ASX RELEASE

Fire alert causes suspension of drilling at Greater Mongoose.

- **Potential evacuation of Cloncurry town site has caused drilling operations to be suspended.**
- **At last report the fire front was just 8km south of the Mongoose drilling operations.**

Renegade Exploration Limited (ASX:RNX) recently announced it had commenced its latest drilling program of up to 2,000m at its Greater Mongoose prospect within the Cloncurry Project to test new copper targets generated from recent drilling and a new drone survey.

A substantial fire front has opened up south of the Cloncurry townsite and is now within 8km of Renegade's operations.

All Renegade and drilling personnel are ready to evacuate the townsite or assist with its defence if required.

Renegade will provide an update on drilling restart when further information is available.

This announcement has been approved by the Board of Renegade Exploration Limited.

About Renegade Exploration Limited

Renegade Exploration Limited (ASX:RNX) is an Australian based minerals exploration company developing a portfolio of advanced copper and gold projects in north-west Queensland.

Renegade's immediate primary focus is the Cloncurry Project located in mining infrastructure rich Cloncurry. In January 2023, Renegade reached an agreement with Carpentaria Joint Venture partner Mount Isa Mines (MIM) to become sole operator and funder of the project¹, which is very advanced in terms of exploration activity.

The company expanded its north-west Queensland operations with a 75% interest in a joint venture on the North Isa Project, located just north of MIM's George Fisher mining operations near Mount Isa.
