

Quarterly Report

For the quarter ending 30 September 2023

renegadeexploration.com

Renegade Exploration is developing a portfolio of advanced copper and gold projects in north-west Queensland.

Highlights

- Large high-grade copper zones continue at Mongoose Prospect, Cloncurry Project:
 - Drilling continues to intersect surface copper oxide zones.
 - Drilling continues to intersect deeper sulphide zones.
- Superb soils at Mt Glorious Prospect, Cloncurry Project:
 - Large copper pXRF anomaly delineated at Mt Glorious.
 - Large 600m long, 250m wide high-grade Cobalt anomaly (+800ppm) identified.
- Renegade commences drilling at the Mt Glorious Cu-Au prospect.

Renegade Exploration Limited
ABN 92 114 187 978
ASX RNX

Cloncurry Project (EPM 8588)

Copper | Gold | Cobalt

Queensland, Australia

Renegade has an ~28% interest in the Cloncurry Project which has Renegade earning back its interest in EPM8588. Renegade’s interest will increase with further expenditure.

In January 2023, Renegade reached an agreement with Carpentaria Joint Venture (CJV) partner Mount Isa Mines (MIM) to become sole operator and funder of EPM 8588¹, host to a number of advanced copper prospects including the Mongoose Prospect.

Mongoose Prospect

Located just south of Cloncurry, Mongoose is a primary target with significant historical copper-gold intercepts and is along strike from the neighbouring Great Australia Mine and Taipan Deposit. Mongoose has been the subject of two drilling programs since March 2023 to determine the potential for near term mining with the initial target being near surface copper oxides.

Renegade has completed two reverse circulation drilling programs, totalling ~3,600m, at Mongoose in March and May 2023. The program has been successful in expanding the supergene oxide zone and discovering a high-grade sulphide zone. Renegade is currently working on modelling the oxide and sulphide resources.

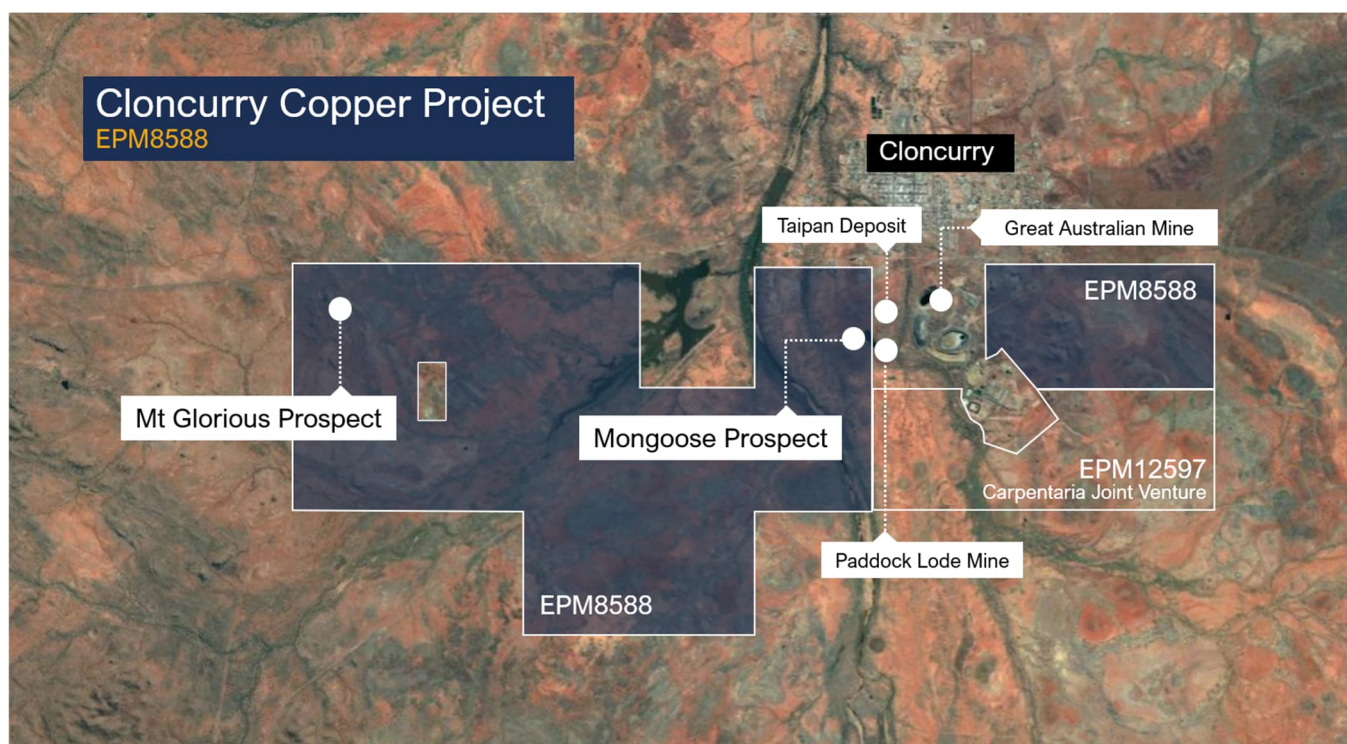

Figure 1. Mongoose Prospect, showing nearby open pit mines and resources.

¹ See ASX Release dated 16 January 2023; Renegade assumes control of Mongoose Project.

