

Jervois

Building a leading independent cobalt and nickel company

São Miguel Paulista Restart – Final Investment Decision
and Equity Capital Raising

10 November 2022

NOT FOR RELEASE OR DISTRIBUTION IN THE UNITED STATES

Important Notice and Disclaimer

SUMMARY INFORMATION

This presentation has been prepared by Jervois Global Limited (ABN 52 007 626 575) (“**Jervois**” or the “**Issuer**”). It is a presentation of general background information in summary form about the Issuer’s activities current at the date of this presentation. The information does not purport to be complete, comprehensive or to comprise all the information which a potential investor may require in order to determine whether to deal in Issuer securities, nor does it contain all the information which would be required in a disclosure document prepared in accordance with the Corporations Act 2001 (Cth) (“**Corporations Act**”). It is to be read in conjunction with the Issuer’s other announcements released to the Australian Securities Exchange (“**ASX**”) (available at www.asx.com.au) and with the information available under its profile on SEDAR (available at www.sedar.com).

NO OFFER, ADVICE OR RECOMMENDATION

This presentation is for information purposes only and should not be read or understood as an offer, invitation, solicitation, inducement or recommendation to subscribe, buy or sell Issuer securities in any jurisdiction. **This presentation will not form any part of any contract or commitment for the acquisition of Issuer securities. This presentation is not a prospectus or other offering document under Australian law or any law. It will not be lodged with the Australian Securities and Investments Commission (“ASIC”).**

Nothing contained in this presentation constitutes financial product, investment, legal, tax or other advice. It does not take into account the investment objectives, financial situation or needs of any particular investor. You should consider the appropriateness of the information in this presentation having regard to your own investment objectives, financial situation and needs and with your own professional advice, when deciding if an investment is appropriate.

NOT FOR RELEASE OR DISTRIBUTION IN THE UNITED STATES

This presentation may not be distributed or released in the United States. This presentation does not constitute an offer to sell, or a solicitation of an offer to buy, any securities in the United States or any other jurisdiction in which such an offer would be illegal. The securities referred to in this presentation have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the “**Securities Act**”), or the securities laws of any state or other jurisdiction of the United States, and may not be offered or sold, directly or indirectly, in the United States or to any person acting for the account or benefit of any person in the United States unless the securities have been registered under the Securities Act (which the Issuer has no obligation to do or procure) or are offered or sold pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable securities laws of any state or other jurisdiction of the United States.

The release, publication or distribution of this presentation (including an electronic copy) outside Australia or New Zealand may be restricted by law. If you come into possession of this presentation, you should observe restrictions and should seek your own advice on restrictions. Any non-compliance with these restrictions may contravene applicable securities laws. Refer to the ‘International offer restrictions’ on slides 58 to 63 of this presentation for more information.

FINANCIAL DATA AND ROUNDING

Investors should note that this presentation contains pro forma financial information on SMP Nickel Cobalt Refinery (“SMP”), which is provided for illustrative purposes only and is not represented as being indicative of the Issuer’s (nor anyone else’s) views on SMP’s future financial condition and/or performance. Investors should also note that the pro forma financial information does not purport to be in compliance with Article 11 of Regulation S-X of the rules and regulations of the U.S. Securities and Exchange Commission.

Certain financial measures included in this presentation are ‘non-IFRS financial information’ under ASIC Regulatory Guide 230: ‘Disclosing non-IFRS financial information’ and also ‘non-GAAP financial measures’ within the meaning of Regulation G under the U.S. Securities Exchange Act of 1934, as amended, and are not recognised under Australian Accounting Standards (“AAS”) and International Financial Reporting Standards (“IFRS”). The disclosure of non-GAAP financial measures in the manner included in this presentation may not be permissible in a registration statement under the U.S. Securities Act. Non-IFRS financial information/non-GAAP financial measures do not have a standardised meaning prescribed by AAS or IFRS and may therefore not be comparable to similarly titled measures presented by other entities and should not be construed as an alternative to other financial measures determined in accordance with AAS or IFRS.

Although the Issuer believes these non-IFRS financial information/non-GAAP financial measures provide useful information to investors in measuring the financial performance and condition of Jervois business, investors are cautioned not to place undue reliance on these non-IFRS financial information/non-GAAP financial measures. The financial information in this presentation is presented in an abbreviated form insofar as it does not include all the disclosures required by the AAS and other mandatory professional reporting requirements applicable to general purpose financial reports prepared in accordance with the Corporations Act.

Important Notice and Disclaimer (cont')

All dollar values are in United States dollars (\$) and financial data is presented as at 30 September 2022, unless stated otherwise. A number of figures, amounts, percentages estimates, calculations of value and other fractions used in this presentation are subject to the effect of rounding.

PAST PERFORMANCE

Past performance and pro forma historical financial information is given for illustrative purposes only. It should not be relied on and is not indicative of future performance, including future security prices.

FORWARD-LOOKING STATEMENTS

This presentation contains certain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities laws. When used in this presentation, the words 'anticipate', 'believe', 'aim', 'estimate', 'expect', 'intend', 'may', 'target', 'plan', 'forecast', 'project', 'schedule', 'will', 'should', 'seek' and other similar words or expressions are intended to identify forward-looking statements or information. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. These forward-looking statements or information may relate to future supply contracts, future sales contracts, the timing of commissioning and production at Idaho Cobalt Operations; estimation of Mineral Resources and Mineral Reserves; magnitude or quality of mineral deposits; anticipated restart and timing of SMP Refinery; future operations; future exploration prospects; the completion and timing of future development studies; future growth potential of the Company's projects and future development plans; statements regarding planned development programmes and expenditures; Jervois' ability to obtain licenses, permits and regulatory approvals required to implement expected business future plans; operational restart plans and exploration. Such statements represent the Issuer's current views with respect to future events and are necessarily based upon a number of assumptions and estimates that, while considered reasonable by the Issuer, are inherently subject to significant business, economic, competitive, political and social risks, contingencies and uncertainties.

These forward-looking statements are based on assumptions and contingencies that are subject to change without notice and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of the Issuer and its related bodies corporate and affiliates (and each of their respective directors, securityholders, officers, employees, partners, agents, advisers and management), and could cause results, performance or achievements to be materially different from the results, performance or achievements that are or may be expressed or implied by such forward-looking statements or any projections and assumptions on which those statements are based. This includes statements about market and industry trends, which are based on interpretations of market conditions. Refer to the 'Key risks' on slides 43 to 56 of this presentation for a summary of certain risk factors that may affect the Issuer.

Investors are strongly cautioned not to place undue reliance on forward-looking statements, particularly in light of the current economic climate and the significant volatility, uncertainty and disruption caused by the COVID-19 pandemic. Forward-looking statements are provided as a general guide only and should not be relied on as an indication or guarantee of future performance. These statements may assume the success of the Issuer's business strategies, the success of which may not be realised within the period for which the forward-looking statements may have been prepared, or at all.

No guarantee, representation or warranty, express or implied, is made as to the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects, returns, statements or tax treatment in relation to future matters contained in this presentation. The forward-looking statements are based on information available to the Issuer as at the date of this presentation. Except as required by applicable laws, rules or regulations, none of the Issuer, its representatives or advisers intends to, or undertakes to, or assumes any obligation to, provide any additional information or revise the statements in this presentation, whether as a result of a change in expectations or assumptions, new information, future events, results or circumstances.

Important Notice and Disclaimer (cont')

MARKET DATA

Certain market and industry data used in this presentation may have been obtained from research, surveys or studies conducted by a lead manager (or an affiliate) or third parties, including industry or general publications. Neither the Issuer nor any of their respective representatives or advisers have independently verified any such market data ("Market Data") or industry data or industry or general publications.

Market Data is provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. The Market Data may assume the success of the Issuer's business strategies, the success of which may not be realised within the period for which the Market Data has been prepared, or at all.

This presentation contains reference to UBS Research, UBS Research Department produces research independently of all other UBS business areas and UBS AG business groups. Research is produced for the benefit of the firm's investing clients.

No guarantee, representation or warranty, express or implied, is made as to the accuracy, likelihood or achievement or reasonableness of any Market Data. Except as required by applicable laws, rules or regulations, none of the Issuer, the lead managers nor their respective representatives or advisers intends to, or undertakes to, or assumes any obligation to, provide any additional information or revise the Market Data, whether as a result of a change in expectations or assumptions, new information, future events, results or circumstances.

DISCLAIMER

To the maximum extent permitted by law, the Issuer, the lead managers and their respective affiliates and related bodies corporate and each of their respective directors, officers, partners, employees, agents, representatives and advisers (together, the "**Beneficiaries**") exclude and expressly disclaim:

- all duty and liability (including, without limitation, any liability arising from fault, negligence or negligent misstatement) for any expenses, losses, damage or costs incurred by you as a result of your participation in, or failure to participate in, the capital raising or the information in this presentation being inaccurate or incomplete in any way for any reason, whether by negligence or otherwise;
- any obligations or undertaking to release any updates or revisions to the information in this presentation to reflect any change in expectations or assumptions; and
- all liabilities in respect of, and make no representation or warranty, express or implied, as to the fairness, currency, accuracy, adequacy, reliability or completeness of information in this presentation or that this presentation contains all material information about the Issuer or which a prospective investor or purchaser may require in evaluating a possible investment in the Issuer or acquisition of securities in the Issuer, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement.

The lead managers and their respective Beneficiaries:

- have not independently verified any of the information in this presentation and take no responsibility for any part of this presentation or the capital raising;
- have not authorised, permitted or caused the issue, lodgement, submission, dispatch or provision of this presentation;
- make no recommendations as to whether you or your related parties should participate in the capital raising nor do they make any representations or warranties to you concerning the capital raising; and
- do not make or purport to make any statements in this presentation and there is no statement in this presentation which is based on any statement by any of them.

You represent, warrant and agree that you have not relied on any statements made by the lead managers or their respective Beneficiaries in relation to the capital raising and you further expressly disclaim that you are in a fiduciary relationship with any of them.

Important Notice and Disclaimer (cont')

You acknowledge and agree that:

- determination of eligibility of investors for the purposes of the capital raising is determined by reference to a number of matters, including legal and regulatory requirements and the discretion of the Issuer and the lead managers. You further acknowledge and agree that each of the Issuer and the lead managers and their respective Beneficiaries exclude and expressly disclaim any duty or liability (including, without limitation, any liability arising from fault, negligence or negligent misstatement) in respect of the exercise or otherwise of that discretion, to the maximum extent permitted by law;
- allocations are at the sole discretion of the lead managers and/or the Issuer. If you do not reside in a permitted offer jurisdiction you will not be able to participate in the capital raising. The Issuer and the lead managers disclaim any duty or liability (including, without limitation, any liability arising from fault, negligence or negligent misstatement) in respect of the determination of your allocation; and
- the lead managers and the Issuer reserve the right to change the timetable in their absolute discretion without recourse to them or notice to you.

The lead managers and their affiliates are full service financial institutions engaged in various activities, which may include trading, financing, corporate advisory, financial advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. The lead managers and their respective affiliates have provided, and may in the future provide, financial advisory, financing services and other services to the Issuer and to persons and entities with relationships with the Issuer, for which they received or will receive customary fees and expenses. In the ordinary course of its various business activities, the lead managers and their respective affiliates may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and those investment and trading activities may involve or relate to assets, securities and/or instruments of the Issuer, and/or persons and entities with relationships with the Issuer. The lead managers and their respective affiliates may also communicate independent investment recommendations, market colour or trading ideas and/or publish or express independent research views in respect of those assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in those assets, securities and instruments.

