Review of operations

Exploration

Marble Bar Lithium Project

During the six months to 31 December 2024 a short ground reconnaissance and rock chip sampling program was executed.

As previously announced GL1 has been awarded a government funded \$220,000 Exploration Incentive Scheme (EIS) grant towards two diamond holes to test down dip of the previously identified altered granite plug and underneath a gold in soils geochemical anomaly.

GL1 is investigating further opportunities for non-lithium related mineral exploration associated within the Company's current tenement holdings. These will be progressed based on technical merit and where the required spend to advance these opportunities to the next stage of evaluation is considered accretive or where third-party funding can be sourced.

In December 2024 the Company completed the acquisition of the Talga Project from Octava Minerals. The Talga Project consists of seven strategic tenements adjacent to the Company's Marble Bar Gold Project and will complete coverage of a large gold in soil geochemistry anomaly that is spatially associated with a highly altered granite. This acquisition provides GL1 with exploration exposure to any potential deeper parts of the system, tenements covering prospective ground between Twin Veins and the Spinifex Ridge Porphyry Mo-Cu-Ag Deposit, Cord copper prospect, as well as further near surface vein hosted gold mineralisation identified at the Razorback Prospect.

DIRECTORS' REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2024

Manna Lithium Project

During the six months to 31 December 2024 the results from the 2024 exploration drilling program were announced. These results confirm a 600m long Southwest extension to the Manna Lithium Deposit.

The Definitive Feasibility Study (DFS) metallurgical testwork program was completed in August 2024. Optimisation testwork has been performed during the six months focused on improving lithium recovery from the desliming and spodumene flotation stages. All key testwork, modelling and engineering reports have been documented and external vendor services have now been delivered. All current work activities have been finalised and further activities are suspended pending future improvements in the lithium commodity markets.

Ongoing activities will centre on advancing approvals relevant to the DFS and ensuring that tenure is maintained in good standing.

Native Title and Aboriginal Heritage

Determinations of native title have been made with respect to areas which include tenements in which the Group has an interest. The native title does not interfere with exercise, by members of the Group, of rights under their tenements and the exercise of those rights takes priority over the exercise of the native title. The Group may be liable to pay compensation in relation to the effect of the grant of its tenements on that native title, which will be determined by the Federal Court if not agreed. The Group is unable to determine the quantum of any future compensation at this time. Native title claims have been made with respect to areas which include tenements in which the Group has an interest. The Group is unable to determine the prospects for success or otherwise of the claims and, in any event, whether or not and to what extent the claims may significantly affect the Group or its projects. Areas of the Group's tenements may be subject to Aboriginal heritage sites protected by State and Federal legislation. In those areas, the agreement of relevant native title holders and certain governmental approvals may be required before members of the Group can exercise rights under their tenements. Agreement is being or has been reached with relevant native title holders in relation to Aboriginal heritage processes regarding areas in which the Group has an interest.
