#### **REVIEW OF OPERATIONS**

#### Sale of Liontown Base Metal Deposit

In December 2009, the Company agreed to sell its 100% owned Liontown base metals deposit in North Queensland to Kagara Ltd ("Kagara") for \$4.5 million comprising 2,244,837 Kagara shares and \$2.25 million in cash payable upon either a decision to mine or the sale of the purchased assets by Kagara. The sale included Mining Lease 10277 and 16 sub-blocks (51.5 square kilometres) of the surrounding Exploration Permit (EPM 14161) which contains the 1.8 million tonne Liontown zinc-lead deposit. The sale was subject to certain conditions subsequent, all of which were satisfied subsequent to period end. Completion occurred on 6 January 2010 and all the shares in Kagara were subsequently sold for proceeds of approximately \$2.7 million.

The sale provides a solid foundation for the Company to move forward and progress the exploration and development of its North Queensland gold assets as well as pursue other opportunities.

#### Mount Windsor Volcanics Project, Queensland

Exploration on the Mount Windsor Volcanics Project ("MWV Project") during the period focussed on the gold potential of the area yielding further encouraging results. Further geological interpretation and exploration targeting was undertaken using regional aeromagnetic and radiometric data to identify potential gold-bearing Carbo-Permian breccia, intrusive or epithermal systems.

Numerous targets have now been defined within the Company's granted tenements and uncontested applications. Field checking and grid-based geological mapping and sampling have been conducted on the most promising outcropping targets within the granted tenements confirming the prospectivity for vertically zoned breccia pipe and epithermal gold systems. This has been further enhanced by new rock chip sample results and newly recovered historical drilling results. Discrete drilling targets have also now been identified following the results of a recently completed geophysical survey.

#### Sheep Mountain Project, Arizona

The Company continues to examine various options to advance its Sheep Mountain Project, including bringing in a partner to fund a major drilling programme. The Sheep Mountain deposit contains an Inferred Resource of 40,300,000 tonnes at an average copper grade of 1.4% and an average molybdenum grade of 0.035% above a cut-off grade of 0.8% copper equivalent (equating to approximately 1.2 billion lb of copper and 31 million lb of molybdenum).

# Liontown Resources Limited **Directors' Report**

### For the half year ended 31 December 2009

The resource estimation quoted herein for the Sheep Mountain Project has been carried out by Denver, Colorado based Geological Consultant, William F Tanaka. Mr Tanaka is a Member of the Australasian Institute of Mining and Metallurgy and has extensive experience in the area of porphyry copper deposits from both a consulting and operational perspective. As such he is qualified to be considered a Competent Person as defined in the December 2004 edition of the JORC Code. Mr Tanaka consents to the release of the information in the form and context in which it appears here.

#### Corporate

During the period, the Company successfully raised \$1 million before issue costs through a placement of 20 million shares at 5 cents. The capital raising and the subsequent sale of all the Kagara shares received as proceeds from the sale of the Liontown base metal assets has significantly strengthened the Company's financial position with a cash balance of approximately \$3.8 million subsequent to period end.

#### **EVENTS SUBSEQUENT TO REPORTING DATE**

After balance date, all conditions subsequent to the sale agreement with Kagara were satisfied. The Company sold 2,244,837 Kagara shares received as proceeds for the sale of the Liontown base metal deposit to Kagara. Proceeds from the sale of the shares were \$2,681,482 resulting in a profit on sale of \$431,482.

## Liontown Resources Limited

### **Notes to the Financial Statements**

#### For the half year ended 31 December 2009

#### 1. Significant accounting policies

#### (a) Statement of compliance

The interim financial statements are a general purpose financial report prepared in accordance with the requirements of the Corporations Act 2001, applicable accounting standards including AASB 134 'Interim Financial Reporting', Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board ('AASB'). Compliance with AASB 134 ensures compliance with IAS 34 'Interim Financial Reporting'.

This condensed half-year report does not include full disclosures of the type normally included in an annual financial report. Therefore, it cannot be expected to provide as full an understanding of the financial performance, financial position and cash flows of the Entity as in the full financial report.

It is recommended that this financial report be read in conjunction with the annual financial report for the year ended 30 June 2009 and any public announcements made by Liontown Resources Limited during the half-year in accordance with continuous disclosure requirements arising under the Corporations Act 2001 and the ASX Listing Rules.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period, except as set out below.

#### (b) Basis of preparation

The interim report has been prepared on a historical cost basis, except for the revaluation of certain financial instruments. Cost is based on the fair value of the consideration given in exchange for assets. The company is domiciled in Australia and all amounts are presented in Australian dollars, unless otherwise noted.

#### (c) Significant accounting judgments and key estimates

The preparation of interim financial reports requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

Except as described below, in preparing this interim report, the significant judgments made by management in applying the Entity's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial report for the year ended 30 June 2009.

#### (d) Adoption of new and revised Accounting Standards

In the half-year ended 31 December 2009, the Entity has reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to its operations and effective for annual reporting periods beginning on or after 1 July 2009.

During the current period, certain accounting policies have changed as a result of new or revised accounting standards which became operative for the annual reporting period commencing on 1 July 2009. The affected policies and standards are:

• Segment reporting - new AASB 8 Operating Segments

The Company has also reviewed all new Standards and Interpretations that have been issued but are not yet effective for the half year ended 31 December 2009. As a result of this review the Directors have determined that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business and, therefore, no change is necessary to the Company's accounting policies.

### **Segment Reporting**

The Entity has applied AASB 8 'Operating Segments' from 1 July 2009. AASB 8 requires a 'management approach' under which segment information is presented on the same basis as that used for internal reporting purposes.

Operating segments are now reported in a manner that is consistent with the internal reporting provided to the chief decision maker. The chief decision-maker has been identified as the Board of Liontown Resources Limited.
