AND CONTROLLED ENTITIES

DIRECTORS' REPORT

The Directors present their interim financial report of Geopacific Resources Limited (Geopacific) and its controlled entities ("Group") for the half-year ended 30 June 2018.

Directors

The following persons were directors of Geopacific Resources Limited and its controlled entities ("Group") at any time during the half-year and up to the date of this report:

Milan Jerkovic Non-Executive Chairman Ron Stephen Heeks Managing Director

Philippa Leggat Executive Director Corporate
Mark Trevor Bojanjac Non-Executive Director
Ian B Clyne Non-Executive Director

Collin Gilligan Non-Executive Director (appointed 25 June 2018)

Matthew Smith Chief Financial Officer & Company Secretary

Review of Operations

For the half-year ended 30 June 2018, the Group made a net loss after income tax of \$1,966,946 (30 June 2017: \$1,174,478).

At 30 June 2018, the Group had net assets of \$83,633,939 (31 December 2017: \$74,349,987) including \$79,055,451 of capitalised exploration expenditure (31 December 2017: \$71,507,900).

At balance date, the Group had \$9,322,169 in cash and cash equivalents (31 December 2017: \$6,765,343) with the increase for the period driven by the capital raise completed in June 2018.

Managing director, Ron Heeks commented

"Over the past six months we have delivered Woodlark from an exploration play into a fully-fleged development project and our DFS will be delivered shortly. Rembering that the project is permitted and ready to build, we are working along side our financial advisors to provide financing solutions that will allow us to move the Project forwards. On top of that we have the significant exploration upside across our 600 square kilometres of licences over the broader mineral field.

"Not to forget Cambodia where exploration techniques delivered drilling targets which resulted in two new goldsilver discoveries from a small program."

Woodlark Gold Project – Papua New Guinea

Advancing the project remains the primary focus of the Company. Geopacific is actively advancing three distinct workstreams at the Woodlark gold project (Woodlark) with positive progress achieved on all fronts since the beginning of the financial year:

- Development Advancing the Definitive Feasibility Study (DFS) which is estimated for release in Q3 2018 after releasing delivering the Resources, Reserves and Preliminary Feasibility Study (PFS)² earlier in the year.
- **Financing** appointment of project finance advisor and extensive marketing to equity investors that invest in development-stage gold projects, in preparation for raising project finance.
- Exploration a major regional exploration program to scope the potential of the Woodlark goldfield, increasing the current 1.57Moz Au resource towards the exploration target potential of 53.3Mt @ 2g/t Au to 105Mt @ 1g/t Au for 5Moz Au. Cautionary Statement: the exploration target is conceptual in nature and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

¹ Exploration will consist principally of drilling from surface. Achieving the exploration target will be reliant on the success of the proposed exploration activities. Exploration has commenced and will be ongoing, systematically testing target areas.

²The <u>PFS was released on 12 March 2018</u>. All material assumptions underpinning the production target and forecast financial information continue to apply and have not changed materially.

AND CONTROLLED ENTITIES

DIRECTORS' REPORT (CONTINUED)

Economic studies and engineering

The Lycopodium-managed Definitive Feasibility Study is on track for completion in September 2018. The mine plan calls for an initial 2.4 million tonne per annum (mtpa) conventional crush, SAG and ball mill circuit that is typical of gold processing plants. An allowance for a 2.4 mtpa gravity upgrade circuit to be integrated from year 3 has been engineered into the design.

Pre-Feasibility Study Highlights

- Mining, social and environmental permits granted
- Annual production of 100Koz Au over 10-year mine life for 1.01Moz Au (incl. 51Koz Au Inferred)
- Free milling ore, recovery of 92% for first 5 years and 90% over mine life
- Up to 60% of gold recoverable by gravity
- Conventional 2.4Mtpa CIL circuit optimised with upgraded ore from year three
- Head grade up to 1.63g/t Au in first years
- Low strip ratio of 2.5:1 for first 5 years, 3.1:1 over mine life
- All-In Sustaining Cost A\$990 for first 5 years, A\$1,100 over mine life
- Capital cost A\$180m
- 2.2-year, post-tax payback
- Free cash flow over life of mine A\$338M (pre-tax) and A\$314m (post tax) at A\$1,650/oz gold price
- Post-tax IRR 33%

Reserve

- High conversion of Resources to Reserves
- 34.7 million tonnes at 0.99g/t Au for 1,101,600 ounces of gold

Resource

- 86% of Resource in Measured and Indicated JORC categories
- 47.04 million tonnes at 1.04g/t Au for 1,573,000 ounces of gold

Details of the PFS can be found by following the link Robust Woodlark Gold Project PFS Supports Development.

