Adelaide, Australia, 2 February 2017 – Ellex Medical Lasers Limited (ASX:ELX), a global leader in medical devices for the diagnosis and treatment of eye disease wishes to provide clarification on the announcement made earlier today.

The commentary titled “Outlook” in the second dot point concerning EBITDA in the second half, was not clear. The outlook on EBITDA should read as follows:

“EBITDA in the second half of FY17 will leverage off higher sales and is therefore expected to be higher than the EBITDA in the first half of FY17. As a result, total EBITDA for FY17 is currently expected to show modest growth over the total EBITDA in FY16 (which was $7.9m). The amount of growth will depend on the investment that has been planned to be made in the iTrack business”

ABOUT ELLEX

Ellex designs, develops, manufactures and sells innovative products that help eye surgeons around the world to effectively and efficiently treat eye disease. Ellex is a world leader in this field. Headquartered in Adelaide, Australia, Ellex has ophthalmic lasers and devices that treat glaucoma, retinal disease primarily caused by diabetes, secondary cataract and vitreous opacities, as well as age-related macular degeneration. Manufacturing is carried out in Adelaide, Australia and Fremont, California. Sales and service directly to eye surgeons is conducted via subsidiary offices in Minneapolis, Lyon, Berlin and Tokyo. A network of more than 50 distribution partners around the world services other markets.
