

Investor Presentation - RIU Explorers Conference  
February 2026

ASX: RNX  
[renegadeexploration.com](http://renegadeexploration.com)

**Three deposits and  
drill ready, company  
making exploration targets.**

# Disclaimer

## IMPORTANT NOTICE

You must read the following notices before reading or making any use of this document or any information contained in this document. By continuing to read, use or otherwise act on this document, you agree to be bound by the following terms and conditions, including any modifications to them.

This presentation (Presentation) has been prepared by Renegade Exploration Limited (Renegade) based on information available to it from them and third party sources as at 24 June 2021. This document is provided for informational purposes only and does not constitute or contain an offer, invitation, solicitation or recommendation with respect to the purchase or sale of any security in Renegade. This document is not a prospectus, product disclosure statement or other offering document under Australian law or any other law, will not be lodged with the Australian Securities and Investments Commission, and may not be relied upon by any person in connection with an offer or sale of Renegade securities. The release, publication or distribution of this document (including an electronic copy) outside Australia may be restricted by law. If you come into possession of this document, you should observe such restrictions and should seek your own advice on such restrictions. Any non-compliance with these restrictions may contravene applicable securities laws. By retaining this document, you (the Recipient) acknowledge and represent to Renegade that you have read, understood and accepted the terms of this Important Notice.

## Disclaimer

The information in this document is general in nature and does not purport to contain all the information that a prospective investor may require in evaluating a possible investment in Renegade or that would be required in a prospectus or a product disclosure statement prepared in accordance with the Corporations Act 2001 (Cth) or the securities laws of any other jurisdiction. You should not treat the contents of this document, or any information provided in connection with it, as financial product, investment advice or any other type of recommendation or advice in relation to Renegade securities. Each recipient of this document should make their own enquiries and investigations regarding all information in this document, including, but not limited to, the assumptions, uncertainties and contingencies which may affect the future operations of Renegade and the impact that different future outcomes may have on Renegade.

No representation or warranty is made by Renegade or any of its advisers, agents or employees as to the accuracy, completeness or reasonableness of the information in this document or provided in connection with it. No information contained in this document or any other written or oral communication in connection with it is, or shall be relied upon as, a promise or representation and no representation or warranty is made as to the accuracy or attainability of any estimates, forecasts or projections set out in this document. No liability will attach to Renegade, with respect to any such information, estimates, forecasts or projections.

To the maximum extent permitted by law, Renegade does not accept responsibility or liability for any loss or damage suffered or incurred by you or any other person or entity however caused (including, without limitation, negligence) relating in any way to this document including, without limitation, the information contained in or provided in connection with it, any errors or omissions from it however caused (including without limitation, where caused by third parties), lack of accuracy, completeness, currency or reliability or you, or any other person or entity, placing any reliance on this document, its accuracy, completeness, currency or reliability. Renegade does not accept any responsibility to inform you of any matter arising or coming to Renegade's notice after the date of this document which may affect any matter referred to in, or information included in, this document. Any liability of Renegade, their advisers, agents and employees to you or to any other person or entity arising out of this document including pursuant to the Australian Securities and Investments Commission Act 2001 (Cth), Corporations Act 2001 (Cth), the Competition and Consumer Act 2010 (Cth) or any corresponding provision of any state or territory legislation, or similar provision under any applicable law is, to the maximum extent permitted by law, expressly disclaimed and excluded.

## Future matters

This document contains information relating to certain intentions, expectations, future plans, strategy and prospects of Renegade. Those intentions, expectations, future plans, strategy and prospects may or may not be achieved. They are based on certain assumptions, which may not be met or on which views may differ and may be affected by known and unknown risks. The performance and operations of Renegade may be influenced by a number of factors, many of which are outside the control of Renegade. No representation or warranty, express or implied, is made by Renegade, or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. Given the risks and uncertainties that may cause Renegade's actual future results, performance or achievements to be materially different from those expected, planned or intended, Recipients should not place undue reliance on these intentions, expectations, future plans, strategy and prospects. Renegade does not warrant or represent that the actual results, performance or achievements will be as expected, planned or intended.

**Release of this document has been authorised by Mr Robert Kirtlan, Renegade's Chairman.**

# Three deposits in three jurisdictions with compelling exploration potential.

## Canada

The Yukon Project Canada hosts a zinc and lead JORC Resource with significant high-grade gold, silver, antimony, germanium and gallium plus company making RIRGS exploration upside at the Myschka prospect and Junction prospect.

## USA

Renegade's US footprint consists of five highly-prospective Au-Ag-Cu exploration projects in Nevada's Walker Lane Trend and the Rooster Hill project in Wyoming which hosts a historical critical minerals resource.

## Australia

The Cloncurry Project is located within Queensland's prolific Northwest Minerals Province, one of the world's richest mineral-producing regions. Host to a copper and gold JORC Resource with development potential.

“

Renegade has been building an inventory of deposits and exploration targets which provides exposure to future development and exploration success opportunities across the spectrum of all minerals including copper, gold, silver, zinc and critical minerals.

”

**Robert Kirtlan**  
Chairman  
Renegade Exploration

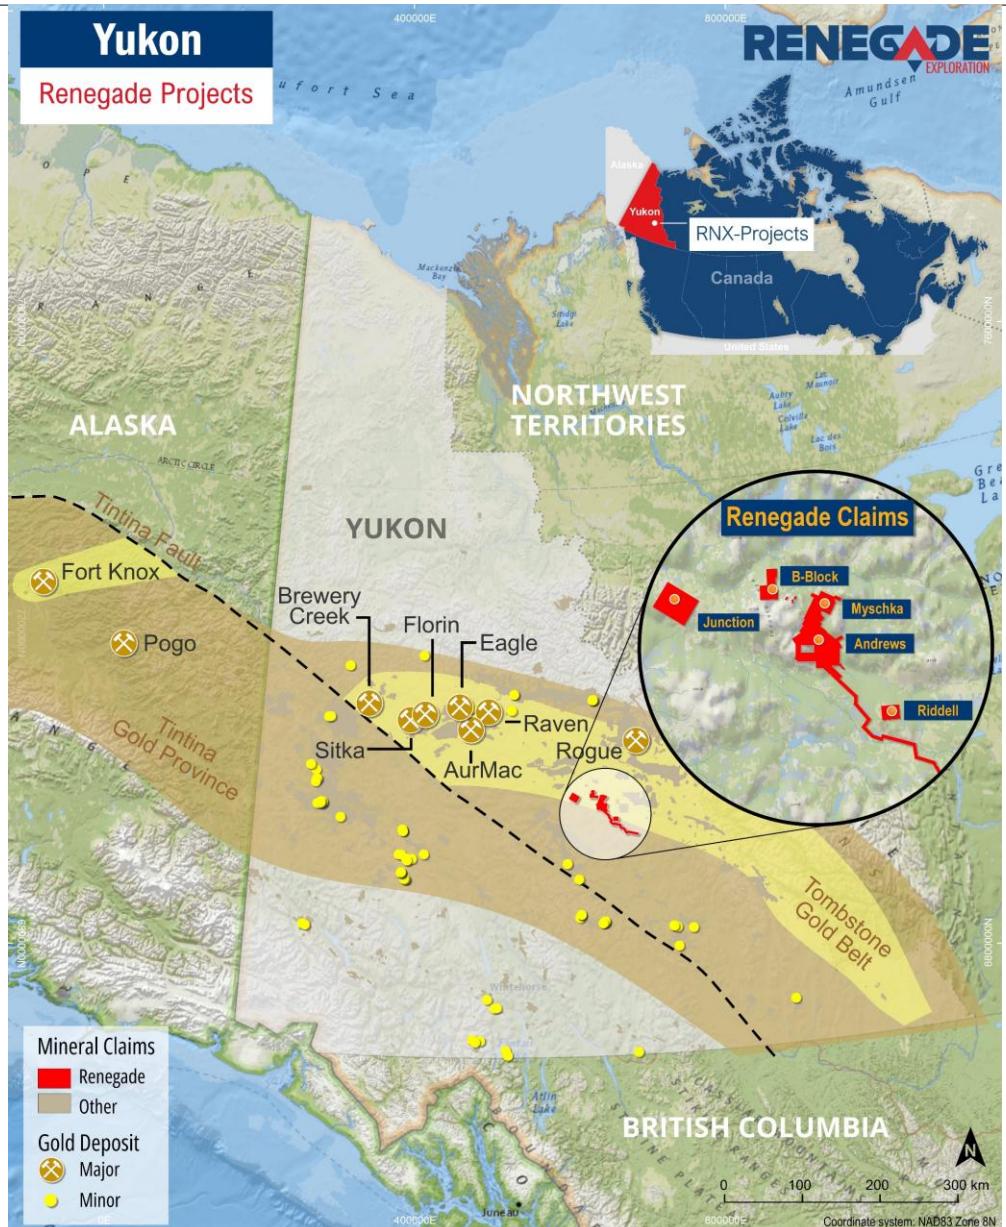

# Yukon Project

Gold, Silver, Antimony.  
Zinc and Lead deposit with  
Germanium, Gallium credits

The project covers approximately 305km<sup>2</sup>.  
Established airstrip and camp facilities on  
site.

