ASX: PAN

Disclaimer

No New Information or Data

This presentation contains references to exploration results and Resource estimates, all of which have been cross referenced to previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

Forward Looking Statements

This presentation may contain certain "forward-looking statements" which may not have been based solely on historical facts, but rather may be based on the Company's current expectations about future events and results. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward looking statements are subject to risks, uncertainties, assumptions and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks in the Countries and States in which we operate or sell product to, and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company's Annual Reports, as well as the Company's other filings. The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statement" to reflect events or circumstances after the date of this announcement, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

Shareholder spread +50% institutional

... some tough decisions in FY2016

Lanfranchi

- Cease mining Deacon post seismic event
- Production from lower grade Jury-Metcalfe suspended due to price
- Care and maintenance from November 2015

Savannah

Placing mine on care and maintenance due to low nickel price

Mt Henry

Selling Mt Henry at a lower point in the US\$ gold price

Balance Sheet

Significant asset write-downs

Personnel

- Approximately 350 employees made redundant across nickel operations and Perth office
- Salary reductions due to changed operating circumstances

... some highlights in FY2016

- Safety
 - LTIFR reduced to zero during March 2016 quarter
- Savannah
 - Record Production of 9,485t Ni, 6,011t Cu and 476t Co

Savannah North

- Positive Scoping Study on Savannah North interim Resource indicates +8 year mine life
- Major Resource upgrade 10.27Mt at 1.70% Ni for 175,100t contained Ni, 74,400t Cu, 12,700t Co

Lanfranchi

- Lower Schmitz maiden high-grade Resource of 131,000t at 5.1% Ni for 6,700t Ni
- Mt Henry
 - Sold to Metals X for 15.4M shares in Metals X and realising \$17.8M in cash

Gum Creek

- Exciting new exploration targets identified through geophysics
- The Horizon Gold \$15M IPO