Exploration upside

Exploration activities continued this quarter over Woodlark island, including ongoing regional soil sampling across outcropping volcanic sequences and the recommencement of drilling.

The focus of the current exploration campaign is to target discoveries of additional deposits in the corridors between known deposits, with much of this work requiring exploration beneath shallow sedimentary cover.

AND CONTROLLED ENTITIES

DIRECTORS' REPORT (CONTINUED)

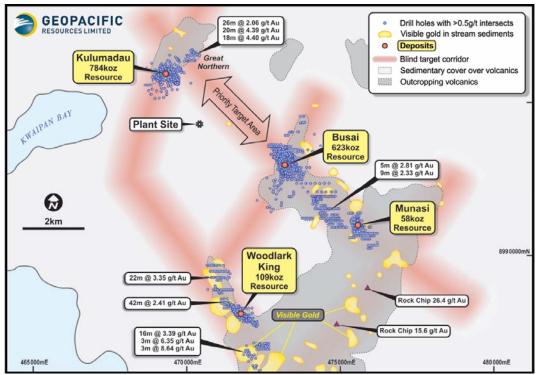

Figure 1: Regional Target Areas. Areas outside the grey dashed line are under shallow limestone cover.

Gold mineralisation is epithermal, which typically occurs in clusters along regional structures. On Woodlark, four deposits – Kulumadau, Busai, Woodlark King and Munasi – have currently reported JORC 2012 resources. The extensive drilling database, geophysical surveys and limited surface exploration all indicate the widespread occurrence of gold mineralisation well outside the defined resources. Major regional structures associated with known gold resources are evident on geophysical images and form the principal targets for exploration.

Diamond drilling recommenced at the Great Northern prospect this quarter, targeting highly encouraging drilling results from historic programs, with a view to expanding the known strike extent of mineralisation and provide some geological context to the observed mineralisation. Assaying of the first holes is underway with results immanent.

Soil sampling over the southern Peninsula was largely completed during the period, with sampling crews moving northwards to the additional target areas.

The majority of the historic work has been undertaken on the areas surrounding the existing deposits; Kulumadau, Busai, Munasi and Woodlark King. These deposits are all situated on the existing mining lease which covers 60 square kilometres. The regional exploration aims to test the broader goldfield looking at priority targets on the exploration licences which cover 600 square kilometres.

Kou Sa Copper Gold Project - Cambodia

The Kou Sa Project (Kou Sa) is located in northern Cambodia's Chep District, Phreah Vihear province and covers a license area of 158 square kilometres. A Maiden Resource (2012 JORC Code compliant) of 51,000 tonnes of copper equivalent was released in 2016. The resource was calculated to assess the project's intial inventory at Prospects 150 and 160. Geopacific believes Kou Sa holds significant potential for the discovery of additional deposits with economic grade and tonnage. A number of IP anomalies across the license still remain untested.

Field work this financial year comprised completion of reconnaissance diamond drilling testing anomalous surface geochemical signatures at the 181 and 118 Prospects both of which yielded new discoveries.

AND CONTROLLED ENTITIES

DIRECTORS' REPORT (CONTINUED)

Initial results from diamond drilling at Prospect 181 identified wide zones of epithermal-style, gold-silver mineralisation over a strike length of more than 250 metres. Mineralisation remains open at depth and along strike in both directions. True widths have yet to be determined but appear to be in excess of 40 metres.

Significant drilling intercepts included 11.5m @ 3.14g/t Au and 14m @ 109.46g/t Ag. The full ASX release New results from gold discovery at Kou Sa is available on the website.

The results from a second gold-silver discovery at the 118 Prospect were released on the ASX New gold-silver discovery at Kou Sa, Cambodia. A scout program consisting of six diamond drill holes for 740.5 metres of drilling targeted anomalous geochemical signatures in trenching and observed epithermal quartz veins and structures.

