## **2. PURPOSE AND EFFECT OF THE OFFER**

### **2.1 Purpose of Offer**

During the period in which the Offer is open, the Company will issue each of the Placement Securities (up to 83,000,000 Shares and 83,000,000 New Options) to the Placement Investors to raise up to \$2,490,000 before costs and the Corporate Adviser Securities (5,000,000 Shares and 5,000,000 New Options) to the Corporate Advisers for no cash sum.

The Shares to be issued to the Placement Investors and the Corporate Advisers and the Shares offered under this Prospectus are fully paid ordinary shares and are in the same class of securities (being Shares) that are quoted securities of the Company.

The New Options to be issued to the Placement Investors and the Corporate Advisers and the New Option offered under this Prospectus are in the same class of securities that are quoted securities of the Company as the Company has existing New Options on issue that are quoted under the code "GGGOB". New Options have an exercise price of 8 cents and an expiry date of 30 September 2018. The full terms of the New Options are set out in Section 5.2.

Each of the Placement Securities and the Corporate Adviser Securities will be issued without a prospectus as the Placement Investors and the Corporate Advisers are exempt from the disclosure requirements under Chapter 6D of the Corporations Act. None of the Placement Investors or the Corporate Advisers are related parties of the Company.

The commitment to raise moneys and issue the Placement Securities was announced on 1 June 2016.

This Prospectus has been prepared for the purpose of section 708A(11)(b)(ii) of the Corporations Act to remove any secondary sales restrictions on the sale of the Placement Securities and the Corporate Adviser Securities. Section 708A(11)(b)(ii) of the Corporations Act removes secondary sale restrictions where relevant securities (that are in a class of securities that are quoted securities of a body) are issued while an offer of the same class of quoted securities is open under a prospectus.

Under the Offer, the Company will invite an investor to subscribe for 1 New Share at 3 cents and 1 free New Option, which New Share and New Option will be in the same class as the Shares and New Options to be issued to the Placement Investors and the Corporate Advisers. Both the Shares and the New Options to be issued to the Placement Investors and the Corporate Advisers are in the same class as existing listed Shares (quoted under the code "GGG") and existing listed New Options (quoted under the code "GGGOB"). The Company will only receive a nominal amount of 3 cents under this Prospectus and therefore raising funds is not a purpose of the Offer.

### **2.2 Effect of the Offer**

The effect of the Offer will be to remove the secondary trading sale restrictions on the Placement Securities and the Corporate Adviser Securities to be issued.

The Offer will further:

- (a) Increase the number of Shares on issue by 1 New Share;
- (b) increase the number of Options on issue by 1 New Option; and

- (c) decrease the cash reserves of the Company by approximately \$20,000, being the estimated costs of the Offer.

## 2.3 Capital Structure

- In addition to the Shares and Options on issue, the Company has 9,685,500 performance rights that have been issued to staff. These performance rights have been issued in 3 equal tranches and require the volume average price of Shares for 5 consecutive trading days to be greater than or equal to 50 cents, 75 cents and \$1.00 respectively before 30 September 2016, at which time they lapse.
- This table assumes that no Options are exercised before the Closing Date.

## 2.4 Effect on Financial Position

The issue of 1 New Share and 1 New Option under this Prospectus will not have a material

impact on the Company's financial position. For this reason a pro-forma statement of financial position of the Company showing the financial effect of the Offer has not been included in this Prospectus.

## 2.5 **No Effect on Control**

The issue of 1 New Share and 1 New Option will have no effect on control of the Company.

### **3. RISK FACTORS**

#### **3.1 Introduction**

The Applicant for the New Securities should be aware that an investment in the Company is highly speculative as the Company is an exploration and development company which 100% owns the Kvanefjeld project in southern Greenland. The Company's current focus is on finalising the environmental and social impact assessments upon the Kvanefjeld project so as to supplement the feasibility study and complete material for a mining licence application.

There are a number of factors that may have a material impact on our future operating and financial performance. The key material risks are described below.

The Applicant should carefully consider the risks described below, the information contained in other sections of this Prospectus, and all other relevant material including our public announcements and reports.

The specific risks below are some of the risks specific to the Company including by reason of its involvement in the resource industry and the Kvanefjeld Project being located in Greenland. The general investment risks below are some of the risks to the Company of a general economic nature.