In connection with the capital raising, one or more investors may elect to acquire an economic interest in the new shares ("**Economic Interest**"), instead of subscribing for or acquiring the legal or beneficial interest in those securities. The lead managers (or their respective affiliates) may, for their own respective accounts, write derivative transactions with those investors relating to the New Shares to provide the Economic Interest, or otherwise acquire securities in the Issuer in connection with the writing of those derivative transactions in the capital raising and/or the secondary market. As a result of those transactions, the lead managers (or their respective affiliates) may be allocated, subscribe for or acquire New Shares or securities of the Issuer in the capital raising and/or the secondary market, including to hedge those derivative transactions, as well as hold long or short positions in those securities. These transactions may, together with other securities in the Issuer acquired by the lead managers (or their respective affiliates) in connection with their ordinary course sales and trading, principal investing and other activities, result in the lead managers (or their respective affiliates) disclosing a substantial holding and earning fee.

The lead managers (and/or their respective affiliates) may also receive and retain other fees, profits and financial benefits in each of the above capacities and in connection with the above activities, including in their capacity as a lead manager to the capital raising.

GENERAL

Statements made in this presentation are made only as at the date of this presentation. The information in this presentation remains subject to change without notice. The Issuer may in its absolute discretion, but without being under any obligation to do so, update or supplement this presentation. Any further information will be provided subject to the terms and conditions contained in this Important Notice and Disclaimer.

The Issuer reserves the right to withdraw the capital raising or vary the timetable for the capital raising without notice in whole or in part.

In consideration for being given access to this presentation, you confirm, acknowledge and agree to the matters set out in this Important Notice and Disclaimer and any modifications notified to you and/or otherwise released on ASX.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Cautionary Note to Investors Concerning Estimates of Measured and Indicated Resources. This discussion uses the terms "measured resources" and "indicated resources". The Issuer advises investors that while those terms are recognized and required by Canadian regulations and Australian regulation, the US Securities and Exchange Commission does not recognise them. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Contents

1. Company update and equity raising overview

2. São Miguel Paulista (SMP) restart

3. Idaho Cobalt Operations (ICO) update

4. Jervois Finland (JFO) update

5. Equity raising

Appendix A – Additional Information

Appendix B – Commodity Market Update

Appendix C – Key Risks

Appendix D – International Offer Restrictions

Jervois is seeking to harness the opportunities created by electrification

A strong platform to leverage structural change in the energy economy

EV batteries require nickel and cobalt

Nickel and cobalt are critical minerals

Jervois assets are strategically important

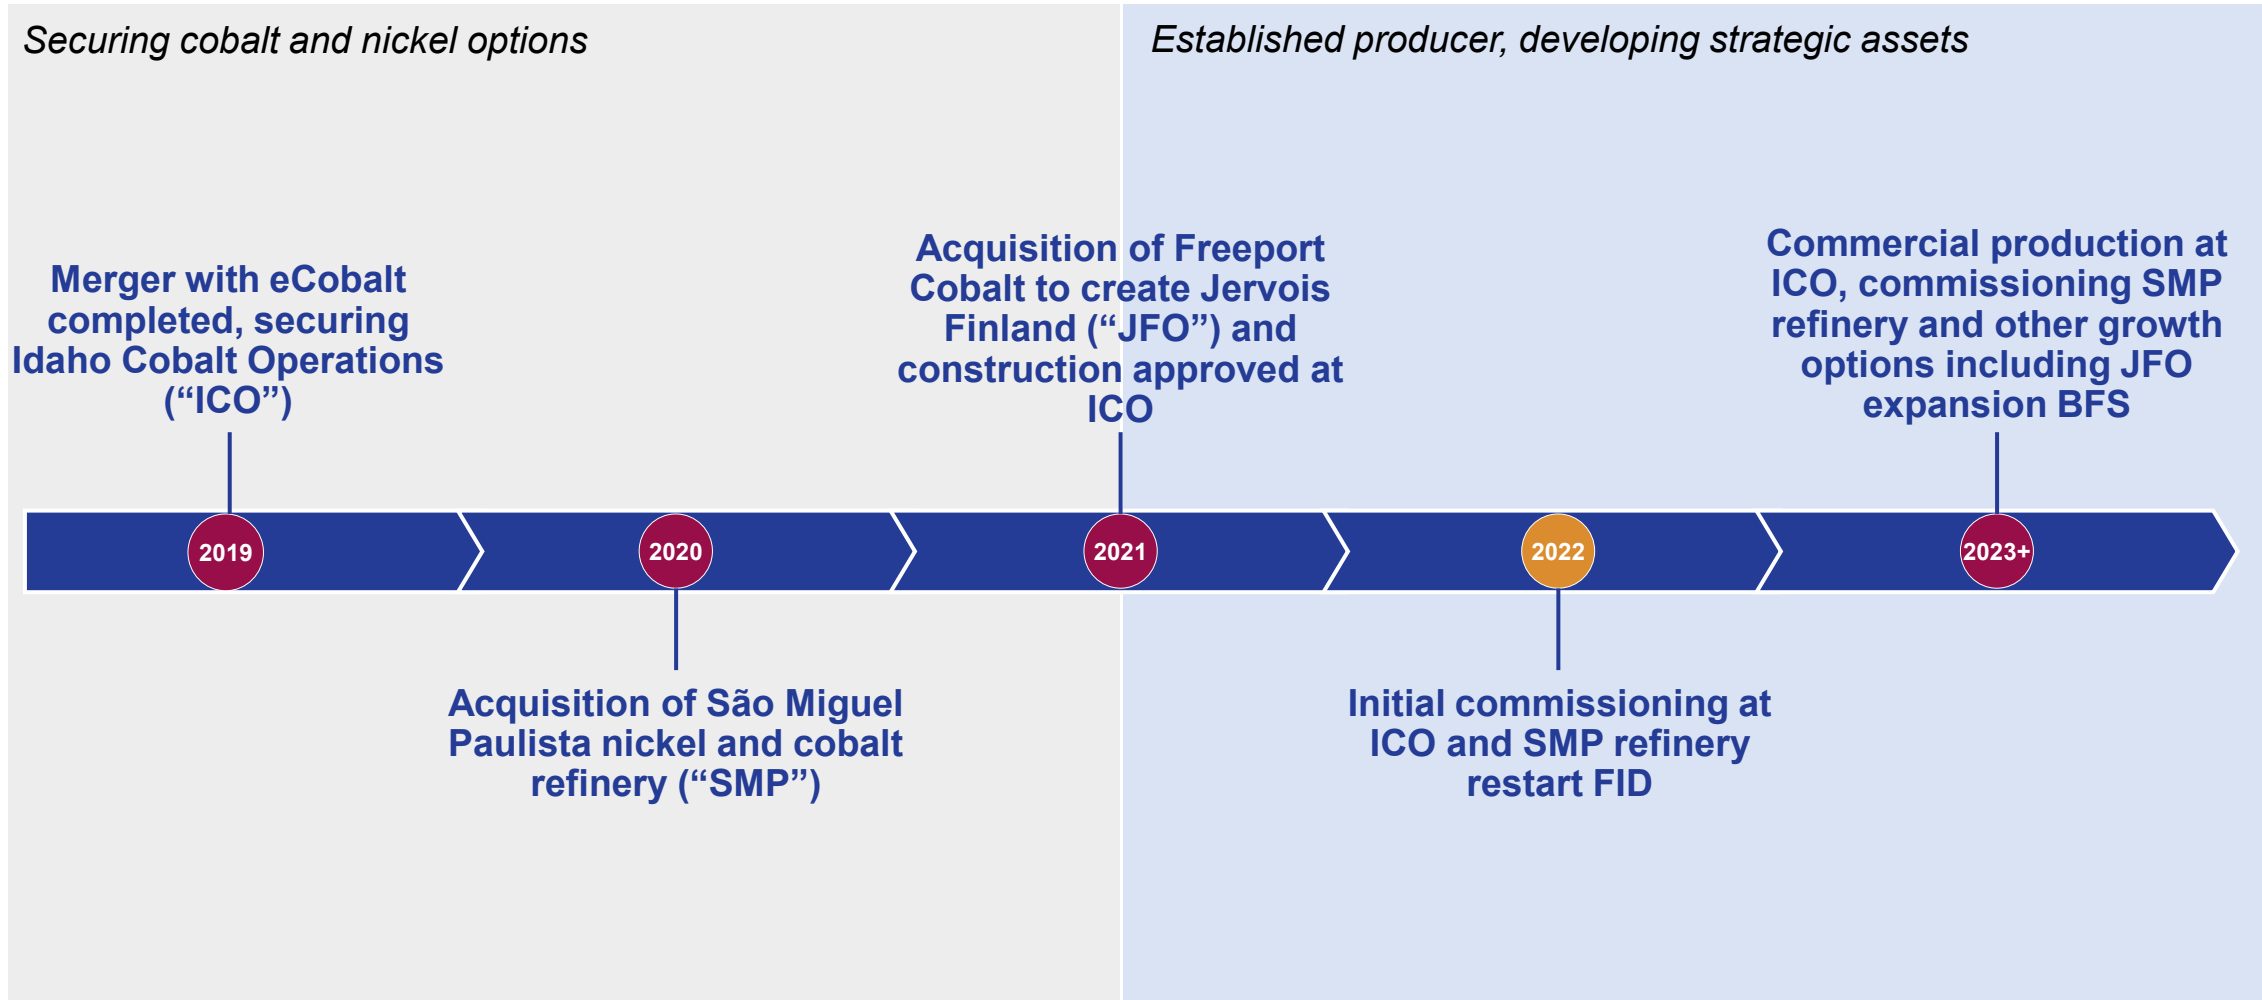

Jervois portfolio is diversified

Jervois management is highly experienced

- Essential ingredients for high-performance electric vehicle batteries and material demand from OEM expected in the near term
- Market demand forecast to grow 3x for cobalt and 2x for nickel by 2035¹
- Identified as critical minerals by Western governments²
- Significant policy tailwinds for producers – e.g., U.S. Government Inflation Reduction Act
- Well-positioned mining and processing assets in United States, Brazil and Finland
- Leverage to legislative significance of diversified, non-China, supply chains
- Jervois believes it is one of the emerging leading critical mineral suppliers to Western industry
- Diversification across value chain and by commodity is expected to enhance earnings quality
- Broad asset base from which to pursue future growth
- Track record in delivering across construction, commissioning, operations, commercial
- Management depth at each location to deliver across its globally integrated, diverse asset base

Path to become a global nickel and cobalt platform

Moving from one to three producing assets expected by early 2024 with further growth optionality

Creating a global nickel and cobalt platform

Portfolio overview

Idaho Cobalt Operations, U.S.

Largest cobalt resource¹ and only primary cobalt mine in the U.S.