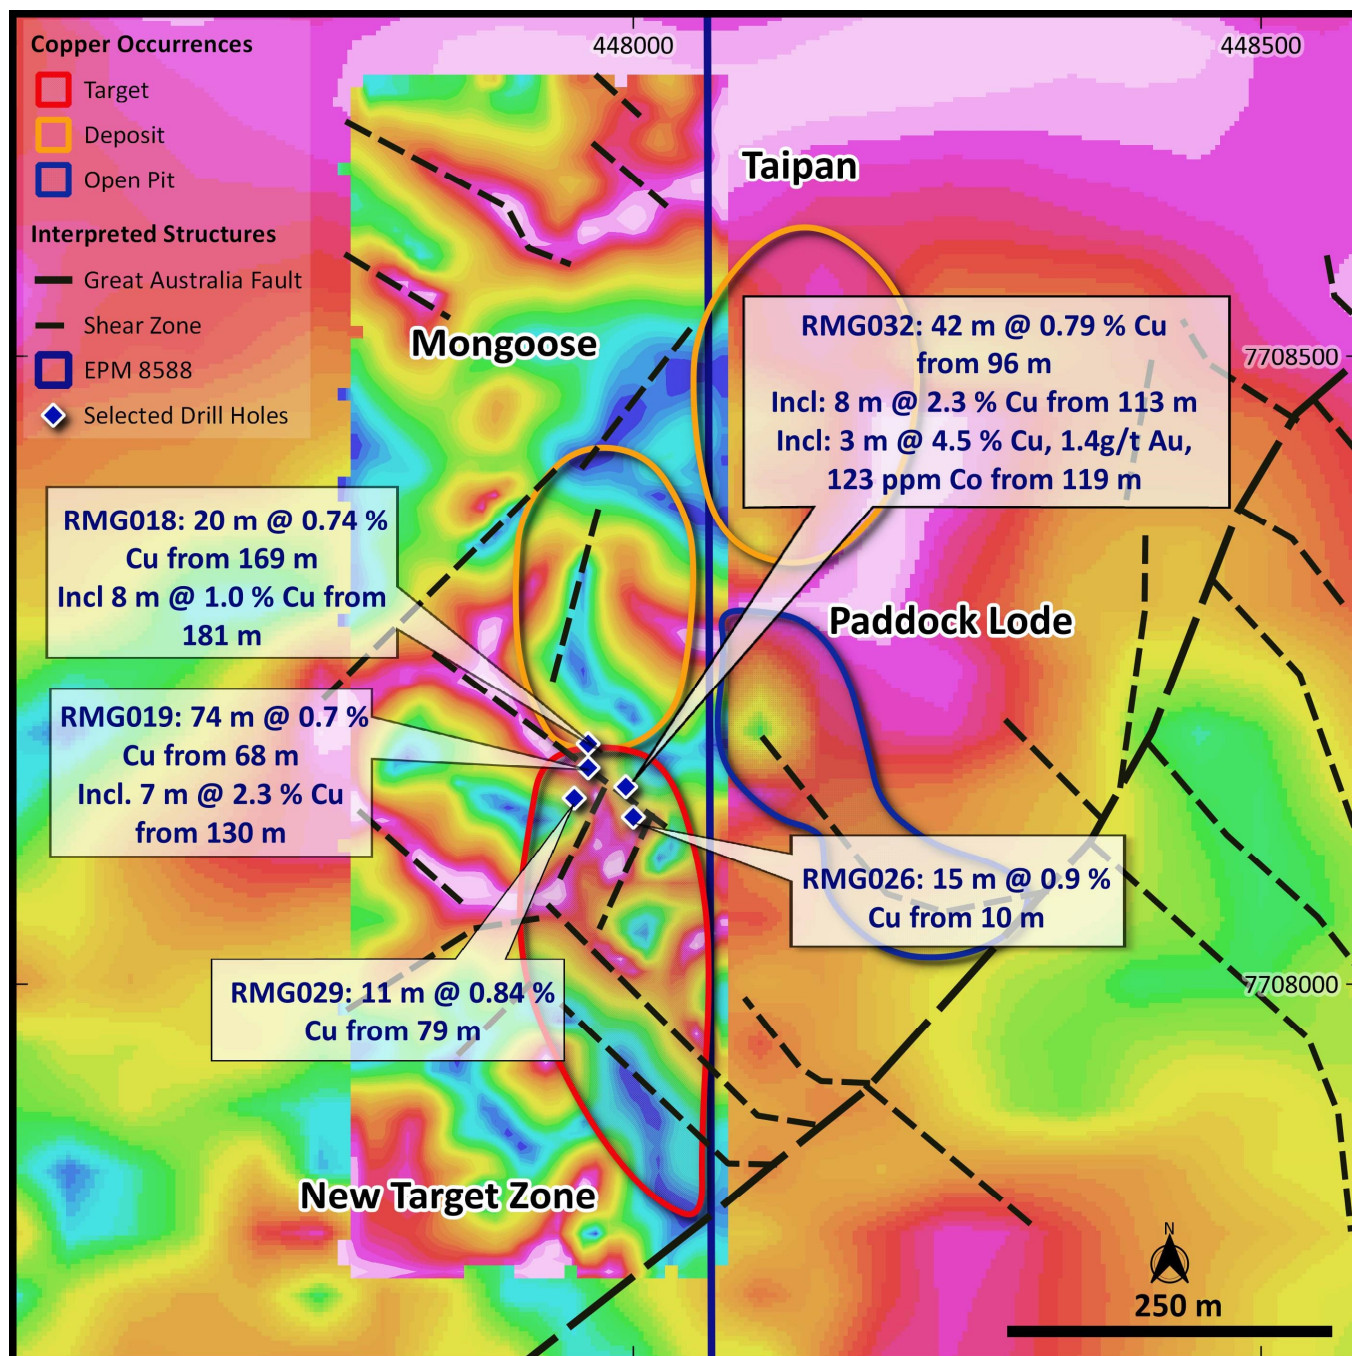

Figure 2. Mongoose plan view showing recent drill hole intercepts.

During the first half of the year, Renegade drilled ~2,000m in its first Stage 1 reverse circulation (RC) drilling program and a further ~1,600m of RC drilling during stage 2. Stage 2 provided further confirmation of the surface oxide and deeper sulphide copper-gold mineralisation discovered in Stage 1 drilling².

² Refer ASX Release dated 8 May 2023; Up to 25% Cu confirms high grade sulphide at Mongoose.

The Stage 2 drilling in May continued to intercept shallow oxide copper zones and the high-grade copper sulphide mineralisation with the following highlights below³:

RMG032: 42m @ 0.79 % Cu, 0.17 g/t Au from 96m; including
 25m @ 1.1 % Cu, 0.26 g/t Au from 113m; including
 8m @ 2.3 % Cu, 0.6 g/t Au from 113m; including
 3m @ 4.5 % Cu, 1.4 g/t Au from 119m; and
 10m @ 0.47 % Cu, 0.09 g/t Au from 6m.

RMG018: 20m @ 0.74 % Cu, 0.22 g/t Au from 169m; including
 8m @ 1.0 % Cu, 0.29 g/t Au from 181m.

RMG029: 11m @ 0.84 % Cu, 0.14 g/t Au from 79m.

RMG030: 10m @ 0.34 % Cu, 0.06 g/t Au from 130m.

RMG026: 15m @ 0.90 % Cu, 0.15 g/t Au from 10m.

