About Midas

Midas Minerals is a junior mineral exploration company based in Western Australia, targeting the discovery of economic mineral deposits. Midas’ primary focus is lithium and gold; however, our projects are also prospective for nickel, PGE, copper, and silver.

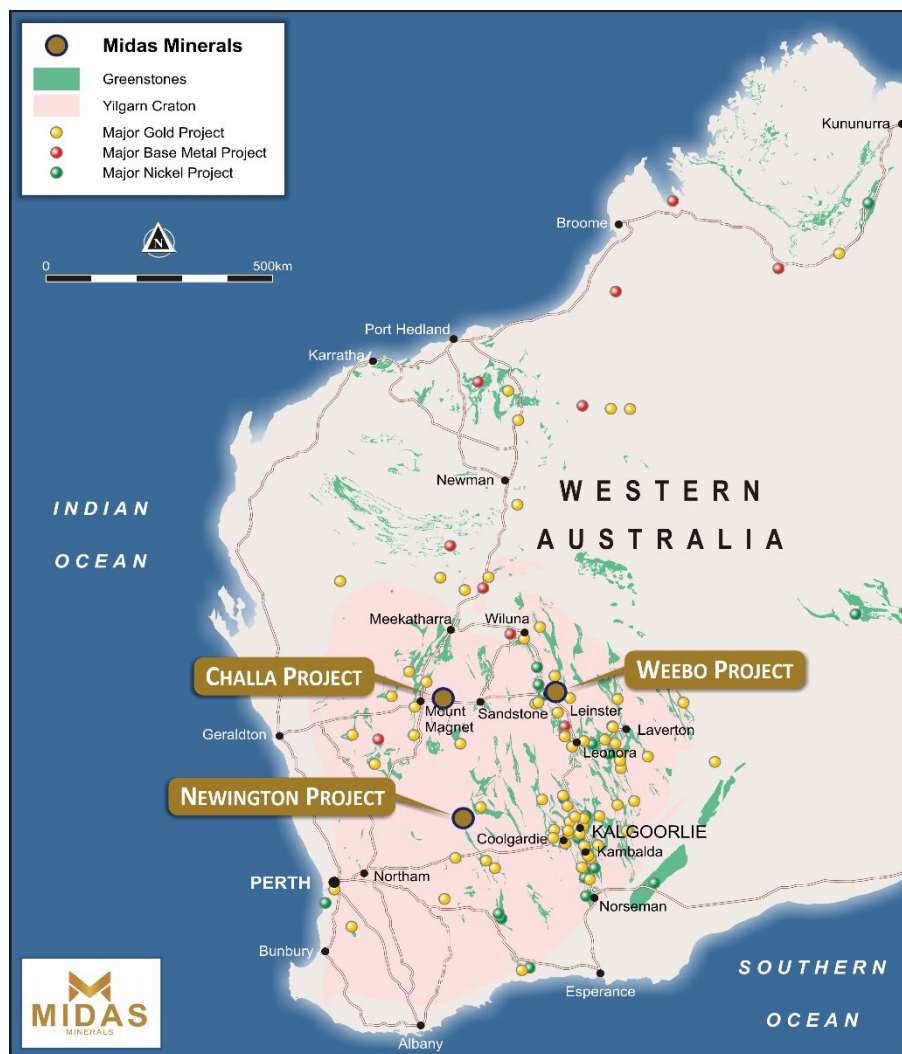

The Company has three projects located within the Yilgarn Craton of Western Australia:

Newington, 311km² – Recently acquired project, located at the north end of the Southern Cross and Westonia greenstone belts, prospective for lithium and gold. Significant lithium and gold mineralisation has been identified.

Weebo (under an option agreement refer to prospectus dated 12 July 2021 released on ASX on 3 September 2021 for details), 453km² - Tier 1 location within the Yandal greenstone belt between the Thunderbox and Bronzewing gold mines, prospective for gold and nickel. Significant gold drill intercepts, and gold and nickel geochemical anomalies were recently reported.

Challa, 859km² - Located over part of the large Windimurra Intrusive Complex between Mt Magnet and Sandstone. Significant palladium-platinum, gold, and base metal geochemical anomalies and VTEM conductors were recently identified.

Midas’ Board and management have extensive experience in mineral discovery and a proven track record of significant gold discoveries and mine development.
