

30 April 2026

Multiple new contracts with US energy utility customer

Highlights

- Long-term US energy utility customer PG&E awards Pointerra contracts totaling US\$0.49 million (A\$0.70 million)
- Pointerra3D Core and Analytics will be deployed for use across the enterprise
- Contracts establish important basis for expansion of use and growth in ARR spend by PG&E

Pointerra Limited (ASX: 3DP) ("Pointerra"; "Company") is pleased to outline multiple contract awards from existing US energy utility customer Pacific Gas & Electric ("PG&E").

PG&E have recently deployed Pointerra3D Core out to mid-2027 to host, manage, maintain and share their entire geospatial land survey data catalogue (dating back to 2006) for enterprise-wide access and use.

Pointerra3D CORE is Pointerra's baseline cloud platform that serves as a Common Data Environment for storing, managing, visualizing, and sharing massive 3D geospatial datasets (like point clouds, imagery, and BIM) in a unified, browser-based interface with enterprise collaboration tools.

PG&E have also committed to an annual contract through 2026 to deploy Pointerra3D Analytics across the data catalogue focused on emergency management change reporting and replacing legacy desktop workflows with cloud native processing solutions.

Pointerra3D ANALYTICS is the advanced tier of Pointerra's cloud platform that builds on CORE by using AI/ML-driven processing for automated classification, segmentation, feature extraction, change/clash detection, and photogrammetry production on massive 2D and 3D datasets to create living digital twins, enabling intelligent analysis and streamlined workflows for physical asset management.

The contract awards are subject to normal commercial terms and conditions.

This announcement has been authorised and approved for release to the ASX by the Board of Pointerra Limited.

ENDS

About Pacific Gas and Electric (PGE): Pacific Gas and Electric Company (PGE), a subsidiary of PG&E Corporation (NYSE: PCG), is one of the largest combined natural gas and electric energy companies in the United States.

Incorporated in California in 1905 and headquartered in Oakland, PGE delivers safe, reliable, affordable and clean energy to approximately 16 million people across a 70,000-square-mile service area in Northern and Central California through 5.5 million electric and 4.5 million natural gas customer accounts.

PGE is focused on public safety, grid resilience and advancing the state's clean energy future.