Snowline's (TSXV:SGD) ~8 million ounce  
Valley Rogue RIRGS deposit is just 100km  
away and other RIRGS deposits are within  
approximately 200km.

The Canadian Government is forming a  
C\$2 billion Critical Minerals Sovereign Fund  
and proposed the expansion of the Critical  
Mineral Exploration Tax Credit to cover 12  
additional minerals including germanium.

**Figure 1.** Location map with nearby mines, Myschka, Andrew Zinc deposit and other Renegade prospects.

# Yukon Project

## Myschka Prospect<sup>1</sup>

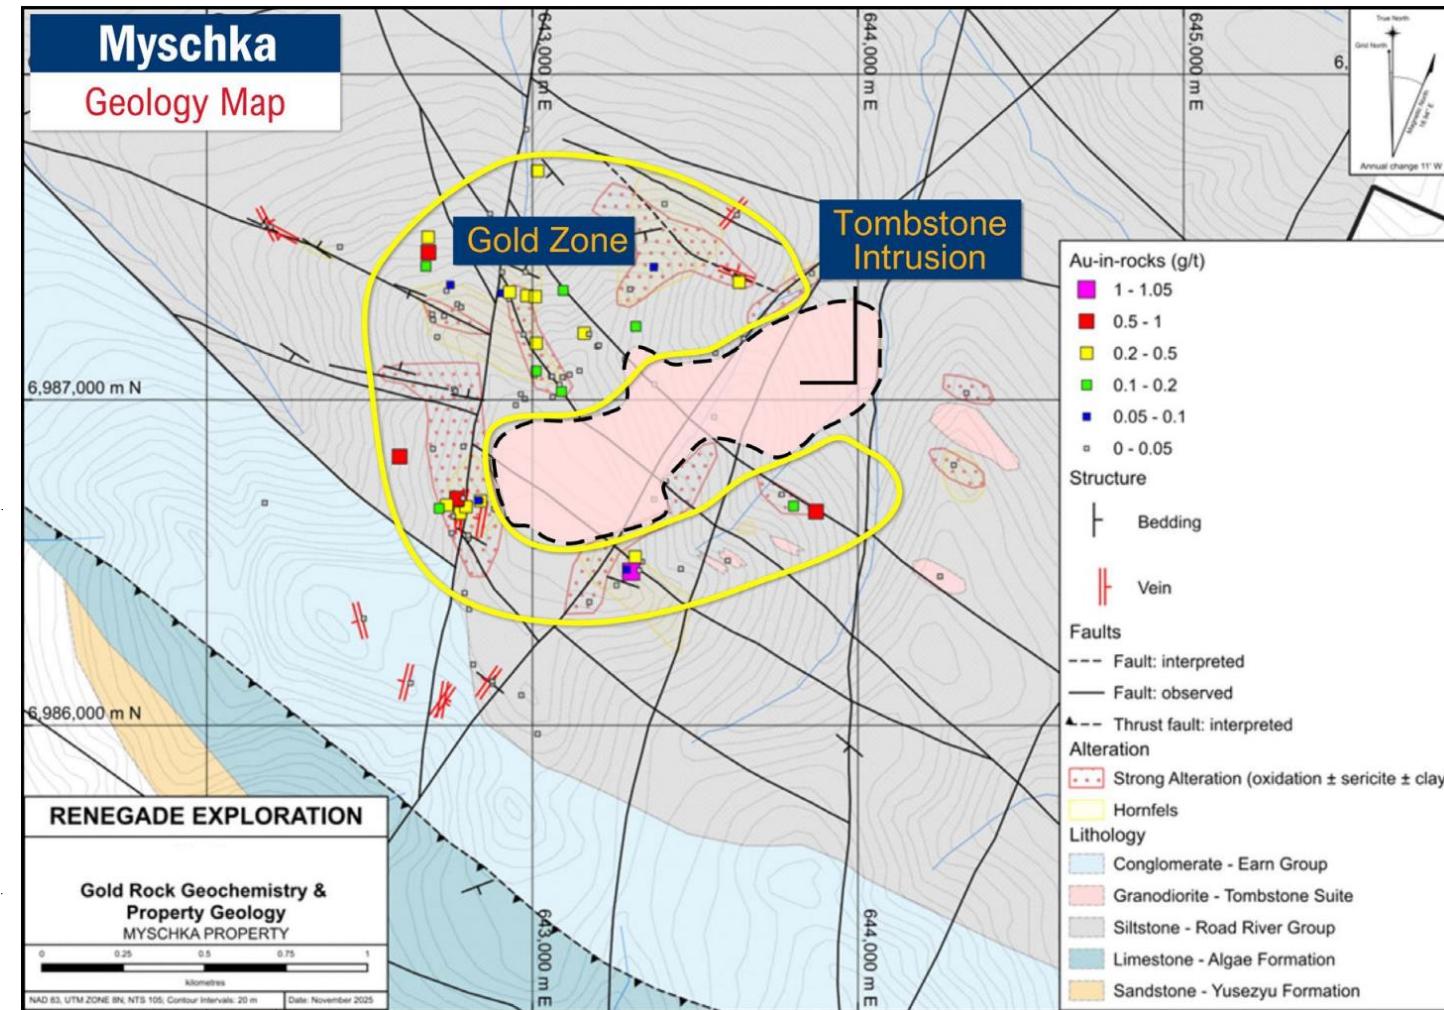

### Gold, Silver, Antimony

Major Tintina Gold Belt RIRGS target over 2.5km<sup>2</sup> planned to be drilled in early 2026.

Returned high-grade gold, silver and antimony rock chips:

- 1,525 g/t Ag, 0.826 g/t Au, 0.22% Sb (Sample: G792121)
- 1,975 g/t Ag, 0.063 g/t Au, 0.18% Sb (Sample: E812131)

The Myschka mineralisation, and control on the mineralisation, appears very similar to the other RIRGS deposits in the Yukon.

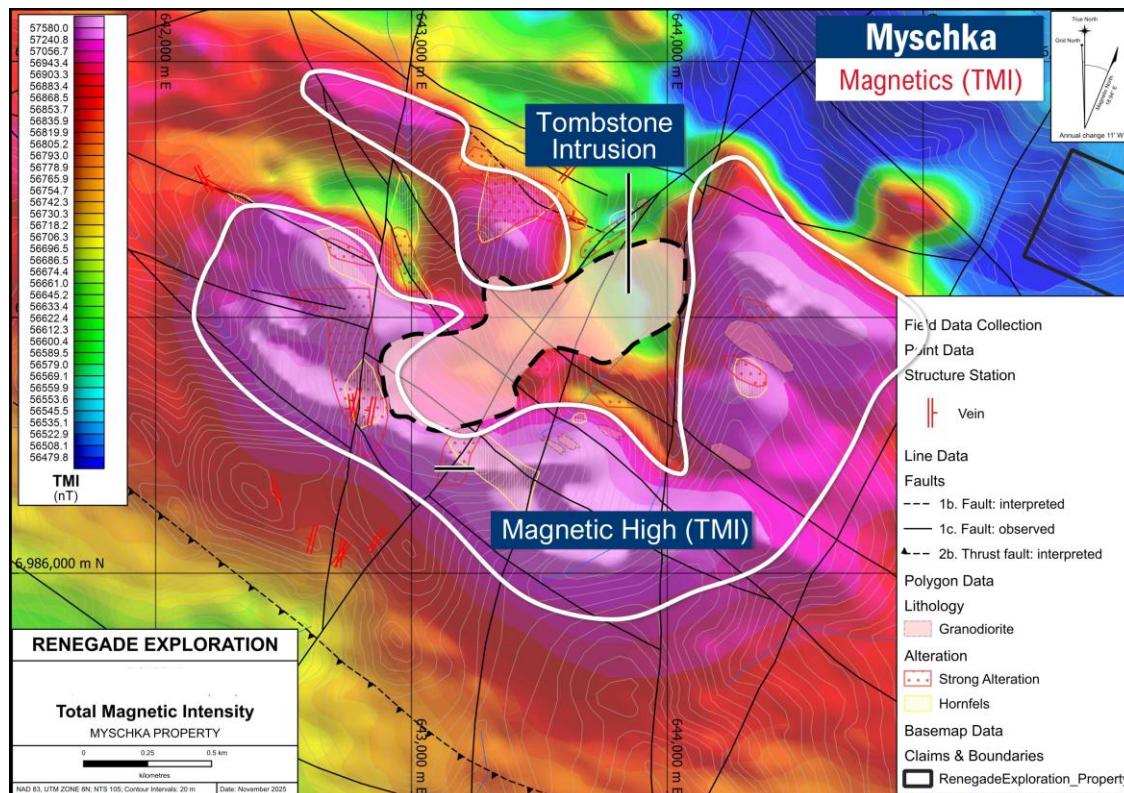

**Figure 2.** The location of all rock chips with gold values highlighted which show a “donut” pattern around the Tombstone Suite stock. The pattern clearly shows the gold is associated with hornfels and sericite alteration zones around the intrusive.