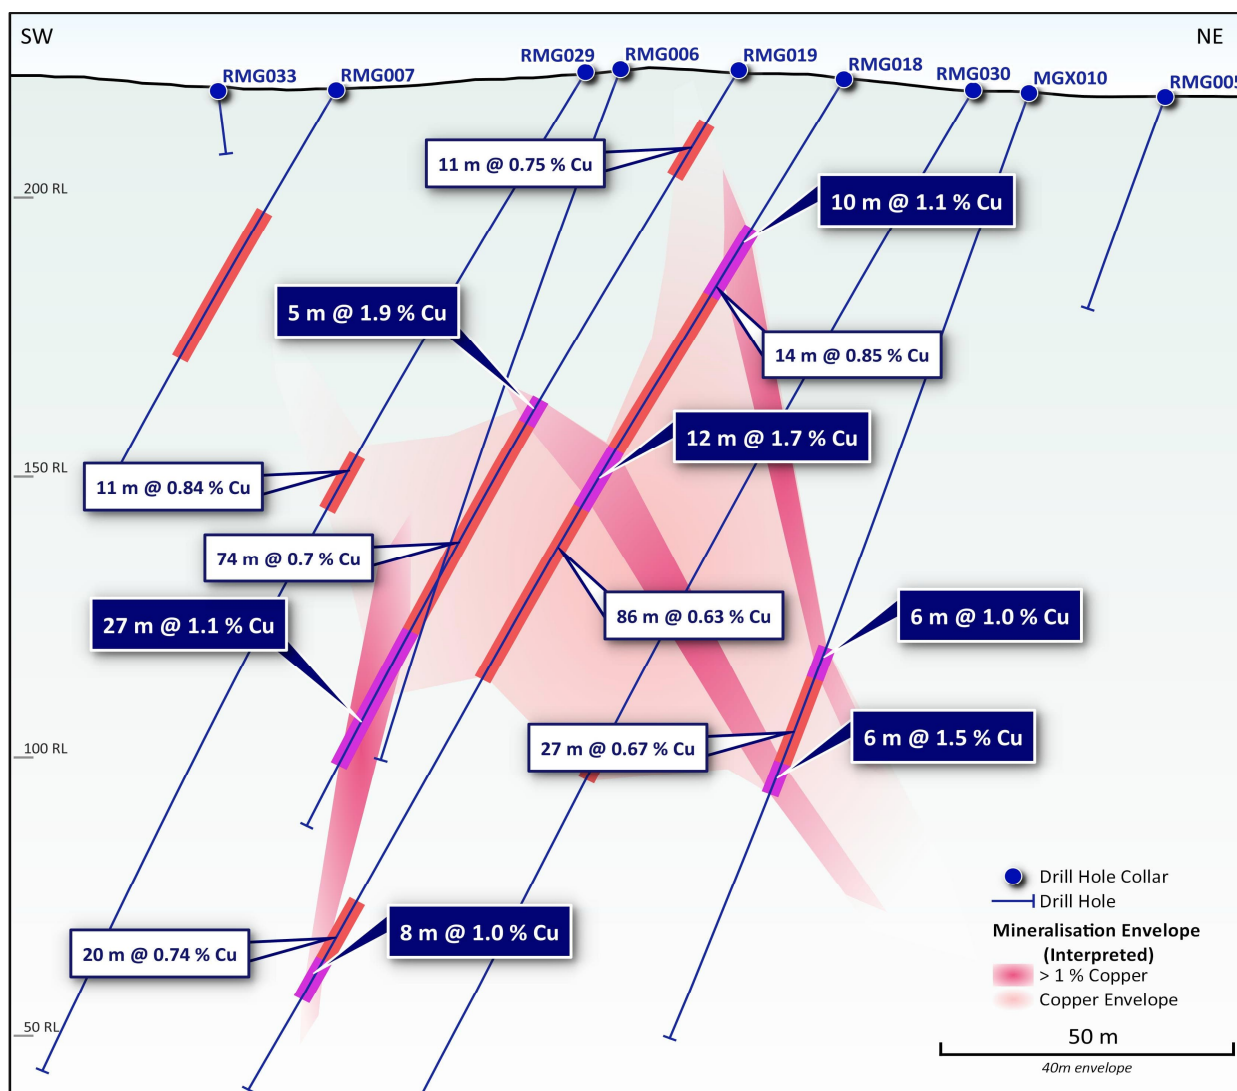

Figure 3. Cross section of Renegade drilling plus historical holes.

³ Refer ASX Release dated 4 July 2023; Large high-grade copper zones continue at Mongoose.

Mongoose Prospect Background

The Mongoose Prospect is hosted by dolerite-gabbro-porphyrific basalts of the Toole Creek Formation. The mineralised zone is dominated by magnetite-actinolite-albite-chlorite altered, sheared and brecciated dolerites. The mineralisation is both primary and supergene in nature. The supergene zone is defined by the presence of malachite, chrysocolla, chalcocite, and cuprite. The fresh, primary (hypogene) copper mineralisation is defined by chalcopyrite with accessory pyrite.

The work completed by the CJV during 2013-14 delineated an extensive coincident magnetic-chargeable anomaly and based on this the CJV completed 3,988 m of reverse circulation (RC) and diamond drilling over 21 drill holes during 2013/2014.

This drilling is exclusively orientated towards the south and has intercepted large zones of Cu-Au mineralisation at surface and depth including;

- 44 m @ 1.7 % Cu & 0.17 g/t Au from 2 m (MGX009)
- 11 m @ 1.2 % Cu & 0.31 g/t Au from 20 m (MGX019)
- 6 m @ 1.0 % Cu & 0.34 g/t Au from 98 m (MGX017)
- 15 m @ 1.6 % Cu & 0.32 g/t Au from 174 m (MGX002)
- 10 m @ 0.95 % Cu & 0.12 g/t Au from 8 m (MGX011)
- 28 m @ 0.66 % Cu & 0.067 g/t Au from 105 m (MGX010)
- 5m @ 1.7% Cu and 0.42g/t of Au from 20 m (MGX005)

