Governance Arrangements and Internal Controls

A summary of the governance and controls applicable to the Company's Mineral Resource process is as follows:

- Review and validation of drilling and sampling methodology and data spacing, geological logging, data collection and storage, sampling and analytical quality control;
- Review of known and interpreted geological structure, lithology and weathering controls;
- Review of estimation methodology relevant to the mineralisation style;
- Visual validation of block model against raw data; and
- Internal peer review by senior company personnel.