#### **3.2 Specific Risks**

##### **Exploration and Development**

Investors should understand that resource exploration and development is by its nature a high risk undertaking.

Ultimately the Company seeks to develop a mining operation at the Kvanefjeld project. There is no guarantee of achievement of milestones to successfully develop the Kvanefjeld project including the grant of a mining (exploitation) licence, the economic recoverability of ore bodies and funding of a mining operation.

##### **Future capital needs and additional funding**

Financing, constructing and operating any mining operation will be a significant cost and beyond any funds raised under this Offer. The Company is looking to progress relationships with funding and strategic development partners. No assurance can be given that future funding will be available to the Company on favourable terms or at all or that a suitable agreement can be reached with a strategic partner which would prejudice the development of the Kvanefjeld project. Any such future funding may take the form of equity or debt or a combination of equity and debt. To date, the Company has entered into a memorandum of understanding with NFC, which is a non-binding framework agreement (see ASX announcement of 7 April 2015).

##### **Mining**

Possible future development of a mining operation at the Kvanefjeld Project is dependent on a number of factors. Some of the factors limiting or preventing development and operations include, but are not limited to, failing to receive the necessary approvals from all relevant authorities and parties including necessary environmental approvals, unseasonal weather patterns, construction of any necessary production facilities, unanticipated

technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, unexpected shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, risk of access to the required level of funding and contracting risk from third parties providing essential services.

In the event that the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations and extended interruptions due to inclement or hazardous weather conditions.

### **Licensing and Government Regulations**

In October 2013 Greenland's parliament voted in favour of removing a long-standing zero-tolerance policy against the exploitation of radioactive materials. There can be no guarantee that future political restrictions on exploitation of radioactive materials will not be implemented.

The issue of a mining (exploitation) licence (needed to mine) for the Kvanefjeld project is a matter of Greenland Government discretion. The Greenland Government will need to be satisfied as to social and environmental considerations. There can be no guarantee that the Greenland Government will issue a mining licence.

In the event of production involving uranium, the regulatory burden at different levels of the industry increases the cost of doing business.

### **Commodity prices**

The Company is aiming to produce a critical rare earth concentrate, with by-production of uranium oxide, lanthanum, cerium, zinc concentrate and fluorspar from the Kvanefjeld project. Adverse fluctuations in prices of these products may detrimentally affect any earnings of the Company and the terms of any offtake agreement it may enter into.

Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include worldwide and regional supply and demand for specific commodities, commodity trading on the futures markets, general world economic conditions and the outlook of interest rates, inflation and other economic factors on both a regional and global basis.

### **Reliance on Key Personnel and Contractors**

The Company's success largely depends on the core competencies of its Directors and management and their familiarisation with, and ability to operate in, the metals and mining industry and the Company's ability to retain its key executives.

Additionally, the Company relies on third party contractors to provide logistics and services for the exploration and development field work upon the Kvanefjeld Project.

## **Resource Estimates**

Resources estimates are expressions of judgment based on knowledge, experience and resource modelling. As such, resource estimates are inherently imprecise and rely to some extent on interpretations made.

Additionally, resource estimates may change over time as new information becomes available. Should the Company encounter mineralisation or geological formations different from those predicted by past drilling, sampling and interpretations, resource estimates may need to be altered in a way that could adversely affect the Company's operations.

## **Environmental**

The Company's operations are subject to the environmental risks inherent in the mineral exploration and production industries. This includes the Greenland Government being satisfied as to environmental considerations prior to the issue of a mining licence upon the Kvanefjeld project. Failure to obtain such approvals will prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations that may be adopted in the future, including whether any such laws or regulations would materially increase the Company's costs of doing business or affect its operations in any area.

## **Currency**

The Company's future revenue so far as concerns its operations in Greenland may be in US dollars whilst its costs will be payable in Danish Kroner, Australian dollars and Euros. The exchange rates between the various currencies are affected by numerous factors beyond the control of the Company. These factors include economic conditions in the relevant country and elsewhere and the outlook for interest rates, inflation and other economic factors. These factors may have a positive or negative effect on the Company's exploration, project development and production plans and activities, together with the ability to fund those plans and activities.

## **Title**

The Company considers the relevant Greenland exploration licences are valid, in force and enforceable in accordance with their terms. The licences are subject to a number of legislative conditions which if not met would affect the standing of the licences and their ability to be renewed.

