

Quarterly Activities Report

For the period ended 31 March 2024

Geopacific Resources Limited ('Geopacific' or 'the Company'; ASX: GPR) is pleased to provide an update on its activities and cashflow for the quarter ended 31 March 2024.

Highlights

- Detailed exploration assessment identified known mineralisation and priority drill targets with strong potential to increase the existing 1.56Moz Woodlark Resource¹ in Papua New Guinea ('**PNG**'), and to support a revised Feasibility Study set for mid-CY2024.
- The community relocation program continued to progress with a further 3 buildings completed during the quarter, taking the total completed buildings to 170.
- In March 2024, the Company deferred the maturity date of short-term bearer bonds² with Deutsche Balaton AG and 2Invest AG, to 30 September 2024, in exchange for a 4% prolongation fee payable at maturity.
- Net GST refunds of \$1.2 million were received from the PNG Tax Authority during the quarter.
- Post quarter end, the Company announced³ strategic placements, cornerstoned by global investors, to raise A\$8 million through a two-tranche share placement. Placement funds to be used to complete an updated feasibility study, grow the resources at Woodlark, including preparation for drilling, pay down approximately A\$3 million of existing short-term bearer bonds and for general working capital purposes.
- The Company held \$2.55 million in cash and cash equivalents as at 31 March 2024, bonds repayable of \$5.3 million, a PNG GST receivable balance of \$4.6 million and \$17 million of Project long lead equipment assets⁴.

SUSTAINABILITY

Occupational Health and Safety

During the quarter there were no lost time injuries ('LTIs') recorded. As at 31 March 2024 the Company was 42 months, or 1,270 days LTI free.

The Company continues to work with the local community and Provincial Health Authority to provide broader health awareness education and support, and vaccinations when required.

Community and Social Responsibility

The Company continues to provide support to its local communities through the provision of ongoing medical assistance, including education facilities, logistics and health care services, and employment and training opportunities. Community relocation activities are ongoing successfully on a self-perform basis.

¹ Refer to ASX announcements 20 December 2023 "Exploration to target four areas of known high-grade mineralisation at the Woodlark Gold Project, PNG" and 14 September 2023 "Woodlark Mineral Resource Update – Grade Boost at Kulumadau".

² Refer to ASX announcements 19 October 2023 *#\$3.5M Short-term Unsecured Funding from Bond Issue"*, 27 December 2023 *"Bond Repayment Deferred to 29 March 2024"*, 2 January 2024 *"Further \$1.8M of Short-term Unsecured Funding Available"* and 28 March 2024 *"Bond repayment Deferred to 30 September 2024"* for full details.

³ Refer to ASX announcement on 26 April 2024 "Successful \$8m raising to unlock value of Woodlark".

⁴ Based on materials cost paid to suppliers in respect of the Woodlark long lead equipment items up to 31 March 2024. No adjustment has been made in relation to the tented and permanent camp assets which are currently the subject of an insurance claim (refer further details under section 'Long lead Equipment Items').

2024 WORK PROGRAM UPDATE

The Company continued to advance project de-risking and optimisation initiatives generated by the Work Program in respect of the 100% owned Woodlark Gold Project in PNG ('**Project**'). The Work Program was in part informed by lessons learned from previous construction activities and aims to reduce the overall Project footprint, environmental impact and execution risk, and simplify infrastructure locations for future development.

In preparation for a planned mid-year Project Prefeasibility Study update, mining optimisations were completed for Kulumadau, Busai, and Woodlark King, the main gold deposits that comprise the Woodlark Global Mineral Resource Estimate ('**MRE**'), summarised in Table 1 and reported in accordance with the JORC Code (2012)⁵. The MRE hosts **45.56 Mt at 1.07 g/t Au for 1.56 Moz**⁶, of which 93.4% is in the higher confidence Measured and Indicated categories. A summary of the MRE by the Competent Persons and JORC Table 1 was included in the original release.

New draft designs and production schedules have been generated for the proposed pits with individual schedules to be utilised in the updated Project financial model. Detailed assessment of operating costs is also ongoing to reflect current Project cost inputs.

