QUARTERLY ACTIVITIES REPORT

for the three months ended 30 September 2021

Quarter Highlights

- ❖ Completed the sale of Yandal East Project to Strickland Metals Limited
- ❖ Revised terms to the Yukon Project Option Agreement which resulted in an immediate payment of \$500,000
- ❖ The Company is advancing due diligence and negotiation on several new projects
- ❖ Successful applicant in the Federal Government Junior Minerals Exploration Incentive Scheme

Yandal East Project Sale

The Company completed the sale of Yandal East Project to Strickland Metals Limited (ASX:STK) on 16 July 2021 (ASX Release dated 16 July 2021). The terms of the sale are:

- \$400,000 being paid on Completion (16/07/2021);
- 40m shares in STK to be issued on completion (16/07/2021) with voluntary escrow for 12 months;
- \$400,000 payable six months from completion (16/01/2022); and
- a 0.5% Net Smelter Royalty payable on any commodity mined from the Renegade Joint Venture tenements

The transaction resulted in an amalgamated ground position in the Yandal belt now controlled by Strickland which has a strike length of ~100km and controls several known gold deposits (RNX ASX Release dated 9 June 2020 and STK ASX Releases dated 23 June 2021).

Strickland has recently announced (STK: ASX Release dated 14 October 2021) encouraging base metal results at the Iroquois Project which is south of the Rumble Resources Limited (ASX:RTR) Earhaddy base metal project. STK has been trading strongly on the back of the potential new discovery.

Strickland are also drilling their existing gold prospects and planning work on prospects on the former Renegade tenements and at the Millrose gold deposit. Programs include 100,000m of air core and 30,000m of RC drilling plus substantial geophysics and soil sampling programs over the coming eighteen months.

Yukon Project

The Company recently advised (ASX Release dated 28 July 2021) it had revised the Share Purchase Agreement which has resulted in a cash payment of \$500,000.

The Company received a demobilisation claim from Yukon based drillers which relates to equipment removal from the Yukon Project site which was completed recently. The equipment has been left on site for approximately 10 years. The eventual final amount claimed was CAD263,000 and was provisioned in the Company's 2021 annual accounts in the amount of AUD250,000. The Company strongly disputed the amount payable and has settled the claim for CAD105,000 (AUD114,000).

Carpentaria Joint Venture (CJV) Interest

The Company has previously flagged its interest in progressing some smaller prospects within the CJV to create value for both partners.

Exploration work over the quarter centred mainly on geophysics and review of previous drilling results.

Corporate

At the end of the quarter the Company had 879,626,638 ordinary shares on issue and the equivalent funds of \$839,000 at bank as of 30 September 2021.

The Company spent a total of ~\$228,000 on exploration and evaluation expenditure during the quarter as summarised in this report. \$114,000 was spent on demobilisation costs at the Yukon Project as mentioned above. The balance of costs were apportioned across the Carpentaria JV and Yandal East Project for geophysical survey work, geological investigation and analysis of previous data, and legal and Government fees and costs associated with the acquisition and transfer of the two interests. No expenditure was incurred on mining production or development activities during the quarter.

The Company holds 40m shares in Strickland Metals Limited which at the date of this release are valued at ~\$3.5m. The shares are voluntarily escrowed to 16 July 2022 unless Strickland approves release for sale.

Payments totalling approximately \$78,000 were made to related parties of the Company, as shown in the Appendix 5B. These payments related to director and consulting fees payable to non-executive directors for services provided for field and corporate related activities. The amount also included the payment of prior year accrued fees for one director. Administration and Corporate Costs were further affected by payment of ASX fees (~\$35,000) and legal costs with respect to the CJV acquisition and Yandal East Project disposal (~\$25,000).

The Company was one of 34 companies successful in its application for the Junior Minerals Exploration Incentive Scheme. The Company has been awarded \$250,000 in tax credits which can be passed on to new shareholders who participate in future capital raisings for exploration within Australia.

The Company has reviewed several potential new projects for the Company. Due diligence is being undertaken in this respect.

This quarterly report has been authorised by the Board of Renegade Exploration Limited.

Ends.

About Renegade Exploration Limited

Renegade Exploration Limited (ASX:RNX) is an Australian based minerals exploration and development company.

The Company has recently divested its WA located Yandal East Project to Strickland Metals Limited (ASX:STK) for a combination of cash and shares in Strickland plus a net smelter royalty. The amalgamated package is located within a well-endowed gold region known as the Yandal Greenstone Belt, in the Wiluna region, Western Australia. The current major production centre is at Jundee, located ~25km west of the Yandal East Project. The region has historically produced in excess of 10Moz of gold and remains relatively unexplored.

The Company has recently acquired an interest in the Carpentaria Joint Venture which has a package of permits in the copper endowed Cloncurry district of Northwest Queensland. The project has several identified advanced copper and gold projects.

Renegade also owns 90% of the Yukon Base Metal Project located within the highly prospective Selwyn Basin, Yukon Territory, Canada. The Project is currently the subject of an Option Agreement to sell.

The Company's primary objective is to deliver long-term shareholder value by achieving a production profile and becoming a mid-tier resource company. Renegade strives to achieve this through the sourcing of brownfield projects with potential for advancement of existing prospects, discovery of new ones or by the acquisition and development of economic mineral deposits.