<sup>1</sup>Refer ASX Release Table at page 18

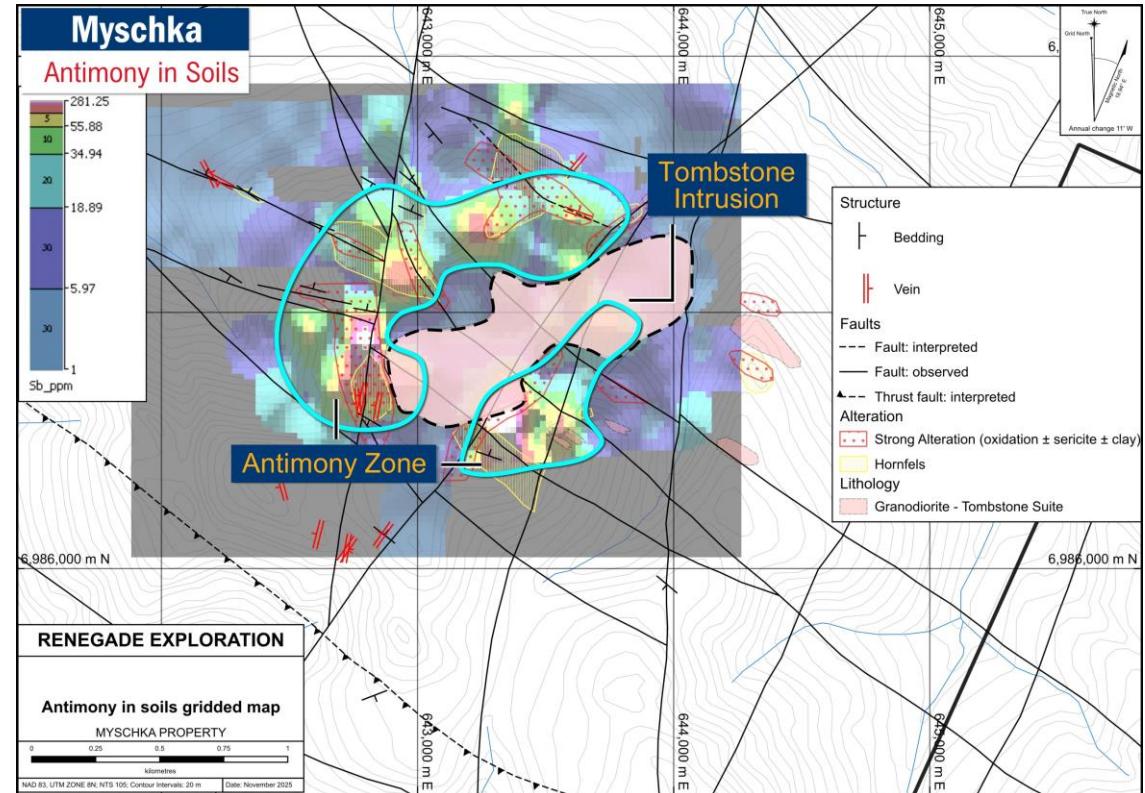

# Yukon Project

## Myschka Prospect<sup>1</sup>

### Magnetics and Soil Geochemistry.

**Figure 3.** The heli-mag survey identified a large 3km x 2km zone of magnetism due to the pyrrhotite alteration halo within the hornfels zone of the stock, which is similar to other RIRGS deposits.

**Figure 4.** Gridded soil antimony (Sb) results show a similar pattern to the magnetics around the Tombstone Suite stock.

# Yukon Project

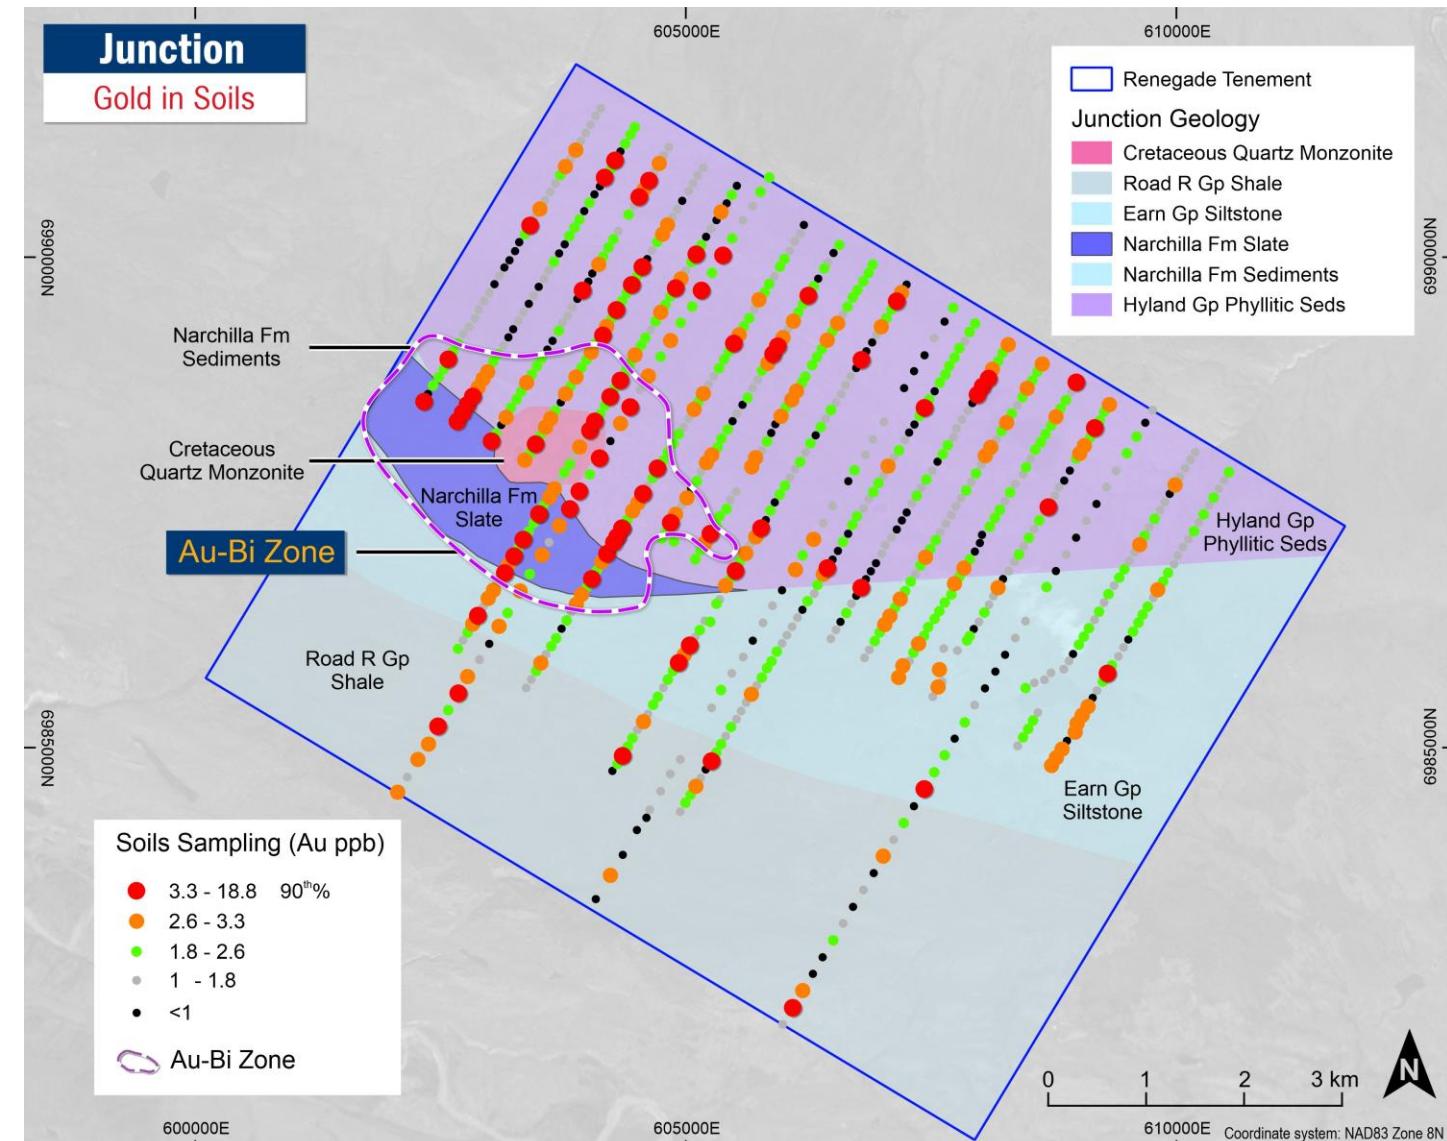

## Junction Prospect<sup>2</sup>

### Gold, Silver, Critical Minerals

New +6km long Tintina Gold Belt RIRGS prospect with up to 11.25 g/t Ag in soils.

Large multi-element system defined with a +4km gold-bismuth-tungsten anomaly, open to the south.

Strong antimony-zinc-silver association mapped across the trend, supporting a district-scale mineralised corridor.

**Figure 5.** Silver-in-soil values show a clear zoning from the Tombstone intrusion and overlaps zinc and antimony anomalies.

# Yukon Project

## Andrew Deposit<sup>3</sup>

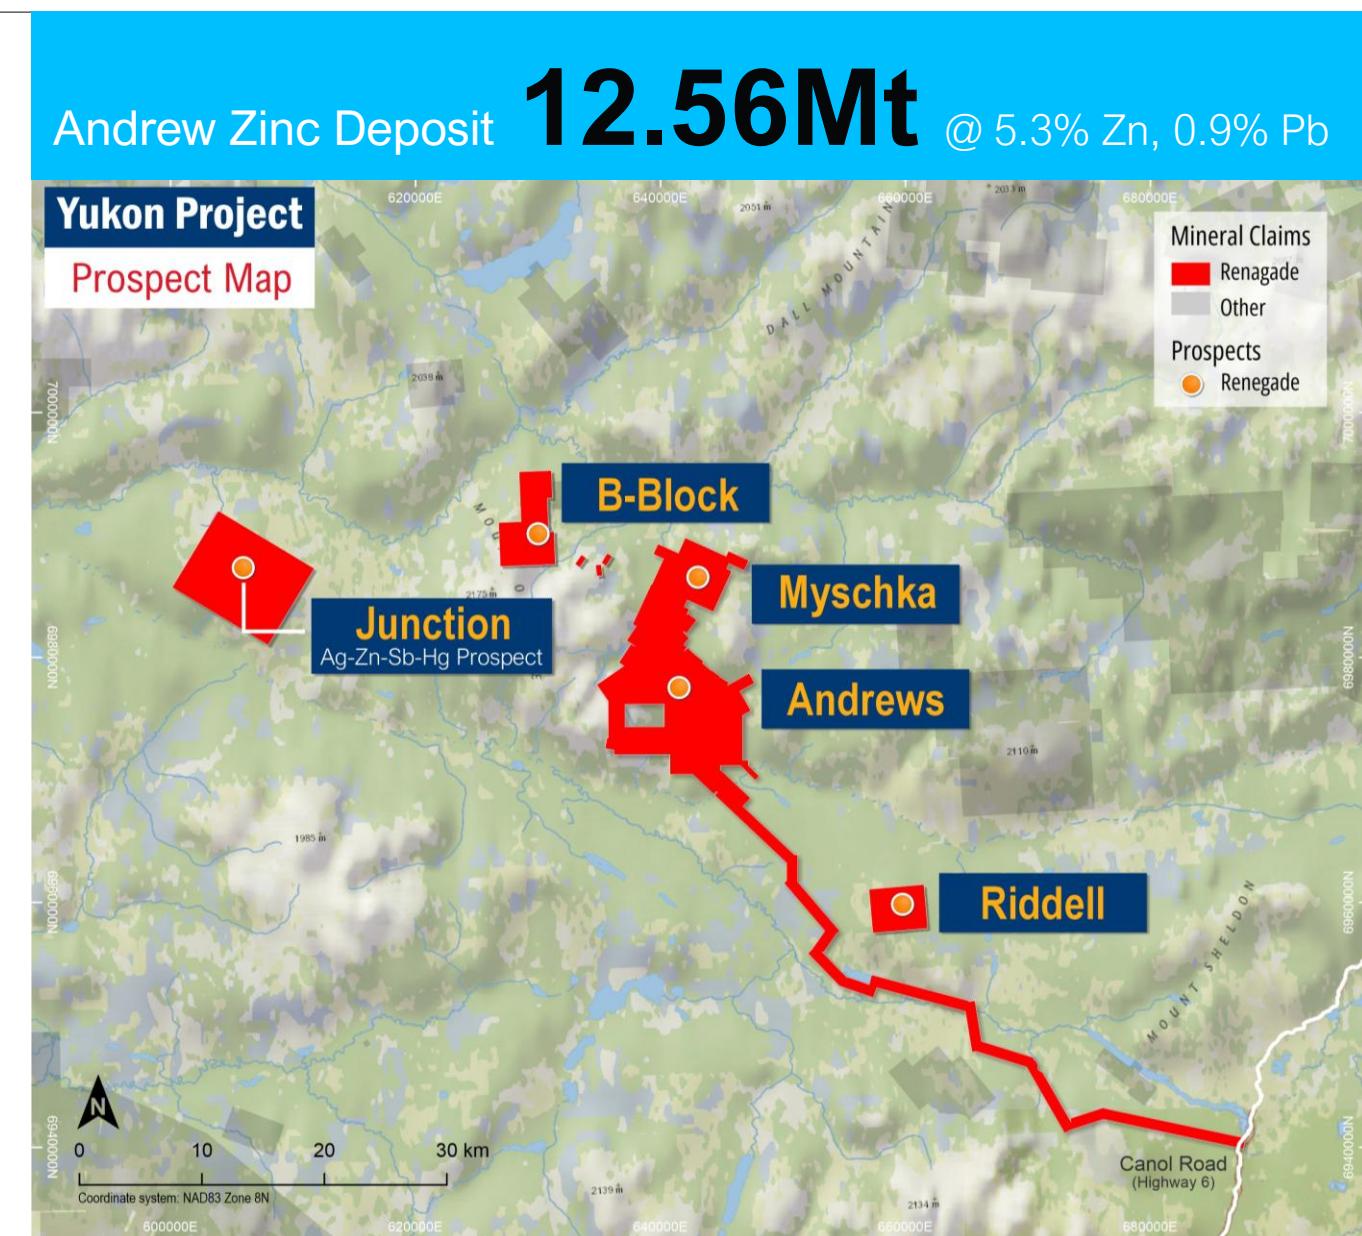

### Zinc and Lead deposit, Gallium, Germanium

Zinc with high grade germanium and gallium in an active development corridor.

Diamond drill results showed significant concentrations of the rare critical defence metals germanium and gallium:

- Germanium up to 48g/t
- Gallium up to 28g/t

Mineralisation remains open at depth and along strike at the three defined zinc deposits. Numerous, sizeable, undrilled, coherent soil geochemistry anomalies are evident elsewhere.

