#### **ASX Announcement**

# Presentation - Mining the Territory Conference and the NT Resources Industry Environmental Management & Logistics Forum

4 September 2019

**Arafura Resources Limited (ASX:ARU) (Arafura** or **the Company)** is pleased to attach a copy of the presentation for the Mining the Territory Conference in Darwin, Northern Territory.

The Mining the Territory Conference is Northern Australia's leading Mining Industry Conference and is held as part of NT Resources Week. The conference is Northern Australia's largest resources industry- based conferences and brings together key industry leadership alongside sector stakeholders, government representatives, resource experts and regional interest groups. Mr Gavin Lockyer, Arafura's Managing Director and CEO presented the Nolans project.

A similar presentation was also made at the NT Resources Industry Environmental Management & Logistics Forum in the Darwin, Northern Territory on the same day. The Forum is supported by the Northern Territory Government and brings together environmental practitioners and members of the resources industry to showcase ways to better manage environmental impact, while also supporting stakeholder engagement and regional development. Mr Brian Fowler, Arafura's General Manager NT & Sustainability presented the Nolans project to the forum.

# Arafura Resources Limited (ASX:ARU)

Emerging as Australia's Next NdPr Producer

# Important Notice – Disclaimer

This presentation has been prepared by Arafura Resources Limited (Arafura, Arafura Resources or the Company) and is of a summary form only and therefore contains general background information which may not be complete. It should be read in conjunction with and full review made of Arafura Resources' disclosures and releases lodged with the Australian Securities Exchange (ASX) and available at www.asx.com.au.

This presentation contains certain statements which may constitute "forward-looking statements." Such statements are only expectations or beliefs and are subject to inherent risks and uncertainties which could cause actual values, results or performance achievements to differ materially from those expressed or implied in this presentation. No representation or warranty, express or implied is made by Arafura Resources that any forward-looking statement contained in this presentation will occur, be achieved or prove to be correct. You are cautioned against relying upon any forward-looking statement.

Except for statutory liability which cannot be excluded, each of Arafura Resources and its related body corporates and their officers, employees and advisers expressly disclaims any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error in it or omission from it. Arafura Resources accepts no responsibility to update any person regarding any inaccuracy, omission or change in information in this presentation or any other information made available to a person, nor any obligation to furnish the person with any further information.

This presentation does not constitute an offer of any securities in Arafura Resources, in any jurisdiction, nor an invitation to apply for such securities, in any jurisdiction, and will not form part of any contract for the acquisition of Arafura shares. This presentation does not provide investment advice or financial product advice. You should obtain professional advice and carry out your own independent investigations and assessment of the information in this presentation (including any assumptions) before acting.

Information in this presentation which is attributed to a third-party source has not been checked or verified by Arafura Resources.

#### Mineral Resources and Ore Reserves

The information in this presentation that relates to Mineral Resources was released in an ASX announcement dated 7 June 2017 (Detailed Resource Assessment Completed) and was completed in accordance with the guidelines of the JORC Code (2012). The information in this presentation that relates to Ore Reserves was released in an ASX announcement dated 7 February 2019 (Nolans Project Definitive Feasibility Study) and was completed in accordance with the guidelines of the JORC Code (2012). Arafura Resources confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the original market announcements continue to apply and have not materially changed. Arafura Resources confirms that the form and context in which the Competent Person's findings are represented have not been materially modified from the original market announcement.

#### **Production Targets and Financial Information**

Information in relation to production targets and financial information included in this presentation is extracted from an ASX announcement dated 7 February 2019 (Nolans Project Definitive Feasibility Study). Arafura Resources confirms that all material assumptions underpinning the production target and financial information set out in the announcement released on 7 February 2019 continue to apply and have not materially changed.

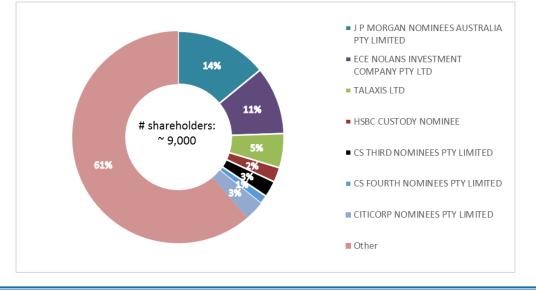

# Arafura Corporate Snapshot

**Capital Structure ASX Code ARU** \$0.068 ASX Share Price (02 Sept) Shares on Issue 1,055m Market Capitalisation (02 Sept) \$71.7m 12 Month Liquidity \$46.9m Cash (30 Jun\*) \$28.6m Debt Nil \$76.6m Enterprise Value (30 Jun)