... fantastic team effort

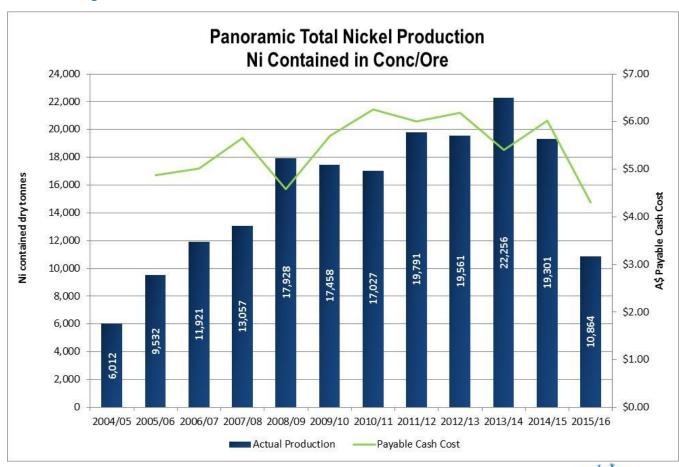

Strong production history

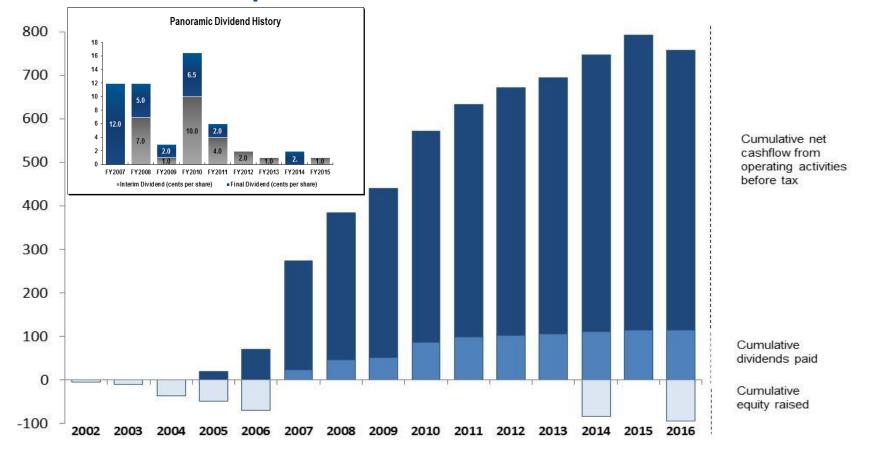

■ Nickel 184,708t

■ Copper 60,590t

■ Cobalt 4,966t

Generated cash and paid \$114.3M in dividends

Continuous exploration success

Savannah

Savannah Lower Zone 2008

3.4Mt @ 1.48% Ni for **50,120t** Ni

■ Below 900 Fault 2014

905kt @ 1.65% Ni for **14,900t** Ni

Copernicus 2006

852kt @ 1.24% Ni for 10,600t Ni

Savannah North 2014

10.27Mt @ 1.70% Ni for **175,100t** Ni

Lanfranchi

■ Deacon 2006

2.24Mt @ 2.83% Ni for 63,551t Ni

Jury-Metcalfe 2013

312kt @ 1.94% Ni for 6,000t Ni

Lower Schmitz 2015

TOTAL ~320,000t Ni

John Hicks, General Manager Exploration

Gum Creek

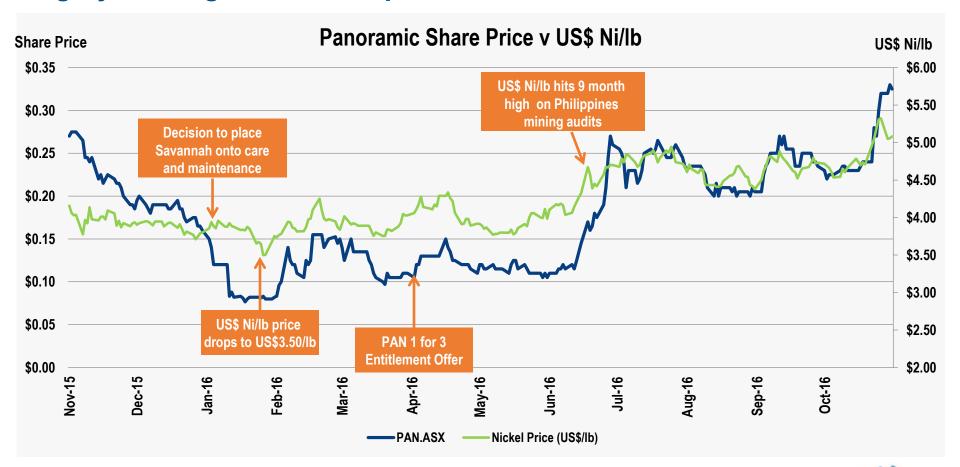

Combined Howards, Heron South, Swan, Swift and Wilsons

14.0Mt @ 1.41g/t Au for 638koz Au

TOTAL ~630,000oz Au

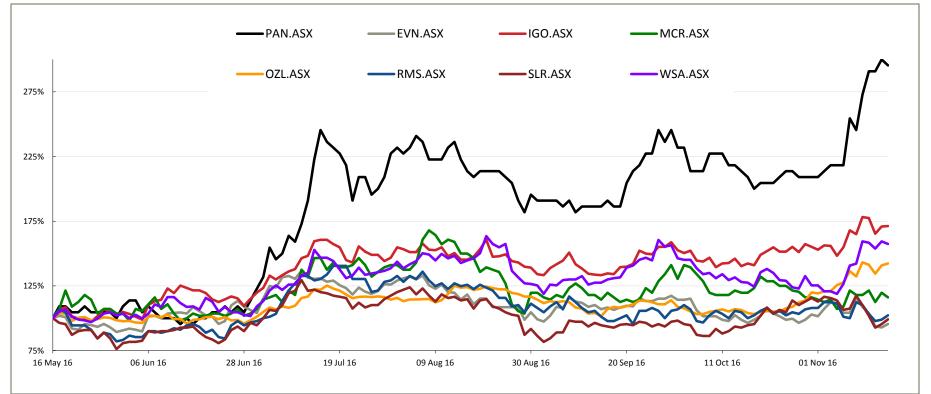

Highly leveraged to nickel price

Solid performance against our peers in last six months

Price, Volume and Performance (Rebased)

Period: 6 months

Nickel – production ready assets

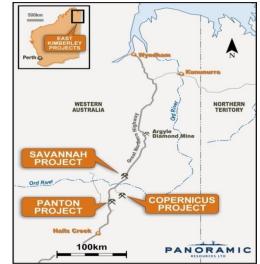

Savannah - summary

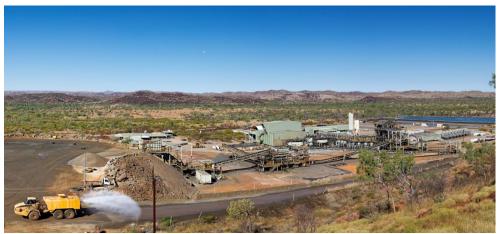

Combined Resources at Savannah*

- **226,400t Ni**
- 104,700t Cu
- 15,300t Co

Key Points

- Underground mine, 1Mtpa processing plant, mobile mining fleet & associated infrastructure
- Operated continuously for 12 years
- 8.5Mt ore milled
- 95kt Ni, 53kt Cu, 5kt Co of metal
- C&M from May 2016
- Very quick re-start
- Offtake agreement until early 2020