## **Sovereign Risk**

The Kvanefjeld Project is located in Greenland. Greenland is an autonomous country within the Kingdom of Denmark.

The political conditions in Greenland and Denmark are generally stable, however, changes in exchange rates, control or fiscal regulations and regulatory regimes, labour unrest, inflation or economic recession could adversely affect the Company's business.

## **Insurance**

The Company, where economically feasible, insures its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance (if obtained) may not be of a nature or level to provide adequate insurance cover. The occurrence of an

event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance of all risks associated with mineral exploration and development is not always available and where available the costs can be prohibitive.

### 3.3 **General Risks**

#### **Securities Investments and Share Market Conditions**

There are risks associated with any securities investment. The prices at which the securities trade may fluctuate in response to a number of factors.

Furthermore, the stock market, and in particular the market for exploration and mining companies may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.

#### **Economic Risk**

Changes in both the world and Greenland economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings.

#### **Legislative**

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies in either Greenland or Australia may adversely affect the financial performance of the Company.

#### **Voting Rights**

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at a general meeting of members every member has one vote on a show of hands and one vote per Share on a poll. Voting may be in person or by proxy, attorney or representative.

#### **Dividends**

Subject to the rights of holders of shares issued with any special rights (at present there are none), the profits of the Company which the Board may from time to time determine to distribute by way of dividend are divisible to each share of a class on which the Board resolves to pay a dividend in proportion to the amount for the time being paid on a share (including amounts credited) bears to the total amount paid or payable (including amounts credited) on that share. While the Company is admitted to trading on the Official List, then despite anything in the Constitution, if the Listing Rules prohibit an act being done, the act must not be done. Nothing in the Constitution prevents an act being done that the Listing Rules require to be done. If the Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the Listing Rules require the Constitution to contain a provision and it does not contain such a provision, the Constitution is deemed to contain that provision. If the Listing Rules require the Constitution not to contain a provision and it contains such a provision, the Constitution is deemed not to contain that provision. If a provision of the Constitution is inconsistent with the Listing Rules, the Constitution is deemed not to contain that provision to the extent of the inconsistency.

## **5.2 Terms of New Option**

The terms of the issue of the New Option are:

- (a) Each Option entitles the holder to one Share in the capital of the Company.
- (b) The Options may be exercised at any time prior to 5.00pm WST on 30 September 2018.
- (c) The exercise price of the Options is 8 cents each.
- (d) Application will be made for the Options to be quoted and the Options will be freely tradeable.
- (e) The Company will provide to each Option holder a notice that is to be completed when exercising the Options ("Notice of Exercise"). Options may be exercised by the Option holder in whole or in part by completing the Notice of Exercise and forwarding the same to the Secretary of the Company to be received prior to the expiry date. The Notice of Exercise must state the number of Options exercised, the consequent number of Shares to be allotted and the identity of the proposed allottee. The Notice

of Exercise by an Option holder must be accompanied by payment in full for the relevant number of Shares being subscribed, being an amount of the exercise price per Share. The Company will process all relevant documents received at the end of every calendar month.

- (f) All Shares issued upon the exercise of the Options will rank equally in all respects with the Company's then issued Shares.
- (g) There are no participating rights or entitlements inherent in the Options and the holders will not be entitled to participate in new issues or pro-rata issues of capital to Shareholders during the term of the Options. Thereby, the Option holder has no rights to a change in the exercise price of the Option or a change to the number of underlying securities over which the Option can be exercised. The Company will ensure, for the purposes of determining entitlements to any issue, that Option holder will be notified of a proposed issue after the issue is announced. This will give Option holders the opportunity to exercise their Options prior to the date for determining entitlements to participate in such issues.
- (h) If there is a bonus issue ("Bonus Issue") to Shareholders, the number of Shares over which an Option is exercisable will be increased by the number of Shares which the holder would have received if the Option had been exercised before the record date for the Bonus Issue ("Bonus Shares"). The Bonus Shares must be paid up by the Company out of profits or reserves (as the case may be) in the same manner as was applied in the Bonus Issue, and upon issue will rank equally in all respects with the other Shares on issue as at the date of issue of the Bonus Shares.
- (i) In the event of any reconstruction (including consolidation, subdivisions, reduction or return) of the authorised or issued capital of the Company, all rights of the Option holder shall be reconstructed (as appropriate) in accordance with the Listing Rules.