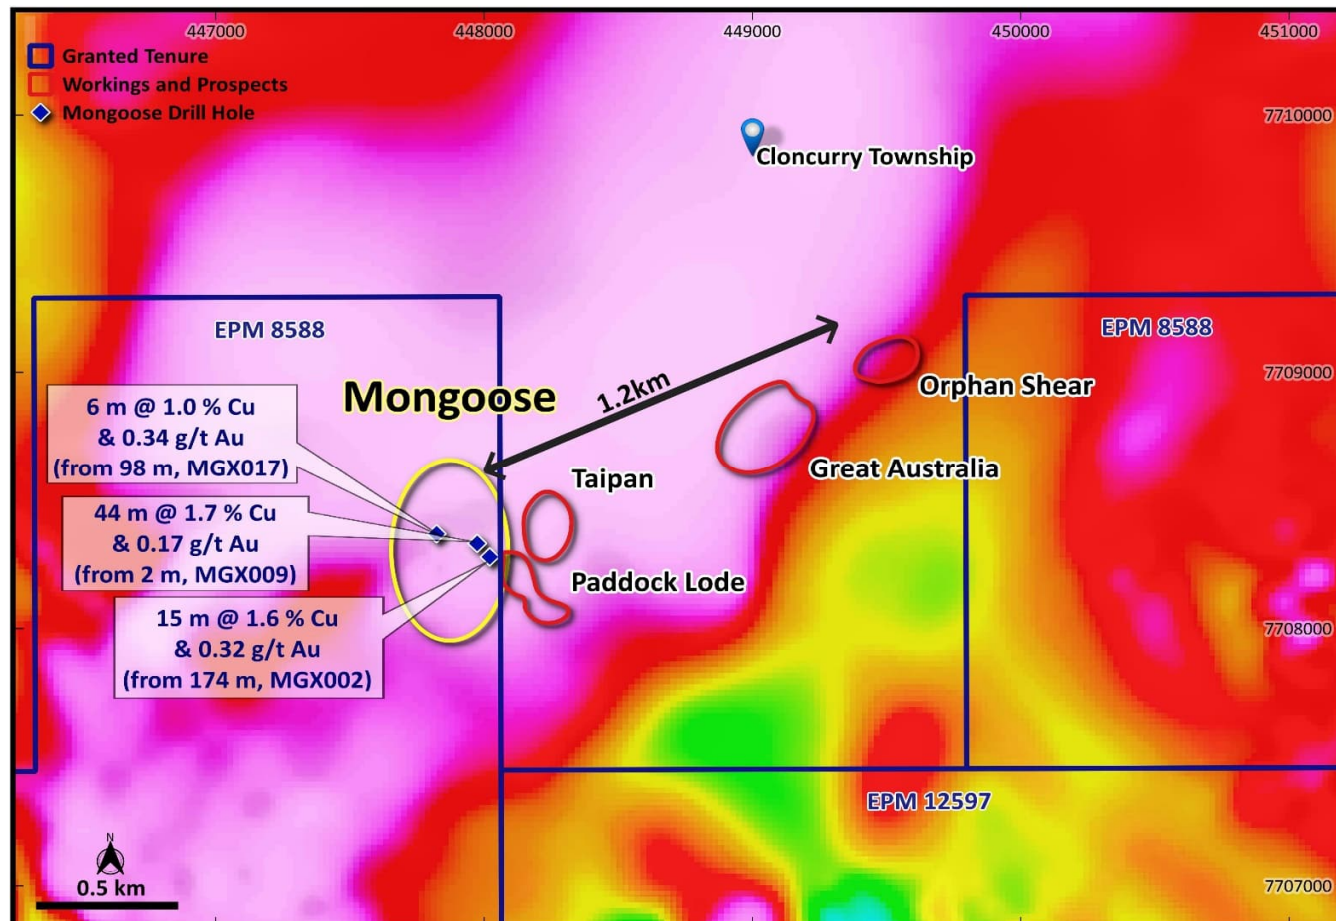

Figure 4. Mongoose project, showing nearby open pit mines and resources with magnetics RTP.

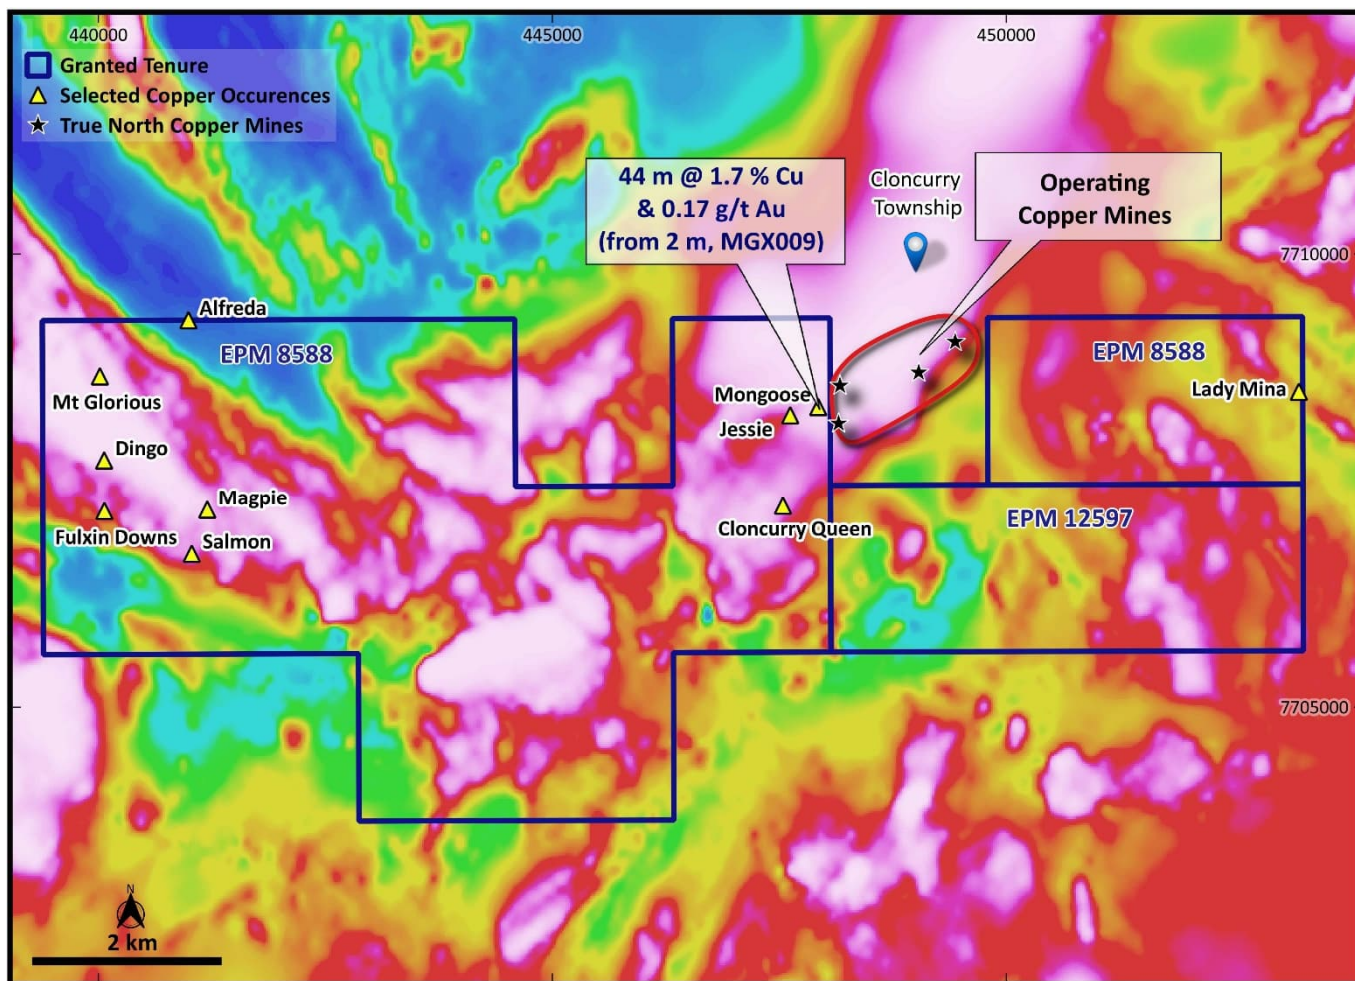

Figure 5. Mongoose prospect and other historical prospects identified to date.