Production Q4 2022

Nico Young, Australia

Prospective nickel and cobalt deposit located in NSW, Australia

Drilling next phase expected Q1 2023

São Miguel Paulista, Brazil

Only class 1 nickel and cobalt refinery in Latin America – restart ready

Production expected Q1 2024

Jervois Finland

Global leader outside of China in downstream cobalt products business

Operational ~US\$375M revenue²

Mining / raw materials

Primary refining, intermediates and finished products

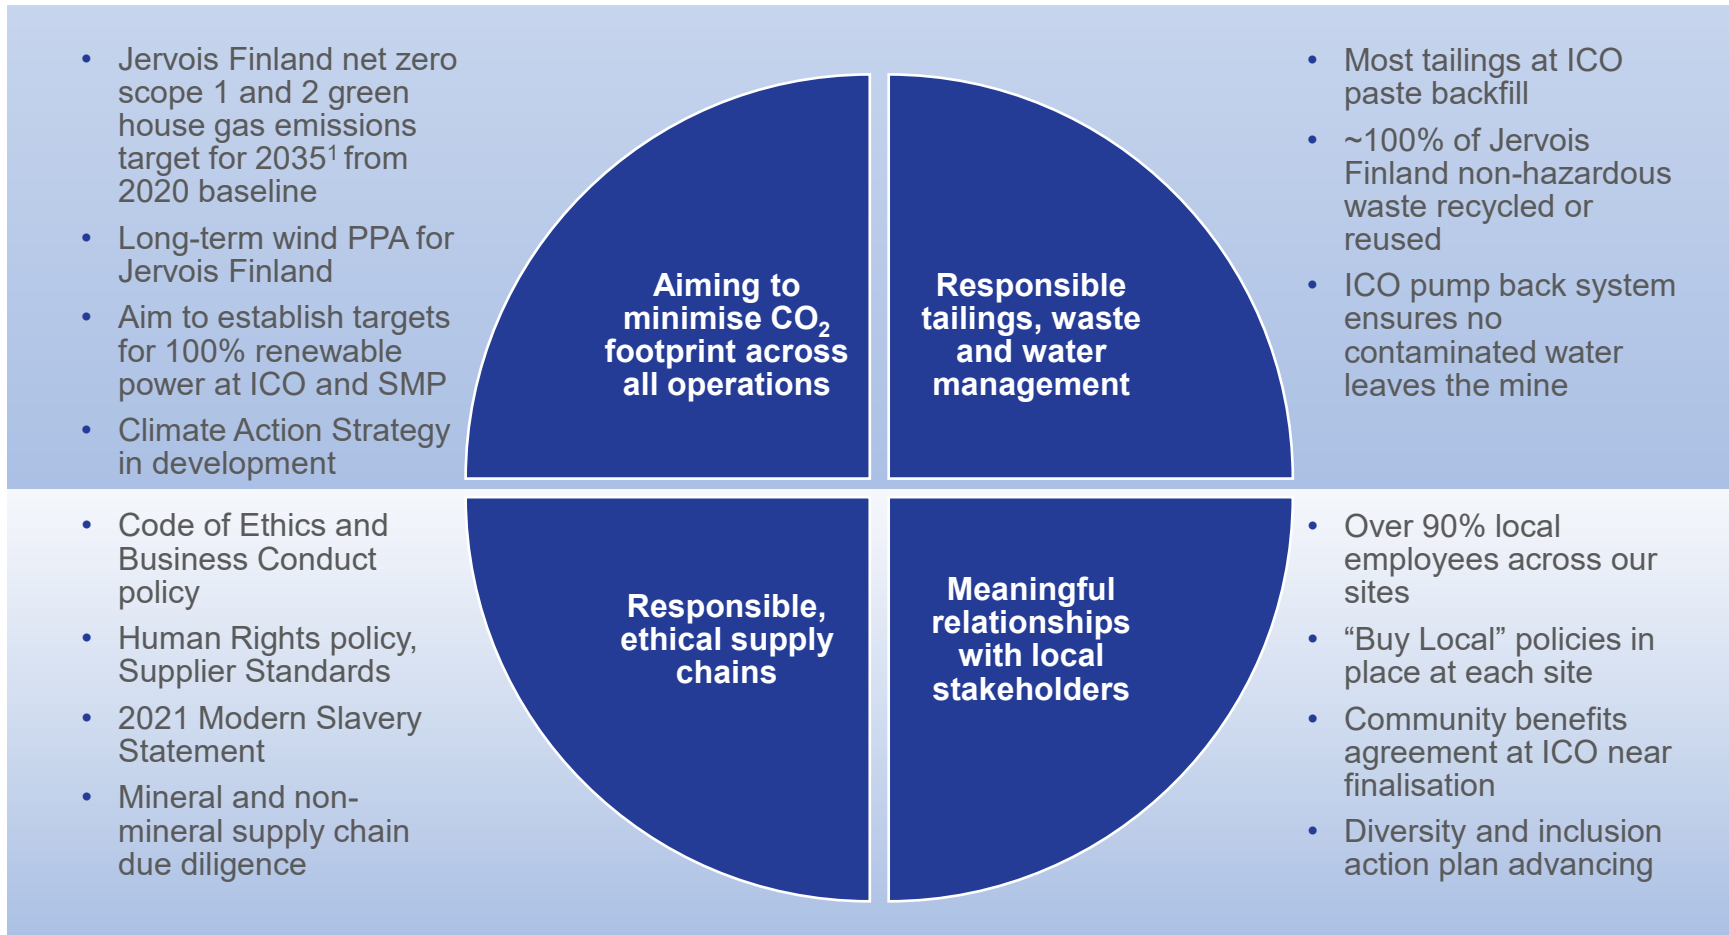

Key attractions

- ✓ 100% ownership across all assets, commercial target is to maximise product flexibility / off-take and price exposure
- ✓ Unique platform focused on geopolitically strategic assets in high quality jurisdictions servicing Western markets
- ✓ Pathway to become #2 producer³ in refined cobalt ex-China – market position expected to unlock new opportunities
- ✓ Earnings diversification reduces portfolio risk
- ✓ Technical and operational cross-pollination and synergies across portfolio assets
- ✓ Future growth options will be progressed according to asset performance and market conditions

Commitment to positive environmental, social and governance outcomes

ESG principles embedded across assets

ESG overview

Memberships and Affiliations

Annual Sustainability Report

Company update and transaction overview

Equity raise underpins objective for three cash generating assets, all expected to be online early 2024

São Miguel Paulista (“SMP”) update	<ul style="list-style-type: none">• Equity raise underpins FID for SMP refinery restart and strengthens commercial hand with partners / suppliers• Focus on delivering Stage 1 forecast of 10,000 mtpa nickel and 2,000 mtpa cobalt metal cathode¹• Restart preparation underway: detailed engineering, procurement, execution planning and feed sourcing negotiations• Restart capital spending planned across 2023 with production expected to commence in Q1 2024• Fully funded², de-risked restart model: simplest and lowest capital pathway to production• Well located to serve Brazil and U.S. markets, ‘Tocantins’ product historically also delivered into Japan and Europe• Appointment of President and EGM Jervois Brasil, Carlos Braga, with deep local and international leadership experience
Idaho Cobalt Operations (“ICO”) update	<ul style="list-style-type: none">• Celebrated opening ceremony on 7 October 2022 with key U.S. and Australian dignitaries• Initial commissioning underway; ore delivery prepared for plant commissioning across November and December• Remaining project capex US\$17M, 2023 mine sustaining capex US\$29M supports transition to long-term sustainable operations• Commercial concentrate production expected in Q4 2022; nameplate capacity production expected by end Q1 2023• Initial 28,000 feet of drilling completed for infill and expansion drilling programme – significant rise in scope for 2023
Equity raise	<ul style="list-style-type: none">• Fully underwritten A\$231M (US\$150M³) equity raising with proceeds used to fully fund restart of SMP, ICO ramp-up and mine sustaining capital expenditure, and for general corporate purposes including Jervois Finland expansion BFS• Funding further de-risks Jervois, allows the company to bring online a third producing asset, and ensures commercial negotiation with downstream supply chain occurs from a position of strength• The Board considers an equity raise the preferred funding pathway as it ensures Jervois maintains a balanced capital structure

Appendix C – Key Risks

Appendix D – International Offer Restrictions

São Miguel Paulista overview

Restart project status

- Proven operating record over three decades; comprehensive care and maintenance programme
- Within São Paulo city limits with ready access to labour and services; 120km from largest container port in Brazil (Santos)
- Low risk, capital efficient restart
- Ausenco and Jervois Brasil management progressing detailed engineering, advanced procurement and execution planning
- Construction plan developed based on three phases:
 - Site establishment
 - New equipment
 - Refurbishment
- Engagement advancing with potential vendors on key work packages
- Bids are in-line with BFS restart capital estimate
- Experienced leadership appointed to drive project delivery for Jervois:
 - President and EGM Jervois Brasil, Carlos Braga
 - SMP Project Steering Committee Chair (incl. operational readiness), Valdecir Botassini
 - SMP Project Director, Mike Romaniuk (post ICO completion)

SMP site overview (São Paulo, Brazil)

SMP location

SMP refinery restart project is execution ready post FID

SMP nickel-cobalt refinery restart plan

Restart and first production timeline

- Restart pathway further defined since BFS via detailed engineering and execution planning
- Restart capital already underway; initial US\$1M of restart capital cost approved by Jervois Board in September 2022 – Ausenco mobilised at site

Production and operational capacity

- Initial refined production 10,000 mtpa nickel and 2,000 mtpa cobalt cathode - first production expected Q1 2024
- Operating risk reduced though selection of flowsheet closely aligned to historical process at SMP

Cost estimates

- US\$55M capital expenditure project focused on replacement and refurbishment of plant and equipment
- Additional US\$10M contingency to address potential for capex escalation (total restart capex US\$65M)⁶
- Near-term outlook for key raw materials pricing in-line with, or favourable to, BFS. Estimated SMP unit costs per April 2022 BFS remain reasonable

Growth optionality

- Option for autoclave to treat ICO cobalt and other concentrates (additional to restart plan)
- Over time, historic capacity of 25,000 mtpa nickel will be targeted via debottlenecking and further investment
- Option to produce nickel sulphate

Key SMP restart parameters (April 2022)

Parameter	BFS input
Assumed operating life	20 years
Restart capital cost	US\$54.8M
Sustaining capital costs (average annual)	US\$0.9M p.a.
Nickel price ²	US\$8.00/lb
Cobalt price ³	US\$25.00/lb
MHP payability	75% CIF Santos
Cobalt hydroxide payability	75% CIF Santos
Brazilian real: US dollar	5.30
Parameter	BFS results ¹
NPV post-tax (at 8% discount rate)	US\$159M
IRR post-tax (nominal)	35%
EBITDA ^{4,5} (average annual in real \$)	US\$35M p.a.
EBITDA margin	12%
Payback (post-tax)	3.0 years
Production rate – nickel metal	10,000 mtpa
Production rate – cobalt metal	2,000 mtpa

First production expected in Q1 2024

Timeline, workstreams and restart capital costs

Key milestones achieved since BFS

- ✓ City Hall operating permit obtained¹ and acquisition subsequently closed in July 2022
- ✓ State environmental approval for construction obtained¹
- ✓ Key management team in place and restart execution plan established
- ✓ Final investment decision by Board in November 2022⁴

Ongoing activities

- Construction planning and readiness activities (led by Ausenco)
- Negotiation on supply of MHP and cobalt hydroxide raw materials at an advanced stage
- Operational readiness workstream established
- Detailed planning for remaining low risk permitting requirements linked to construction and operation
- POX addition BFS in progress – scope and release linked with third-party concentrate sale negotiations

Key steps to first production ³	2022	2023				2024

SMP estimated restart capital costs (US\$M)