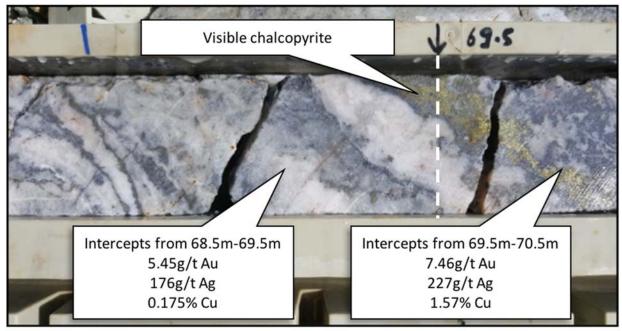

Figure 2: P181 Mineralised cut diamond core from drill hole KDH255 showing epithermal vein textures with visible chalcopyrite

Fijian Gold Projects - Fiji

Geopacific has five Projects located on the two main islands of Fiji – Viti Levu and Vanua Levu. The Nabila, Rakiraki, Sabeto and Vuda Projects are in the highly-prospective north-east trending zone that also hosts the world-class Vatukoula and Mt Kasi gold mines.

These projects are at various stages of exploration from early to advanced, with the presence of deeper mineralised systems being identified in areas.

Exploration to date has provided evidence for porphyry and/or epithermal systems at all projects. There remains potential to expand the already identified gold mineralisation at Faddy's, which is the most advanced prospect across all of the Fijian projects.

An IP survey over selected portions of the Vuda and Sabeto licences in Fiji was completed during the period. The survey was designed to assess for potential shallow buried porphyry-type bodies that could be responsible for extensive alteration and associated scattered gold and copper mineralisation evident at surface and in historical drilling.

Results of the survey have confirmed the presence of conductors (both shallow and deeper) at both Sabeto and Vuda licences, consistent with a shallow intrusive feature. The intrusive was postulated from earlier wider spaced geophysical surveys and it's now confirmed as a discrete target. The resultant targets will require drill testing to assess.

AND CONTROLLED ENTITIES

DIRECTORS' REPORT (CONTINUED)

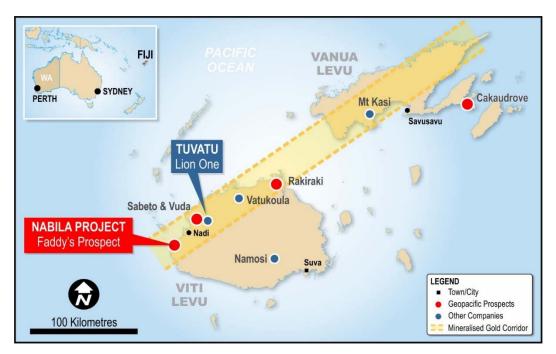

Figure 1: Fiji - Gold projects location map

Corporate

Geopacific released its annual report and financial statements for the year ended 31 December 2017. The Annual General Meeting was held in May with all resolutions passing with a significant majority.

Woodlark development plans

Geopacific appointed Ironstone Capital as financial advisor to assist the Company in arranging project finance to enable the development of Woodlark. Geopacific is able to run this concurrently with the DFS because the Mining, environmental and social permits in place, making the Project 'ready to build' once financing is in place.

Geopacific has actively increased the level of market awareness for Woodlark and the Company following the release of the Pre-Feasibility Study², supported by Australian, European and North American roadshows

Director Appointment

Geopacific appointed Mr. Colin Gilligan to the board as a Non-Executive Director. Mr. Gilligan is a mining engineer with over 25 years' experience in the resources sector in Australia, South Africa, North America and Asia. He has held technical, executive and director roles with a number of companies throughout his career including Mitsui, Thiess, Anglo, Coalspur Mines and Resource Generation.

Oversubscribed \$10M placement

On 30 April 2018, Geopacific announced the completion of a placement to raise A\$10 million at A\$0.036 per share, representing a 5.3% discount to the previous day's closing share price. This demonstrates the strong support from quality institutional investors for Geopacific's strategy to finalise the DFS and bring a significant exploration program online to continue to grow the project.

²The <u>PFS was released on 12 March 2018</u>. All material assumptions underpinning the production target and forecast financial information continue to apply and have not changed materially.