**Figure 6.** Claims map: Location of Myschka, Junction, other Renegade prospects and the Andrew Zinc Deposit.

# USA Projects

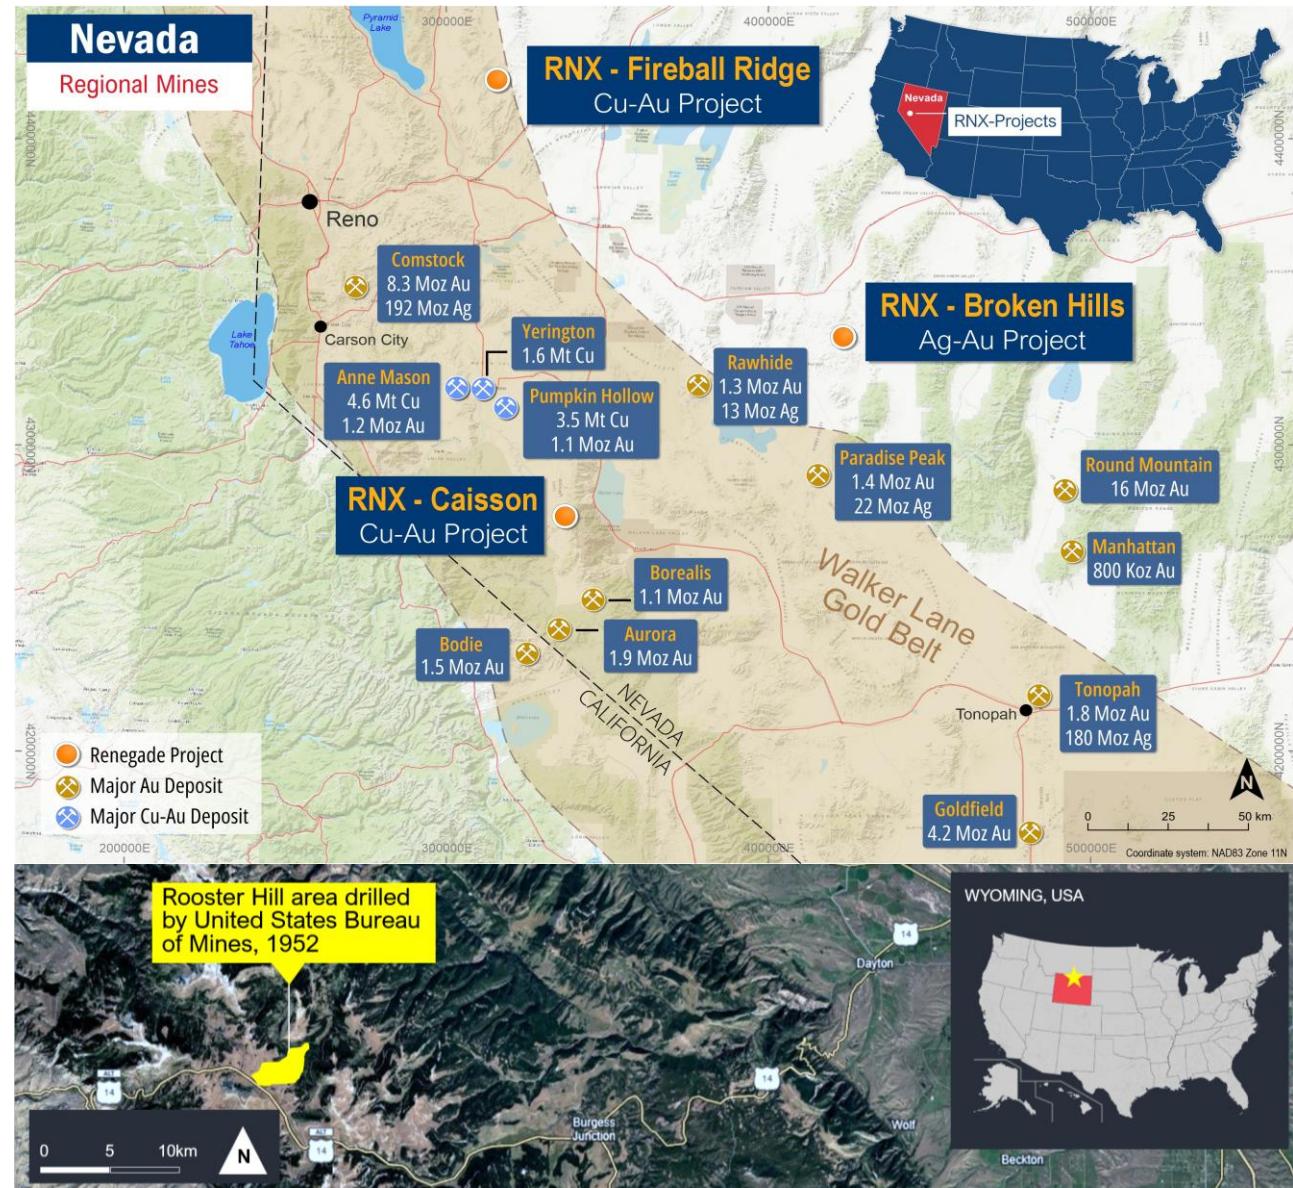

## Gold, Silver, Copper, Critical Minerals

The US is open for business and welcoming investment.

Trump administration is heavily investing into all minerals.

Nevada is an excellent jurisdiction:

- Fast permitting
- Excellent infrastructure
- Experienced mining work force
- Near to Reno, Nevada's Kalgoorlie
- Surprisingly underexplored

**Figure 7.** Claims map: Location of Nevada projects<sup>^</sup> and the Wyoming Rooster Hill project.

# USA Projects

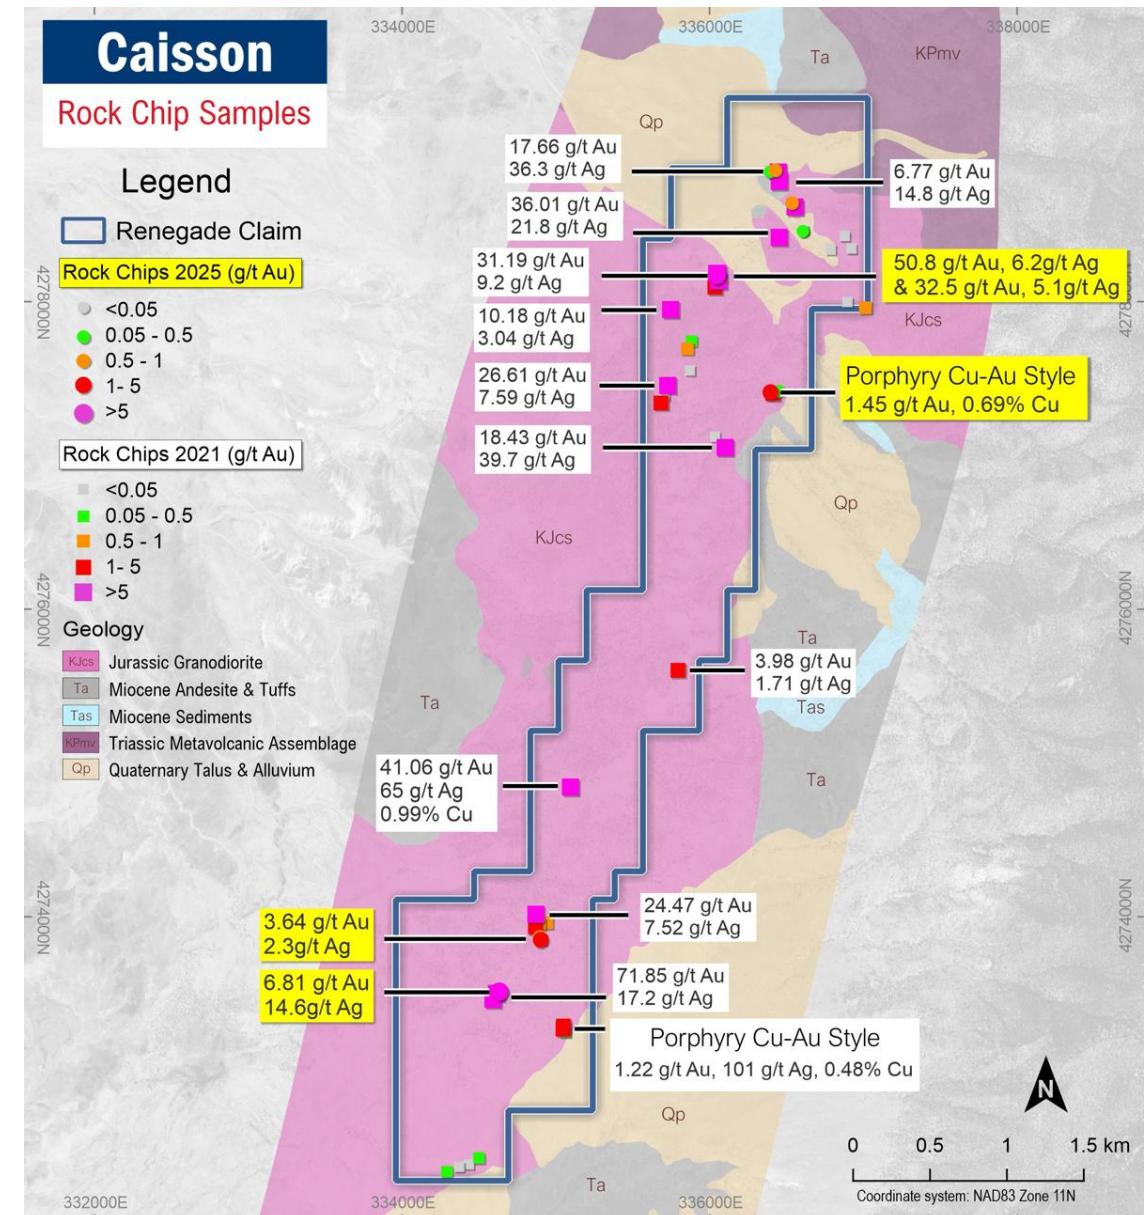

## Caisson Project<sup>4</sup>

### Gold, Silver, Copper

Strong geological setting in Nevada's Walker Lane and Yerington copper belt, a proven district for large gold and copper systems.