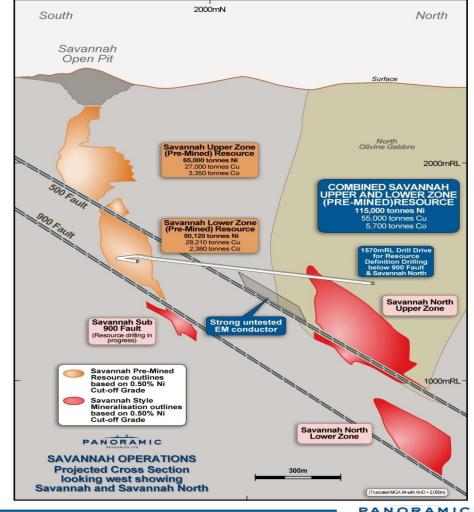

Savannah North

Upgraded Resource*

- 175,100t Ni
- **74,400t Cu**
- 12,700t Co

Key Points

- ~500 metres from existing decline
- January 2016 Scoping Study indicated
 ~8 year mine life
- Short development timeframe and relatively low CAPEX
- Feasibility Study nearing completion
- Exploration upside

January 2016 Scoping Study vs Feasibility Study

| Operating Metric | Scoping Study (March 2016) | Feasibility Study (due December 2016) |
|--|---|---|
| Mineral Resources | 6.88Mt @ 1.59%Ni, 0.77% Cu, 0.11% Co containing: 109,600t Ni 52,900t Cu 7,800t Co | 10.27Mt @ 1.70%Ni, 0.72% Cu, 0.12% Co containing: 175,100t Ni 74,400t Cu 12,700t Co |
| Mining Inventory | 6.07Mt @ 1.26% Ni, 0.64% Cu, 0.09% Co containing: 76,500t Ni 38,600t Cu 5,300t Co | TBA |
| Mine Life | 7.75 years | ТВА |
| LOM production (metal in concentrate) | 66,200t Ni 36,700t Cu 5,000t Co | TBA |
| Annual production (metal in concentrate) | 9,500t Ni 5,300t Cu 700t Co | TBA |

The Mineral Resources underpinning the above production target have been prepared by a competent person or persons in accordance with the requirements of the JORC Code – refer to the Company's ASX announcement of 1 October 2015.

Cautionary Statements

This presentation includes information extracted from Panoramic Resources Limited ASX announcement dated 27 January 2016 entitled "Savannah North Scoping Study - Positive results demonstrates robust, long life, Ni-Cu-Co Project". The Scoping Study is based on low-level technical and economic assessments, and is insufficient to support the estimation of Ore Reserves or to provide assurance of an economic development case at this stage, or to provide certainty that the conclusions of the Scoping Study will be realised. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised.

January 2016 Scoping Study - Financials

| Financial Metric | Units | US\$5.00/lb | US\$6.00/lb | US\$7.00/lb | US\$8.00/lb |
|---|-----------|-------------|-------------|-------------|-------------|

| Payable Ni cash costs | A\$/lb Ni | 5.19 | 5.26 | 5.29 | 5.36 |
| | US\$/Ib | 3.63 | 3.68 | 3.70 | 3.75 |

Basis

- A\$1 = US\$0.70
- Copper US\$2.50/lb
- Cobalt US\$10.00/lb
- Savannah North stand alone
- No Savannah ore

Savannah – immediate priorities

Complete Feasibility Study

Key changes from Scoping Study

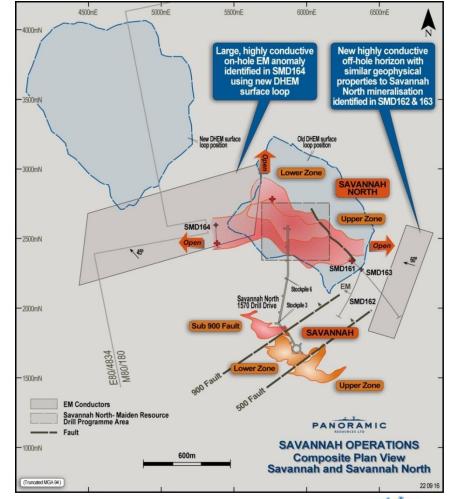

- Combined Savannah/Savannah North
- Optimised mine plan
- 8% nickel bulk concentrate
- CAPEX and OPEX optimisation

