

### JUNE 2005 QUARTERLY REPORT

#### HIGHLIGHTS

Exploration RC drilling at the Company's Gidgee Project has continued to test for mineralisation in a north westerly corridor centred on the Swift open pit. Several holes have also identified potential for high grade below the Eagle pit. Significant RC drilling results from Gidgee are tabled below:

Hole	Prospect	Interval	Grade	From
		( <b>m</b> )	(g/t Au)	( <b>m</b> )
GDC 083	Swift	18	20.2	71
and		11	9.8	96
GDC 098	Swift	1	26.6	312
GDC 105	Eagle	5	12.7	180
and		1	36.8	212
and		2	23.3	233
GDC 107	Eagle	4	6.9	159
GDC 108	Swift	6	5.0	32
GDC 113	Swift	10	4.9	78
GDC 117	Swift	4	6.2	115
GDC 126	Eagle	2	13.6	222
and		2	6.6	241
GDC 135	Swift	8	3.4	80
GDC 136	Swift	4	10.8	192
GDC 137	Swift	44	3.2	80
GDC 140	Swift	4	8.7	36

**RAB** and aircore drilling is testing the areas north of the North Swan Bitter open pit, and east and west of the Swift line of workings. Significant RAB and aircore drilling results from Gidgee are tabled below:

Hole	Prospect	Interval	Grade	From
		( <b>m</b> )	(g/t Au)	( <b>m</b> )
PRA04	N Swan Bitter	8	1.45	44
PRA05	N Swan Bitter	4	1.45	28
PRA29	N Swan Bitter	4	2.76	20
and		4	1.89	56
MGA04	N Swan Bitter	4	1.0	44
and		4	1.27	52
and		4	1.71	60
EGA01	East Gannet	4	2.41	24
and		8	2.36	64
SHA017	Sherwood	4	1.26	48

#### 1. GIDGEE EXPLORATION OVERVIEW

Legend's immediate exploration objective is to discover sufficient Mineral Resources and Ore Reserves to enable recommissioning of the existing mill with a minimum 3 year mine life.

During the quarter, the reverse circulation ("RC") drilling focus was predominantly on the north-westerly trending Swift lode (formerly called "Gulliver"), although other targets and areas were tested. RC drilling for the quarter was totalled 80 holes for 16,501 metres. A summary of RC intercepts over 1g/t gold from holes drilled during the quarter is included in Table 1 at the end of this report.

The drilling has shown that the gold mineralisation at Gidgee is highly variable with adjacent holes often returning different values. This is in part due to the style of the veins, but also reflects the "nuggety" nature of the high grade gold.

The continuing RC drilling program is designed to:

- confirm the orientation of interpreted mineralised structures,
- demonstrate the continuity of mineralisation between adjacent drill holes,
- demonstrate the potential for additional mineralisation on parallel structures adjacent to the known mineralisation, and
- demonstrate the potential for additional open pit resources in areas where previous drilling was inadequate.

Legend is also implementing a rotary air blast ("RAB") and aircore ("AC") drilling program in the near mine area because it considers the historical RAB drilling was too shallow and largely ineffective. A more powerful drill rig than was previously available is being utilised, and this is generating significant new gold anomalies, mostly from lower in the regolith profile. During the quarter, 313 RAB and AC holes for 22,569 metres were completed

The RAB/AC results indicate extensions to the known mineralisation and suggest that the Gidgee deposit remains open to the north of the North Swan Bitter open pit. The rig is currently also extending the area of the known mineralisation south of the Emu-Feather pit, on a trend parallel to and between the Butcherbird-Swan Bitter and Swift-Gannet lines. Results greater than 0.5g/t gold from RAB/AC holes drilled this quarter are shown in Table 2.

Structures controlling the gold mineralisation consist of a series of steeply dipping northnorthwest (340°) and west-northwest (310°) trending mineralised shears with additional gold mineralisation hosted by flatter veins on link structures between the sets of shears. The host rocks are a series of basalt flows with coarser basalt or dolerite cores. The exact nature of the sequence is still under investigation.

#### **Basemetal Exploration**

Compilation and evaluation of historic and open-file file data relating to basemetal exploration on Legend's tenements in the Gidgee greenstone belt continued. The work completed so far indicates that the felsic volcanic units in the belt have favourable geochemical signatures and are the right age to be considered "fertile".

