Recent videos from TSI following the release of the PFS include

- Valuation update
- Interview with managing director, Ron Heeks

Managing director, Ron Heeks commented

"Now that the Woodlark PFS is complete, the team is working full-steam-ahead to deliver the Definitive Feasibility Study (DFS) in the third quarter of this year.

"Exploration planning to scope targets across the broad Woodlark goldfield is also underway. Geopacific is targeting an aspirational resource over five million ounces of gold with a strong existing base of over 1.6 million ounces to build from. This target is predicated on the numerous, attractive exploration targets already discovered by previous drilling and our improving understanding of the mineralising systems."