SMP expected to deliver robust operating margins through the cycle

Operating cost structure

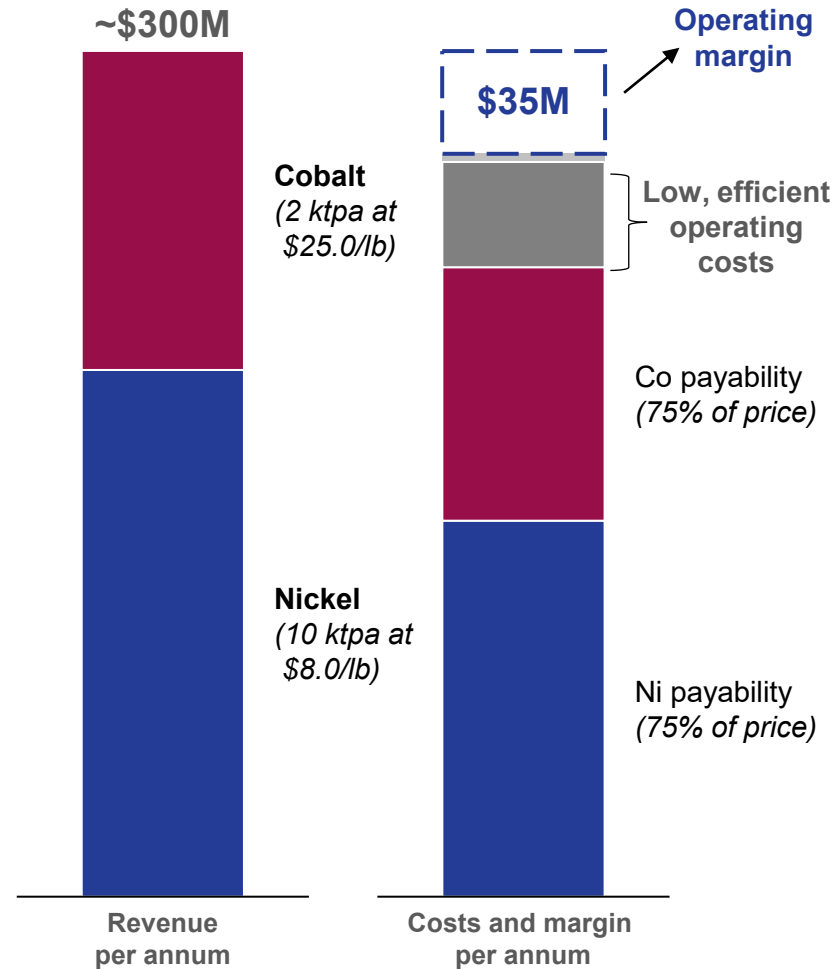

Globally competitive operating cost structure

- Key raw materials costs based on pricing linked to final product – e.g., % payable x LME nickel price
- Price risk managed through commercial model including Quotational Periods
- Annual average operating cost of US\$37M (R\$196M), based on BFS¹
- Long-term cost competitiveness underpinned by skilled workforce, competitive energy (hydropower) and local currency (R\$)
- Economics also supported by historical and forecast recoveries of 99% nickel, 97% cobalt

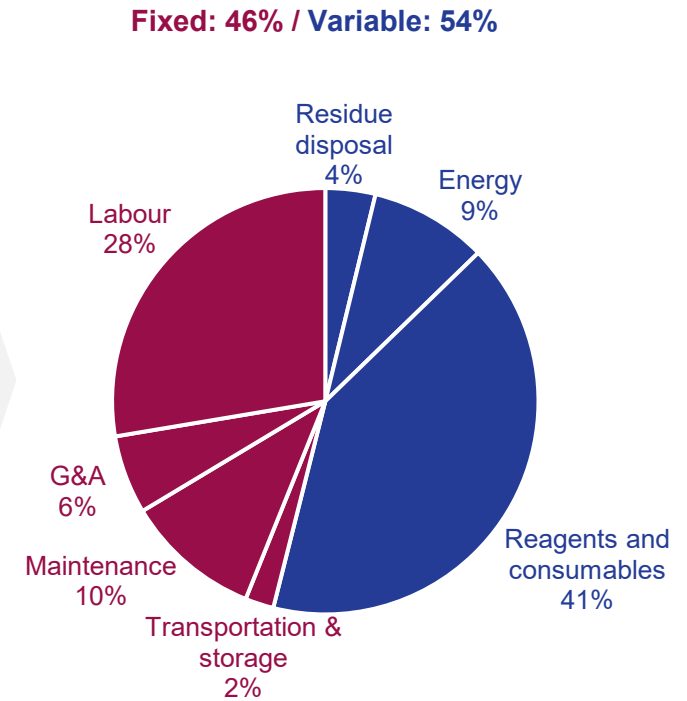

Sustainable EBITDA margin expected through the cycle

- Annual average EBITDA ~US\$35M and EBITDA margin ~12% under BFS assumptions¹
- Margins expected to be resilient through the cycle – raw materials costs linked to metal prices
- Near-term upside potential should current market conditions persist (e.g., premiums, payables)

BFS average annual revenues, costs, and margins (US\$M)²

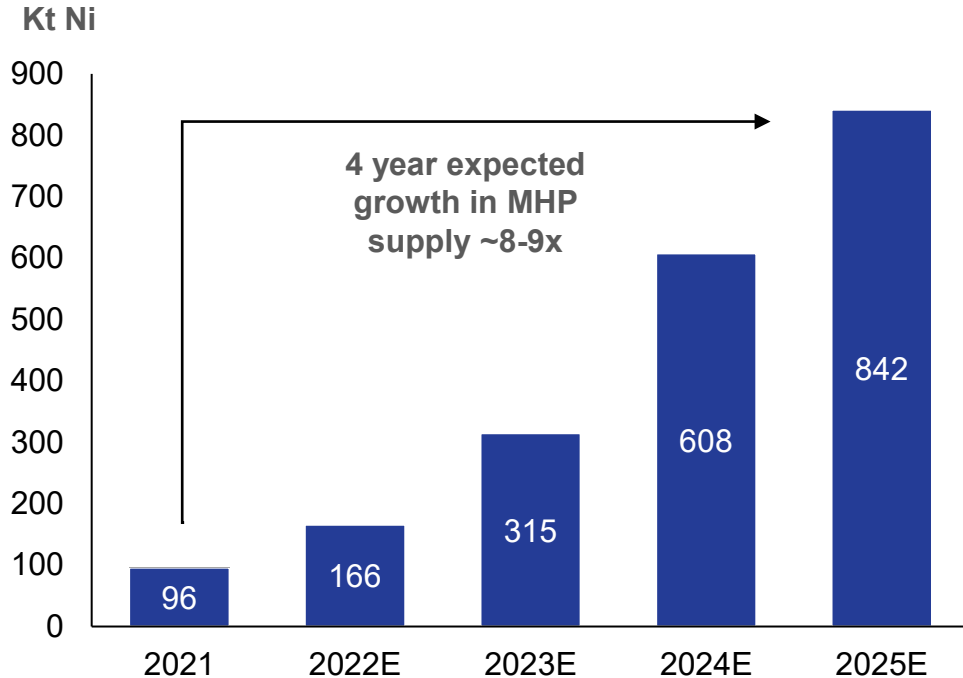

Annual operating cost estimate (US\$37M; R\$196M)²

Market conditions favourable for SMP raw materials procurement

Significant rise in MHP supply forecast from Indonesia

Global MHP supply 2021 to 2025¹

SMP raw materials	SMP BFS - Apr 2022
Nickel feed – MHP % payable	75% CIF Santos
Cobalt feed – Co hydroxide % payable	75% CIF Santos

- SMP historically processed around 10-20% MHP and 20-30% cobalt hydroxide
- MHP is an intermediate product used as a raw material in production of refined nickel – existing major producers:
 - Ravensthorpe Nickel Operations in Australia
 - Goro in New Caledonia
 - Ramu in Papua New Guinea
 - Gordes in Turkey
 - Multiple HPAL operations in Indonesia
- Growth of Indonesian supply increasing global availability of MHP with downward pressure on payabilities
- Initial MHP supply contracts under negotiation – expected to be finalised by end Q4 2022
- For MHP producers, sale to SMP is an attractive diversification opportunity away from China

Market conditions favourable for SMP product sales

Class 1 electrolytic nickel premia trading strongly

- SMP historically produced electrolytic nickel with 99.9% purity
 - Grade exceeded London Metal Exchange (“LME”) delivery specifications
 - Purity for demanding applications such as batteries, electroplating, high grade speciality stainless steels
- SMP electrolytic cobalt (broken cathodes) can be sold into battery manufacturing, super alloys, chemical industry, diamond tooling and magnets
- ‘Tocantins’ nickel and cobalt brands well established domestically in Brazil and key Western export markets
 - Class 1 nickel with strong ESG credentials and metallurgical characteristics
 - Historically traded at a premia to standard LME electrolytic nickel brands
 - Future premia anticipated to widen basis market conditions
- Superalloy demand rebounding with aerospace
- Possible further impact to class 1 nickel supply due to potential sanctions for Russian metal and LME delivery restrictions

SMP well-positioned to leverage importance placed on ESG

Aim to become an ESG leader in nickel and cobalt refining

Lower carbon emissions

- Targeting low scope 1 and 2 emissions, with benefit to customers' scope 3 emissions
- 100% hydrometallurgical process which is at the lower end of carbon intensity for nickel, cobalt metal
- >80% of power from renewables; aim to increase to 100% through ENEL agreement

Ethical supply chains

- Western-focused supply chain
- Working towards to Responsible Minerals Initiative (“RMI”) conformance
- Expanding supply chain due diligence according to OECD and UN standards

Community engagement

- Formalisation of stakeholder engagement strategy underway
- Instituting SpeakUp programme and measures to foster workforce diversity
- Hire-local, buy-local policy

Responsible business practices

- Initiated process to advance towards ISO 9001, 14001, 45001 certification
- Ethics & Compliance programme in development
- Benchmarking against best-in-class and broadly accepted industry ESG standards underway (Nickel Mark and Cobalt Mark in development, following the established Copper Mark)

Appendix A – Additional Information

Appendix B – Commodity Market Update

Appendix C – Key Risks

Appendix D – International Offer Restrictions

Idaho Cobalt Operations - the largest cobalt resource in the United States

ICO overview

ICO location, Idaho, United States

- High grade cobalt-copper-gold deposit, located near the town of Salmon, Idaho
- Largest NI 43-101 compliant cobalt resource in the US
- Construction substantially complete and plant commissioning commencing

- Ramp-up on track for expected sustainable nameplate production by end Q1 2023
- Mine development based on initial 7-year mine life to minimise risk and maximise IRR
- Optionality in resource expected to support mine life extension
- Official opening occurred on 7 October 2022, well-supported by political stakeholders
- US\$17M remaining expenditure of US\$107.5M project development budget
- Option to refine cobalt concentrate at SMP (via addition of POX); negotiations continuing with third-party processors in countries allied to the U.S.
- Copper concentrate to be sold into North American markets
- Engagement ongoing with U.S. government on mine expansion and downstream processing, including possible funding support

Surface construction (October 2022)

Mining prepared for ore delivery (October 2022)

ICO 2023 priorities: ramp-up, optimisation and resource expansion

Timeline and workstreams

Mine sustaining capital completing key underground infrastructure

Proposed mine development 2022 to 2024

Actual 2022 2023 2024

ICO underground mine development plan (October 2022)

Initial ore delivery ready to commence ahead of infrastructure completion

- Remaining infrastructure nearing completion
 - Underground shop and sumps
 - Additional ore accesses
 - Development for paste backfill system

