

Great Southern Mining Investor Webinar

Great Southern Mining Limited (ASX: GSN) Managing Director Matthew Keane will host a live investor webinar on Wednesday July 8, 2026 commencing at 9am AWST / 11am AEST.

Mr Keane will deliver a presentation focusing on the Company's Duketon and Mon Ami gold projects near Laverton in Western Australia.

Drilling is now underway at Mon Ami, with the aim of testing for extensions to known mineralisation within the existing JORC (2012) Mineral Resource of 55.5Koz¹, and also test targets 250m north of the Mineral Resource.

The rig will then move to the Duketon Gold Project, where drilling will aim to extend the known mineralisation at the Golden Boulder discovery. The mineralisation here has already been outlined over 3.5km and remains open along strike and at depth. Drilling will then take place at the Amy Clarke discovery at Duketon, where mineralisation has already been outlined over 4.7km and remains open along strike and at depth.

Both the Duketon Gold Project and Mon Ami are close to several operating mills in the area.

Great Southern is fully funded for all planned drilling, having completed a \$4.6M Placement in June.

Webinar Details:

Investors, analyst and media can register to join the webinar via the link below:
