\$65.7 billion	\$17.2 billion	\$72.8 billion		

Bendigo Bank 1Q26 Update

"Cash earnings are lower this quarter and flat on the prior comparative period (pcp), with stronger income offset by higher expenses. Net interest income was higher than pcp benefiting from higher net interest margin (NIM).

Deposit mix improved over the quarter, with lower cost deposits growth of 3.4% annualised now representing 53.0% of customer deposits, while term deposits reduced to 34.7% of customer deposits. Residential loan balances contracted 5.6% annualised over the quarter, representing our cautious approach to competitive dynamics in third party channels. The balance sheet remains well positioned for a return to growth in the second half of the financial year.

During the quarter, we delivered several strategic milestones which will position the bank for sustainable growth in the second half of this financial year and beyond. The Bendigo Lending Platform has been successfully rolled out across the branch network in all states, except for Victoria and Tasmania which will be rolled out in November. Bendigo's refreshed in-app onboarding process went live at the end of October, with positive feedback on the experience including the ability to onboard new customers in a matter of minutes".

Richard Fennell, Managing Director and CEO

Financial Performance for 1Q26

- Unaudited cash earnings of \$120.7 million, down 3.2% on 2H25 quarterly average. Unaudited statutory NPAT of \$110.0 million in the quarter.
- NIM was 1.91%, up 3bps on 4Q25, with the benefit of improved deposit mix through growth in savings accounts, term deposit repricing and a more favourable asset mix offsetting the impact of a lower cash rate. The exit NIM was slightly lower than 1Q26 average.
- Net interest income was up 3.4% on 2H25 quarterly average driven by higher NIM.
- Other income was up 6.8%, driven by higher card transaction volumes and seasonality of Community Bank franchise fees.
- Operating expenses were 7.6% higher due to seasonal factors and several one-offs, or 3.0% when adjusted for these items. These include:
 - Higher staff costs impacted by higher average quarterly workdays, movement in the value of leave balances and redundancy costs.
 - o An unplanned additional remediation provision of \$3.7 million.
- Credit expenses (\$0.3 million reversal for the quarter) benefited from a collective provision release in Agribusiness, partly offset by higher specific provisions in Consumer and Business.
- Balance sheet remains strong with a customer deposit funding ratio¹ of 77%, a quarterly average LCR of 136.5%, and spot NSFR of 117.7%. The CET1 ratio was 10.93%, down 7 bps on the prior quarter.

Quarterly Credit Risk Tables (1Q26)

The following credit risk tables are reported semi-annually in the Basel III Pillar 3 Disclosures. They are included here to provide a quarterly overview of the 'Credit quality of assets' and 'Credit risk exposures'.

The 'Overview of risk weighted assets (RWA)' table is reported in the quarterly Basel III Pillar 3 Disclosures (released 11 November 2025).

CR1 Credit Quality of Assets

Table CR1 presents a breakdown of performing and non-performing exposures, along with the related provisions for credit losses. The reported exposures consist of on-balance sheet financial assets and off-balance sheet exposures that are subject to the credit risk framework.

Amounts are in millions.

	_	30 Sep 2025						
		а	b	С	d	е	g	
		Gross carrying	values of	(Of which ECL accour for credit losses on	• .		
		Non-performing exposures ¹	Performing exposures	Allowances/	Allocated in regulatory category of Specific ²	Allocated in regulatory category of General	Net values (a+b-c)	
1	Loans	1,204	82,016	360	79	281	82,860	
2	Debt Securities	-	10,649	-	-	-	10,649	
3	Off-balance sheet exposures ³	20	11,879	-	-	-	11,898	
4	Total	1,223	104,543	360	79	281	105,406	

^{1. &#}x27;Non-performing exposures' defined in APRA Prudential Standard APS 220 Credit Risk Management.

^{2. &#}x27;Regulatory category of specific provisions' includes ECL accounting provisions for credit losses held against Stage 3 and Stage 2 exposures that are under-performing. ECL is not computed for off-balance sheet exposures or debt securities.

^{3. &#}x27;Off-balance sheet exposures' are gross of any credit conversion factor (CCF) or credit risk mitigation (CRM) techniques.

CR4 Standardised Approach - Credit Risk Exposure and Credit Risk Mitigation (CRM) Effects

Table CR4 presents on-balance sheet and off-balance sheet exposures before and after CCF and CRM as well as associated RWA and RWA density by asset classes.

Amounts are in millions.