# July 2019 – investment by Talaxis Ltd, a member of the Noble Group

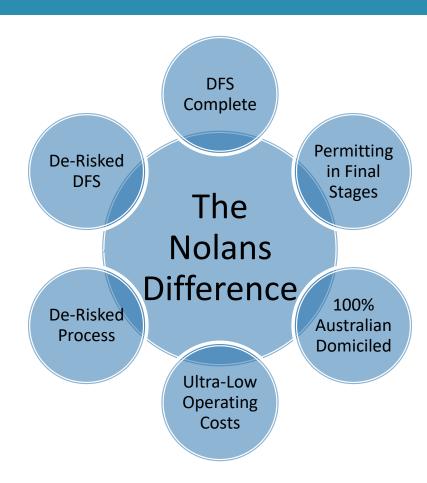

<sup>\*</sup> Data based on 30 June plus proceeds from entitlement offer

# Arafura's Nolans Project

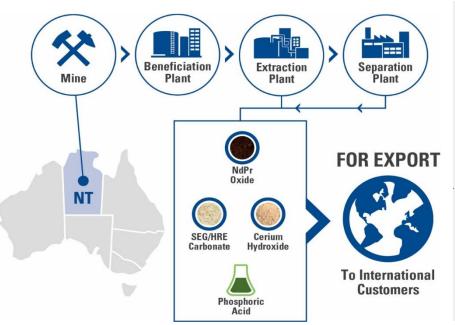

- DFS completed February 2019 confirming Nolans as a world class NdPr project
- Ultra-low cost producer at US\$25.94/kg NdPr
- Long-life asset 23-year mine life based on Ore Reserves only with potential to extend production
- Well positioned to feed forecast NdPr supply shortfall
- Target project commissioning in 2022
- Globally strategic 100% Australiandomiciled operation in the NT with environmental approval

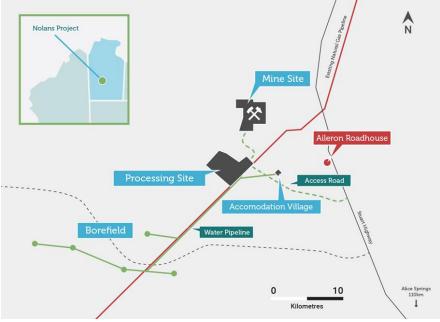

Refer ASX announcement 7 February 2019: Nolans Project Definitive Feasibility Study

### 100% Australian Domiciled in the NT

- DFS includes fully costed permanent disposal and rehabilitation of tailings and process residues at site
- Environmental approvals secured
- Able to provide customers with product traceability and waste management certainty

- Stuart Highway 10 km east
- Alice Springs railyard, airport and other services 135 km south
- Amadeus natural gas pipeline adjacent to project site
- Water supply 30 km south

# Sustainable Supply is Our Value

Extensive community and stakeholder consultation

Waste management plan tailings and residue facility

Assessing impact from mining, extraction and transport corridor

Surface water and groundwater management plans

Biodiversity studies on existing flora and fauna

Framework for decommissioning closure and rehabilitation

# Social License to Operate

# Benefits for the Territory & Australia

- Direct Capital spend >A\$730m
- Community Benefits Plan work in progress
- Direct employment in operations ≈ 300
- Innovative downstream processing not just "dig it up and ship it out",
   we will value add in Australia
- Long mine life offers opportunities for intergenerational change
- Wider business opportunities through service providers
- Estimated Royalties and Taxes to the NT over A\$2b over planned life of mine
- Establishes Australia as a secure and long-term supplier of strategic metals to our allies and global trading partners

## **Local Opportunity**

**Indigenous Engagement Strategy workshop Alice Springs** 

- Local and indigenous procurement strategy currently being developed
- Prequalification requirements will be in place for all ALL tenderers
- Prequalification requirements will be fully provided and explained well ahead of tender process
- Head contractor will have requirements to ensure local and indigenous business participation which will be included in contractual requirements
- Where practicable work packages will be broken down to allow local businesses to bid for aspects of the project
- Register with the Industry Capability
   Network (ICN) at gateway.icn.org.au