Opportunities being pursued to maximise mine productivity

- Stoping optimisation
- Ramp design
- Technology investment

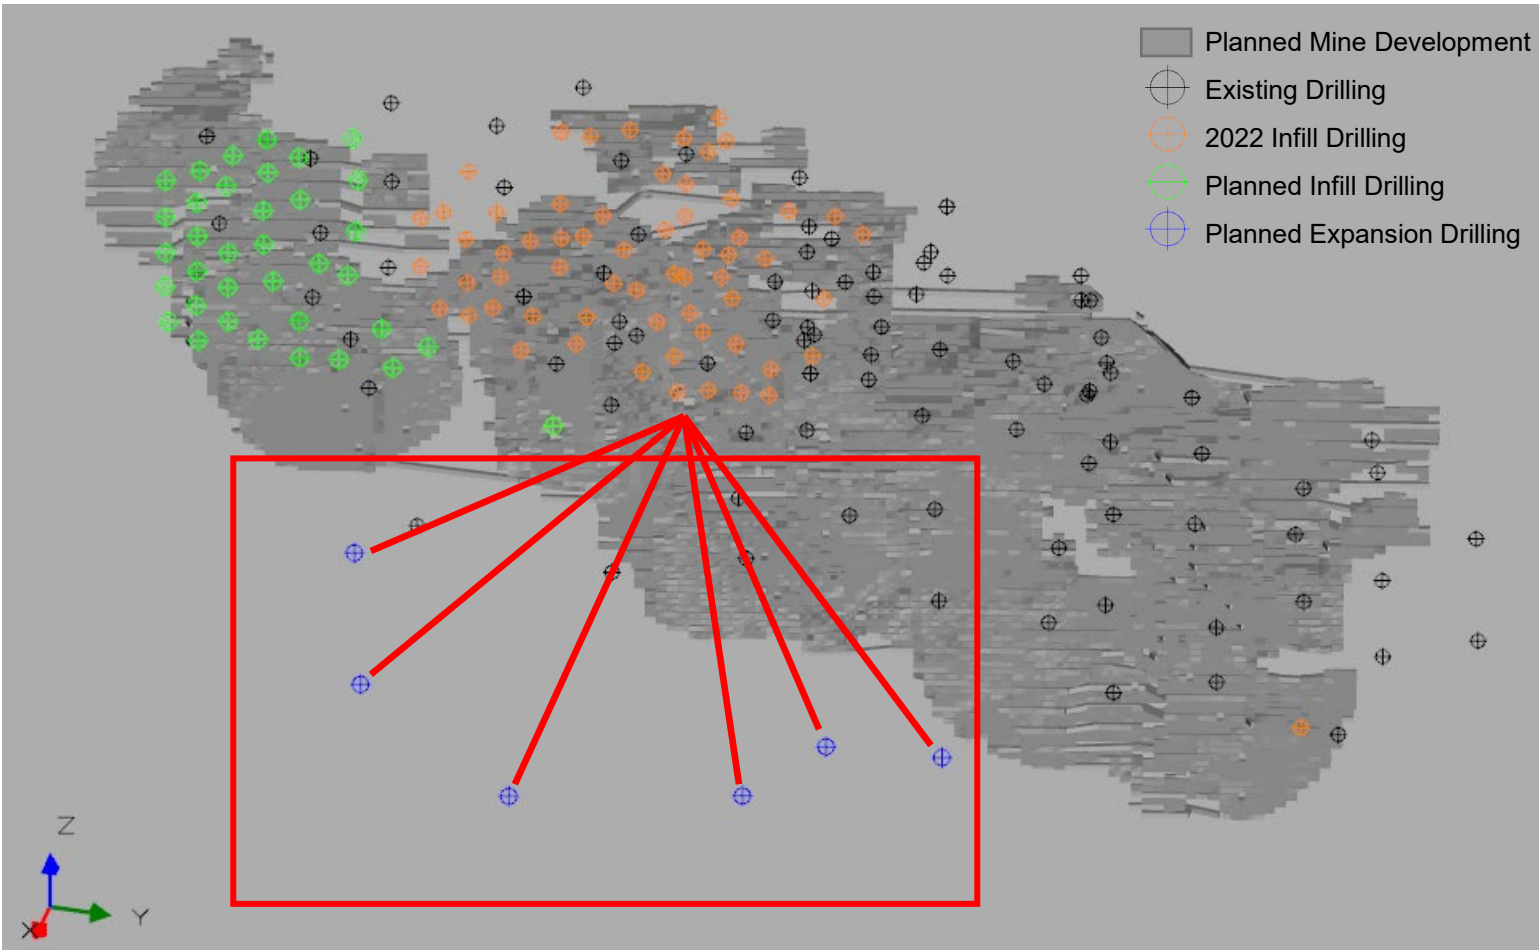

Life of mine sustaining capital expenditure profile materially consistent with BFS

- Development profile maximises optionality
- Cost inflation impacting 2023 and 2024
- Capex profile ramps down 2025 onwards

Mine sustaining capital expenditure	2023	2024
Feasibility Study (NI 43-101) ¹	US\$30M	US\$20M
November 2022 update	US\$29M	US\$26M

Drilling underway in high potential expansion zone

Infill and expansion drilling

ICO underground drilling plan (October 2022)

Initial infill drilling programme complete

- Infill drilling programme completed to de-risk near-term production – 28,000 feet drilled

First phase expansion drilling underway

- Significant extension potential – reserves included in BFS LOM equal to 47.5% of resource
- Ore body open to the south and at depth
- For current approved programme 1,600 feet drilled to date (US\$0.4M), of forecast 8,250 feet (US\$1.4M)

Brownfield exploration targets established

- Sunshine deposit, 100%-owned and within short trucking distance from ICO facilities
- 2023 drill programme submitted for regulatory approval

US\$5M from the equity raise will be used for infill and expansion drilling

Focus on cost management

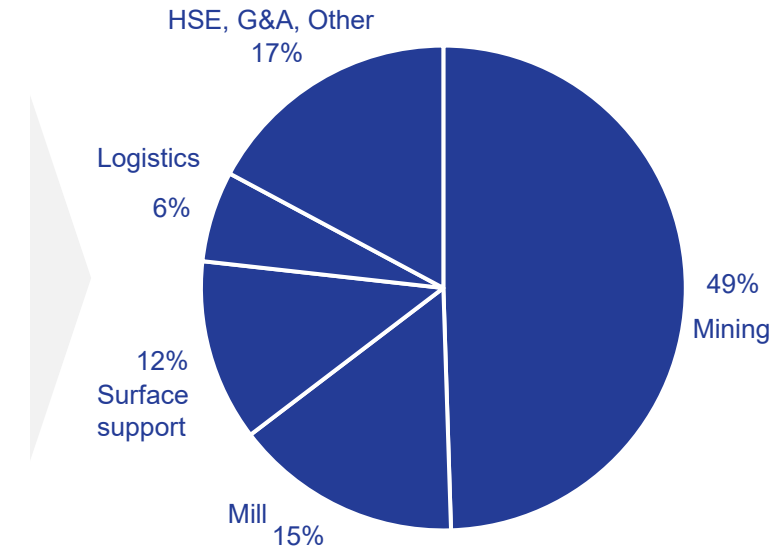

ICO operating costs

- Strong management in the construction phase helped contain inflationary impacts on project capex
- Jervois is working to optimise its business plan to mitigate U.S. inflationary pressures on operating costs
- Escalation since 2020 BFS includes mining costs, labour rates, energy and key consumables
- Efficiency and improvement initiatives being pursued site-wide to optimise operating costs

Updated 2023-24 annual operating costs vs 2020 BFS (US\$M)¹

A global leader in cobalt-based advanced materials

Jervois Finland overview

Working capital	Dec 2021	Sep 2022
Cobalt price, qtr end (US\$/lb)	33.5	25.7
Cobalt inventory (mt ³)	1,704	2,687
Net Working Capital (US\$M)	115	163

Established global leader in cobalt-based advanced materials

- One of two major players active across all key markets globally
- Strategic asset – unique capabilities and market position hard to replicate
- Well diversified business serving customers in U.S., Europe and Japan

Near-term focus on margin optimisation and inventory management

- EBITDA margin target ~10-15% through the cycle, influenced by price
- Staged unwind of excess inventories into 2023 – cash release to repay debt

BFS underway on potential expansion to match expected growth in demand

- Potential for additional 6,000 tonnes capacity at Kokkola from mid-2020s

Working capital overview

Jervois Finland underpinned by >US\$150M of product inventory

Mercuria facility established to provide commercial flexibility

- US\$100M of US\$150M drawn at end September 2022 (US\$115M drawn at end of October 2022)
- Underpinned by >US\$150M of physical cobalt inventory

Significant loan repayments anticipated if cobalt prices are stable

- Intention is to unwind inventory to target levels (90 -110 days), with proceeds to be applied to amortisation of Mercuria loan
- Natural repayment and deleveraging as inventory decreases both as volumes are reduced, and lower prices flow through

Measured approach to reducing cobalt inventory remains optimal

- Selling premium cobalt products on a discounted basis into non-strategic end markets (China) is a suboptimal commercial outcome
- Proceeds from inventory unwind applied to amortise Mercuria loan in line with anticipated reduction in collateral
- Permitted cash to upstream under loan terms capped at US\$50M

Working capital overview (US\$M)	Q3 2022 Unaudited ⁴
Cobalt price at quarter-end (actual, US\$/lb) ¹	25.7
Net Working Capital – US\$M	163
Cobalt inventory: raw materials (mt)	1,015
Cobalt inventory: finished goods (mt)	1,488
Cobalt inventory: total (mt)²	2,687
Inventory cover (days)³	~160

- Cobalt price movements materially impact inventory value and changes to working capital
- Investment in working capital part of the Jervois Finland business model
- Working capital optimised to balance supply chain risk, commercial objectives and liquidity management
- Total inventory volumes temporarily in excess of target levels (90 - 110 days)
- Cobalt hydroxide supply catch up follows significant logistical interruptions over past 12 months
- Working capital expected to normalise across 2023, weaker than expected 2H 2022 due to China lockdowns

Sources and Uses

The equity raising has been sized to fully fund SMP and ICO

Sources	US\$M	A\$M ¹	Uses	US\$M	A\$M ¹
Equity raising	150	231	SMP restart capital expenditure	65	100
Cash (at 31 October 2022)	42	64	SMP acquisition payment and working capital	22	34
			ICO remaining project capital expenditure ²	17	26
			ICO sustaining capital expenditure	34	52
			ICO exploration programme	5	8
			ICO working capital	10	15
			JFO expansion BFS	2	3
			Interest – ICO Bond, Mercuria facility	22	34
			Corporate and general	15	23
Total sources	192	295	Total uses	192	295

SMP

- Estimated capex for 12-month restart project of US\$65M (including US\$10M additional contingency)
- SMP final acquisition payment of US\$12M (R\$62.5M) in June 2023. Working capital requirement of US\$10M

ICO

- Remaining project capex of US\$17M². Mine sustaining capex of US\$29M and other sustaining capex of US\$5M
- Exploration programme of US\$5M. Working capital and ramp-up requirement of US\$10M

JFO and Corporate

- Refinery expansion BFS costs of US\$1.5M
- Interest on ICO Senior Secured Bonds (US\$13M) and Mercuria facility (US\$9M)