The entire EPM 8588 permit area has numerous historical workings and has been the subject of substantial historical work programs including soil and rock chip sampling, geophysics, mapping and over 15,000m of drilling. This data has been compiled into Renegades GIS and is the subject of ongoing review. Numerous prospects exist which require follow up (Figure 5).

In general, the previous programs were targeting large deposits. Renegade is working on models which will host smaller high-grade deposits which lend themselves to early mining and cash generation opportunities.

Following the commencement of the sole risking or Earn Back in EPM 8588, Renegade is the operator of the permit and controls expenditure, exploration and development of the permit. Renegade will earn back into the permit on terms similar to the existing CJV terms previously announced⁴

⁴ Refer ASX Release dated 17 December 2020; Renegade acquires interest in the Carpentaria Joint Venture.

Mt Glorious Prospect

Mt Glorious is located just 7km west of Mongoose and the Cloncurry townsite and lies 500m off the Barkly Highway.

Mt Glorious was mined up until approximately 2015 with limited availability of records. Mt Glorious consists of three pits, South Pit, Main Pit and North Pit. From the sampling completed to date, field mapping and observation of the geological settings it appears the ore grade was high.

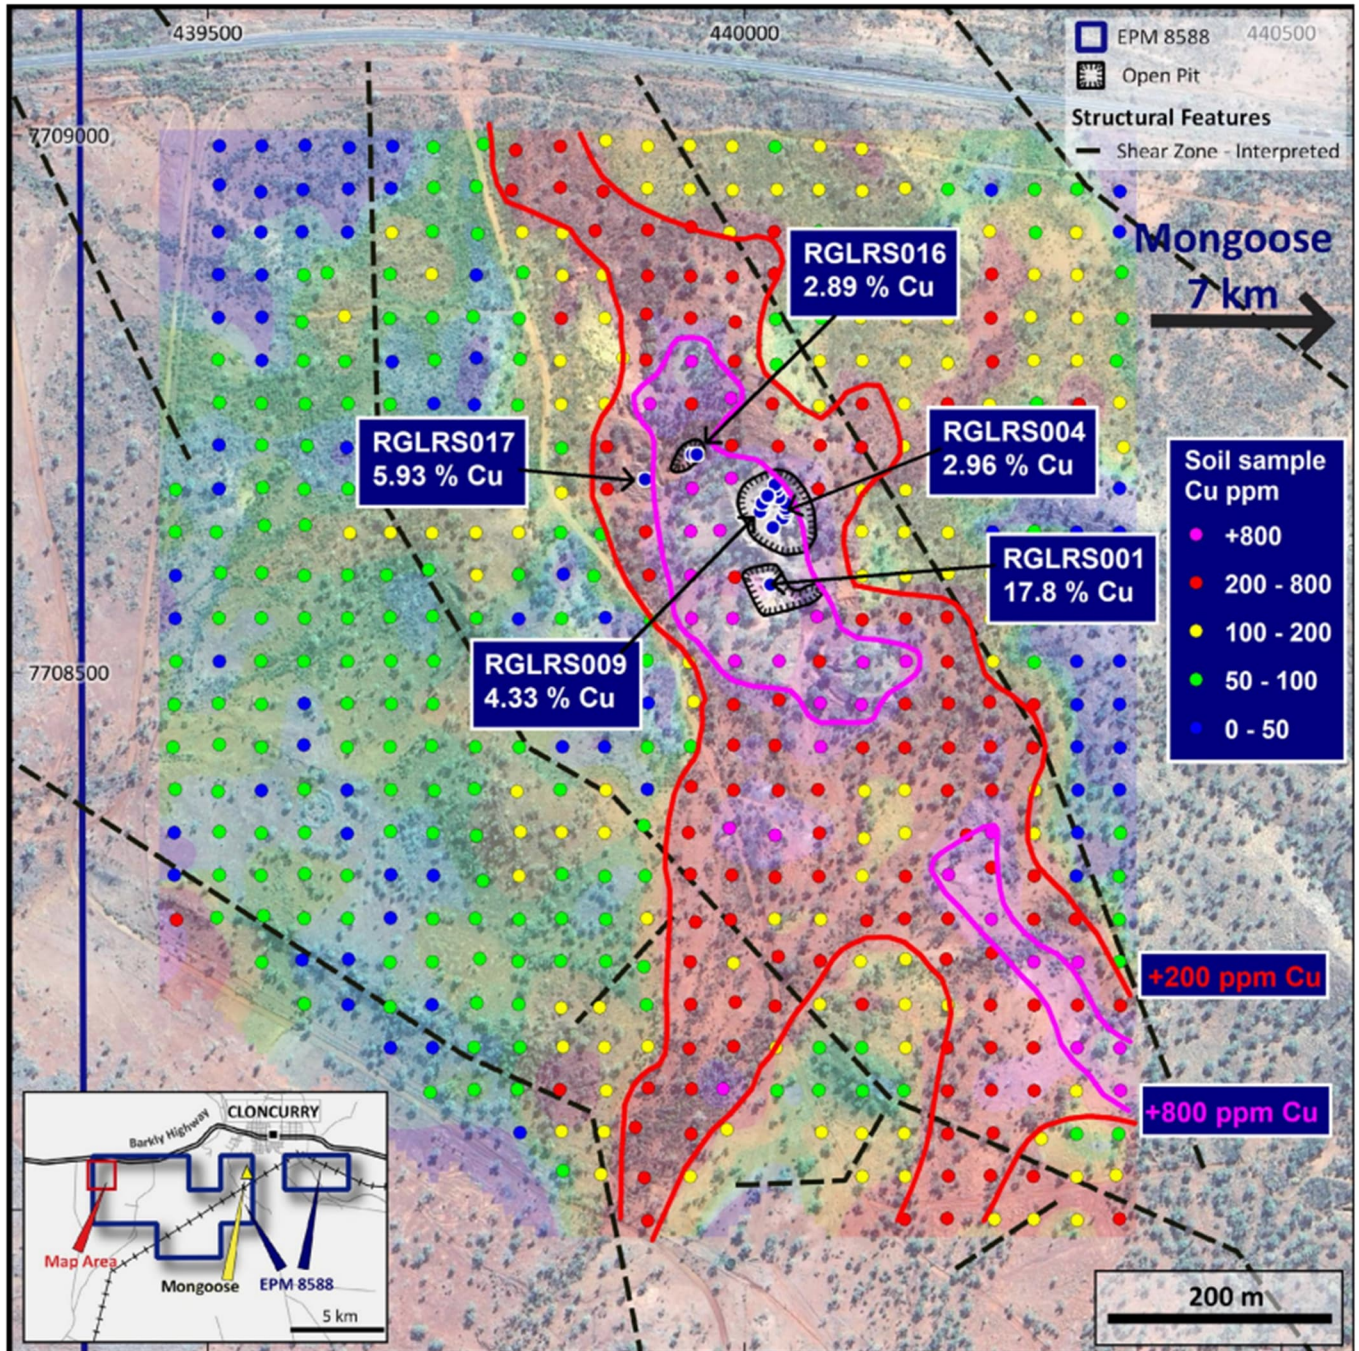

Figure 6. Mt Glorious Prospect showing recent soil sampling, high grade rock chips and Historic pit outlines.

Numerous historical mining pits lie on a north-south/north-west trending structure and exhibit brecciation and alteration. Of additional interest is the parallel iron formation which appears to be high-grade haematite. Samples have been taken to determine the grade and characteristics of the iron ore. Rock chip sampling in pit and surrounds has yielded outstanding results including⁵;

