Gum Creek Gold Project

Commencement of Reverse Circulation Drilling at Gum Creek

HIGHLIGHTS

- Reverse Circulation (RC) drilling has commenced at the Gum Creek Gold Project. Approximately 10,000m of infill and extension RC drilling is planned across all deposits included in the Gum Creek Feasibility Study.
- A fifteen-hole (1,932.1m) diamond drill program designed to infill gaps and provide geotechnical information for the Gum Creek Feasibility Study has been completed with geotechnical, geochemical, and comminution testwork continuing.

Horizon Gold Limited (ASX:HRN) (Horizon or the Company) is pleased to announce the commencement of a 10,000m RC drilling program within its 100% owned Gum Creek Gold Project (**Gum Creek** or the **Project**) centred 90 kilometres north of Sandstone in the Murchison Region of Western Australia.

The program of infill and extension RC drilling will be completed at fifteen prospects including all deposits involved in the Gum Creek Feasibility Study. The program will enhance the geological and resource confidence level across the Project's 2.14 million ounce gold resource and test high priority targets including the open down plunge position of previous drill intercepts including **52m @ 5.9g/t Au** from 91m to EOH including **13m @ 16.7g/t Au** from 123m (WERC002)¹ at the Wedge Prospect (see Figure 1), and **24m @ 3.7g/t Au** from 124m including **11m @ 7.6g/t Au** from 125m (HKRC001)² at the Hawk Prospect (see Figure 3). RC drilling will also be completed at Eagles Peak South where there is potential for a maiden resource to be defined. The RC program is expected to be completed early in April 2025.

A fifteen-hole (1,932.1m) diamond drill program designed to infill gaps and provide geotechnical information for the Gum Creek Feasibility Study has been completed with geotechnical, geochemical, and comminution testwork continuing. All assay results are pending.

About the Company

Horizon Gold Limited (ASX:HRN) is an exploration company focused on its 100% owned Gum Creek Project in Western Australia (Figure 4). The Gum Creek Gold Project represents an exciting gold exploration and potential development opportunity that currently contains a Mineral Resource Estimate of 44.45Mt @ 1.50g/t Au for 2.14 million ounces of gold³ including Indicated and Inferred resource classifications in accordance with the Australasian Code for Reporting of Identified Mineral Resources and Ore Reserves (JORC Code 2012 edition). The indicated portion of the MRE is 28.19Mt @ 1.48g/t Au for 1.35Moz, representing 63% of the total resource ounces.

In March 2023 the Company announced a Maiden Inferred Zn-Cu-Ag Mineral Resource Estimate of 7.0Mt @ 1.8% Zn, 0.5% Cu, 5.0g/t Ag (2.9% ZnEq) at a 2.0% ZnEq cut-off for 200,000 ZnEq tonnes (130,000t Zn, 30,000t Cu, 1.1Moz Ag)⁴ for the Altair VMS deposit also located within the Gum Creek Project.

The Company believes the Gum Creek Gold Project can be a robust, viable stand-alone mining operation and is continuing work on the Gum Creek Feasibility Study. The Project has significant upside including excellent potential to extend the 10-year Gum Creek Scoping Study mine life through resource expansion drilling and underground mining. Underground mining options and economic evaluation work on the Swan/Swift, Kingfisher, Omega and Wilsons deposits is yet to be completed, and additional drilling at the 12 open pittable resource areas not included in the Scoping or Feasibility Studies will likely increase the resource size of these deposits and elevate them to an economically viable status, further enhancing the positive financial outcomes of the Gum Creek Gold Project.

Competent Persons Statement:

The information in this report that relates to Exploration Results is based on information compiled by Mr Leigh Ryan, who is a member of The Australasian Institute of Geoscientists. Mr Ryan is the Managing Director of Horizon Gold Limited and holds shares and options in the Company. Mr Ryan has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Ryan consents to the inclusion in the report of the matters based on information provided in the form and context in which it appears.

No New Information or Data:

This announcement contains references to Mineral Resource estimates, all of which have been cross referenced to previous market announcements. The Company confirms that it is not aware of any additional information or data that materially affects the information included in the relevant market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

Forward Looking Statements:

This ASX announcement may contain certain "forward-looking statements" which may not have been based solely on historical facts, but rather may be based on the Company's current expectations about future events and results. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward looking statements are subject to risks, uncertainties, assumptions and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to metals price volatility, currency fluctuations, as well as political and operational risks and governmental regulation and judicial outcomes.