Equity raising overview

Equity Raising size and structure	<p>Fully underwritten A\$231M (US\$150M) equity raising (“Equity Raising”) consisting of:</p> <ul style="list-style-type: none"> • An institutional placement (“Placement”) to raise approximately A\$113M (US\$73M) • A 1 for 5.42 pro-rata accelerated non-renounceable entitlement offer (“Entitlement Offer”) to eligible shareholders to raise approximately A\$118M (US\$77M) <p>Approximately 550M New Shares to be issued under the Offer representing approximately 36% of current issued capital</p>
Offer Price	<p>The Equity Raising will be offered at a price of A\$0.42 per New Share (Offer Price)</p> <ul style="list-style-type: none"> • 12.9% discount to theoretical ex-rights price (TERP including placement)¹ of A\$0.482; and • 14.6% discount to theoretical ex-rights price (TERP excluding placement) of A\$0.492; and • 16.8% discount to close price of A\$0.505 on Tuesday, 8 November 2022
Use of proceeds	<p>The proceeds will be used to fund: i) the restart of SMP; ii) ICO ramp up and mine sustaining capital expenditure; and iii) general corporate purposes including Jervois Finland expansion BFS</p>
Investor participation	<p>AustralianSuper</p> <ul style="list-style-type: none"> • Entities controlled by AustralianSuper have agreed to participate in up to A\$55.6M (~24% of the Equity Raising) – including its full Institutional Offer entitlement, Placement pro-rata and additional Retail Entitlement Offer sub-underwriting <hr/> <p>Mercuria</p> <ul style="list-style-type: none"> • Mercuria has agreed to invest US\$10.5M in the Equity Raising <hr/> <p>Directors and management</p> <ul style="list-style-type: none"> • Directors and senior management of Jervois have indicated they will participate for approximately A\$2.0M (US\$1.3M) in the Equity Raising² • CEO Bryce Crocker intends to sell a number of shares in Jervois to fund a personal tax liability that arises from the exercise of expiring options and earlier vesting of shares during a recent blackout period
Ranking	<ul style="list-style-type: none"> • New Shares will rank equally with existing Jervois shares on issue in all aspects • New Shares issued under the Placement will not be eligible to participate in the Entitlement Offer

Equity Raising timetable

Event	Date
Announcement of Equity Raising	Thursday, 10 November 2022
Bookbuild for Placement and Institutional Entitlement Offer closes	Thursday, 10 November 2022
Announcement of the completion of Placement and Institutional Entitlement Offer and trading resumes on an ex-entitlement basis	Friday, 11 November 2022
Record Date for Entitlement Offer (7pm)	Monday, 14 November 2022
Information Booklet and Entitlement & Acceptance Form despatched to Eligible Retail Shareholders	Thursday, 17 November 2022
Retail Entitlement Offer opens	Thursday, 17 November 2022
Settlement of New Shares to be issued under the Institutional Entitlement Offer + Placement	Friday, 18 November 2022
Allotment and Quotation of New Shares under the Placement and Institutional Entitlement Offer	Monday, 21 November 2022
Closing date for acceptances under Retail Entitlement Offer (5pm)	Wednesday, 30 November 2022
Announcement of results of Retail Entitlement Offer and notification of any shortfall	Monday, 5 December 2022
Settlement of Retail Entitlement Offer	Tuesday, 6 December 2022
Allotment and issue of New Shares under the Retail Entitlement Offer	Wednesday, 7 December 2022
Commencement of trading and holding statements dispatched for Retail Entitlement Offer	Thursday, 8 December 2022

JERVOIS INVESTMENT HIGHLIGHTS

EV batteries require nickel and cobalt

Nickel and cobalt are critical minerals

Jervois assets are strategically important

Jervois portfolio is diversified

Jervois management is highly experienced

Fully funded for execution of near-term
growth pipeline¹

Contents

1. Company update and equity raising overview

2. São Miguel Paulista (SMP) restart

Appendix D – International Offer Restrictions

Potential future upside from policy tailwinds

Overview of critical minerals policy environment

Step change in U.S. Government engagement on critical minerals policy; a whole of government approach to enhancing domestic capacity

- Several new initiatives and pieces of legislation provide incentives for domestic extraction, processing and refining of critical minerals
- Inflation Reduction Act (“IRA”) broadens scope of existing legislation to include critical minerals and provides significant funding boost to many existing programmes:
 - Department of Defense: Defense Production Act Title III Program
 - Department of Energy: Title XVII Innovative Energy Loan Guarantee Program; Advanced Technology Vehicles Manufacturing Loan Program; Vehicle Technologies Office
 - U.S. International Development Finance Corporation
- IRA regulations being drafted – implementation will potentially have a positive economic impact for Jervois
- Mineral Security Partnership – in co-operation with key Allies including *inter alia* Australia, Finland, EU, Japan, South Korea and Canada

European Union Critical Raw Materials Act at early stage of development

- While unlikely to be as far reaching as the U.S. IRA, denotes understanding of the importance of securing critical minerals supply chains
- Jervois participating in industry consultation and providing input to regulators

Balance sheet

Balance sheet at 30 September 2022¹ and cash balance reconciliation to 31 October 2022

Jervois Global Limited (consolidated, unaudited)	30 September 2022	31 December 2021
	US\$M ¹	US\$M
Cash and cash equivalents	52	49
Restricted cash	1	114
Trade and other receivables	46	37
Inventories	158	109
Other	5	6
Total current assets	262	315
Property, plant, and equipment	258	128
Intangibles, including goodwill	99	103
Other	14	32
Total non-current assets	371	263

Appendix A – Additional Information

Appendix B – Commodity Market Update

Appendix C – Key Risks

Appendix D – International Offer Restrictions

Outlook for nickel

Positive fundamental outlook for the nickel industry driven by the growth in battery precursors

Primary nickel demand outlook by segment (kt)¹

Electrification expected to drive a step change in nickel demand

- High nickel remains chemistry of choice for Western OEMs
- Global demand outlook for nickel in EVs remains robust
- LFP important for entry level EVs, high LFP penetration is key to moderating expected nickel and cobalt supply shortfalls
- OEMs forced to consider entry into less favourable investment jurisdictions to secure supply
- Battery demand expected to reach ~1Mt in 2026 representing ~25% of primary nickel consumption, up from 15% currently

Nickel markets

Nickel prices have stabilised following LME disruptions at the beginning of 2022

Overview

- LME Nickel prices @ US\$22,134/Mt (~US\$10.05/lb) (1 November 2022)
- After LME disruptions earlier in the year, prices have fallen and stabilised around US\$10/lb since June
- Electrolytic nickel metal at significant premiums to LME during most of 2022

Price drivers

- Increased MHP and matte supply from Indonesia
- Due to macroeconomic and COVID-19 impacts (latter in China), stainless steel demand softening
- Superalloy demand rebounding

Market outlook

- Increasing supplies of intermediates creating lower payables, and larger spread between class 1 & class 2 prices
- EV growth rates for high Ni chemistries forecast to remain strong
- Possible further impact to class 1 supply due to potential sanctions for Russian metal and LME delivery restrictions

Cobalt markets (1/2)

Positive fundamental outlook for the cobalt industry

Total cobalt demand by sector and scenario¹

IEA forecast future cobalt demand under two scenarios

- Stated Policies Scenario (STEPS) – forecast based on sector-by-sector analysis of today's policies and policy announcements
- Sustainable Development Scenario (SDS) – compliance with Paris Agreement by 2040 (stabilisation at <math><2^{\circ}\text{C}</math> global temperature rise)

IEA conclusions

- Conservatively assumed that cobalt content in cathodes continues to fall
- Despite this, by 2040 cobalt demand into EVs and battery storage expected to rise 7x (STEPS) and 21x (SDS) from 2020 baseline
- Cobalt demand growth in non energy transition uses expected to continue
- Expansion in cobalt supply unlikely to be capable of satisfying demand
- Supply increases expected to be dominated by unstable and unreliable regions

Cobalt markets (2/2)

Cobalt price stabilised and then consolidated in Q3 - outlook remains positive for 2023 and beyond

Cobalt market stabilised after recent downturn

- Global macroeconomic situation, along with continuing COVID-19 related lockdowns, dampened demand in Q2 2022
- Risk of supply disruptions from DRC are re-emerging and may trigger restocking, favourably impacting prices

Resilient demand in industrial segments

- Aerospace industry is on path to recovery with increased aircraft orders driving super alloy demand
- Chemicals, Catalysts, Ceramics and PM segments stable with GDP demand growth expected

Growth in battery sector demand poised to accelerate

- EV outlook for demand remains robust – Jervois well placed to participate in demand growth
- Consumer electronics sector expected to recover from recent slowdown

Appendix A – Additional Information

Appendix B – Commodity Market Update

Appendix C – Key Risks

Appendix D – International Offer Restrictions

Risk factors (1/14)

This section discusses some of the risks associated with an investment in Jervois Global Limited (“Company” or “Jervois”, and together with its subsidiaries, the “Group”).

The Group’s business is subject to a number of risks both specific to its business and of a general nature which may impact on its future performance. Before subscribing for new shares in the Company (“New Shares”) under the Placement or Entitlement Offer (“Offer”), investors should carefully consider and evaluate the Company, the Group’s business and whether the New Shares are suitable for them having regard to their investment objectives and financial circumstances and take into consideration the risks set out in this section and other risks relevant to the Group.

The list of risks below should not be taken as an exhaustive list of the risks faced by the Group or by investors in the Company. Those risks, and others not specifically referred to below, may in the future materially affect the financial performance of the Group and the value of the New Shares. The offer of New Shares carries no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares. Investors should consider the investment carefully and should consult their professional advisers before deciding whether to apply for New Shares.

1. Jervois Finland

1.1 Working capital

Jervois anticipates that cash will be released from lower working capital in 2023 and will be used to meet partial repayment of the Mercuria working capital facility. The pace and extent of inventory unwind will be influenced by market conditions. Adverse market conditions may cause inventory reductions to occur at a slower pace than currently expected. Should this occur, the timing and extent to which the Mercuria loan is reduced will also be impacted.

1.2 Future earnings may not be as expected

To the extent that the actual results achieved by Jervois Finland are different than those anticipated there is a risk that the profitability and future earnings of the operations of Jervois Finland and the Group may differ (including in a materially adverse way) from the performance as expected.

1.3 Cobalt Prices

A significant proportion of Jervois Finland’s product sales are based on prices linked to the quoted prices for cobalt. Purchases of cobalt hydroxide, which is refined and then processed into a range of cobalt products, are priced according to a percentage of quoted cobalt prices. Changes in the quoted price of cobalt impact Jervois Finland’s sales, costs, profitability, cash flow, and working capital requirements. Rapid or material adverse movements in the quoted price of cobalt, may lead to financial losses and may adversely impact liquidity of the Group.

1.4 Feed Supply payables

The cobalt hydroxide (feed supply) cost is typically paid as a percentage of the cobalt price and may be influenced by levels of available supply feed stock. In market conditions where there is limited supply feed, the Group may need to pay a higher percentage to secure supply. Historically a higher payable is often associated with higher cobalt prices, however this is not always the case. If a higher payable is required without a commensurate change in the quoted price of cobalt, this may impact the operating margin and therefore the future profitability of Jervois Finland.

1.5 Risks to availability of supply

In view of forecast growth in demand for cobalt, there is a risk that supply availability will be partially or totally constrained. ESG issues will constrain preferred supply, and material that is available from sources meeting ESG requirements (including Jervois Finland’s sources of supply) will be in higher demand. There is also a risk that if availability of supply is materially constrained that feed supply prices increase adversely impacting the future profitability of Jervois Finland.