Timing

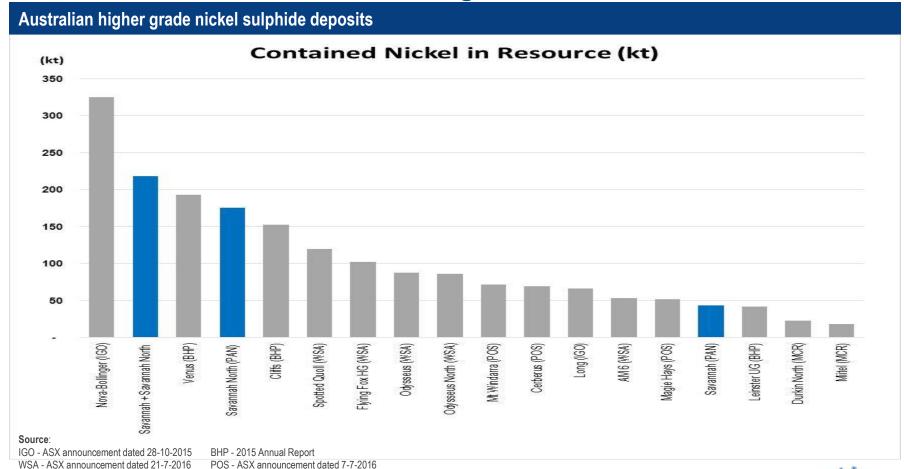

- Finalising inputs December 2016
- Write-up and release results January 2017

Continue exploration

- Surface drilling to test EM targets
- Continue testing 2km strike length

Savannah + Savannah North – a significant Resource

Lanfranchi - summary

Resource

95,500t Ni

Key Points

- Underground mine, mobile mining fleet and equipment and associated infrastructure
- Mined continuously for 10 years (2005-2015)
- 3.85Mt ore mined containing 94kt Ni
- C&M from November 2015
- Quick re-start to mine Jury-Metcalfe, Deacon
- Offtake with BHP Nickel West to February 2019

Lower Schmitz high-grade Resource

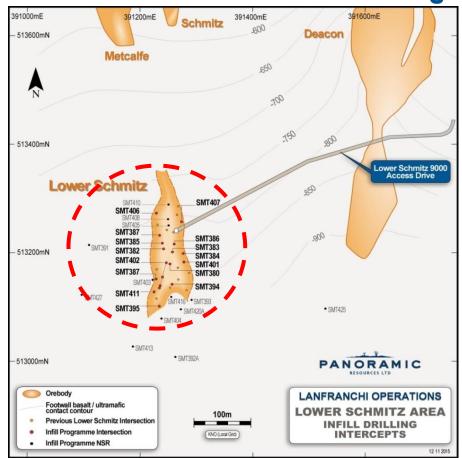

- 131kt at 5.1% Ni for 6,700t Ni
- EM anomaly 100m to the north

Exploration upside

Multiple exploration targets identified

Lanfranchi – Lower Schmitz high-grade

Lanfranchi – significant exploration potential

Schmitz Channel – Lower Zone

- 700m below surface
- 9,000t Ni per 100m vertical*
- Historic production of ~53,000t Ni from the Schmitz channel including:
 - Schmitz 33,552t Ni
 - Skinner 13,678t Ni
 - Winner **6,250t** Ni

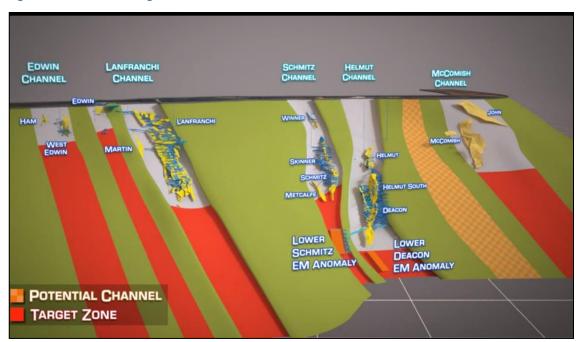

Lanfranchi Channel

- 500m below surface
- 6,000t Ni per 100m vertical*

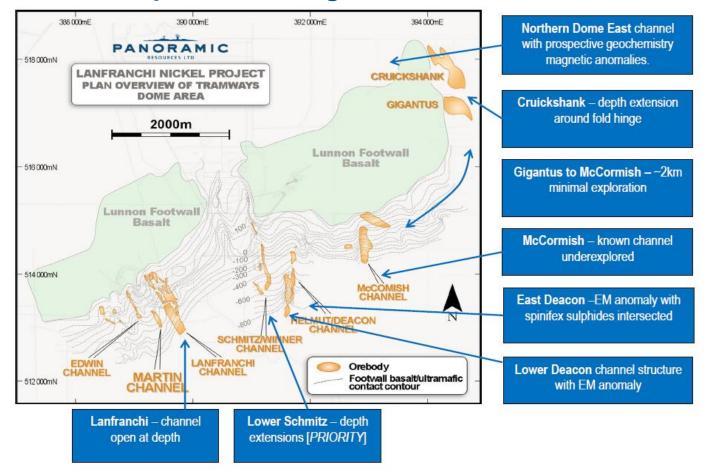

Helmut/Deacon Channel

- 900m below surface
- 20,000t Ni per 100m vertical*

New Channels?

