During the September 2025 quarter, FUM for Regal Partners Limited (ASX:RPL, "Regal" or the "Company") rose to \$20.0 billion, a 13.1% increase on the \$17.7 billion of FUM at 30 June 2025. When considering additional non-fee-earning commitments ("Commitments"), total FUM & Commitments was \$21.2 billion, a rise of 12.0% over the quarter.

The increase in FUM was driven by a combination of continued net client inflows and positive investment performance across a wide range of investment strategies.

Net FUM inflows in the quarter were approximately +\$0.7 billion. These included strong contributions from the PM Capital Global Companies Fund and Regal Tactical Opportunities strategy, as well as material net inflows into the Regal Resources Royalties Fund, Taurus Mining Finance Fund II*, Merricks Capital co-investments and the establishment and seeding of the Ark Capital Partners Hotel Opportunities Fund. The Regal Global Small Companies Fund, launched in April 2025, has also continued to gather support following strong investment performance.

Note: Past performance is not a reliable indicator of future performance.

* Credit and royalties net flows included approximately \$0.1 billion of non-fee-earning commitments for Taurus Funds Management that became fee-earning.

** Commitments comprise non-fee-earning commitments only.

Positive investment performance of almost +\$1.8 billion contributed +9.9% to FUM growth, reflecting favourable returns across a wide range of strategies, including strong performance across the Hedge Funds and Multi-Strategy asset strategies.

The change within “Other” includes \$0.1 billion of dividend and distribution payments (net of reinvestments) as well as other factors such as buy-backs and adverse foreign exchange movements for Taurus Funds Management due to a slightly stronger Australian dollar.

PERFORMANCE FEE UPDATE FOR THE 2H25, AS AT 30 SEPTEMBER 2025

As a result of continued strong investment performance, \$13.7 billion of performance fee-eligible FUM sits at or within 5% of its high water mark as at 30 September 2025, representing 85% of performance fee-eligible FUM as at 30 September 2025.⁵ The Company notes that fund performance and performance fees can vary significantly over short time periods. However, in the interests of keeping the market fully informed, the Company notes the current quantum of crystallised and uncrystallised performance fee revenue accumulated for the 2H25 period to 30 September 2025 (pre-tax and on a normalised basis)⁶ sits materially above the top end of the current broker consensus forecasts for performance fees (with current broker consensus forecasts estimating between \$22m-\$52m in performance fees for 2H25, across six covering brokers). The crystallised and uncrystallised performance fees accumulated for the 2H25 period to 30 September 2025:

- incorporates approximately \$5m of crystallised performance fees, reflecting three months of performance for funds and mandates that have monthly performance fee crystallisation periods;
- incorporates three months of performance for funds and mandates that have semi-annual performance fee crystallisation periods and a crystallisation date of 31 December 2025;
- incorporates nine months of performance for funds and mandates that have annual performance fee crystallisation periods and a crystallisation date of 31 December 2025; but
- does not include performance fees relating to those funds or mandates that have their next performance fee crystallisation date beyond 31 December 2025 e.g. the PM Capital Global Companies Fund (which has an annual performance fee crystallisation date of 30 June).

It is important to note that any uncrystallised performance fees continue to remain “at risk” and highly subject to change. There is no certainty that the current level of uncrystallised performance fee revenues accumulated for the 2H25 to date will be earned, given these remain subject to fund and mandate investment performance through the remainder of 2H25.