Category	2023 Woodlark Global Mineral Resource			
(>0.4g/t lower cut)	Tonnes (Million)	Grade (g/t Au)	Ounces (Thousand)	
Measured	2.25	3.00	217	
Indicated	39.44	0.98	1,241	
Inferred	3.77	0.84	102	
Total	45.56	1.07	1,560	

Table 1: Woodlark Mineral Resource by JORC classification as at 14 September 2023 estimated using a cut-off grade of0.4 g/t Au which is consistent with the assumed open-cut mining method.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements referenced in this announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Geological Update

Woodlark Exploration Review

During the quarter, a detailed exploration assessment was conducted to unlock the strong upside at the Project. The integrated geological database continues to be expanded by the exploration team with specific focus on capturing new and digitising historic data to build out the various exploration vectors, including prospective geology, magnetics, structure, geochemistry, and historic drilling to support the key elements of the targeting process.

⁵ Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. The JORC Code, 2012 Edition. Prepared by: The Joint Ore Reserves Committee of The Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia (JORC).

⁶ Refer to ASX announcement 14 September 2023 "Woodlark Mineral Resource Update – Grade Boost at Kulumadau".

Exploration targeting has been successful in determining priority targets and areas with the potential to host additional mineral resources through fieldwork and drilling. These new target areas are all close to the current MREs.

Of the four priority targets previously outlined (**Figure 1**), Great Northern and Wayai Creek host potential for new mineral resources to be estimated using existing data. At Little MacKenzie, a considerable gold mineralised footprint, >500m strike extent has been delineated at surface, delivered through a combination of historic drilling, mapping and trenching. Infill and extensional drilling is required prior to any resource estimation.

