Mining Lease granted for Manna Lithium Project

Global Lithium Resources Limited (**ASX: GL1**, “**Global Lithium**” or “the **Company**”), is delighted to announce another strategic milestone for its flagship Manna Lithium Project, with the granting of Mining Lease M28/414 by Western Australia’s Minister for Mines, Petroleum and Exploration for a term of 21 years pursuant to the Mining Act 1978 (as amended).

This critical approval follows closely on the heels of the recently signed Native Title Mining Agreement with the Kakarra Part B Native Title Group, underscoring Global Lithium’s successful execution of its strategic priorities for 2025 and its commitment to responsible project development.

The granting of the Mining Lease significantly de-risks the Manna Lithium Project and accelerates its progress towards a Final Investment Decision (FID), following the optimisation of the project’s Definitive Feasibility Study that remains on track for the end of the 2025 calendar year.

Global Lithium Managing Director Dr. Dianmin Chen said this latest milestone further demonstrated the Company’s effective delivery on key commitments outlined to shareholders following Board renewal in February 2025.

“The granting of the Mining Lease for the Manna Lithium Project is a transformative moment for Global Lithium and its shareholders. This achievement, coming so soon after the successful Native Title Mining Agreement, validates our focused strategy and the diligent work of our team and partners,” Dr Chen said.

“With the Mining Lease now granted, we have cleared another major hurdle and are now fully focused on finalising the optimised Definitive Feasibility Study and pursuing discussions with potential development partners.”

The Manna Lithium Project remains the third largest lithium resource in the prolific Eastern Goldfields region, containing a Mineral Resource of 51.6Mt at 1.0% Li₂O¹. It has the potential to become a significant producer of spodumene concentrate and contributor to the State’s critical minerals sector.

Approved for release by the Board of Global Lithium Resources Limited
