Increasing Demand for Mining-Tech

BHP Head of Geoscience Excellence says mining needs more 'front-end loading'

“We still as an industry firefight a lot of challenges downstream in the value chain, realising we didn’t have the information we needed upfront. And so, front-end loading that knowledge in terms of being able to quantify earlier, better, what’s in the rock that matters, is the big challenge.

“The ability to quantify uncertainty and to manage that uncertainty through the value chain, so that we understand the risks, make decisions, and know how we can invest to best reduce that uncertainty through the value chain, that is huge.

“If we can get there that will definitely change the way we make decisions in mining.

“In future I see us drilling to test our models rather than to build our models."

CAM MCCUAIG
BHP HEAD OF GEOSCIENCE EXCELLENCE
FUTURE OF MINING CONFERENCE 2021
Our Market and the Impact of COVID-19

KEY CHALLENGES
Supply chain – longer freight and delivery times, including new rigs
Skilled labour – impacted by availability, mobility restrictions and attrition
Limited access to mine sites for trials of new products, including the Flexidrill technologies under development – high underlying demand, labour constraints and related COVID pressures
New COVID-19 variants – potential re-imposition of government restrictions

KEY OPPORTUNITIES
Increasing demand for IMDEXHUB-IQ™ connected sensors and software
Solutions to support clients to work remotely, efficiently, securely and safely – key components of IMDEX’s value proposition

AROUND THE GROUNDS
Strong underlying demand in all key IMDEX regions
Americas and Australia operating at or near full capacity, steady growth in Africa & Europe, Southeast Asia improving
IMDEX has continued to support clients without material disruption and has addressed supply chain challenges in 1H22
Short-term Industry Constraints

“For the core drilling business, we also enter 2022 with the highest rig count in the group’s history and we are confident in maintaining strong utilisation levels given the increased activity we are seeing from our existing clients as well as the strength we continue to see in commodity pricing.”

JAMIE BOYTON
EXECUTIVE CHAIRMAN OF CAPITAL LIMITED
18 JANUARY 2022

“Our second quarter of fiscal 2022 was very encouraging as activity levels continued to increase in most regions... Competition for skilled drilling crews continues to be a challenge facing our industry in the most operationally intense markets, putting pressure on costs and productivity... Training and retention efforts have allowed us to support our rapid growth and deliver value to our customers.”

DENIS LAROCQUE
PRESIDENT AND CEO OF MAJOR DRILLING
2 DECEMBER 2021

“Rig utilization ... reached an average of 60% this quarter compared to 49% for the same quarter in 2020...we were impacted by the general economical context with increasing supply chain disruptions, labour constraints and inflationary costs pressures which are expected to continue in the upcoming quarters.”

DANIEL SIMONCINI
CHAIRMAN & CO-CEO OF FORACO
3 NOVEMBER 2021

“Our continuing focus on people and operational reliability enabled us to achieve near record production in iron ore and to reduce the impacts of adverse weather and COVID-19 related labour constraints in our operations. Cost control remained strong across the business, in the face of a more inflationary environment.”

MIKE HENRY
CHIEF EXECUTIVE OFFICER OF BHP