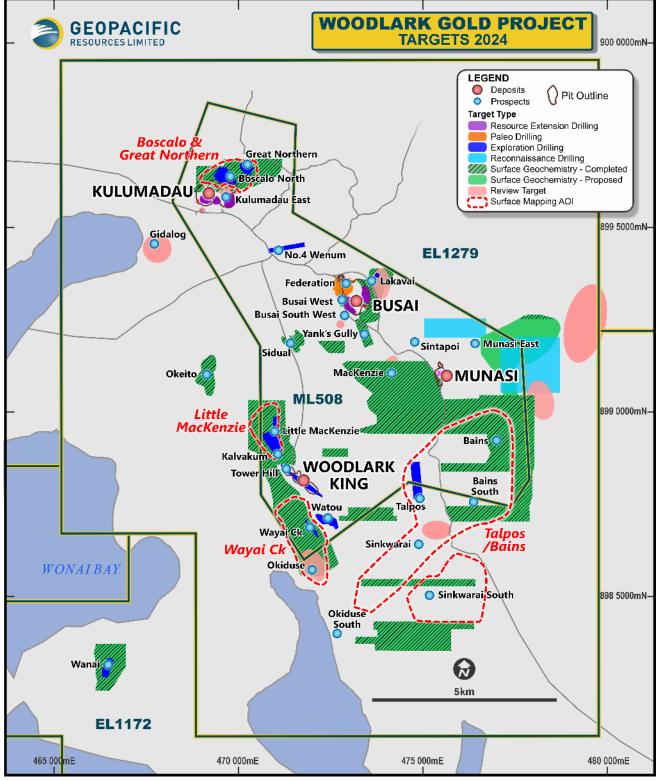

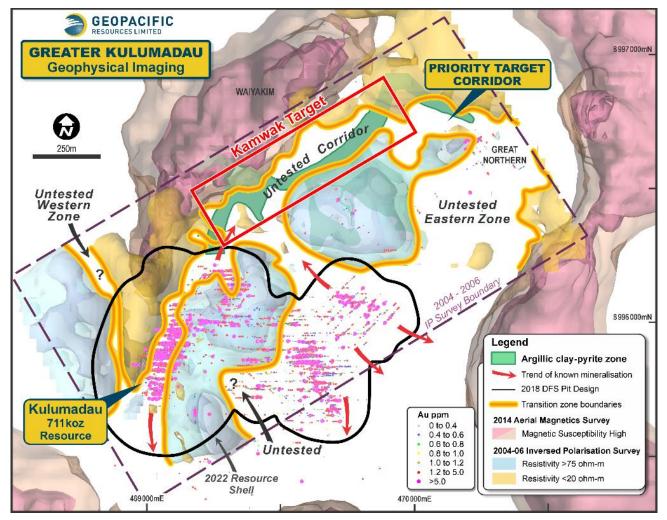

Figure 1: Location of exploration target areas

These new target areas are all outside the current MREs, and the known mineralisation in each remains open and largely untested.

In addition to these four areas, a large-scale untested mineralised corridor (**The Kamwak Target**) immediately north of the main Kulumadau West high-grade zone provides upside to extend near surface resources.

Kulumadau – Large-scale target corridor at Kamwak, including the Great Northern prospect

Figure 2: Geophysical anomaly, Kamwak target, Boscalo North and Great Northern prospects shown with current Kulumadau pit-shell outline

The **Kamwak** target is located over an untested geophysical corridor trending NE (1 km in strike by 100 m wide) (Figures 1 and 2). There is no known drilling over the Kamwak target and it may represent a significant concealed mineral resource of equivalent size and grade to Kulumadau West that hosts 1.78 Mt @ 4.9 g/t for 279,600 oz Au⁷. Additional fieldwork is scheduled to map out the argillic alteration and potential mineralisation within the Kamwak demagnetised corridor to the NE.

Previously intersected high-grade mineralisation at Great Northern is near surface and focused along the Kweiyan Fault (of WSW to ESE control) over an approximate 300 m strike extent that remains open. Limited drilling exists along the structural zone.

Sufficient information exists to estimate a Mineral Resource at Great Northern, which is expected to be completed during the June 2024 quarter. Any future drilling will target extensions to the high-grade near-surface southwest dipping mineralisation and test along strike.

⁷ Refer GPR ASX release 14 September 2023 'Woodlark Mineral Resource Update – Grade Boost at Kulumadau'

Woodlark King Mining Centre - includes Wayai Creek & Little MacKenzie prospects

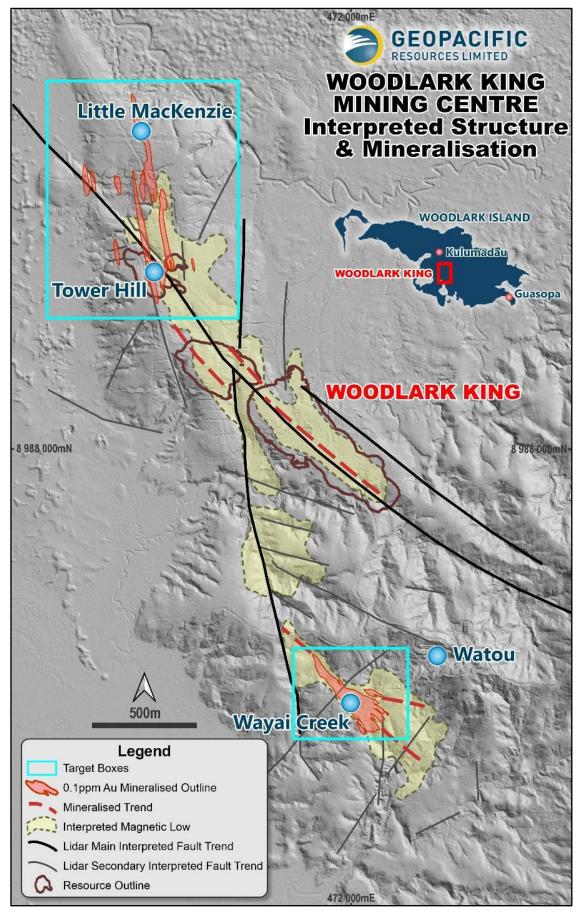

Figure 3: Woodlark King Mining Centre prospect locations

Gold mineralisation at **Wayai Creek** (Figures 1 and 3) falls within a broad historical 0.1 g/t Au in a surface anomaly that was originally defined by Placer (Misima Mines, 2000). Subsequent trenching (2014/15) and recent wide spaced drilling (2022) along the strike of the target zone has demonstrated that the mineralisation is continuous over a 350 m strike extent with grades of between 2 to 17 g/t Au over moderate widths.