At Bevan, east of the Gidgee minesite, CRA Exploration Pty Ltd in 1980 reported intercepts of 7 metres at 5.7% copper and 10 metres at 2.35% zinc (including 1 metre at 9.73%). These intercepts were only followed up by one diamond and three RC holes. At Altair to the northwest of Gidgee, a diamond hole drilled by Pancontinental in 1994 returned a 3.5 metre intersection of massive sulphides containing 1.18% copper.

Anomalous basemetal values previously reported for RAB intercepts at Golden Hind, immediately west of Kingfisher, were tested by RC drilling. The anomalism is now interpreted to be the result of secondary enrichment over black shales, and will not be further followed-up at this time. However, volcanic fragmental rocks were identified in aircore holes adjacent to the zones tested by RC drilling and the area is of interest for future exploration.

#### 2. MUNNI MUNNI JOINT VENTURE (LEGEND 30.12%)

The drilling program proposed by the Manager of the Joint Venture, East Coast Minerals N.L. (ECM), was delayed due to equipment availability and weather. Legend and ECM have agreed to Legend diluting its interest to 30.12% effective 30 June 2005.

#### 3. KARRATHA GOLD AND BASE METAL PROJECT, WEST PILBARA

The Karratha project covers about 625 square kilometres of the West Pilbara greenstone belt between Karratha, Roebourne and Radio Hill, an area that Legend considers to be underexplored and highly prospective for base metals.

A low-impact small-scale gold mining operation was started on E47/966 under a tribute-style arrangement, following DOIR approvals. This will allow Legend to establish local controls and distribution of gold, with the view to planning wider and deeper drill testing of the mineralised system.

Although Legend's exploration focus has been almost exclusively on its Gidgee property during the reporting period, the company will continue to review how best to advance the Karratha project and increase its value for shareholders.

#### 4. CORPORATE

#### **New Directors**

Mr Dermot Ryan and Mr Mark Wilson were appointed Executive Directors of Legend on 13 May 2005. Mr Ryan was also appointed Chief Executive Officer. Mr Andrew Chapman resigned as a director but remained as Company Secretary and Mr Ian Cowden withdrew his nomination to seek re-election at the AGM held on 30 May 2005.

#### New Substantial Shareholder

On the 8 June 2005 the Commonwealth Bank of Australia and its subsidiaries advised the ASX that it had become a substantial shareholder of Legend, holding 5.3% of the fully paid shares on issue at the time.

#### **Capital Raisings**

Two resolutions at the AGM relating to shareholder ratification of the issue of shares were carried by overwhelming majorities.

On the 4 July 2005 Legend announced that Australian Gold Resources Pty Ltd ("AGR") had exercised 25,000,000 of its Legend options thereby providing cash to Legend of \$1,000,000. Subsequently AGR announced to the ASX a change in its substantial shareholding to 107,492,500 fully paid shares being 28.4% of the fully paid shares on issue at the time. Also

during the quarter, 161,828 fully paid shares were issued as a result of the exercise of listed options at an exercise price of \$0.15 per option thereby raising \$24,274.

#### 5. GIDGEE OPERATIONS

The Swan Bitter underground mine and processing plant remained on care and maintenance throughout the quarter.