MGLRS001	17.8% Cu, 0.28g/t Au
MGLRS004	2.96% Cu
MGLRS009	4.33% Cu, 0.14g/t Au
MGLRS016	2.89% Cu, 14.35g/t Au
MGLRS017	5.93% Cu

During the quarter pXRF results were released from a soil sampling program comprising over 500 samples that was completed in June 2023. The program highlighted broad zones of mineralisation at the prospect⁶ including:

- 1,000m long, 250m wide +200 ppm Cu anomaly
- 400m long, 140m wide high-grade +800 ppm Cu anomaly
- Spot copper high values include;
 - **RGLSS_297: 5434 ppm Cu**
 - **RGLSS_298: 2798 ppm Cu**
 - **RGLSS_360: 2394 ppm Cu**
- Large 600m long, 250m wide high-grade Cobalt anomaly (+800 ppm)
- Spot cobalt high values include;
 - **RGLSS_81: 1380 ppm Co**

Subsequent to the end of the quarter, Renegade announced that drilling had commenced at the Mt Glorious Cu-Au prospect⁷. The previously undrilled prospect will be subject to reverse circulation drilling across up to 12 holes for 1,000m to 1,500m to test prospectivity.

Mt Glorious Geology

Copper deposits in the western portion of EPM 8588 are separated into two dominant types. The first type of deposits are limestone hosted, where the copper is delivered into the limestone via faults and fractures. Copper precipitation is thought to occur due to a chemical reaction between the copper rich fluids and the carbonate rich rock. These deposits include Magpie, Salmon, Dolomite, and the Dingo historical mines. The second deposit type is where the copper is fault/breccia hosted with the quartzite country rock.

⁵ Refer ASX Release Dated 19 June 2023; Glorious rock chips from Mt Glorious Prospect.

⁶ Refer ASX Release Dated 27 July 2023; Superb soils from Mt Glorious Copper Prospect.

⁷ Refer ASX Release Dated 17 October 20223; Drilling commences at the Mt Glorious Cu-Au prospect.

