## **JCurve Solutions announces partnership with Epicor for its Riyo solution**

*JCS' innovative service management and scheduling software, Riyo, to be integrated by leading software provider, Epicor, into the growing Australian aged care market.*

JCurve Solutions (ASX: JCS) is pleased to advise that it has become an Alliance ISV (independent software vendor) partner for Epicor Software Corporation. Following a comprehensive selection and technical due diligence process, the Company's Riyo solution has been selected as the preferred solution for rostering and scheduling jobs as part of the Epicor Senior Living Solution (SLS) offering.

Epicor is one of Australia's leading solutions for the aged care industry, managing over 50,000 residents. The company's SLS offering is designed specifically for the operators of residential aged care, independent living, and community care organisations.

The Riyo platform delivers innovative service management and scheduling software that helps service-focused companies remove bottlenecks, scale quickly with demand, and turn their service jobs into "job done". Riyo overcomes common roadblocks to business success while keeping a strong focus on creating winning customer experiences.

JCS CEO Stephen Canning explained that "Riyo is fast becoming a disruptor of legacy solutions by delivering a modern, progressive field service and rostering solution that is tailor-built to the requirements of the Aged and Community Care market. Traditional solutions lack the agility that many companies in the industry need to thrive in the modern world of service delivery. With our close engagement with the progressive team at Epicor, we are confident that our rich functionality of Riyo has the flexibility and scalability to deliver the greatest value to the Aged and Community Care sector."

Greg O'Loan, Regional VP of Epicor, explains, "In today's business environment, aged care organisations must be more efficient and client-centric to provide high-quality services while remaining profitable. The partnership between Epicor and JCS strengthens the delivery of innovative technology that improves scheduling, productivity, and provides unrivalled customer experiences. As Greg elaborates, "With the combination of Riyo's feature-rich technology, a modern user interface, and Epicor's deep industry experience, we look forward to providing a market-leading rostering and scheduling solution for the growing Aged and Community Care sector."

JCS will work with Epicor on a number of Epicor aged care customer opportunities, which are well suited to the tailored Riyo solution as part of the Epicor and JCS go-to-market launch.
