## **Directors' Report**

#### For the half year ended 31 December 2011

#### DIRECTORS' REPORT

Your directors submit the financial report for Liontown Resources Limited ("Liontown" or "the Group") for the half year ended 31 December 2011. In compliance with the provisions of the Corporations Act 2001, the directors report as follows:

#### **Directors**

The names of directors who held office during or since the end of the half year and until the date of this report are as below. Directors were in office for this entire period unless otherwise stated.

| Timothy R B Goyder | Chairman   |
|--------------------|--|
| David R Richards   | Managing Director                                |
| Douglas A Jones    | Non-executive Director                           |

| Craig R Williams   | Non-executive Director                           |

#### **REVIEW OF OPERATIONS**

#### 1. Jubilee Reef Joint Venture Project (Northern Tanzania) (Liontown earning up to 75%)

During the period, Liontown undertook an initial drill program to test beneath and along strike of historical shallow gold intersections at the Masabi Hill and Shangaza/Panapendesa prospects at the Jubilee Reef Project in Northern Tanzania. Broad intersections of strong gold mineralisation were recorded at both Masabi Hill and Shangaza/Panapendesa.

The gold mineralisation at Masabi Hill is associated with a strongly altered granitic intrusion that is largely obscured by shallow transported soil cover. The Reverse Circulation ("RC") and RAB/Aircore drilling has indicated at least two gold trends (central and contact) with potential to host wide zones of ore grade mineralisation.

As a result of mechanical problems and the early onset of the wet season, the drill program could not be completed prior to the end of the year. A multi-purpose drill rig has been secured for 2012 and the planned drilling will be completed as soon as weather conditions permit (expected early in Q2).

#### 2. Mega Joint Venture Project (Liontown earning up to 75%)

During the period, Liontown has entered into a joint venture agreement with Tanzoz Minerals Ltd whereby Liontown can earn a 75% equity within three years of the date of the agreement by paying Tanzoz \$50,000 per annum and spending a minimum of \$50,000 per annum on in-ground exploration. The project consists of a 9.3km<sup>2</sup> prospecting licence located immediately southwest of the Jubilee Reef Project.

#### 3. African Barrick Iron Ore Joint Venture Project (Liontown earning 70%)

Liontown has entered into a joint venture to explore for iron ore in the Lake Victoria Goldfield of northern Tanzania. Liontown has secured the opportunity to earn up to 70% equity in the iron rights from African Barrick which is the largest gold miner in Tanzania. Following an initial six month assessment stage, Liontown can earn up to 70% by spending \$20 million.

The iron joint venture covers ~530km<sup>2</sup> abutting Liontown's Jubilee Reef Project which has been assessed as

being prospective for iron ore. The Lake Victoria Goldfield is a similar geological terrain to the Mid-West region of Western Australia where a number of large iron ore resources have been discovered. The project area includes significant banded iron formation stratigraphy that has not been previously assessed for iron mineralisation.

#### 4. Mount Windsor Joint Venture Project (Liontown 100%, Ramelius earning 60%)

During the period, joint venture partner Ramelius undertook RC and diamond core drilling at four prospects within the Mt Windsor JV targeting geochemical and/or geophysical anomalies. Although the drilling did not identify any ore grade intersections, several drill holes reported elevated gold values as well as highly anomalous silver and associated pathfinder elements.

Ramelius has confirmed that it will continue to fund and manage exploration at Mt Windsor in 2012. Exploration expenditure since commencement of the JV in April 2010 is approximately \$3,500,000.

#### **CORPORATE**

In November 2011, Liontown completed a one for four entitlements issue by issuing 52,768,600 shares at \$0.03 per share to raise approximately \$1.6 million before issue costs.

#### **EVENTS SUBSEQUENT TO REPORTING DATE**

Subsequent to reporting date, the Company has firm commitments to place 30,000,000 shares at \$0.038 per share to raise approximately \$1.14 million before issue costs.

## For the half year ended 31 December 2011

#### 1. Significant accounting policies

#### (a) Statement of compliance

The interim consolidated financial statements are a general purpose financial report prepared in accordance with the requirements of the Corporations Act 2001, applicable accounting standards including AASB 134 'Interim Financial Reporting', Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board ('AASB'). Compliance with AASB 134 ensures compliance with IAS 34 'Interim Financial Reporting'.

This condensed half-year report does not include full disclosures of the type normally included in an annual financial report. Therefore, it cannot be expected to provide as full an understanding of the financial performance, financial position and cash flows of the Group as in the full financial report.

It is recommended that this financial report be read in conjunction with the annual financial report for the year ended 30 June 2011 and any public announcements made by Liontown Resources Limited during the half-year in accordance with continuous disclosure requirements arising under the Corporations Act 2001 and the ASX Listing Rules.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period, except as set out below.

#### (b) Basis of preparation

The interim report has been prepared on a historical cost basis. Cost is based on the fair value of the consideration given in exchange for assets. The Group is domiciled in Australia and all amounts are presented in Australian dollars, unless otherwise noted.

#### (c) Significant accounting judgments and key estimates

The preparation of interim financial reports requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim report, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial report for the year ended 30 June 2011.

#### (d) Adoption of new and revised Accounting Standards

In the half-year ended 31 December 2011, the Group has reviewed all new and revised Standards and Interpretations issued by the AASB that are relevant to its operations and effective for annual reporting periods beginning on or after 1 July 2011. It has been determined by the Group that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business and, therefore, no change is necessary to the Group's accounting policies.

The Group has also reviewed all new Standards and Interpretations that have been issued but are not yet effective for the half year ended 31 December 2011. As a result of this review the Directors have determined that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business and, therefore, no change is necessary to the Group's accounting policies.

#### (e) Basis of consolidation

The consolidated financial statements comprise the financial statements of Liontown Resources Limited ("Company" or "Parent") and its subsidiaries (the "Group").

Subsidiaries are all those entities over which the Company has the power to govern the financial and operating policies so as to obtain benefits from their activities. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether a group controls another entity.

The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

In preparing the consolidated financial statements, all intercompany balances and transactions, income and expenses and profit and losses resulting from intra-group transactions have been eliminated in full.

## **Condensed Notes to the Financial Statements**

## For the half year ended 31 December 2011

Subsidiaries are fully consolidated from the date on which control is transferred to the Company and cease to be consolidated from the date on which control is transferred out of the Group. Control exists when where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing when the Company controls another entity.

Investments in subsidiaries held by Liontown Resources Limited are accounted for at cost in the accounts of the parent entity less any impairment charges.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. The acquisition method of accounting involves recognising at acquisition date, separately from goodwill, the identifiable assets acquired and the liabilities assumed are measured at their acquisition date fair values.

The difference between the above items and the fair value of consideration (including the fair value of any pre-existing investment in the acquiree) is goodwill or a discount on acquisition.

A change in ownership interest of a subsidiary that does not result in a loss of control is accounted for as an equity transaction.

# 2. Segment reporting Geographical segments

The Group has identified its operating segments based on internal reports that are reviewed and used by the Board of Directors in assessing performance and in determining the allocation of resources.

The operating segments are identified by management based on the allocation of costs; whether they are corporate related costs or exploration costs. Results of both segments are reported to the Board of Directors on at least a monthly basis.