7km long gold-silver zone with rock chips up to 71.85g/t Au, 65g/t Ag, and 1% Cu.

Recent work confirms porphyry-style copper gold mineralisation and soil anomalies, advancing the project towards defined drill-ready targets.

**Figure 8.** Location of all Caisson rock chips with significant Au, Cu assays labelled (Black text are 2021 assays, yellow text are RNX 2025 assays).

# USA Projects

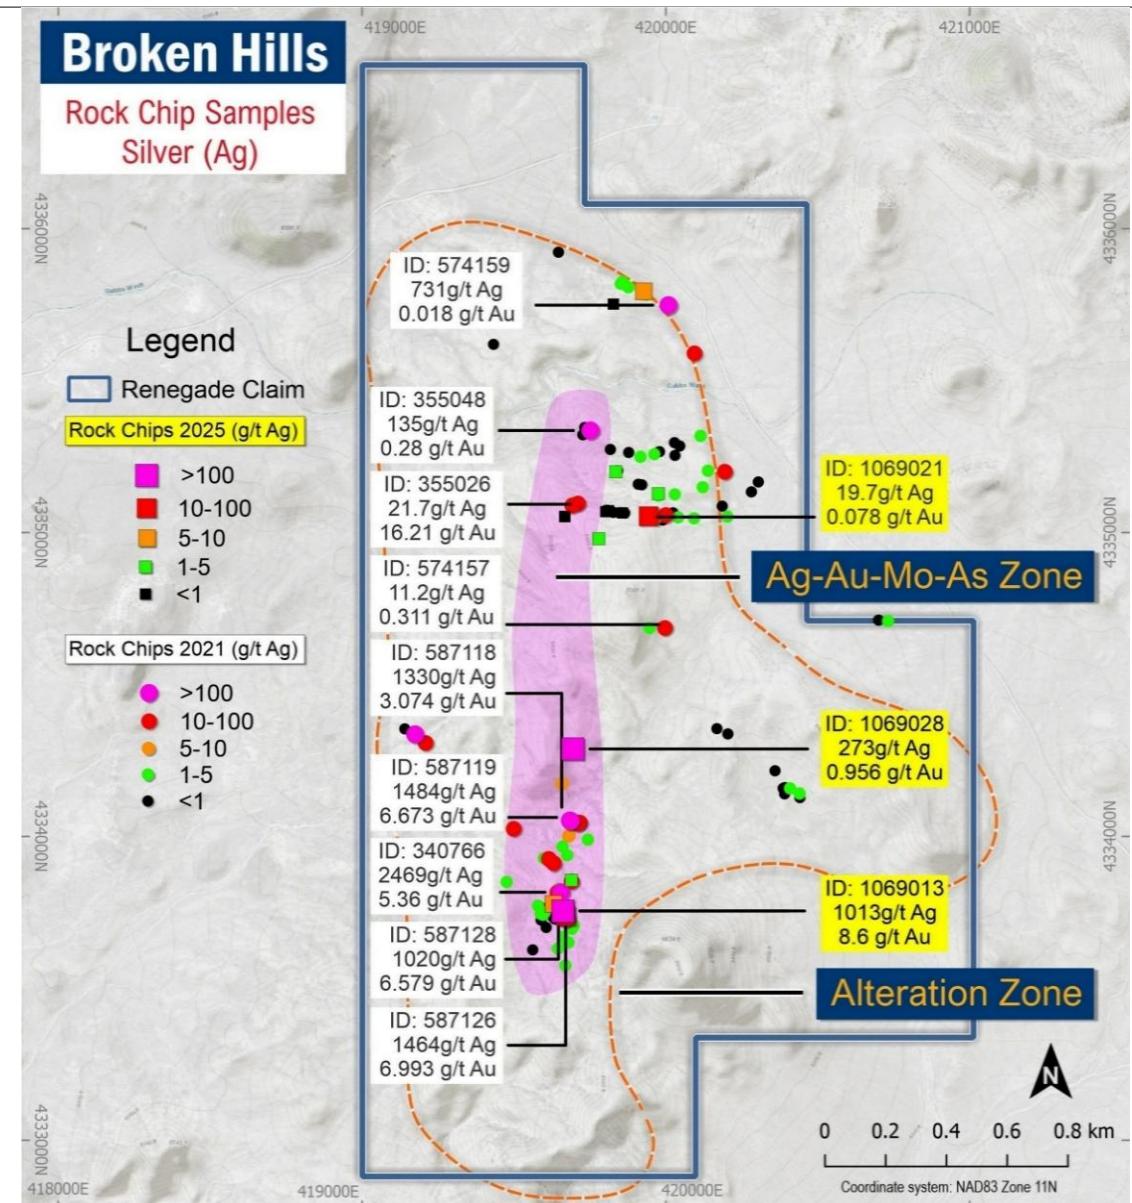

## Broken Hill Project<sup>5</sup>

### Silver, Gold

Large epithermal silver-gold target, now being advanced towards drill target definition.

2km long silver-gold zone with rock chips up to 2,469g/t Ag, 16.21g/t Au.

Recent sampling confirms continuity and extensions along the mineralised trend, strengthening the scale of the system.

**Figure 9.** Broken Hills Project with all 2015 and 2025 rock chip locations. Samples referenced in this text are annotated with gold and silver values.

# USA Projects

## Fireball Ridge Project<sup>6</sup>

### Gold, Silver

Epithermal silver-gold target, now being advanced towards drill target definition.

Numerous historic workings.

Recent rock chip sampling up to 3.28g/t Au.

Gossanous-quartz vein systems and sediment hosted Jasperoid type rocks.

Substantial historic drilling.

Excellent location with easy access.

Recent sampling confirms continuity and extensions along the mineralised trend, strengthening the scale of the system.