The mineralised zones contain hydrothermal breccias with silicification and veining up to 10 m in width. Three main zones with a steep dip to the SW have been identified from historical surface trenching and drilling.

The geometry to Wayai Creek mineralisation is in a similar orientation to the Woodlark King deposit which is interpreted to be controlled by a regional N-S structure based on the Lidar survey data. This survey added credibility and support to the Wayai Creek mineralisation, and several other targets in the greater Woodlark King, Watou and Wayai Creek area.

Several of these structural targets correlate with historical surface geochemistry which to-date have not been tested by drilling. The recent compilation highlights these historical targets which were not followed up due to the focus on the main deposits.

Mineralisation at Little MacKenzie/Tower Hill (Figures 1 and 3) is interpreted to be a northerly extension of the Woodlark King deposit (MII 5,257,020 t @ 0.87 g/t Au for 142,346 ounces of gold) and is hosted within narrow SSW trending zones of near vertical dip that remain open to the north.

The currently defined mineralised envelope is extensive, over 1 km in strike. Drill lines are spaced from 100 m to 300 m with mineralisation able to be traced with confidence between the sections. New infill drilling is required to define a resource.

Additionally, high-grade gold drill intercepts including 21 m @ 3.47 g/t Au from 102 m (10WWT095), and 4 m @ 5.05 g/t Au from surface (10WWT066) are located 300 m north-north-east of the northern edge of the proposed Woodlark King pit, are open, and warrant further testing.

Surface mapping, trenching, and drilling help in defining a wireframe > 0.1 Au with a northwest strike and steep dip to the mineralisation. Surface mapping is planned over the target during the next quarter to assist with better defining the extent and geometry of mineralisation as part of the drill planning process.

Planned Work Program

The exploration team has been focussed on capturing new, and digitising historic data, to build out the various exploration vectors to support the key elements of the targeting process. These include:

- Prospective geology Historic focus on Okiduse Volcanics that window out through later cover
- Aeromagnetics Magnetic gradients, and magnetic lows typically associated with gold mineralisation
- **Structure** Known controls to mineralisation, complex structural framework that underpins the mineralisation at Woodlark. The main gold deposits of Kulumadau and Busai are situated within, and define, a northwest structural corridor
- Geochemistry Multi-element vectors to blind/buried mineralisation, evidence of overprinting
- Biogeochemistry Coincident with alteration and associated mineralisation
- Pan-concentrates Several untested target areas which are part of the current review
- *Historic drilling* Numerous near-surface, high-grade, open intercepts that warrant follow up trenching and drilling

Over the next quarter (Figure 4), field mapping will continue over areas that have favourable host lithology, complex magnetic responses, favourable structures, and anomalous geochemistry, each with the potential to

host economic gold mineralisation. The new field mapping will aim to validate existing data and support further testing through trenching and drilling.

Soils collected in 2023 are being scanned with a PXRF and anomalous samples will be dispatched for gold and multi-element analysis. Drill chips over Woodlark prospective targets will then be scanned with PXRF to provide improved mineral chemistry from outside of the known deposits which will provide vectors to blind or buried mineralisation.

The 2014 heliborne magnetic survey will be re-processed, and surface geochemistry reviewed to generate new surface and/or buried targets that have not been previously recognised in Central Woodlark Okiduse volcanics.

Gold in soils results will be available from late-April 2024 from the original 2018 soils sample sieved rejects. A selection of approximately 40% of original survey samples have been sent for analysis, with the selection basis on elevated multi-element results.

The Company will advance these prospects with a view to providing both updated resource estimates, and an updated Project Study which is due for completion mid-2024.