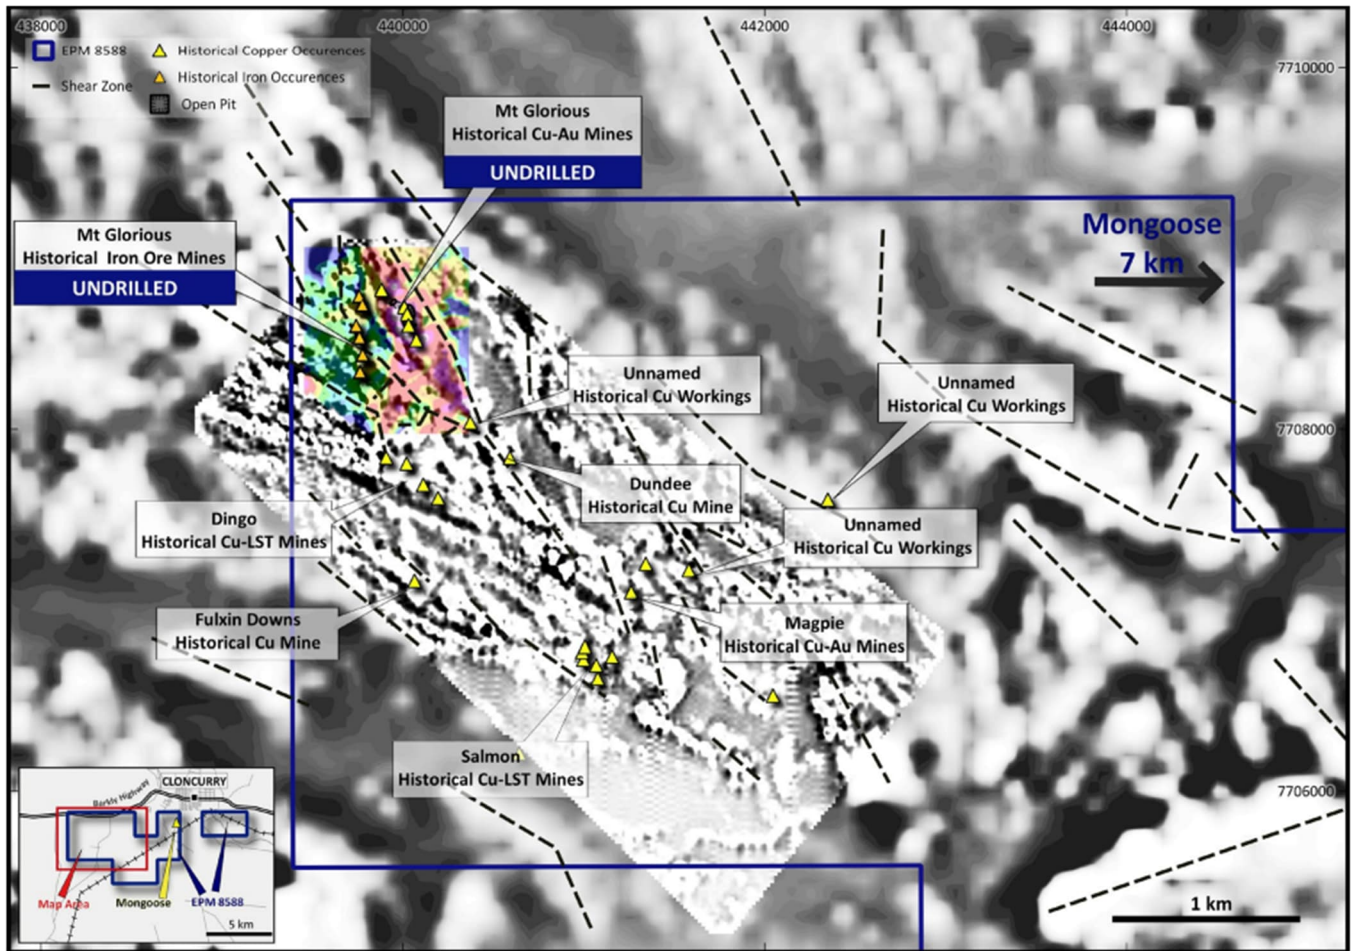

Figure 7. Mt Glorious Prospect showing recent high grade rock chips, pit outlines, copper in soil anomaly (red + 250 ppm Cu, pink + 800 ppm Cu) on Magnetics RTP 1VD background.

Mt Glorious is the second type and is hosted by quartzites and dolerites which have been faulted and brecciated thereby providing the open spaces and fluid pathways required for mineralisation. The mineralisation at Mt Glorious is characterised by a large alteration system covering numerous faults which display differing elemental enrichments. From west to east, the faults display hematite enrichment, followed by a line of faults with copper enrichment, then by a zone of pyrite enrichment. The structures of interest are mainly steep dipping and trend to the NW and dipping steeply to the NE (70-80°). These faults develop into a quartz-hematite breccia and gossan in the central area. A secondary fault system is highlighted by a hematite rich ridge which trends WNW. Mineralisation within the open pits at Mt Glorious consists of supergene copper enrichment. The dominant copper minerals are chalcocite, cuprite, malachite, azurite and chrysocolla.

Carpentaria Joint Venture

Copper | Gold | Cobalt

Queensland, Australia

Renegade has a 23% interest in the Carpentaria Joint Venture (CJV) which covers a package of advanced copper and gold projects in Queensland's Cloncurry mining district. Our operating partner is Mount Isa Mines Limited (a subsidiary of Glencore plc).

Edgarda Copper-Cobalt Prospect (EPM 12180)

Edgarda is located within 9km of the three recent Carnaby Resources discoveries, including Nil Desperandum, Lady Fanny and Mount Hope. In the final quarter of 2023 two holes were drilled by the operator of the CJV.

Drilling consisted of two holes targeting underneath the historical Edgarda mine (Figure 8), recorded as being 400m long, 15m wide, and 8m deep. This area was completely undrilled prior to the recent program.

Figure 8. Magnetics RTP showing recent nearby significant Cu discoveries.

North Isa Project Copper

Queensland, Australia

The North Isa Project which is located directly north of Glencore’s George Fisher Mine and approximately 40km north of Mt Isa township. Renegade met its expenditure requirement with Glencore and now owns 75% of the project.

Due to the focus on the Mongoose and Mt Glorious Prospects no exploration work was undertaken at the North Isa Project in the quarter. Planned programs include soil sampling, geophysics and mapping at the Tulloch Prospect with potential follow up drilling at Lady Agnes.

Figure 10. Location of North Isa Project showing major prospects and proximity to Mount Isa.

Aramac Project

Vanadium | Rare Earths

Queensland, Australia

Renegade has made applications for a number of permits in the Barcaldine region. The permits cover previously discovered Toolebuc formation which is the host to Vanadium deposits to the north in the Julia Creek and Richmond areas. Substantial historical work has been undertaken on the permits which contains well know sedimentary oil shale mineralisation with potential vanadium and rare earth element enrichment. Upon receipt of final permit grants, Renegade is undertaking a major review of previous data with a view to formulating field exploration programs.