Lanfranchi – Exploration Targets

Unlocking Gum Creek

Proposed ASX code: HRN

www.horizongold.com.au

Horizon Gold - Introduction

New gold company 1.25Moz Resource and large ground holding on the Gum Creek Greenstone Belt

IPO and Capital Raising

- Panoramic Resources (ASX:PAN) to spin out Horizon Gold (new ASX listing)
- \$15M fully underwritten IPO capital raising at \$0.40 per share
- PAN will retain a 51% interest in Horizon Gold (escrowed for two-years)

Capital Structure post IPO

- Shares on issue 76.53M, market capitalisation ~\$30.6M (at \$0.40 per share)
- Pro-forma cash ~\$13.65M, enterprise value ~\$16.9M
- Zeta Resources, PAN's largest shareholder, has agreed to sub-underwrite the IPO to \$4.6M (~15% of Horizon Gold)

Gum Creek Gold Project

- Acquired by PAN in 2011-2012 for ~\$23M
 - Significant exploration activity by PAN has doubled Resources to 1.25Moz¹
- Substantial infrastructure in-place and historical production >1Moz²
- 724km² of tenure covering the Gum Creek Greenstone Belt

Exploration and news flow post IPO

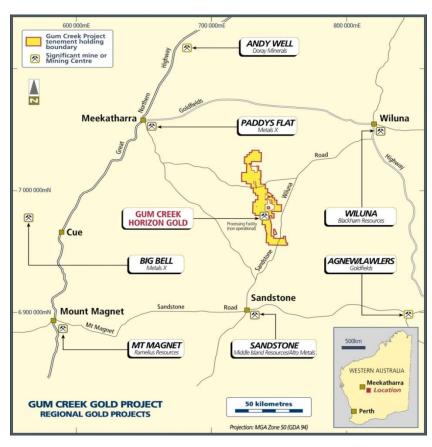

- Resource extension and infill drilling
- Regional exploration targeting new gold discoveries
- Free Milling and Refractory development studies

Horizon Gold - Gum Creek Gold Project

- Location 640km NE of Perth, Western Australia
- Large tenement package 724km² covering the Gum Creek Greenstone belt
- Significant Resources 17.3Mt at an average grade of 2.25g/t Au for 1.25Moz
- Tenements 42 mining tenements with key Resources held on granted mining leases
- New exploration targets 14 priority exploration targets recently identified
- Historic Production >1Moz gold
- Substantial infrastructure:
 - 600ktpa process plant (not in operation and not capable of use without significant capital investment in refurbishment)
 - Village and airstrip
 - Tailings storage facilities
 - Extensive road network
- Water excellent water quality in pits