Community Relocation Program

The community relocation construction program provides a Community Employment opportunity and focusses on bettering the living standards and community facilities on Woodlark Island.

In November 2023, works commenced on the next phase of the community relocation program which comprises a further 16 buildings. Construction work recommenced mid-January 2024 after the Christmas break, with minor disruptions occurring during the reporting period due to heavy rain. At the end of the quarter, a further 3 buildings had been completed, and handed over including a trade store, taking the total completion to 170 buildings. Activity relating to the United Church is ongoing.

A general slow-down in activities occurred during March 2024 to conserve funds. Activities are expected to ramp back up in the second half of the year.

CORPORATE AND FINANCIAL SUMMARY

Corporate

In late March (refer ASX release 28 March 2024), the Company announced it had extended the maturity date of its short-term bearer bonds on issue with Deutsche Balaton AG and 2Invest AG, in exchange for a 4% prolongation fee payable at maturity. The extension resulted in a deferral of the bearer bond repayment from 29 March 2024, to on or before 30 September 2024. All other terms in relation to the bearer bonds remained unchanged.

Subsequent to quarter end, the Company announced that it had received a firm commitment from new strategic investor, Mr. Jingtao Chi, for an approximate A\$5 million two-tranche share placement at 2.1c per share that will see Mr. Chi emerge with a 19.99% holding in the Company ('**Placement**') (refer ASX release 26 April 2024).

In parallel, the Company has also received a firm commitment from existing substantial shareholder Deutsche Balaton AG to apply monies owing under certain bearer bonds, including outstanding fees and interest (together totalling approximately A\$3 million), to subscribe for shares in the Company at the same price as the Placement, to maintain its current relevant interest of 37.2% of the shares in GPR ('**Bond Conversion**').

Completion of the Placement is subject to, and conditional on, the Company obtaining any necessary regulatory approvals, with the second tranche and Bond Conversion also subject to shareholder approval which is expected to occur at an Extraordinary General Meeting of the Company to be held in June 2024.

Mr. Chi is the Chairman and ultimate beneficiary of XXRT Power Investment Company Limited ('**XXRT**'), headquartered in Beijing, with more than 5 billion RMB (c.A\$1.1 billion) of assets under management. XXRT provides, amongst other things, engineering solutions to the emerging EV industry in China.

Mr. Chi and the Company share the collective aim of accelerating progress of the Woodlark Gold Project. In addition to providing capital to the Company, Mr Chi will leverage his deep relationships and industry experience to assist GPR in its goal of becoming the next major PNG gold miner.

Funds raised from the Placement will be used to advance the Woodlark Gold Project where recent exploration highlighted high-priority target areas with strong potential to host material economic mineralisation, and to upgrade and grow the existing 1.56 Moz gold resource, and for general working capital purposes.

Funds applied under the Bond Conversion (approximately A\$3 million) will be used to pay down certain existing bearer bonds on issue to Deutsche Balaton AG (including fees and interest under those bearer bonds).

Financial

As at 31 March 2024, the Company had the following capital structure:

Cash balance	\$2.55 million
Long lead equipment items materials cost ⁸	\$17 million
PNG GST receivable	\$4.6 million
Bonds on issue – repayable on or before 30 September 2024 ⁹	\$5.3 million
Fully paid ordinary shares on issue	821,717,373
Options	3,645,136
Performance rights	53,512,442
Share appreciation rights	407,016

Long Lead Equipment Items

During the December 2023 quarter, a claim was lodged with the Company's insurers in relation to potential damage to the permanent and tented camp assets currently in storage in Lae, PNG. An assessment for the potential claim is ongoing.

PNG GST Receivable

During the quarter, the Company received a net refund of \$1.2 million in respect of GST returns for the months of August, September, October and December 2021, representing 99.9% of the underlying claims. At the end of the March 2024 quarter following receipt of the above refund, the Company's wholly owned PNG subsidiary, Woodlark Mining Limited ('**WML**'), had a total unaudited GST receivable balance of \$4.6 million¹⁰. In December 2022 the PNG tax authorities ('**IRC**') notified WML that an audit of the GST returns for the period February 2021 to September 2022 would commence. The IRC audit process is ongoing and the remaining GST claim receivable for the current audit period is c.\$3.45 million.

