About Mayfield Group Holdings

Mayfield Group Holdings Limited (ASX: MYG) designs, manufactures and services the critical electrical infrastructure that forms the foundation for Australia's energy systems, data centres, defence installations and essential industrial operations.

While the world embraces new technologies, such as solar farms, data centres, electric vehicles, and AI computing, Mayfield builds the fundamental electrical infrastructure that makes them work. Our business is built on a simple truth: nothing happens without power, and power requires reliable, intelligent distribution systems. We don't just participate in Australia's progress; we provide the essential infrastructure foundation that enables it.

Operating from advanced manufacturing facilities in Adelaide (26,500m² and 5,176 m²) and Perth (7,900m² and 8,000 m²), with service operations across all mainland state capitals, Mayfield delivers integrated solutions through three complementary business units: Mayfield Industries (modular electrical manufacturing), BE Switchcraft (commercial electrical solutions), and Power Parameters (critical power equipment and testing), supported by ATI Australia's communications and control systems capabilities.

Our Australian manufacturing provides supply chain security and rapid response capabilities, positioning Mayfield as an experienced and trusted partner that delivers for major contractors, utilities, infrastructure operators, and government entities.
