

Key Operations & Engineering Appointment

Highlights:

- **Experienced Energy Engineering Manager, John Tranfield, joins ECT as Operations and Engineering Manager**
- **Mr Tranfield has over 18 years technical and operational leadership in the energy sector across multiple international jurisdictions and a track record of delivering and optimising complex, large scale projects**

Environmental Clean Technologies Limited (**ASX: ECT**) ("**ECT**" or "the **Company**") is pleased to announce the appointment of Mr. John Tranfield, a highly experienced technical and operational leader, as the new Operations and Engineering Manager. With an extensive background spanning 18 years, predominantly in the Oil & Gas sector, John brings a wealth of experience and expertise to ECT as the company pursues the commercialisation of its technology suite to deliver low and zero-emission solutions across a range of sectors.

ECT Managing Director Sam Rizzo commented:

"I am pleased to announce the appointment of John Tranfield. This is a significant step for ECT as we move towards commercialising the Bacchus Marsh operations and developing the pipeline of projects. John's experience is exactly what we need right now, with over two decades across multiple engineering, petroleum, and service industries. John has a proven track record in delivering projects, making efficiency improvements, and optimising and managing the ongoing challenges of day-to-day operations."

In his most recent role, John served as Lead Engineer/Supervisor for Exxon Mobil in Offshore Bass Strait & PNG for the past four years. His responsibilities included operational management, health & safety oversight, cost control, contractor management, and coordination. Before Exxon, John held pivotal roles as the General Manager and Operations Manager at OCS Group, overseeing global operations in Australia, the US, South America, and Africa. His leadership led to strategic transformational change, increased engagement, revenues, and customer satisfaction.

ECTs focus on commercialisation, optimisation and downstream processing of Syngas to valuable decarbonised energy, enables John to bring his experience and training to deliver projects and accelerate the growth of the company.

Mr Tranfield commented:

"The opportunity to join the ECT team and accept the collaborative challenge of delivering project commercialisation on proven technology was an easy decision to make. As recognised by Harvard Publishing, my contributions to the emergent hydrogen industry through defining collaborative and integrative business strategies reflect the innovative mindset I will bring to ECT. Employing these collaborative business strategies and delivering on aligned goals in a safe, efficient and sustainable manner, I look forward to building on ECT's past achievements and contributing to future successes during this exciting period."

ECT Chairperson Jason Marinko added:

"In welcoming Mr John Tranfield as the new Engineering Operations Manager, we take a significant stride towards fortifying our leadership team. As we intensify our focus on commercialising our technology suite, including innovative processes like syngas processing, John's experience in project delivery and processing aligns seamlessly with the company's goals."

The addition of Mr Tranfield to the leadership team, coupled with recent organisational changes, is part of the strategic repositioning of ECT from technology development to a commercial operating and revenue-generating company delivering and improving shareholder value.