Dermot Ryan Director

29th July 2005

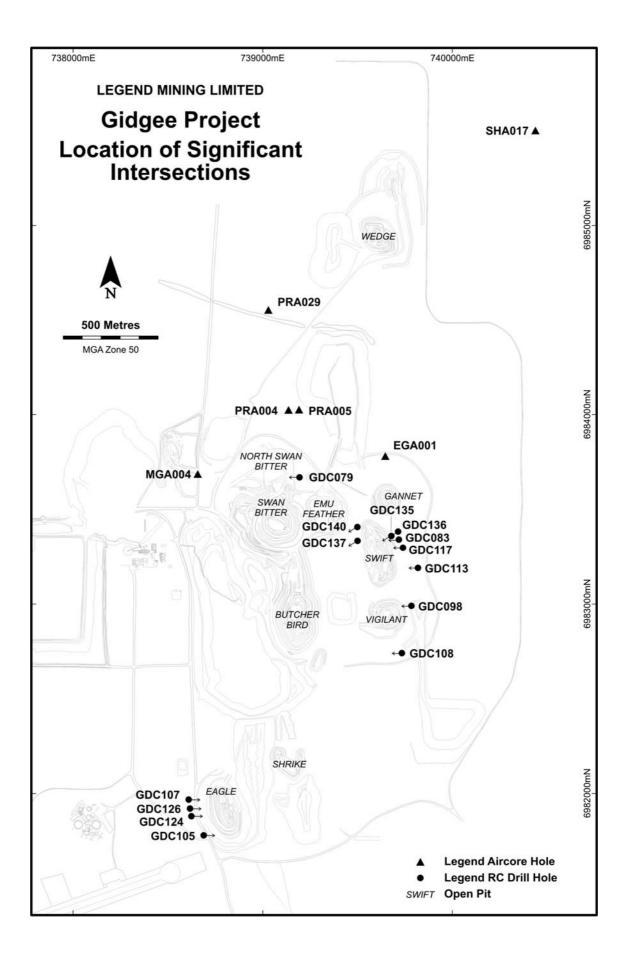

The information relating to exploration and results from Gidgee in this report is based on data compiled by Mr Donald Thomson, a Member of the AusIMM and an employee of Legend Mining Ltd. Mr Thomson has sufficient relevant experience in the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" and consents to the inclusion in this report of the information in the form and context in which it appears.

#### Appendix 5B Mining exploration entity quarterly report

1.13	Total operating and investing cash flows (brought forward)	(5,054)	(7,761)
	Cash flows related to financing activities		
1.14	Proceeds from issues of shares, options, etc.	3,178	8,145
1.15	Proceeds from sale of forfeited shares	-	-
1.16	Proceeds from borrowings	-	-
1.17	Repayment of borrowings	-	(526)
1.18	Dividends paid	-	-
1.19	Other - Rental & Interest	(21)	(23)
	- Capital raising costs	(129)	(129)
	Net financing cash flows	3,028	7,467
	Net increase (decrease) in cash held	(2,026)	(294)
1.20	Cash at beginning of quarter/year to date	3,895	3,070
1.21	Adjustment on first time application of AIFRS Exchange rate adjustments to item 1.20	-	<u>(907)</u> 2,163
1.22	Cash at end of quarter	1,869	1,869

#### Payments to directors of the entity and associates of the directors Payments to related entities of the entity and associates of the related entities

		Current quarter \$A'000
1.23	Aggregate amount of payments to the parties included in item 1.2	324
1.24	Aggregate amount of loans to the parties included in item 1.10	-

1.25 Explanation necessary for an understanding of the transactions

Directors salary, consultancy fees & termination payments.

#### Non-cash financing and investing activities

2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

Acquisition of Gidgee Resources Limited by the issue of 75,000,000 Ordinary Shares & the issue of 75,000,000 Options @ \$0.04 with an expiry date of 31 May 2009. The holder of the above 75,000,000 options, exercised 25,000,000 of these options on the 30 June 2005.

2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

N.A.

<sup>+</sup> See chapter 19 for defined terms.

#### **Financing facilities available**

Add notes as necessary for an understanding of the position.

		Amount available \$A'000	Amount used \$A'000
3.1	Loan facilities	-	-
3.2	Credit standby arrangements	-	-

#### Estimated cash outflows for next quarter

	Total	1,500
4.2	Development	-
4.1	Exploration and evaluation	\$A'000 1,500

## **Reconciliation of cash**

show	nciliation of cash at the end of the quarter (as n in the consolidated statement of cash flows) to slated items in the accounts is as follows.	Current quarter \$A'000	Previous quarter \$A'000
5.1	Cash on hand and at bank	1,852	3,878
5.2	Deposits at call	17	17
5.3	Bank overdraft	-	-
5.4	Other (provide details)	-	-
	Total: cash at end of quarter (item 1.22)	1,869	3,895

<sup>+</sup> See chapter 19 for defined terms.

Andrew Chapman.....

### Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.

<sup>+</sup> See chapter 19 for defined terms.

5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