1.6 Cooperation with Umicore:

Jervois Finland relies on a shared refinery with Umicore, and future cooperation with Umicore on matters related to the operation of the facilities is essential. Any material technical malfunction, fire, loss of cooperation or dispute may adversely impact the Jervois Finland business.

Risk factors (2/14)

2. RISKS TO JERVOIS USA

2.1 Limited operating history

The Company's principal assets currently 100% indirect ownership of Jervois Finland, 100% indirect ownership of the São Miguel Paulista nickel-cobalt refinery in Brazil ("SMP Refinery") and 100% indirect ownership in Jervois Mining USA Limited ("JRV USA").

JRV USA's principal asset is a permitted cobalt-copper mine in Idaho, United States that is currently completing construction and commissioning (the "ICO Project"). The remainder of the construction and commissioning is expected to be funded by funds raised under the Offer. JRV USA is still in the early stages of commissioning meaning that JRV USA will be subject to all the risks inherent in the ramp-up of, inter alia, the underground mine transitioning from development to production mining and surface grinding and flotation metallurgical processing facilities ramping up to continuous commercial production. The ICO Project holds an approved Plan of Operation, an access agreement for site access, and associated land claims. Investors should note that JRV USA has no history of earnings, and there can be no assurance that JRV USA's ICO Project or any other property or business that JRV USA may acquire or undertake will generate earnings, operate profitably or provide a return on investment in the future.

Although JRV USA has initiated measures to mitigate risks related to geology, mining, processing and transportation through the ICO Bankable Feasibility Study ("BFS") and certain drilling and testwork programmes in 2019 and an ongoing drilling programme in 2022, geological and economic extraction and processing risk will always remain.

2.2 The key risks related to JRV USA identified in the ICO BFS and more generally moving forward are

- **Geology:**
 - Geological interpretation – sub-surface modelling of geological characteristics is based on drilling information, surface mapping and ore deposit models. This carries data accuracy and interpretation risk. To minimise this risk, factors such as nearby mine knowledge, drillhole core analysis and structural models have been used to develop the resource model. The ore deposit is stratiform with mineralization confined to the BTE rock unit which has been identified from drillhole logging. By their nature, stratiform deposits display a high continuity.
 - Drill spacing – the orebody has been drilled on a nominal 200ft sectional spacing, however the central zone which is the first to be mined has been infilled to a 100ft spacing. Establishing surface drilling platforms is difficult due to the steep terrain, as such we are executing an infill drilling programme from underground. Initial planned stopes will be infill drilled to 50ft spacing for ore definition and grade control.
 - Assay data – pre-2009 assay data is incomplete with respect to arsenic assays. Examination of drill ore intercepts with QEMScan reveals that arsenic is mostly associated with cobalt as the mineral Cobaltite. Therefore, arsenic is mainly contained within the orebody and has a close direct relationship to cobalt.
 - Oxidation – oxidized ore shows poor recoveries. This ore is identified by low sulphur content and is excluded from the reserve.
 - Faulting displacement – a detailed 3D structural model has been formed of the major faults occurring in the orebody area. These have been shown to be subparallel to the orebody strike and only minor displacements of the orebody occur. There may be minor fault splays which remain unknown in extent and orientation however the occurrence of these will be defined by close spaced underground drilling.
 - Grade estimation – the selected method of grade estimation is ID2. This method was chosen over other statistical methods for preservation of the high-grade components of the ore intercepts which is appropriate to the selective mining method to be employed. Indicator and ordinary kriging were found to smear grades on a local scale which is not acceptable for selective mining. As the drill intercept density increases via underground drilling, conditional simulation methods will be employed to further enhance grade definition.

Risk factors (3/14)

- **Mining:**
 - Contractor performance – Currently Jervois USA has opted for a contract miner option and operation of the mine is reliant on contractor performance. The mine plan, mining method and contractor performance can be impacted by ground conditions, updates in geological information, such as faults and structures, resource definition and the presence of water.
 - Geological interpretation – The mine schedule is based on resource estimation and any scheduling is based on geological interpretation.
- **Metallurgy and processing:**
 - Recovery of metal may be hindered by poor head grade delivery from the mine.
 - Recovery of metal may be hindered by poor operation of the plant.
 - Through-put of material may be hindered by poor maintenance.
- **Infrastructure, Logistics and Transportation:**
 - ICO business depends on adequate infrastructure, including reliable power sources, water supply, roads and other infrastructure. Water shortages, power outages, sabotage, community, government or other interference in the maintenance or provision of such infrastructure could adversely affect ICO's business, financial condition and results of operations.
 - Significant current infrastructure is already in place. Risks such as adverse weather, forest fires and other climatic risks may impact this infrastructure.
 - Future infrastructure development that may be required could be impacted by climatic risks.
 - Site access and road usage – limiting road traffic and access to the site is an environmental and safety risk which will be mitigated during operations by use of the accommodation camp which will accommodate the bulk of mining labour. Material and equipment deliveries will be managed or controlled through the Salmon warehouse to ensure deliveries to site are coordinated.
- **Permitting:**
 - Demonstrating the effectiveness of the pump-back system/groundwater capture zone prior to initiating mining activities below the water table.
 - Ability of the water treatment plant to meet agency compliance.
 - Submittal and approval of various plans to the agency and the uncertainty in obtaining the approval by the agencies.
 - Final outcome of the Point of Compliance issued by the State of Idaho regarding groundwater quality threshold levels for the project.
 - Uncertainty of regulatory or rule changes by the State of Idaho or the U.S. federal government during construction and/or operations that may apply to the site.
- **Procurement, Construction and Execution:**
 - As part of project development risks associated with supply chain, sourcing of materials and equipment and deliveries can impact project cost and schedule.
 - Construction activities can be impacted by sourcing or contractors and workforce, site conditions and weather, delivery of materials and equipment and site productivity.
 - Construction of environmental systems – environmental systems and early works include completion of the miners dry and mining infrastructure, commissioning of the water treatment plant and pump back systems. Certain aspects of this work are affected by seasonal construction access.
- **Commissioning:**
 - Under delivery of ore to the Mill creating the requirement for stop start operations of the Mill.
 - Potential for catastrophic failure of equipment in the initial start-up and commissioning phase.
 - Technical difficulties in achieving expected recoveries and concentrate qualities expected in the concentrate flowsheet during start up activities.
 - The ability to attract and retain adequate workforce through start up, commissioning and operations phase of the project could impact project cost and schedule.
- **Marketing:**
 - The cobalt at ICO is contained within cobaltite, a mineral composed of cobalt, arsenic and sulphur. The ICO cobalt concentrate therefore contains elevated arsenic, as the arsenic cannot be separated from cobalt using conventional sulphide flotation methods. The marketability of the ICO concentrate is more limited due to the arsenic which requires specialised and safe extraction (such as that which Jervois plans to undertake at the SMP refinery via the use of a pressure oxidative leach ("POX") autoclave). Any delay or reduction in sales of the ICO cobalt concentrate could adversely affect the Group's future cash flow and overall profitability.
 - Arsenic will also deport to the copper concentrate, in quantities likely sufficient to trigger penalties from customers (which were incorporated into the ICO BFS marketing assumptions), but not in adequate volumes to affect the marketability of the concentrate or to render it a 'complex' material for global copper smelters.

Risk factors (4/14)

2.3 Risks related to the JRV USA's financial situation

The proceeds from the Offer will be used towards payment of capital expenditures, operating expenses and financing costs (including payment of interests on the Bonds) associated with the development and operation of the ICO Project. The proceeds from the Offer are expected to be sufficient for the Group to bring the ICO Project into continuous commercial production. If there is a shortfall in funding for ICO Project the Group has a history of successful equity fund raising and may also enter into pre-payment, mineral streams or inventory financing transactions, any, or a combination of which, may provide sufficient financing to bring the ICO Project into continuous commercial production. There can be no assurance that the Group will be able to obtain or access additional funding if required, or that the terms associated with the funding will be reasonable. If the Group, as concerns JRV USA and the ICO Project, is unable to obtain such additional funding, lease payments, work commitments, rental payments and option payments, if any, may not be satisfied and could result in a loss of property ownership or earning opportunities for JRV USA and the Group.

The management of the Group will have some discretion concerning the timing and size of the expenditures for sustaining capital of the ICO Project. As a result, an investor will still be subject to the judgment of the management of the Group for the application of the proceeds of the Offer. Further, the results and the effectiveness of the application of the proceeds are uncertain. If the proceeds are not applied effectively, the Group's results of operations and the value of the shares or secured assets may be materially and adversely affected.

2.4 Calculation of mineral resources and mineral reserves and limitations on mineral resource estimates

There is a degree of uncertainty attributable to the calculation of mineral reserves, mineral resources and corresponding grades being mined or dedicated to future production. Until mineral reserves or mineral resources are actually mined and processed, the quantity of mineral reserves or mineral resources and grades must be considered as estimates only. In addition, the quantity of mineral reserves or mineral resources may vary depending on metal prices. Any material change in the quantity of mineral reserves, mineral resources, grade or dilution may affect the economic viability of the ICO Project. In addition, there can be no assurance that mineral recoveries in small-scale laboratory tests will be duplicated in larger scale tests under on-site conditions or during production.

No assurance can be given that any particular level of recovery of minerals will in fact be realized or that identified mineral resources will ever qualify as a commercially mineable (or viable) deposit which can be legally and economically exploited. In addition, the grade of mineralization which may ultimately be mined may differ from that indicated by drilling results and such differences could be material. Production can be affected by such factors as permitting regulations and requirements, weather, environmental factors, unforeseen technical difficulties, unusual or unexpected geological formations and work interruptions. The estimated mineral resources at ICO should not be interpreted as assurances of commercial viability or of the profitability of any future operations. Moreover, certain sections of the mineral resources are reported at an "inferred" level. Inferred mineral resources have a substantial degree of uncertainty as to their existence, and economic and legal feasibility. Accordingly, there is no assurance that inferred mineral resources reported herein will ever be upgraded to a higher category. Investors are cautioned not to assume that part or all of an inferred mineral resource exists or is economically or legally mineable.

Jervois engaged independent consulting firms to both prepare (Orix Geosciences) and audit (CSA Global) the ICO Mineral Resource Estimate. RPM Global were engaged by Jervois as Independent Engineer for lenders, and part of their scope was to also review the mineral resource estimate. RPM Global's recommendation was that the resource classification must be solely based on drillhole spacing and, as a result, Measured tonnes should be changed to Indicated, and Indicated tonnes changed to Inferred tonnes. No change to the Inferred resource was recommended. Jervois and Orix disagree with RPM Global's opinion, which is also inconsistent with prior mineral resource estimates at ICO from Micon. The Group has commenced an additional infill drilling at ICO in order to increase the confidence in the mineral resource and mineral reserve estimates. The outcome of the drilling may result in an updated mine plan being prepared to take into account any changes to classification, tonnes and metal grades and may result in the operations at ICO reaching commercial production later than currently expected.

Risk factors (5/14)

3. RISKS TO THE SMP REFINERY

3.1 Capital cost estimates

The company has undertaken a BFS which includes estimates of the capital costs required to restart the SMP Refinery. Estimates are provided on a plus/minus 15% range as is standard in BFS estimates. There is a risk that the final capital expenditure will be higher than the upper end of this range due to macro-economic and project-specific factors including inflation, interest rates and currency fluctuation, supply chain disruptions, and project execution risks. If the capital expenditure amount is greater than the plus 15% range this may impact the ability of the company to complete the SMP Refinery restart, or impact the financial returns estimated for the SMP Refinery.