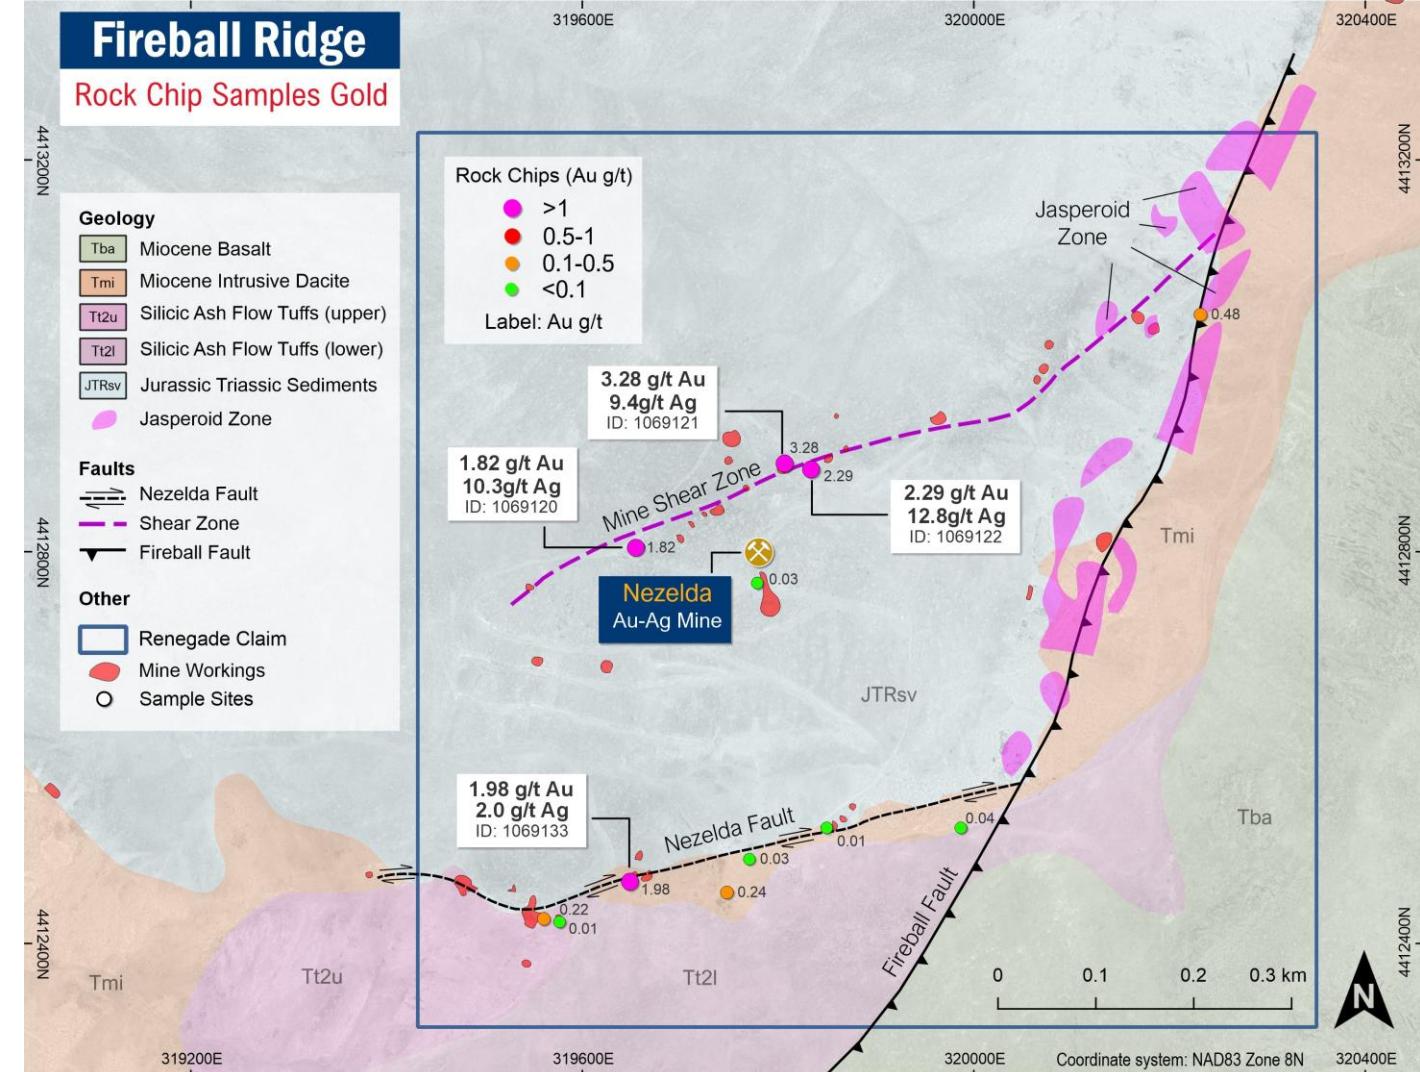

Figure 10. Location of Fireball Ridge sampling and gold grades.

# USA Projects

## Rooster Hill Project<sup>7</sup>

### Critical minerals

Wyoming is a stable and mining friendly jurisdiction.

Extensive historical drilling already completed, including 92 drill holes by the United States Bureau of Mines.

Prospective for monazite, a primary source of lighter rare earth elements (REEs) such as cerium, lanthanum, neodymium and praseodymium.

Near to potential processing facilities in Utah.

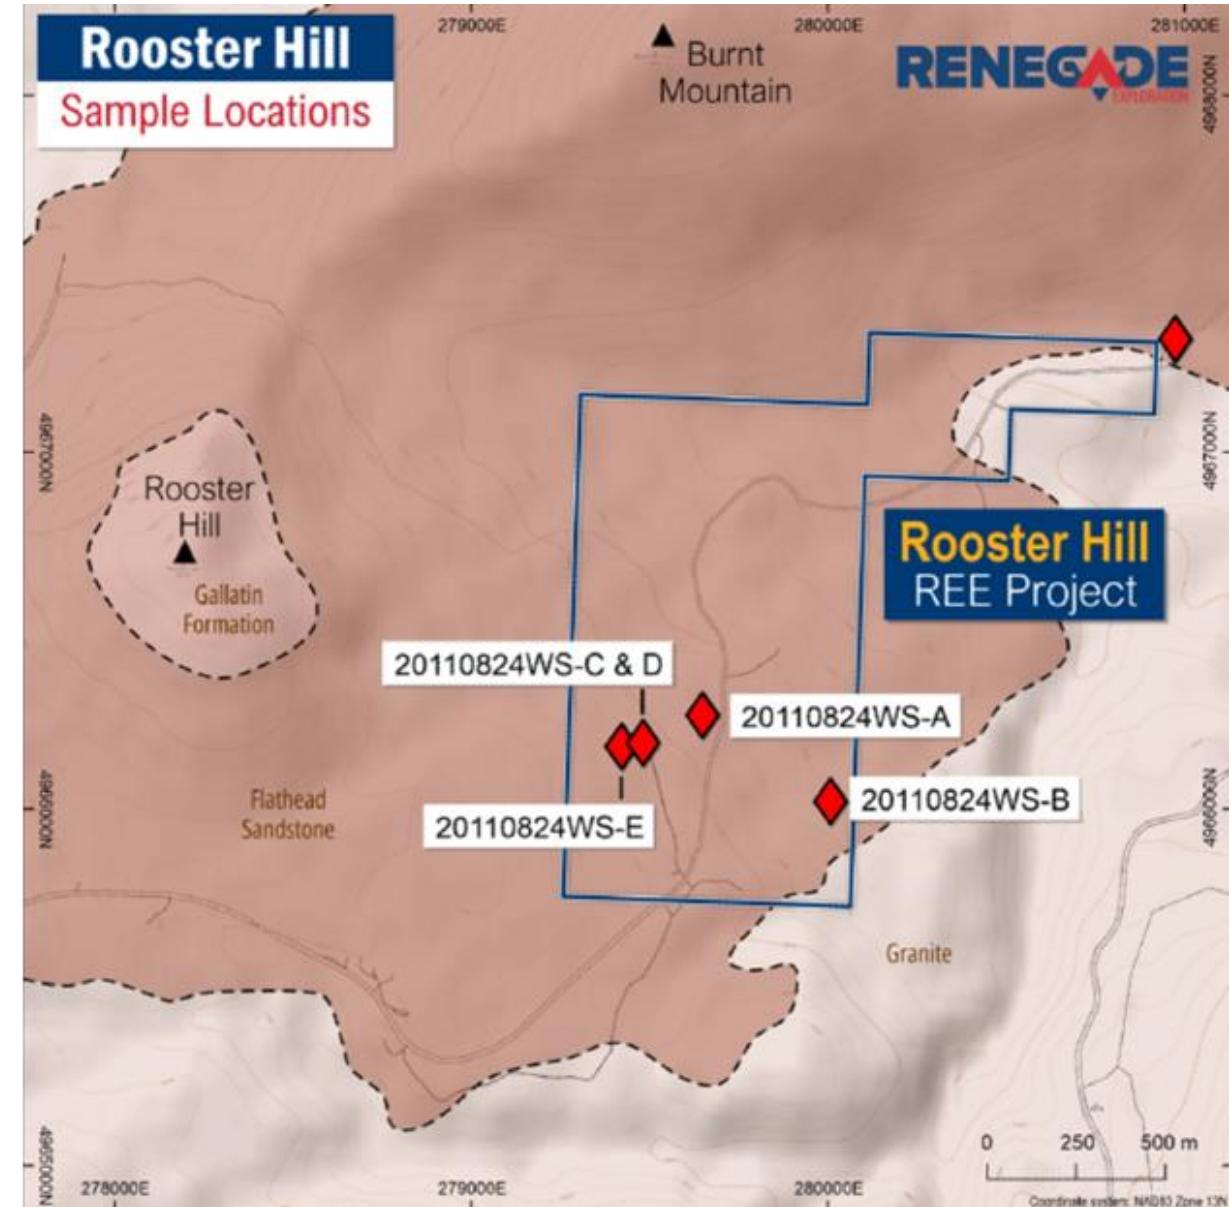

Figure 11: Location of Rooster Hill permits.