AND CONTROLLED ENTITIES

DIRECTORS' REPORT (CONTINUED)

Competent Person's Statement

The information in this announcement that relates to exploration results and exploration targets are based on information compiled by or under the supervision of James Kerr, a Competent Person who is a Member of The Australasian Institute of Mining and Metallurgy and General Manager, Geology for Geopacific. Mr Kerr has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Kerr consents to the inclusion in the announcement of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Woodlark Mineral Resources is based on information compiled and reviewed by Mr Nicholas Johnson, a Competent Person who is a Member of the Australian Institute of Geoscientists and a full-time employee of MPR Geological Consultants Pty Ltd. Mr Johnson has sufficient experience which is relevant to the style of mineralization and type of deposits under consideration and to the activity which he has undertaken to qualify as a Competent Person as defined in the JORC Code 2012 and is a qualified person for the purposes of NI43-101. Mr Johnson has no economic, financial or pecuniary interest in the company and consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Woodlark Mineral Reserves is based on information compiled and reviewed by Mr John Battista, a Competent Person who is a Member and Chartered Professional of the Australian Institute of Mining and Metallurgy (AusIMM) and a full-time employee of Mining Plus Pty Ltd. Mr Battista has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which he has undertaken to qualify as a Competent Person as defined in the JORC Code 2012 and is a qualified person for the purposes of NI43-101. Mr Battista has no economic, financial or pecuniary interest in the company and consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

Forward Looking Statements

All statements other than statements of historical fact included in this announcement including, without limitation, statements regarding future plans and objectives of Geopacific Resources Limited are forward-looking statements. When used in this announcement, forward-looking statements can be identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects' or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this announcement, are expected to take place. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the company, its directors and management of Geopacific Resources Ltd that could cause Geopacific Resources Limited's actual results to differ materially from the results expressed or anticipated in these statements.

Geopacific Resources Ltd cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements. Geopacific Resources Ltd does not undertake to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this announcement, except where required by applicable law and stock exchange listing requirements. Woodlark is permitted by the PNG Government, subject to meeting the conditions of the licence.

Significant Changes in the State of Affairs

Other than the above, no other significant changes occurred during the reporting period.

Events occurring after the balance sheet date

No matter or circumstance has arisen since the end of the financial period which significantly affected or may significantly affect the operations of the Company, the results of those operations, or the state of affairs of the Company in future financial years.

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 30 JUNE 2018

NOTE 1 BASIS OF PREPARATION OF HALF-YEAR REPORT

This general purpose condensed financial report for the half-year ended 30 June 2018 has been prepared in accordance with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*.

This half-year financial report does not include all the disclosure and notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 31 December 2017 and any public announcements made by Geopacific Resources Limited during the half year in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

The half-year financial report is presented in Australian dollars.

Going concern basis for preparation of financial statements

The financial statements have been prepared on the going concern basis which contemplates the continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business.

During the half-year period the Group incurred a net loss of \$1,966,946 and net operating cash outflows of \$1,835,117. At 30 June 2018, the Group had cash and cash equivalents of \$9,322,169, net asset of \$83,633,939 and a working capital surplus of \$8,454,909.

These conditions indicate the existence of a material uncertainty that may cast a significant doubt about the Group's ability to continue as a going concern and, therefore, that it may be unable to realise its assets and discharge its liabilities in the normal course of business.

The Directors have considered the funding and operational status of the business in arriving at their assessment of going concern and believe that the going concern basis of preparation is appropriate based on:

- The Group's ongoing ability to raise funds from external sources to meet ongoing development, exploration and working capital requirements as evidenced by its capital raising of \$9,683,463 during the period ended; and
- The Group's ability to manage the timing of cash flows to meet the obligations of the business as and when they fall due.

Should the Group not be able to continue as a going concern, it may be required to realise its assets and discharge its liabilities at amounts that differ to those stated in the financial report.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts not to the amounts and classification of liabilities that might be necessary should the Company not continue as a going concern.

Significant accounting policies

Except as noted below, the same accounting policies and methods of computation have been applied by each entity in the consolidated group and are consistent with those adopted and disclosed in the most recent annual report.

Adoption of new and revised accounting standards

In the half-year ended 30 June 2018, the Group has reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to its operations and effective for annual reporting periods beginning on 1 January 2018.

It has been determined by the Group that there is an immaterial impact of the new and revised standards and interpretations on its business and therefore no change is necessary to Group accounting policies.

AND CONTROLLED ENTITIES

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 30 JUNE 2018

NOTE 1 BASIS OF PREPARATION OF HALF-YEAR REPORT (CONTINUED)

New accounting standards adopted since the end of the last reporting period

The Group has also reviewed all new Standards and Interpretations that have been issued but are not yet effective for the half-year ended 30 June 2018.

