FOLLOW-UP DRILLING COMMENCES AT THE SPRINGFIELD GOLD DEPOSIT, NSW

1,000m RC program underway to begin testing for deeper extensions of the shallow mineralisation

Xpedra Resources Limited (**ASX: XPD**; "**Xpedra**" or "**the Company**") is pleased to advise that follow-up Reverse Circulation (RC) drilling has commenced at its 100%-owned Springfield Gold Deposit in New South Wales.

With assays now reported from 19 of the Company's initial 27 drill holes, the maiden RC program has increased confidence in the scale, continuity and shallow nature of the Springfield Gold Deposit (see summary of recent results below).

Building on these encouraging results, the Company has commenced a follow-up RC drilling program comprising approximately 1,000 metres. The holes have been designed to begin testing for deeper extensions to the shallow mineralisation defined during the maiden drilling program.

Assay results are pending for the final eight holes from the Company's maiden RC drilling program and are expected to be received in the coming weeks. These include holes drilled further along strike to the north of the holes for which assay results were received recently (see below), as well as a series of four widely-spaced slightly deeper holes.

Xpedra's Managing Director, Scott Funston, said:

"We are excited to be drilling again at Springfield, building on the results generated from our maiden drilling program, which has confirmed the significant potential of this project. This follow-up program is the next logical step as we begin drilling beneath those shallow intersections.

"With assays still pending from the final eight holes of the maiden program, we expect a continued flow of results over the coming weeks as we progressively build our understanding of the Springfield Gold Deposit."

Significant results reported to date from the maiden drilling program at Springfield:

- **44m @ 2.03g/t Au from 1 metre, *including:***
  - ***7m @ 4.04g/t Au from 1 metre, and***
  - ***12m @ 3.46g/t Au from 25 metres* (SFRC018)**

- **24m @ 2.97g/t Au from surface, *including:***
  - ***15m @ 4.27g/t Au from surface, which included:***
    - ***8m @ 6.71g/t Au from surface* (SFRC017)**

- **55m @ 1.32g/t Au from surface, *including:***
  - ***15m @ 2.79g/t Au from 7 metres, which included:***
    - ***6m @ 4.09g/t Au from 7 metres* (SFRC011)**

- **37m @ 1.90g/t Au from surface, *including:***
  - ***11m @ 3.50g/t Au from 3 metres* (SFRC013)**

- **52m @ 1.35g/t Au from 20 metres, *including***
  - ***11m @ 3.03g/t Au from 39 metres* (SFRC004)**

Gold mineralisation has now been intersected over approximately 180m of strike, with mineralisation remaining open in multiple directions.

This announcement was authorised for release by the Board of Directors.

Additional Information

Competent Persons Statement

The information in this announcement that relates to exploration results is based on, and fairly reflects, information compiled by Mr Charlie Voorn, who is a consulting geologist. Mr Voorn is a Registered Member of the Australian Institute of Geoscientists and is an independent consultant geologist. Mr Voorn has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results and Mineral Resources (JORC Code). Mr Voorn consents to the inclusion in the announcement of the matters based on the information in the form and context in which it appears.

There is information in this announcement relating to previous exploration results which were announced on 22 September 2025 titled: "Acquisition of Highly Prospective Springfield Gold Deposit in NSW and $2.2 million Placement", 21 April 2026 titled "Compelling Wide, Shallow Gold Zones Intersected in Initial Drilling at the Springfield Gold Deposit, NSW", 28 May 2026 titled "Drilling Continues to Return Compelling Wide, Shallow Gold Intercepts at the Springfield Gold Deposit NSW" and 11 June 2026 titled "Exceptional Wide, Shallow Gold Intercepts Continue to Build Scale Potential at the Springfield Gold Deposit, NSW". Please refer to those announcements for full details and supporting information. Other than as disclosed in those announcements, Xpedra confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements, and that all material assumptions and technical parameters continue to apply and have not materially changed. Xpedra also confirms that the form and context in which the Competent Person's findings were included have not been materially modified from the original market announcements.

Forward Looking Statements

Information included in this announcement constitutes forward-looking statements. When used in this announcement, forward-looking statements can be identified by words such as "anticipate", "believe", "could", "estimate", "expect", "future", "intend", "may", "opportunity", "plan", "potential", "project", "seek", "will" and other similar words that involve risks and uncertainties.

Forward-looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of resources and reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation as well as other uncertainties and risks set out in the announcements made by the Company from time to time with the Australian Securities Exchange.

Forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, its directors and management of the Company that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements. The Company does not undertake to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this report, except where required by applicable law and stock exchange listing requirements.