<sup>7</sup>Refer ASX Release Table at page 18

# Cloncurry Project

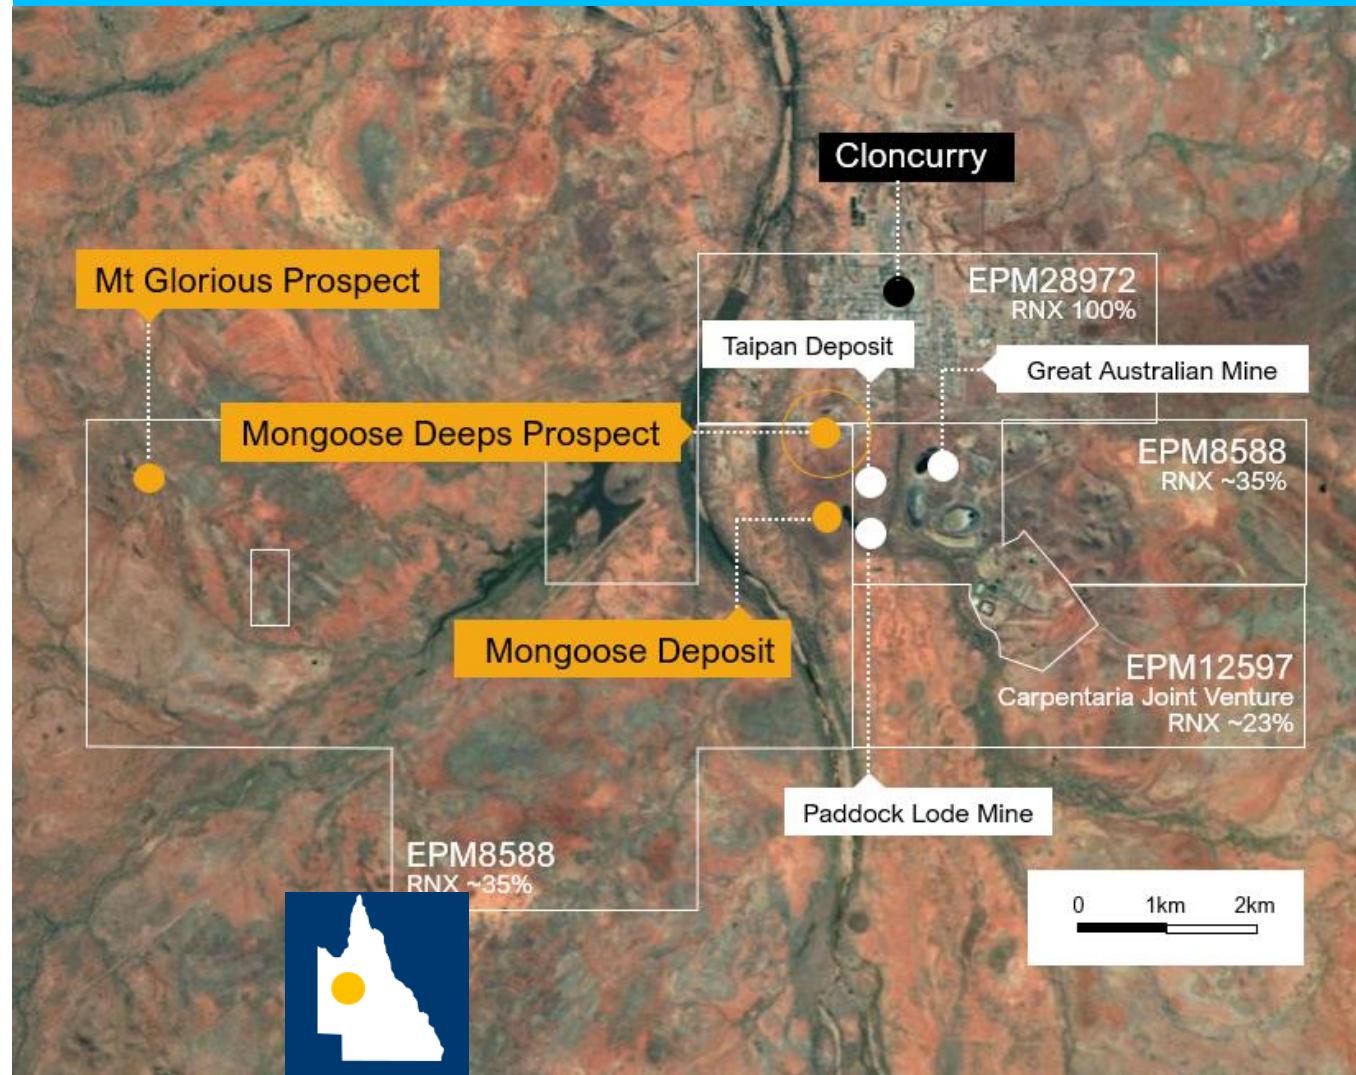

## Copper-gold deposit<sup>9</sup>

Great position in copper rich north-west Queensland. Joint Venture with Glencore, Renegade operates and holds 35.5% of the Cloncurry Project<sup>8</sup>.

Mongoose copper resource within the greater Mongoose Mineralised Zone on strike from neighbouring Great Australia Mine and Taipan Deposit (ASX:TNC).

Advanced project with development potential.

Mongoose Deposit **3.1Mt** @ 0.55% Cu and 0.07g/t Au<sup>1</sup>

**Figure 13. Location of Cloncurry Project permits and Mongoose Deposit.**

<sup>1</sup>Refer ASX Release Table at page 18

# Experienced leadership

**Robert Kirtlan**  
Chairman

Former finance professional working for major investment banks in Sydney and New York focusing on global mining. Involved in the mining industry for approximately 35 years arranging equity and debt financing for junior and major mining companies. Several prior companies successful with asset monetisation plus a number acquired by takeover.

**Mark Connelly**  
Non-Executive Director

Proven track record in the mining industry. Former CEO of Papillon Resources and Adamus Resources. Both companies were acquired by way of takeovers with Papillon valued at over USD570m. Significant operational and development experience. Recent involvement in a number of successful development and M&A plays.

**Mark Wallace**  
Non-Executive Director

Background in economics and finance. Spent almost 20 years working for both major and boutique Investment Banks specialising in the Global Materials and Energy sectors. Bulk of his career in London and Sydney identifying, advising and financing early stage and pre-development mining and energy companies.

**Peter Rolley**  
Consulting Geologist

Senior geology professional with ~40 years' experience across North America, South America, Africa and Australia. Previous roles include Freeport, Teck, Oceania Gold, recently Hillgrove Resources. Masters in Geostatistics from UQ and five years at Schofield complements his excellent exploration and in pit credentials.

# Corporate snapshot

# Competent person and geological information

The information in this presentation for the Yukon Project dated 5 and 11 February 2025 is based on, and fairly represents, information and supporting documentation prepared by Mr Edward Fry, who is a consultant to the Company. Mr Fry is a Member of the Australasian Institute of Mining and Metallurgy. Mr Fry has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results (JORC Code). Mr Fry consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The information in this presentation for the Myschka and Junction Prospects is based on, and fairly represents, information and supporting documentation prepared by Mr Peter Rolley, who is a consultant to the Company. Mr Rolley is a Member of the Australian Institute of Geoscientists. Mr Rolley has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results (JORC Code). Mr Rolley consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The information in the presentation for the Broken Hills and Caisson projects is based on, and fairly represents, information and supporting documentation prepared by Dr E Max Baker, who is a consultant to the Company. Dr Baker is a Fellow of the Australasian Institute of Mining and Metallurgy. Dr Baker has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results (JORC Code). Dr Baker consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The references to the announcements in this presentation relating to Exploration Results were reported in accordance with Listing Rule 5.7 in the following announcements and the Company confirms it is not aware of any new information or data that materially affects the information included in the previous market announcements noted below:

No.	Date	ASX Release
1	11 February 25 21 November 25	Review of historic soils yields high grade gold, silver and antimony Yukon Myschka prospect emerges as compelling drill target
2	10 February 26	Yukon gold-silver-antimony mineralised system identified
3	5 February 25	High grade critical defence metals identified at Yukon Andrew deposit
4	10 June 25	Significant gold rock chip results at new Nevada Project
5	1 July 25 15 January 2026	Multiple 1,000g/t Silver in Rock Chip Samples at Nevada Project Silver rock chip results to 1,000g/t silver in Nevada, USA
6	17 February 26	Significant Gold and Silver rock chip results in Nevada
7	18 December 25	Option to purchase Rooster Hill Monazite Project
8	16 January 23	Renegade assumes control of Mongoose project
^	Figure 7	Nevada mines source: US Geological Survey

The information in this presentation for the Rooster Hills Project is based on, and fairly represents, information and supporting documentation prepared by Mr Shane Hibbard, who is a consultant to the Company. Mr Fry is a Member of the Australasian Institute of Mining and Metallurgy. Mr Hibbard has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results (JORC Code). Mr Hibbard consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

## Mongoose Resource<sup>9</sup>

	Date
Maiden Mongoose Cu-Au mineral resource estimate at Cloncurry Project The references to Mineral Resource estimates were reported in accordance with Listing Rule 5.8 in the announcement above.	12 December 2023

In accordance with ASX Listing Rule 5.23, the Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcement noted above and that all material assumptions and technical parameters underpinning the Mineral Resource estimates in the previous market announcement continue to apply.

The information in this announcement that relates to the Mongoose Mineral Resource estimates is based on information compiled by Mr Jonathan Abbott, who is a Member of The Australian Institute of Geoscientists. Mr Abbott is a director of Matrix Resource Consultants Pty Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves". Mr Abbott consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

## Yukon Resource<sup>3</sup>

	Date
Quarterly activities report Yukon Base Metal Project – Resource Estimation	21 March 2014 2 March 2018

The references to Mineral Resource estimates were reported in accordance with Listing Rule 5.8 in the announcements above.

In accordance with ASX Listing Rule 5.23, the Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcement noted above and that all material assumptions and technical parameters underpinning the Mineral Resource estimates in the previous market announcement continue to apply.

The information in this report that relates to Mineral Resources at the Yukon Base Metal Project is based on information compiled by Mr Peter Ball who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Ball is the Manager of Data Geo. Mr Ball and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Ball consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