As a result of this review the Directors have determined that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business. Therefore, no change is necessary to Group accounting policies.

Critical Accounting Estimates and Significant Judgements used in Applying Accounting Policies

The critical estimates and judgements are consistent with those applied and disclosed in the 31 December 2017 Annual Report.

The consolidated interim financial statements were approved by the Geopacific Board of Directors on 17 August 2018.

NOTE 2 PRIOR PERIOD RESTATEMENT

During the preparation of the Financial Statements for the half-year period to 30 June 2018, the Company identified that the Heads of Agreement revising the terms of the sale and purchase of the issued shares of Golden Resource Development Co had been superseded by an amended Agreement executed on 21 September 2016. The terms of the amended Agreement show that the deferred consideration payable was incorrectly recorded in the Company's Financial Statements as at 31 December 2017. Therefore, the Group consolidated financial statements previously disclosed contained a material error within the consolidated statement of financial position.

The Company's Financial Statements as at 31 December 2017 disclosed the deferred consideration as a contingent liability as follows:

• Under the revised terms, one final payment of US\$1.575M is due at completion of a bankable feasibility study for the Kou Sa project, in addition to a 2% royalty on production capped at \$8.425 million.

The amended Agreement outlines the terms of the deferred consideration as follows:

- US\$1.575M payment which is due on completion of a bankable feasibility study <u>or</u> three years from signing of the Amendment (21 September 2019);
- US\$4.725M payment which is due over 36 monthly instalments of US\$131,250 from the date of the above payment of \$1.575M; and
- A net smelter royalty on sales of production from the Kou Sa Project capped at US\$3.7M.

The correct treatment based on the terms of the amended Agreement, with the exception of the net smelter royalty, would be to record the deferred consideration as a non-current liability.

As a result as at 31 December 2017, the contingent liability balance was overstated by \$7,726,535 (US\$6.3M), the non-current liability balance was understated by \$7,726,535 (US\$6.3M) and the non-current exploration and evaluation asset was understated by \$7,726,535 (US\$6.3M).

AND CONTROLLED ENTITIES

Total non-current liabilities	648,463	7,726,535	8,374,998		
Total liabilities	2,762,652	7,726,535	10,489,187		

NOTE 3 SEGMENT INFORMATION

The Group has identified its operating segments based on the internal reports that are reviewed by the Board in assessing performance and determining the appropriate allocation of the Group's resources. The Group has also had regard to the qualitative thresholds for the determination of operating segments.

For management purposes the Group is organised into three operating segments based on geographical locations, which involves mineral exploration and development in Papua New Guinea and Cambodia. All other corporate expenses are disclosed as "Corporate" within this segment report. The Group's principal activities are interrelated and the Group has no revenue from operations. For the 30 June 2018 segment note, Fiji has been reclassified into "Corporate" with the change in accounting treatment to assets held for sale.

All significant operating decisions are based on analysis of the Group as four segments. The financial results of these segments are equivalent to the financial statements of the Company as a whole. The accounting policies applied for internal reporting purposes are consistent with those applied in preparation of the financial statements.

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 30 JUNE 2018

NOTE 4 ASSETS CLASSIFIED AS HELD FOR SALE

	Consolidated		
	30 June 2018 \$	31 December 2017 \$	
Current Assets held for sale	3,409,224	4,831,070	
Reconciliation of movements during the period:			
Carrying value – beginning of period	4,831,070	-	
Movement during the period	109,172	-	
Write down	(1,531,018)	-	
Transfer from exploration expenditure	-	6,639,151	
Other net liabilities	-	(1,808,081)	
Carrying value – end of period	3,409,224	4,831,070	

The board and management after due consideration have determined that the fair value of the assets held for sale is the value of the net assets of the Companies being sold, which at 30 June 2018 was \$3.41M.

Any impairment loss on a disposal group is allocated to remaining assets and liabilities on a pro rata basis, except that no loss is allocated to the financial assets, deferred tax assets and employee benefit assets which will be measured in accordance with Geopacific's accounting policies.

In preparation for the sales process and ahead of the licence renewals for the Raki Raki, Qalau, Tabuka, Cakaudrove and Nuku tenements due in November 2018, the Company has made the decision not to renew these licences. In light of these circumstances, a full write down to the carrying value of the capitalised expenditure of the above mentioned licences has been recorded for the half-year ended 30 June 2018.