Significant infrastructure

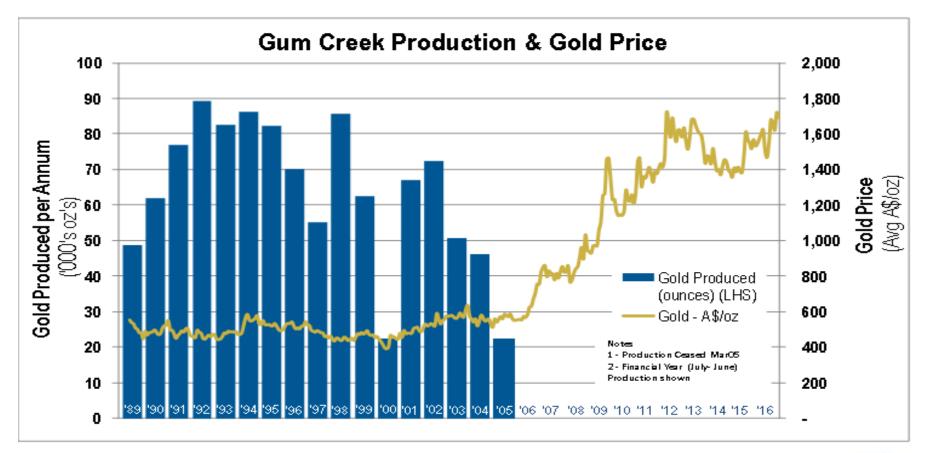

Horizon Gold - Historical Production >1Moz

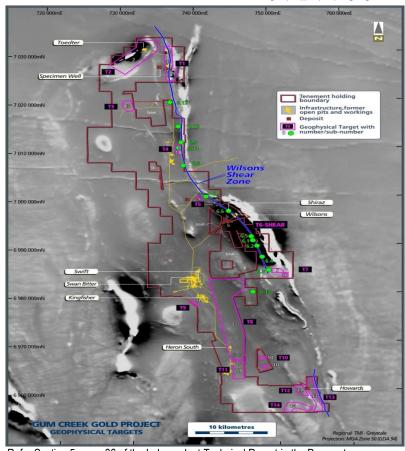

Horizon Gold - Regional Exploration

- Recent geophysical surveys, combined with analysis of historical work has identified 14 new exploration targets
- The Wilsons Shear, which is one of the fourteen new regional targets, hosts several gold deposits and has been more accurately defined
- An additional fourteen discrete geophysical targets are located on the Wilsons Shear
- Proposed regional exploration includes ground EM surveys, IP surveys and air-core drilling to better define geophysical, geochemical and structural targets to be followed by RC and core drilling of prospects. Initial program includes:
 - 200 line kilometres of EM
 - 400 line kilometres of IP
 - 13,000m of air-core drilling
- Horizon will now benefit from a fully integrated, high quality, belt scale geological, geophysical and geochemical dataset driving future exploration targeting

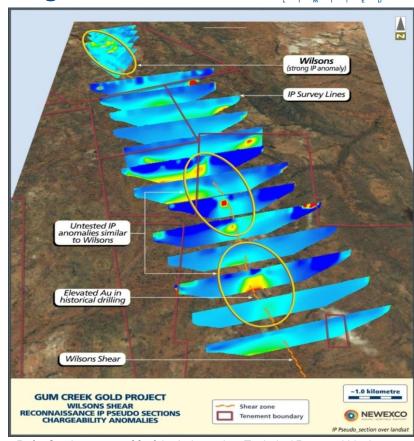

Refer Section 5, page 36 of the Independent Technical Report in the Prospectus

Horizon Gold - Regional Exploration Targets

Wilsons Shear – IP Targets

- Mineralisation at Wilsons is associated with a strong chargeable IP anomaly
- Two discrete chargeable IP anomalies similar to Wilsons have been identified coincident with the Wilsons Shear to the south of Wilsons
- Only an estimated 10% of the Wilson Shear within Gum
 Creek has been tested using modern IP techniques
- IP anomalies to be drill-tested.
- Exploration of the two IP anomalies identified to the south of Wilsons is a priority

Refer Section 5, page 38 of the Independent Technical Report within the Prospectus

Horizon Gold - Objectives and Strategy

Proposed strategy comprises three key objectives:

1. Resource Extension and Infill

 To grow the known resources and lift defined resources into higher-confidence JORC categories

2. Regional Exploration

Target new gold discoveries outside the known resources

3. Development Studies

- On free milling mineralisation
- On refractory mineralisation
- Includes metallurgical and processing investigations

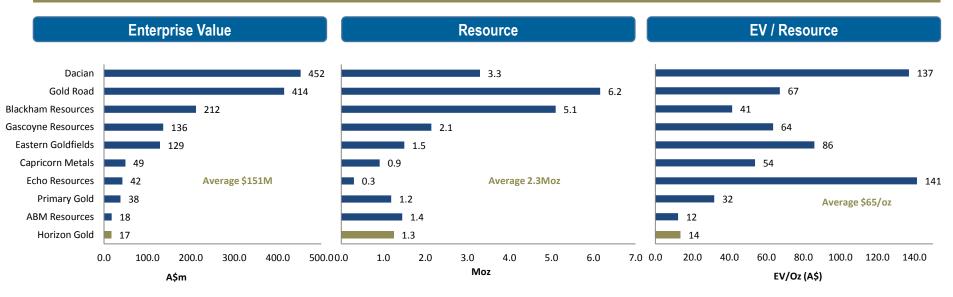

Horizon's objective is to become a stand-alone gold producer

Relative Valuation of Horizon Gold

Implied EV/Resource ounce metric of ~\$14/oz is a significant discount to ASX listed gold peers

Source: IRESS, Company announcements

Note: Share price as at 27 October 2016, company data sourced from latest company announcements

The share price for Horizon Gold is based on the issue price of shares under the Prospectus, being \$0.40 per share. The issue price of shares in Horizon Gold is not determinative of the actual trading price. The price at which Horizon Gold's shares trade on ASX may be higher or lower than \$0.40 per share and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular.

