

Fabrication of Samphire FRT Pilot Processing Plant Complete

Alligator Energy Limited **ASX: AGE (Alligator or the Company)** is pleased to advise that the fabrication and acceptance testing of the Field Recovery Trial (FRT) pilot processing plant has been completed and the containerised modules have been transported to Whyalla in advance of finalising all approvals for the on-site construction.

Highlights

- Fabrication of the pilot processing plant by Adelaide Control Engineering (ACE) for the Samphire Project FRT has been completed.
- The seven containerised plant modules including the reverse osmosis plant have passed factory acceptance testing and are now being deployed to Whyalla where they will be stored ahead of finalisation of all regulatory approvals and completion of site construction works.
- Geotechnical investigations have been completed to finalise the site engineering design in readiness for construction works and construction tender.
- Fabrication of the pilot processing plant in this modularised form may create business opportunities for the further use of the plant at completion of the FRT.
- The Company continues to work with the Regulator to provide the additional information requested by SA Govt Departments to enable finalisation of the Retention Lease for the FRT.

Alligator's Acting CEO, Andrea Marsland-Smith stated: *"Completion of the fabrication of the FRT pilot processing plant by ACE is a significant milestone in our planning for the field recovery trial. We would like to acknowledge the Alligator engineering team, ACE and Ammjohns Project Engineering in achieving completion of this important phase of the Project. The modularised transportable "plug and play" nature of the plant and its integrated control system will lend itself for use on other sites into the future. Construction, commissioning and operating plans are now well underway in preparation for on-site assembly of the FRT infrastructure upon granting of the Retention Lease and approval of the Program for Environment Protection and Rehabilitation plan (PEPR)."*

Delivery of modularised FRT pilot plant at Alligator's office/warehouse premises, Whyalla.
