Cavalier and WTAC Complete Heritage Surveys Ahead of Site Preparation at Crawford

Highlights

- ▣ All heritage surveys across the Crawford Stage 1 operational area have now been completed in partnership with the Wangkatja Tjungula Aboriginal Corporation (WTAC), including the access road corridor
- ▣ Site preparation works, comprising heritage preservation activities and collaborative site works, will now commence
- ▣ Subject to final approvals, Cavalier and WTAC will continue working together toward the commencement of pre-production activities following site preparation, including heap leach pad development and broader site establishment works currently targeted for Q3

Daniel Tuffin, Executive Technical Director and CEO, commented:

“Since the execution of the Native Title and Mining Agreement, all heritage surveys have now been successfully completed together with WTAC across all Stage 1 operational areas, marking another important step toward the commencement of operations at Crawford.

The relationship between Cavalier and WTAC continues to strengthen through on-country engagement and collaborative planning around cultural heritage preservation, environmental management and future site activities.

Both parties continue to work closely together as Crawford advances through site preparation works ahead of planned pre-production and heap leach development activities targeted for Q3.

Importantly, the recent WTAC board meeting described the upcoming joint outcomes as ‘historic’ for both parties, reflecting the positive and constructive partnership that continues to develop as Crawford progresses toward production at the Stage 1 Open Pit.”

Heritage Survey Update:

Cavalier Resources Ltd is pleased to provide an update on ongoing collaborative activities with the Wangkatja Tjungula Aboriginal Corporation (WTAC) at the Crawford Gold Project, following execution of the Native Title Agreement announced on 22 December 2025.

Since execution of the Agreement, Cavalier and WTAC have continued to work collaboratively to advance Crawford toward site preparation and future development activities.

All heritage surveys have now been completed across several priority areas associated with planned site preparation and future development works for Stage 1, including proposed infrastructure corridors and future site activity areas. The surveys were completed collaboratively with WTAC representatives and form part of the ongoing heritage management framework established under the Native Title and Mining Agreement.

In parallel with these activities, both parties continue to engage on country in relation to cultural heritage preservation, environmental management and future site activities as Crawford advances toward site preparation works.

Following completion of the site preparation works, and subject to final approvals, Cavalier intends to progress to the next stage of development at Crawford, including pre-production and heap leach development activities targeted for Q3.