# Patented Process – De-risked DFS

## Technology Program – De-Risked Process

√Phase 7

Rare Earth

Separation

Design has

advanced

√ Phase 5 & 6

Rare Earth

**Processing** 

• >99.5% of cerium

earth chloride

hydroxide

rejection from rare

Marketable cerium,

**Rare Earth Processing Pilot Plant** 

**Acid Bake Pilot Plant** 

#### ✓ Phase 1

#### Beneficiation

- 5,000 kg highphosphate concentrate
- >82% NdPr & >90% P<sub>2</sub>O<sub>5</sub> recovery

## **Flowsheet Piloting**

### Completed

#### √Phase 4 Acid Bake

• 4,100 kg rare earth sulphate material

#### ✓ Phase 2 **Phosphate** Extraction

 Merchant grade phosphoric acid suitable for fertilizer use 3% TREO losses to gypsum waste

#### ✓ Phase 3

#### **Bulk Pre-Leach**

- 2,000 kg pre-leach residue
- Met performance objectives

**Beneficiation Pilot Plant** 

**Phosphate Extraction Pilot Plant** 

**Bulk Pre-Leach Pilot Plant** 

### De-Risked DFS

#### Designed for ramp-up

- Surge capacities between major process stages including one week concentrate, two weeks pre-leach residue, one week rare earth chloride
- o Parallel trains of acid bake to improve availability
- Space for expansion and modification in layout
- Modular acid plant for staged ramp up

#### Risks costed into DFS outcomes

- Conservative three year ramp up schedule included (29% Y1, 62% Y2, 93% Y3)
- Additional labour and reagents costed into ramp up operating costs
- A\$20m included for de-bottlenecking capital
- Nolans DFS includes learnings from other complex metallurgical projects including nickel laterites and rare earths to develop designs and costs that maximise the likelihood of delivery on the DFS promises in operation

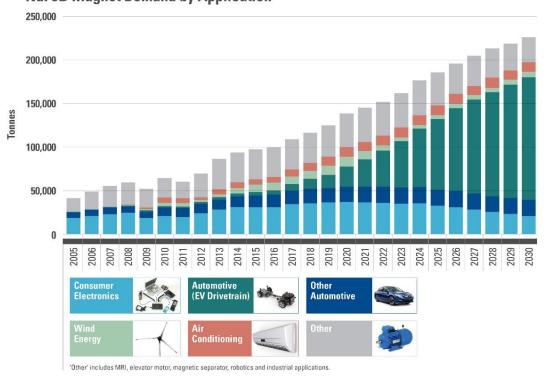

# The Opportunity

# NdPr Market Opportunity

#### **NdFeB Magnet Demand by Application**

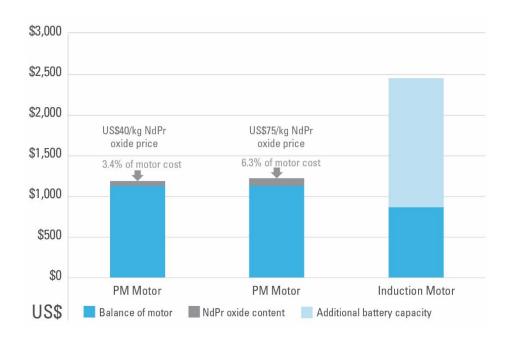

- Underlying demand for NdFeB magnets across all applications is forecast to grow by 6% p.a. over the period to 2030
- NdFeB demand growth for EV applications is more dramatic and forecast to grow by 24% p.a.
- Demand in applications for consumer electronics and wind turbines will reduce during the forecast period. For some applications substitution will be traded off against reduced performance and cost.
- Supply-demand balance achieved through demand destruction in lower quality applications and technology innovations that achieve better use of NdPr in magnet manufacturing
- New supply will not come on stream fast enough to meet demand from all applications
   NdFeB magnets and NdPr oxide will move to the best value in use
- EV applications require high quality and efficient motors using NdFeB magnets

# NdPr Magnet Substitution – EV

# Modelled effect of increase in NdPr price, NdFeB Magnet v Induction Motor and incremental Li-ion battery pack

- Chevrolet Bolt: 150 kW NdFeB magnet motor with 60 kWh lithium-ion battery pack <sup>1</sup>
- NdFeB magnet motor cost based on US\$8 per kW<sup>2</sup>
- Estimate of 1 kilogram of NdPr metal per NdFeB motor magnet <sup>2</sup>
- Induction motor cost calculated as 76% of NdFeB magnet motor <sup>3</sup>
- Efficiency of induction motor 15% less than NdFeB magnet motor.<sup>4</sup> To compensate, an extra 6 kWh of battery capacity has been allowed for.
- Lithium-ion battery pack costs of US\$176 per kWh applied <sup>5</sup>
- Demand estimates do not include analysis on the impact of drive efficiency

