FORWARD LOOKING STATEMENTS

Statements and material contained in this presentation, particularly those regarding possible or assumed future performance, production levels or rates, commodity prices, resources or potential growth of the Company, industry growth or other trend projects are, or may be, forward looking statements. Such statements relate to future events and expectations and, as such, involve known and unknown risks and uncertainties and are based on the assumptions, estimates, analysis and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management of the Company believes to be relevant.

Although management believes that the assumptions made by the Company and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the actual market price of commodities, the actual results of current exploration, the actual results of future exploration, changes in project parameters as plans continue to be evaluated, as well as those factors disclosed in the Company's publicly filed documents. Readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

DISCLAIMER

No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisers and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation, or any opinions or beliefs contained in this presentation, and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission there from. To the maximum extent permitted by the law, the Company disclaims any obligation to update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

COMPETENT PERSON STATEMENT

The information in this announcement that relates to exploration results and the Mineral Resource Estimate for the Mulga Tank Project complies with the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code) and has been compiled and assessed under the supervision of Dr Caedmon Marriott, Managing Director of Western Mines Group Ltd. Caedmon is a member of the Australian Institute of Geoscientists and the Society of Economic Geologists. Caedmon has sufficient experience that is relevant to the styles of mineralisation and types of deposit under consideration, and to the activity being undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Caedmon consents to the inclusion in this presentation of the matters based on his information in the form and context in which it appears.

MONETARY VALUES

Unless otherwise stated, all dollar values are in Australian Dollars (A\$). The information in this presentation remains subject to change without notice.

A NICKEL EXPLORATION COMPANY

WESTERN MINES GROUP COMPANY OVERVIEW

- **Exceptional flagship project** – discovery of a major komatiite hosted nickel sulphide mineral system under cover in WA
- “Globally significant” – **Mineral Resource 1,968Mt at 0.27% Ni over 5.3Mt contained Ni**
- Largest nickel sulphide deposit in Australia and Top 10 in the World
- Camp-scale project targeting both low-grade disseminated and high-grade massive sulphide
- Exploration team lead by **WA nickel expert** Dr Ben Grguric
- **Tight capital structure** with ~\$25m market cap
- Highly leveraged to ongoing exploration success

WHY NICKEL?

NICKEL MARKET IS AT CYCLICAL LOWS BUT SETTING UP FOR STRUCTURALLY HIGHER FUTURE PRICES

- DEMAND
 - Stainless steel ~68% global demand = function of GDP growth
 - Key component of EV battery chemistry and energy transition = demand kicker
 - Analysts routinely underestimate nickel demand
- SUPPLY
 - Indonesia growing to ~75% global production = largely Chinese owned
 - “ONEC” could manage supply and pricing
 - Ore grades falling = costs rising
 - Ore royalty increase = costs rising
 - Increasing push for ESG compliance = costs rising

Price floor and
stable higher prices

- Nickel sulphide is the lowest quartile in CO₂ intensity
- Polymetallic Ni-Co-Cu-PGE deposits some of the highest value per tonne deposits on the plant
- Positive themes for pricing – supply chain security, ESG, supply chain tracing, European Battery Passport, “blood nickel”...

FRONTIER EXPLORATION IN A WORLD CLASS NICKEL PROVINCE

YILGARN CRATON WESTERN AUSTRALIA

- One of the world's major nickel provinces
- World-class examples of komatiite-hosted nickel deposits – Perseverance (50Mt @ 2.3% Ni), Mt Keith (643.7Mt @ 0.58% Ni) and Kambalda (35Mt @ 3.1% Ni)

MULGA TANK Ni-Co-Cu-PGE PROJECT

- New search space – frontier exploration for major komatiite-hosted Ni-Co-Cu-PGE deposits under cover
- Strategically assembled 425km² position on the under-explored Minigwal Greenstone Belt
- Mulga Tank Ultramafic Complex (WMG 100%) is a "camp scale" project

WHAT LIES AT DEPTH WITHIN THIS EXTENSIVE SULPHIDE SYSTEM?

THERE'S A MONSTER HIDING SOMEWHERE

FIG. 4. Schematic relationship between the intrusive and extrusive magmatic systems in the Agnew-Wiluna greenstone belt. Notably, significant Ni-Cu-(PGE) mineralization is thought to be spatially and genetically associated with proximal settings (e.g., Kambalda in the Kalgoorlie terrane or Cliffs, Mount Keith, and Perseverance in the Agnew-Wiluna greenstone belt) rather than distal facies (e.g., Pyke Hill in the Abitibi greenstone belt; Arndt et al., 2008, the Monument ultramafic unit in the Agnew-Wiluna greenstone belt, or the Walter Williams Formation in the Kalgoorlie terrane).

FIG. 3. Schematic diagram illustrating the continued flow of magma through an idealized conduit. A. Initial surge of magma carries entrained sulfide droplets, which may be deposited in widened parts of the conduit to form the "proto-ore". In places, sulfide melt may inject into the floor. B. Continued surges of undepleted magma stir up the previously accumulated sulfide melt, upgrading it in Cu, Ni and PGE, and reprecipitating it downstream in the conduit. Proto-ores that injected into the floor may remain shielded from reaction and upgrading in metal content.

CO-FUNDED EIS DRILLING TO TEST THE DEPTHS OF THE SYSTEM

ACTIVE BASAL ZONE SHOWING CONDUCTIVE MOBILEMT ANOMALY

- Basal sequence intersected over ~2km – significant extent of prospective basal contact
- “Cloud” sulphide and frequency of sulphidic melt pockets potentially vectoring towards sulphide enriched keel and/or feeder vent:

MULTIPLE DRIVERS OF COMPANY SUCCESS OVER NEXT 6-12 MONTHS

PHASE 4 DRILLING PROGRAM - RESOURCE EXTENSION, INFILL AND HIGH-GRADE TARGETS

1. MT KEITH-STYLE OPEN PITABLE DISSEMINATED SULPHIDE RESOURCE – BACKSTOPS COMPANY VALUE

- Resource expansion: RC holes to the south of current resource
- Resource infill: RC and diamond holes between Indicated zones and within current resource
- Resource upgrade
- Ongoing metallurgical test work
- Initial Scoping Study

2. PERSEVERENCE-STYLE HIGH-GRADE TARGET AT DEPTH WITHIN THE MAIN INTRUSION

- Deep diamond hole EIS9 with \$220,000 EIS grant
- “Western Press”: diamond tails targeting basal contact near MTD028
- DHEM and geochemical assays
- Vector towards high-grade horizon at depth

3. KAMBALDA-STYLE KOMATIITE CHANNELS ALONG THE BELT

- MLEM survey of *Panhandle* area
- Two outstanding EIS grants totalling \$400,000 for 1 x deep diamond, 2 x RC with diamond tail and 4 x RC
- Drill test targets within highly fertile mineralised komatiite channel system

EXCITING DISCOVERY OPPORTUNITY

EXPLORATION PHILOSOPHY

- We believe multiple significant nickel deposits will be found at Mulga Tank
- We strive to do high-quality technical exploration work
- We are frugal to maximise exploration spend and minimise equity dilution
- We are per share driven – at the end value created will be divided by shares outstanding