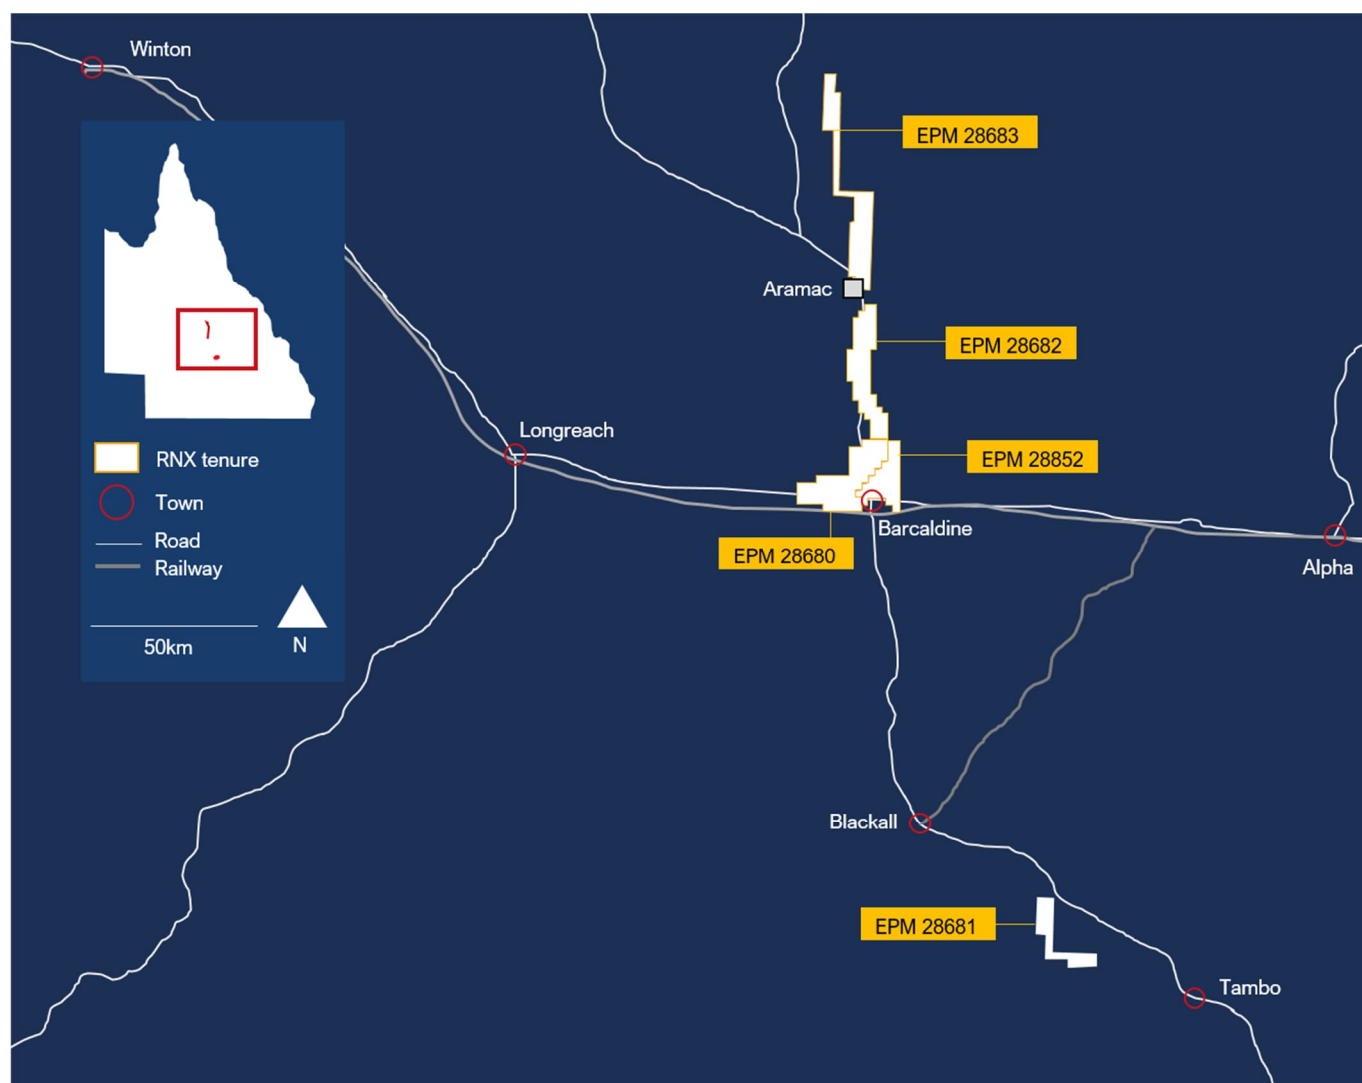

Figure 11. Location of Aramac permits.

Corporate

Financial Position

At the end of the quarter, Renegade had 948.1m ordinary shares on issue and the equivalent funds of \$54,000 at bank as of 30 September 2023.

Renegade has⁸ secured a 12% \$700,000 Loan Facility secured against the funds owed for settlement on the Yukon Project sale. This facility is currently drawn to \$300,000 at end of quarter.

ASX Additional Information

Renegade spent a total of \$187,119 on exploration and evaluation expenditure during the quarter as is summarised in this report:

- EPM8588 (Cloncurry Project) \$ 170,193
- Carpentaria JV \$ 17,026
- No expenditure was incurred on mining production or development activities during the quarter.

Payments totalling approximately \$115,000 were made to related parties of Renegade, as shown in the Appendix 5B. These payments related to director and consulting fees payable to executive and non-executive directors for services provided for field, administration and corporate related activities.

This quarterly report has been authorised by the Board of Renegade Exploration Limited.

Company Profile

About Renegade Exploration Limited

Renegade Exploration is an Australian based minerals exploration and development company focused on projects in northern Queensland. The company's primary objective is to deliver long-term shareholder value through the discovery, acquisition and development of economic mineral deposits.

The company's portfolio has exposure to copper, gold, zinc, cobalt, vanadium and rare earths and stretches from the prolific mining district of Mount Isa in the west to Barcaldine in central west Queensland. Our interest in the Carpentaria Joint Venture covers a package of advanced copper and gold projects in Queensland's Cloncurry mining district led by the Cloncurry Project, which is advanced in terms of prospective targets and previous exploration activity.

The company has expanded its north-west Queensland interests by earning a 75% joint venture interest in the North Isa Project, located just north of MIM's George Fisher mining operations and has several advanced prospects to continue exploration activities. It has also acquired permits near Barcaldine in central west Queensland which are considered to be prospective for vanadium and rare earths.

Competent Person Statement and Geological Information Sources

The information in this announcement that relates to geological information for Mongoose Project is based on information compiled by Mr Edward Fry, who is a full-time employee of the Company. Mr Fry is a Member of the Australian Institute of Mining and Metallurgy. Mr Fry has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results (JORC Code). Mr Fry consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The references in this announcement to Exploration Results were reported in accordance with Listing Rule 5.7 in the following announcements:

ASX Release Title	Date
Renegade acquires interest in the Carpentaria Joint Venture	17 December 2020
Renegade assumes control of Mongoose Project	16 January 2023
Up to 25% Cu confirms Mongoose high grade copper sulphide	8 May 2023
Glorious rock chips from Mt Glorious	19 June 2023
Large high-grade copper zones continue at Mongoose	4 July 2023
Superb soils from Mt Glorious Copper Prospect	27 July 2023
Drilling commences at the Mt Glorious Cu-Au prospect	17 October 2023

The company confirms it is not aware of any new information or data that materially affects the information included in the previous market announcements noted above.

Tenement Summary

Mining claims/permits held at 30 September 2023

3.5	Proceeds from borrowings	300	300
3.6	Repayment of borrowings	-	-
3.7	Transaction costs related to loans and borrowings	-	-
3.8	Dividends paid	-	-
3.9	Other (provide details if material)	-	-
3.10	Net cash from / (used in) financing activities	300	300

4.	Net increase / (decrease) in cash and cash equivalents for the period		
4.1	Cash and cash equivalents at beginning of period	85	85
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(236)	(236)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(95)	(95)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	300	300

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (3 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	54	54

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	54	85
5.2	Call deposits	-	-
5.3	Bank overdrafts	-	-
5.4	Other (Term deposit)	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	54	85

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	87
6.2	Aggregate amount of payments to related parties and their associates included in item 2	28

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

Payments for Directors consulting fees related to management, field work and Directors fees.

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	700	300
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	700	300
7.5 Unused financing facilities available at quarter end		400
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
<p>Renegade entered into a Loan Facility Agreement on 20 July 2023. The facility is for up to \$700,000 at an interest rate of 12%pa for six months and is secured against the Yukon Option Agreement amount outstanding.</p>		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(235)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(187)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(422)
8.4 Cash and cash equivalents at quarter end (item 4.6)	54
8.5 Unused finance facilities available at quarter end (item 7.5)	400
8.6 Total available funding (item 8.4 + item 8.5)	454
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	1
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
<p>Answer: Yes.</p>	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
<p>Answer: The Company is advancing negotiations around the disposal of certain assets and expects this will be realised in the coming quarter.</p>	

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes. The Company is able to expand and contract its activities with respect to both forward work commitments and variable overheads and costs.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 October 2023

Authorised by: The Board of Renegade Exploration Limited
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