# Supply & Demand Balance (1)

#### NdPr Oxide Supply & Demand

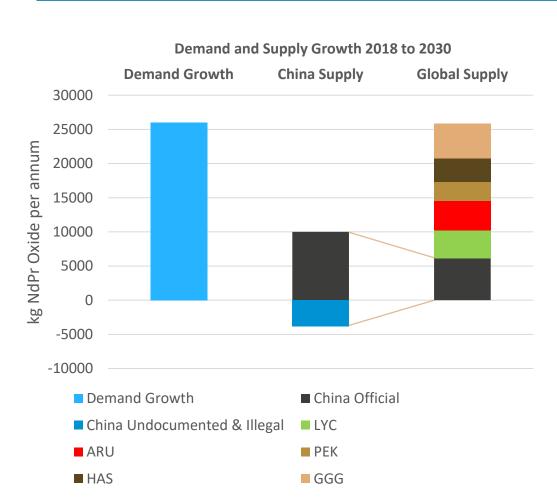

- China continues to dominate the global supply chain being the world's largest producer accounting for about 80% of NdPr for global NdFeB magnet production
- Supply reforms, industry consolidation and higher environmental standards will constrain China's ability to rapidly increase NdPr production
- Lynas Corporation (ASX:LYC) is the only significant miner and processor of rare earth materials outside China enjoying a market capitalisation in excess of \$1b
- China remains the dominant supplier, however analysts forecast China to become a net importer by the early 2020s
- Supply growth of 20,000 tonnes of NdPr oxide required in the 2020s

Source: Roskill Consulting (November 2018) – Rare Earths Market Analysis

# Supply & Demand Balance (2)

- China will likely to experience some reduced illegal/undocumented production offsetting increased production from domestic ores and imported mineral concentrates
- Demand projections don't fully incorporate impact on efficiency when using rare earth magnets
- Demand projections also cannot incorporate the potential impact, real or reactionary, from international trade wars
- 20,000 tonnes of additional NdPr oxide in the 2020s means there is room in the market for additional China and LYC production along with all advanced stage projects including ARU, PEK, HAS and GGG

Source: Roskill Consulting (November 2018) – Rare Earths Market Analysis

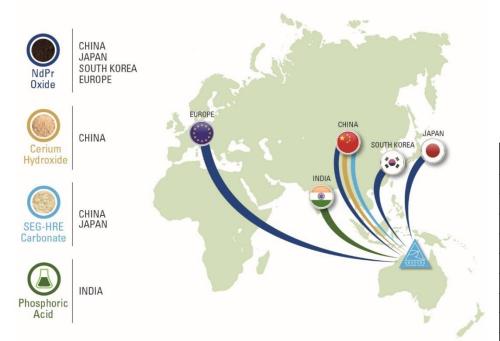

# Funding to Production

## Product Offtake Strategy

## **Offtake Strategy**

FOR EXPORT TO INTERNATIONAL CUSTOMERS

- Offtake agreements to underpin project funding
- Customer engagement targeted at NdPr users not aligned with China 2025 strategy
  - Japan NdFeB magnet manufacturers
  - Europe & Korea automotive OEMs and wind turbine makers
  - China NdFeB magnet manufacturers with significant export markets
- India vertically integrated fertilizer producers

Customer / Target Region	Amount (tonnes p.a.)	Offtake Status	Proportion of Revenue <sup>1</sup>					
NdPr Oxide – targeting contracts with NdFeB magnet companies &/or end users								
JingCi Material Science Co.	900	MoU						
China								
Japan	]		96%					
South Korea	3,457	In progress						
Europe								
SEG-HRE Carbonate – targeting contracts with rare earth processors								
China	505 (7050		40/					
Japan	606 (TREO equivalent)	In progress	1%					
Cerium Hydroxide – targeting contracts with rare earth processors								
Baotou Xinyuan Rare Earth Hi-tech	8,383 (TREO equivalent)	MoU	3%					