Horizon Gold IPO Indicative Timetable

| Date of Prospectus and lodgement with ASIC | Friday, 21 October 2016 |
|--|-----------------------------|
| Priority Offer Record Date | Friday, 28 October 2016 |
| Opening Date | Friday, 28 October 2016 |
| Closing Date for Priority Offer (PAN Shareholders) | Friday, 18 November 2016 |
| Closing Date for Public Offer | Friday, 25 November 2016 |
| Despatch of holding statements | Wednesday, 7 December 2016 |
| Expected date for quotation on ASX | Wednesday, 14 December 2016 |

^{*} The above dates are indicative only and may change without notice. The Company reserves the right to extend the Closing Dates or close the Offers early without prior notice. The Company also reserves the right not to proceed with the Offers at any time before the issue of Shares to Applicants.

Horizon Gold - Investment Highlights

HORIZONGOLD

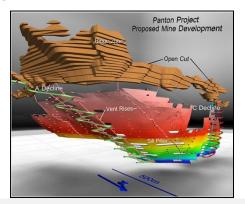

- ✓ Well credentialed board and management
 - Proven track record of exploration discovery and development
- **✓** Strong cash position
 - To fund active exploration program and development studies
- ✓ Supportive shareholder base
 - PAN (51%) to provide management and technical expertise
 - Zeta Resources (~15%) has agreed to sub-underwrite up to \$4.6M
- ✓ Valuable Resource base, infrastructure and prospective exploration tenure
 - Historical acquisition cost ~\$23M, plus significant in-ground exploration spend
 - IPO valuation represents a significant discount to ASX listed peers (\$/Resource oz)
- **✓** Large prospective greenstone belt
 - Current Resources 1.25Moz averaging 2.25g/t
- **✓** Exploration upside
 - 14 new priority exploration targets identified
 - Exploration drilling a priority post listing
 - Exciting IP targets Wilsons Shear
- ✓ Previous Studies
 - Illustrate a potential pathway to development for both free milling and refractory Resources
 - Further work to be undertaken to enhance economics and de-risk
- ✓ Exploration results and news flow post IPO

Nickel Price Outlook

Nickel price outlook much brighter

Market swinging into deficit on robust demand, despite NPI gains in Indonesia

We continue to anticipate an announcement of large-scale Filipino mine suspensions and resulting ore stocks drawdowns to low levels. We now expect this will drive nickel prices up to **c.\$12,500/t** over the next three months, relative to current pricing of c.\$10,800/t. The potential for nickel prices to rise more than our base case 3-mo target of \$12,500/t is high in our view, with upside in the bull case of larger and/or more permanent than expected Philippines mine suspensions potentially driving prices up

to \$15-16,000/t. The main downside risk is a substantial decline in Chinese steel and coking coal prices, which could weigh on sentiment in the ferrous sector as well as reduce costs of production.

QUALIFYING STATEMENT AND NOTES

Notes:

- Figures have been rounded and therefore may not add up exactly to the reported totals
- All resources are inclusive of reserves
- Savannah Project Resource cutoff grade is 0.50% Ni
- Copernicus Project Resource cutoff grade is 0.50% Ni
- Lanfranchi Project Resource cutoff grade is 1.00% Ni

Competent Person Statement

The information that relates to Mineral Resources is based on information compiled by or reviewed by Paul Hetherington (MAusIMM) for the Savannah Project Resource and Copernicus Project Resource and Bradley Robinson (MAusIMM) for the Lanfranchi Project Resources. The aforementioned were formerly full-time employees of Panoramic Resources Limited. The aforementioned have sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. The aforementioned consent to the inclusion in the release of the matters based on their information in the form and context in which it appears.

The information that relates Mineral Resources at Lower Schmitz is based on information compiled by Mr Paul Payne. Mr Payne is a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM) and consultant working for Payne Geological Services Pty Ltd (PayneGeo). Mr Payne has sufficient experience that is relevant to the style of mineralisation and type of target/deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Payne consents to the inclusion in this report of the matters based on the information in the form and context in which it appears.

QUALIFYING STATEMENT AND NOTES

Notes:

- Figures have been rounded and therefore may not add up exactly to the reported totals
- All reserves are inclusive of resources
- Savannah Project Reserve cutoff grade is 0.80% Ni
- Lanfranchi Project Reserve cutoff grade is 1.00% Ni except for airleg mining which is 2.00% Ni

Competent Person Statement

Information relating to Ore Reserves has been compiled by or reviewed by Lilong Chen (MAusIMM). The aforementioned is a full-time employee of Panoramic Resources Limited. The aforementioned has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. The aforementioned consents to the inclusion in the release of the matters based on his information in the form and context in which it appears.