Post quarter end, the Company was notified that the IRC had completed their review of the monthly returns for January, February, March and April 2022, for which the Company is awaiting a refund of approximately \$0.96 million. The GST claim for the balance of the current audit period for which the IRC has not yet commenced their review is \$2.49 million. The quantum and timing of GST refunds in PNG is uncertain.

ASX Additional Information – March 2024 quarter

Listing Rule 5.3.1: Exploration and Evaluation Expenditure ¹¹	\$1.35 million	
Listing Rule 5.3.2: Expenditure on Mine Development ¹²	\$0.35 million	
ASX Listing Rule 5.3.5: Payments to Related Parties and their Associates	¢0.07 million	
Directors' remuneration \$70k	\$0.07 million	

⁸ Based on materials cost paid to suppliers in respect of the Woodlark long lead equipment items up to 31 March 2024. No adjustment has been made in relation to the tented and permanent camp assets which are currently the subject of an insurance claim (refer details under 'Long lead Equipment Items').

⁹ Face value of bearer bonds on issue. Excludes accrued interest and fees.

¹⁰ All values expressed in this section have been converted to Australian dollars at the 31 March 2024 PGK:AUD exchange rate of 2.41 (December 2023 quarter 2.49). The underlying PNG GST receivable is in PNG Kina, the Australian dollar equivalent expressed will be subject to foreign currency fluctuations.

Competent Person's Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Michael Woodbury, who is a Fellow, and Chartered Professional ('**CP**') of the Australasian Institute of Mining and Metallurgy, a member of the Australian Institute of Geoscientists and full-time employee of Woodlark Mining Limited. Mr Woodbury has sufficient experience that is relevant to the styles of mineralisation and types of deposit under consideration, and to the activity being undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the *"Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves"* ('**JORC Code**'). Mr Woodbury consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. The information in this report that relates to Geopacific's Exploration Results is a compilation of previously released to the ASX by Geopacific and Mr Woodbury consents to the inclusion of these Results in this report.

The information in this report that relates to Woodlark Mineral Resource Estimate is based on information compiled and reviewed by Mr Chris De-Vitry, a Competent Person who is a Member of the Australian Institute of Geoscientists and a full-time employee of Manna Hill Geoconsulting Pty Ltd. Mr De-Vitry has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which he has undertaken to qualify as a Competent Person as defined in the JORC Code 2012 and is a qualified person for the purposes of NI43-101. Mr De-Vitry has no economic financial or pecuniary interest in the company and consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.

Geopacific confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters in the market announcements continue to apply and have not materially changed. Geopacific confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Forward Looking Statements

This announcement contains "forward-looking statements" within the meaning of securities laws of applicable jurisdictions. Forward-looking statements can generally be identified by the use of forward-looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "believe", "continue", "objectives", "outlook", "guidance" or other similar words, and include statements regarding certain plans, strategies and objectives of management and expected financial performance. Forward-looking statements are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. These forward-looking statements are based upon a number of estimates, assumptions and expectations that, while considered to be reasonable by Geopacific, are inherently subject to significant uncertainties and contingencies, involve known and unknown risks, uncertainties and other factors, many of which are outside the control of Geopacific and any of its officers, employees, agents or associates.

Actual results, performance or achievements may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. Exploration potential is conceptual in nature, to date there has been insufficient exploration to define additional Mineral Resources and it is uncertain if further exploration will result in the determination of additional Mineral Resources. Readers are cautioned not to place undue reliance on forward-looking statements and Geopacific assumes no obligation to update such information made in this announcement, to reflect the circumstances or events after the date of this announcement.

Schedule of Tenements

Mining tenements held by Geopacific Resources Limited and its subsidiaries at the end of the quarter, including tenements acquired and disposed of during the quarter:

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 April 2024

Authorised by: The Board of Directors

(Name of body or officer authorising release - see note 4)

Notes

- This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
