ASX RELEASE

Order for DroneGuns™ for Western Governmental Agency

DroneShield Ltd (ASX:DRO) (“DroneShield” or the “Company”) is pleased to announce that its distributor CDS has purchased two units of its DroneGun™ product, for use by a governmental agency of a major Western country allied with the United States, to be deployed by the agency for drone threat mitigation.

Oleg Vornik, DroneShield’s CEO, commented “While financially the revenue from this order to the overall DroneShield business is immaterial, this is now our third order for use by a major country in two weeks, following the orders placed by our distributors with us for their Latin American and Asian governmental end-users earlier this month. This order also follows a recent \$3.2 million order for DroneGuns™ for use by a Middle Eastern Ministry of Defence, which was approved by the US regulator approximately three weeks ago. We feel that our global distribution network and marketing build-out efforts of the recent year and a half have started to pay off, and our sales and adoption momentum is gaining substantial traction. We look forward to updating the market as further sales “dominoes” fall in the coming weeks and months.”