AND CONTROLLED ENTITIES

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 30 JUNE 2018

NOTE 5 EXPLORATION EXPENDITURE

	Consolidated		
	30 June 2018 31 December 2		
		restated	
Non-current			
Capitalised exploration expenditure	79,055,451	71,507,900	
Reconciliation of movements during the period:			
Carrying value – beginning of period	71,507,900	33,200,336	
Acquired on acquisition	-	19,583,649	
Additions	4,455,011	6,208,795	
Deferred consideration	58,130	7,726,535	
Transfer from prepayments	-	13,679,845	
Transfer to assets held for sale	-	(6,639,151)	
Foreign exchange fluctuation	3,034,410	(2,252,109)	
Carrying value – end of period	79,055,451	71,507,900	

During the half-year, the Company did not expense any previously capitalised exploration expenditure (2017: nil).

As outlined in Note 8, the Company renegotiated the payment schedule with Vendors for the acquisition of Golden Resource Development Co. Under the revised terms, the remaining non-contingent instalments of the purchase price are to be paid as follows:

- a) \$US1.575 million is due at completion of a bankable feasibility study for the Kou Sa Project or by 21 September 2019, whichever is earlier; and
- b) \$US4.725 million paid in monthly instalments over three years after payment of the \$US1.575.

The Company confirmed its intention to look at selling its Fiji assets and an active program to locate a buyer for these assets commenced. The associated assets and liabilities were consequently transferred to assets held for sale as disclosed in Note 4.

Information regarding the prior period restatement is disclosed in Note 2.

NOTE 10 CONTINGENT LIABILITIES

Kou Sa – revised repayment schedule

In January 2015, the Company's subsidiary, Royal Australia Resources Ltd, entered into an agreement to acquire 100% of the Issued Capital of Golden Resource Development Co Ltd for \$US14.0 million.

The Company renegotiated the payment schedule in relation to its agreement to acquire 100% of the Company with the Vendors in September 2016. Other than the remaining non-contingent instalments of the purchase price to be paid as described in Note 5 and Note 8, a 2% net smelter royalty on sales of production from the Kou Sa project will be payable, capped at \$US3.7 million. This royalty is conditional upon production from the Kou Sa project.

The Group did not have any other contingent liabilities at the end of the reporting period (2017: nil).

DIRECTORS' DECLARATION

The Directors of Geopacific Resources Limited declare that:

- (a) the interim financial statements and notes of the consolidated entity set out on pages 12 to 26 are in accordance with the *Corporations Act 2001*, including:
 - (i) complying with Australian Accounting Standard AASB134 *Interim Financial Reporting*, and the Corporations Regulations; and
 - (ii) give a true and fair view of the financial position as at 30 June 2018 and of its performance for the half-year ended on that date of the consolidated entity.
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Directors.

Signed at Perth this 17 August 2018.

Ron Heeks

Executive Director

Greenwich & Co Audit Pty Ltd. | ABN 51 609 542 458 Level 2, 35 Outram Street, West Perth WA 6005 PO Box 963, West Perth WA 6672 T 08 6555 9500 | F 08 6555 9555 www.greenwichco.com

Independent Auditor's Review Report

To the members of Geopacific Resources Limited

Report on the Half-Year Financial Report

We have reviewed the accompanying half-year financial report of Geopacific Resources Limited, which comprises the consolidated statement of financial position as at 30 June 2018, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the half-year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration.

Directors' Responsibility for the Half-Year Financial Report

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors' determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the Corporations Act 2001 including: giving a true and fair view of the company's financial position as at 30 June 2018 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001. As the auditor of Geopacific Resources Limited, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the Corporations Act 2001.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Geopacific Resources Limited is not in accordance with the Corporations Act 2001 including:

- (a) giving a true and fair view of the company's financial position as at 30 June 2018 and of its performance for the half-year ended on that date: and
- (b) complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001.

Emphasis of matter - Inherent uncertainty regarding continuation as a going concern

Without modifying our conclusion, we draw attention to Note 1, which outlines that the going concern basis is dependent upon successful completion of funding strategies to generate or raise sufficient funds to pay Geopacific Resources Limited's debts as and when they fall due.

As a result, there is material uncertainty related to events or conditions that may cast significant doubt on Geopacific Resources Limited's ability to continue as a going concern, and therefore whether it will realise its asset and extinguish its liabilities in the normal course of business and at the amounts stated in the financial report.