Proportion of revenue for rare earth products only

# **Project Funding Strategy**

- Arafura looking to secure a A\$1,146m<sub>(1)</sub> in new funding to execute the Nolans Project
- Potential sources of funding include equity, debt, JV and/or project selldown with a strategic investor
- DFS completion and environmental approval are critical enablers for engagement with funding partners
- Currently in due diligence by NAIF
- Recently completed \$23.2m raising to accelerate Project timeline and get "shovel ready"

Offtake & Equipment Procurement

- Offtake long term strategic supply
- Procurement for high value specialist capital equipment

Export Credit Agencies

- Government-backed direct loans and guarantees
- Leveraged to strategic link with NdFeB magnet supply and capital equipment procurement
- NAIF mandate encourage investment and Indigenous engagement in Northern Australia

Commercial Banks

- Long-life project, high margin and low cost producer
- Offtake and ECA reduce market exposure and credit risk
- Improved bankability for conventional lenders

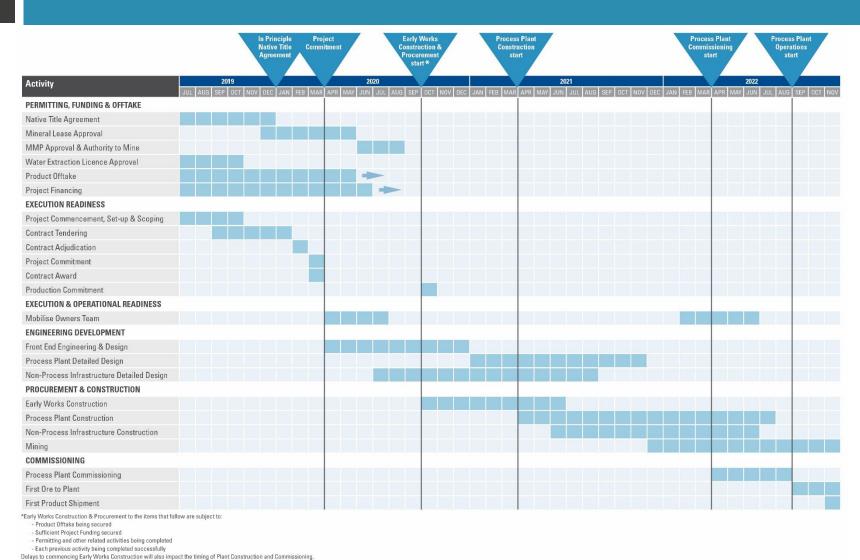

Equity

- ECA and bank involvement "halo-effect" reduced funding risk and less equity dilution
- Market and technical validation
- JV / Project selldown opportunities

(1) Expected peak funding includes pre-production capital, sulphuric acid plant, working capital and capital escalation. Excludes financing costs.

### Indicative Production Timeline

Thank You

# Long Life Asset

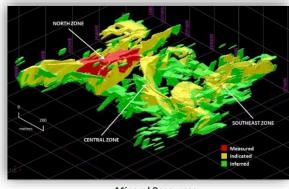

RESOURCES	TONNES (m)	RARE EARTHS TREO %	PHOSPHATE P <sub>2</sub> O <sub>5</sub> %	NdPr Enrichment %
Measured	4.9	3.2	13	26.1
Indicated	30	2.7	12	26.4
Inferred	21	2.3	10	26.5
TOTAL	56	2.6	11	26.4

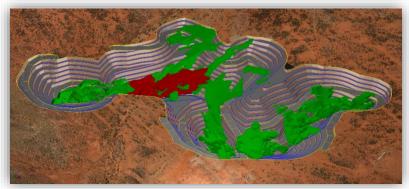

As announced on 7 June 2017. 1.0% TREO cut-off grade. Numbers may not compute exactly due to rounding. "NdPr enrichment" is the proportion of TREO comprising  $Nd_2O_3$  and  $Pr_6O_{11}$ .

RESERVES	TONNES (m)	RARE EARTHS TREO %	PHOSPHATE P <sub>2</sub> O <sub>5</sub> %	NdPr Enrichment %
Proved	4.3	3.1	13	26.1
Probable	14.9	2.9	13	26.5
TOTAL	19.2	3.0	13	26.4

As announced on 7 February 2019. Numbers may not compute exactly due to rounding. "NdPr enrichment" is the proportion of TREO comprising Nd<sub>2</sub>O<sub>3</sub> and Pr<sub>6</sub>O<sub>11</sub>.