QUALIFYING STATEMENT AND NOTES*

Competent Persons Statement

The information that relates to the Swan OC, Swan UG, Swift UG, and Kingfisher Mineral Resources is based on information compiled by or reviewed by Dr Spero Carras (FAusIMM). Dr Carras is the Executive Director of Carras Mining Pty Ltd and was acting as a consultant to Legend Mining Ltd in 2006 and Panoramic Resources Ltd between 2012 and 2016. Dr Carras has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Carras consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

The information that relates to the Heron South, Howards, Specimen Well, Shiraz and Toedter Mineral Resources is based on information compiled by or reviewed by Andrew Bewsher (AIG). Mr Bewsher is a full time employee of BM Geological Services and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Bewsher consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

The information that relates to the Wilsons Mineral Resource is based on information compiled by or reviewed by Ben Pollard (AIG, AusIMM). Mr Pollard is a full time employee of BM Geological Services and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Pollard consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

QUALIFYING STATEMENT AND NOTES

Cross references to previous market announcements:

refer ASX announcement dated 30 September 2015 titled "Mineral Resources and Ore Reserves at 30 June 2015"

No New Information or Data

The Panton Mineral Resource estimates tabled above have been previously reported, and the relevant market announcements cross referenced. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

QUALIFYING STATEMENT AND NOTES

Notes - Open Pit Resource:

The open pit Mineral Resource is reported at a cut-off grade of 0.59 g/t Pt-Eq within a Lerchs-Grossman resource pit shell optimized on Pt-Eq. The strip ratio (waste:ore) of this pit is 9.5:1. The platinum-equivalency formula is based on assumed metal prices and overall recoveries. The Pt-Eq formula is: Pt-Eq g/t = Pt g/t + Pd g/t x 0.3204 + Au g/t x 0.6379 + Ag g/t x 0.0062 + Cu g/t x 0.00011 + Total Ni g/t x 0.000195 + Total Co g/t x 0.000124 + Rh g/t x 2.1816. The conversion factor shown in the formula for each metal represents the conversion from each metal to platinum on a recovered value basis. The assumed metal prices used in the Pt-Eq formula are: Pt US\$1,595/oz, Pd US\$512/oz, Au US\$1,015/oz, Ag US\$15.74/oz, Cu US\$2.20/lb, Ni US\$7.71/lb, Co US\$7.71/lb and Rh US\$3,479/oz. The assumed combined flotation and PlatsolTM process recoveries used in the Pt-Eq formula are: Pt 76%, Pd 75%, Au 76%, Ag 55%, Cu 86%, Ni 44%, Co 28% and Rh 76%. The assumed refinery payables are: Pt 98%, Pd 98%, Au 97%, Ag 85%, Cu 100%, Ni 100%, Co 100% and Rh 98%.

QUALIFYING STATEMENT AND NOTES CONT.

Notes - Underground Resources:

The underground mineral resource is reported at a cut-off grade of 1.94g/t Pt-Eq. The Pt-Eq formula is: Pt-Eq g/t = Pt g/t + Pd $g/t \times 0.2721 + Au$ $g/t \times 0.3968 + Ag$ $g/t \times 0.0084 + Cu$ $g/t \times 0.000118 + Sulphide$ Ni $g/t \times 0.000433 + Sulphide$ Co $g/t \times 0.000428 + Rh$ $g/t \times 2.7211$. The assumed metal prices used in the Pt-Eq formula are: Pt US\$1,470/oz, Pd US\$4,000/oz, Rh US\$4,000/oz, Au US\$875/oz, Ag US\$14.30/oz, Cu US\$2.10/lb, Ni US\$7.30/lb and Co US\$13.00/lb. The assumed process recoveries used in the Pt-Eq formula are: Pt 75%, Pd 75%, Rh 75%, Au 50%, Ag 50%, Cu 90%, and Ni and Co in sulphide 90%. The assumed smelter recoveries used in the Pt-Eq formula are Pt 85%, Pd 85%, Rh 85%, Au 85%, Ag 85%, Cu 85%, Ni 90% and Co 50%. Ni and Co in sulphide were estimated by linear regression of MgO to total Ni and total Co respectively. The regression formula for Ni in sulphide (NiSx) is: NiSx = Ni - (MgO% x 60.35 - 551.43). The regression formula for Co in sulphide (CoSx) is: CoSx = Co - (MgO% x 4.45 - 9.25).

Cross references to previous market announcements:

Open pit Resources – refer Magma Metals Limited (ASX:MMW) announcement dated 7 February 2011 titled "Positive Scoping Study for Thunder Bay North Project"

Underground Resources – refer Magma Metals Limited (ASX:MMW) announcement dated 23 February 2012 titled "Magma Metals Increases Mineral Resources at TBN to 790,000 Platinum-Equivalent Ounces"

No New Information or Data

The Thunder Bay North Mineral Resource estimates tabled above have been previously reported, and the relevant market announcements cross referenced. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.