3.2 Nickel and Cobalt prices, premia and feedstock availability and payability

The feed supply cost is typically paid as a percentage of the cobalt and nickel price and may be influenced by levels of available supply feed stock. In market conditions where there is limited, or no feed supply, the Group may need to pay a higher percentage to secure supply or may not be able to secure any supply. Historically a higher payable is often associated with higher nickel or cobalt prices, however this is not always the case. If there is no supply or if a higher payable is required without a commensurate change in the quoted price of nickel or cobalt, this may impact the operating margin and therefore the future profitability of SMP refinery.

3.3 Intermediate feedstock impurity levels

The variability of the feed MHP (nickel) and Co(OH)₂ is unknown. Higher levels of metals such as manganese, magnesium and zinc can impact the product quality and plant operations.

3.4 Logistics

The logistics of receiving reagents, feed material and shipment of product has been assessed but forecasting errors may impact the cost for receiving materials and exporting the product

3.5 Brownfield construction

Brownfield construction has implicit complexity due to limited space for new equipment, laydown yards and construction assembly. Any impact from these issues may delay the construction process and may impact overall capital costs.

3.6 Permit and licenses

New permits and licences that may be required or modification of existing permits and licenses, associated with construction and or operating activities may be obtained in a longer time frame than anticipated, or not granted on the terms required by the SMP refinery. If such permits or licences are not received or are not as requested by the Group, this may have a material impact on the ability of the refinery to operate and therefore on the Group financial position.

4. RISKS TO THE GROUP

4.1 Global Operating Footprint and Russian Federation Invasion of Ukraine

The Company has activities across Finland, Australia, the United States and Brazil. The integration and ongoing management of this portfolio imposes heightened risks related to the ongoing business prospects of Jervois.

The invasion by the Russian Federation of Ukraine, the resulting economic sanctions and the potential escalation or expansion of the invasion and the global response to it may have an impact on the Company's business. It may result from a broader global economic fallout and its impact on commodity prices including their price discovery mechanisms, credit markets and commercial counterparty risk or have more local impacts at the operational level. The Company continues to monitor the situation and the impact the invasion, resulting sanctions and potential escalation or expansion may have on the Company. The Company's ability to obtain financing and the ability of the Company's vendors, suppliers, customers and partners to meet obligations may be impacted as a result of the invasion, the resulting sanctions and potential escalation or expansion. Similarly, the Company's ability to advance our stated strategy and business plan and commodity prices may be impacted.

4.2 Reliance on management

The success of the Group depends to a large extent upon its ability to retain the services of its senior management and key personnel. The loss of the services of any of these persons could have a materially adverse effect on the Group's business and prospects. There is no assurance that the Group can maintain the services of its Directors, officers or other qualified personnel required to operate its business.

Risk factors (6/14)

4.3 Group's operations are subject to human error

Despite efforts to attract and retain qualified personnel, as well as the retention of qualified consultants, to manage Group's interests, and even when those efforts are successful, people are fallible and human error could result in significant uninsured losses to Group. These could include loss or forfeiture of mineral claims or other assets for non-payment of fees or taxes, significant tax liabilities in connection with any tax planning effort Group might undertake and legal claims for errors or mistakes by Group personnel.

4.4 Community and stakeholder relations

The Company's relationships with the community in which it operates are critical to ensure the future success of its existing operations and the construction and development of its project. The future success of Jervois is reliant on a healthy relationship with local communities in which the Company operates. While the Company is committed to operating in a socially responsible manner, there is no guarantee that its efforts will be successful, in which case interventions by third parties could have a material adverse effect on the Company's business, financial position and operations.

4.5 Risks related to insurance and insurance coverage

Exploration, development and production operations on mineral properties and in refineries involve numerous risks, including unexpected or unusual geological operating conditions, ground or slope failures, fires, environmental occurrences and natural or climate change related phenomena such as prolonged periods of inclement weather conditions, floods and wildfires. It is not always possible to obtain insurance against all such risks and the Group may decide not to insure against certain risks because of high premiums or other reasons. Such occurrences could result in damage to, or destruction of, mineral properties or production facilities, personal injury or death, environmental damage to the Group's' properties or the properties of others, delays in exploration, development or mining operations, supply chain disruptions, monetary losses and possible legal liability. Should such liabilities arise, they could reduce or eliminate future profitability and result in increasing costs and a decline in the value of the securities of the Group. If the Group is unable to fully fund the cost of remedying an environmental problem, it might be required to suspend operations or enter costly interim compliance measures pending completion of a permanent remedy. The lack of, or insufficiency of, insurance coverage could adversely affect the Group's future cash flow and overall profitability.

4.6 Project Delay

Jervois has a significant investment planned to complete construction in Idaho, US and to restart the SMP Refinery in Brazil. There are a number of risks inside and outside its control, such as availability of suitable financing, technical risk, infrastructure and logistics constraints, construction delays, cost overruns, insufficient labour skills or resources, delays in confirmatory permitting to move into construction then the commissioning and operating phases, or any other regulatory matters. Once complete given the risks outlined previously, there is no guarantee the results of ICO or SMP Refinery will be sufficient to offset such capital expenditures and generate adequate investor return.

Risk factors (7/14)

4.7 Competition risk in the market in which the Group operates

Significant and increasing competition exists for appropriate supply of feedstock for the mineral processing assets of the Group and the limited number of mining and mineral processing acquisition opportunities available. Additionally, new mineral processing facilities may be commissioned that will be in competition for the supply of feedstock and the sale of products in which the Group operates. The Group expects to leverage its increased size and market exposure to secure appropriate feed supply and to selectively seek strategic acquisitions in the future, however, there can be no assurance that suitable feed supply or acquisition opportunities will be identified. As a result of this existing or potentially new competition, some of which is with large established mining or refining companies with substantial capabilities and greater financial and technical resources than the Group, the Group may be unable to acquire adequate feed supply on suitable terms and this may impact the operating margin and therefore the future profitability of the Group. Additionally, the Group may be unable to acquire additional attractive mining or mineral processing assets on terms it considers acceptable. In addition, the Group's ability to consummate and to effectively integrate any future acquisitions on terms that are favourable to the Group may be limited by the number of attractive acquisition targets, internal demands on resources, competition from other companies and, to the extent necessary, the Group's ability to obtain financing on satisfactory terms, if at all.

4.8 Liquidity risk

The Group is transitioning to the operating phase at the ICO Project and the SMP Refinery, however the Group has not yet generated positive cash flow from these assets. The Group is a revenue generating group and will require working capital to manage its operations and therefore it is subject to liquidity risk. Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group is devoting significant resources to the development of its assets, however there can be no assurance that it will generate positive cash flow from operations in the future. The Group expects to continue to incur negative consolidated operating cash flow and losses until such time as it achieves commercial production at a particular project. Due to the lack of positive operating cashflow, the Group manages liquidity risk by maintaining adequate cash reserves, by continuously monitoring actual and forecast cash flows, its credit facilities and matching the maturity profiles of financial assets and liabilities.

4.9 Currency fluctuations

The Company's operations in the U.S., Finland, Brazil, and Australia make it subject to foreign currency fluctuations and such fluctuations may materially affect the Company's financial position, operational results and cashflows. The Company does not currently use an active hedging strategy to reduce the risk associated with currency fluctuations.

4.10 Commodity price risk

The Company is not currently a producing entity so is not directly exposed to fluctuations in commodity prices although these will affect equity market sentiment, the value of its securities and its ability to raise further capital on desired terms. As the Company transitions to become a producer as anticipated in the near term this risk will become the most material factor affecting its financial results.

Jervois Finland is directly exposed to the price of cobalt. Jervois Finland's profitability may be significantly affected by changes in the market price of cobalt.

The development of the Company's properties is dependent on the future prices of cobalt and nickel. Once the Company's properties enter commercial production, the Company's profitability will be significantly affected by changes in the market prices of cobalt and nickel. Metal prices are subject to volatile price movements, which can be material and occur over short periods of time and which are affected by numerous factors, all of which are beyond the Company's control. Such factors include, but are not limited to, interest and exchange rates, inflation or deflation, fluctuations in the value of the U.S. dollar and foreign currencies, global and regional supply and demand, speculative trading, the costs of and levels of metal production, and political and economic conditions. Such external economic factors are in turn influenced by changes in international investment patterns, monetary systems, the strength of and confidence in the U.S. dollar (the currency in which the prices of metals are generally quoted) and political developments. The effect of these factors on the prices of metals, and therefore the economic viability of the Company's mineral properties, cannot be accurately determined. The prices of cobalt and nickel have historically fluctuated widely, and future price declines could cause the development of (and any future commercial production from) the Company's mineral properties to be impracticable or uneconomic. As such, the Company may determine that it is not economically feasible to commence commercial production, which could have a material adverse impact on the Company's financial performance and results of operations. In such a circumstance, the Company may also curtail or suspend some or all of its exploration activities.

Risk factors (8/14)

4.11 Tenements, licences and permits

Jervois Mining USA holds permits for the operation of the ICO Project. Each of these have certain requirements and obligations attached to them, which if not met, will result in Jervois Mining USA losing the rights to operate in these land areas and the resulting negative impact to the future prospects of Jervois Mining USA. Jervois Finland holds permits for the operation of its facilities. Each of these have certain requirements and obligations attached to them, which if not met, will result in Jervois Finland losing the rights to operate in these areas and the resulting negative impact to the future prospects of Jervois Finland and could adversely affect the Group's future cash flow and overall profitability

There is no guarantee that title to the Group's mining leases, exploration licenses, environmental licenses and other tenure of property will not be challenged or impugned. The Group's tenure, permits and licenses may be subject to prior unregistered agreements, transfers, leases or native land claims and title may be affected by such unidentified or unknown claims or defects. Furthermore, any concession, permit or license may be withdrawn or the terms and conditions thereof, be changed by the relevant authority if the Group does not comply with its obligations under applicable laws or such specific concession, permit or license or if there otherwise are compelling reasons, (e.g. effects of the operations that could not have been foreseen at the time of authorization of such concessions, permits and licenses). In particular, mining tenements are subject to expenditure and work commitments which must be complied with in order to keep the tenements in good standing. In certain circumstances, these commitments may be varied at the discretion of the relevant mining authority. Failure to meet these commitments could lead to forfeiture of the tenement. Where tenement expenditures and work commitments or other regulatory requirements are not complied with, regulatory exemptions may need to be applied for within specified periods. Should exemptions not be applied for in time or are applied for in time but are not ultimately granted, fines may be payable to avoid the tenements being forfeited or, in extreme cases, the tenements may be forfeited.

Obtaining the necessary governmental licenses or permits is a complex and time-consuming process. There can be no assurance that the Group will be able to maintain or obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations or refinery activities at its projects. This could materially and adversely affect its business, results of operations, financial conditions or prospects. The ICO Project and SMP Refinery will require certain permits through construction and commissioning.

4.12 Environmental risks and other regulatory requirements

The activities of the Company are subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation generally provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining or refining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in imposition of fines and penalties. In addition, certain types of operations, including any proposed development of the Company's mineral properties and restart of the SMP Refinery, may require the submission and approval of environmental impact assessments. Environmental legislation is evolving to stricter standards, and enforcement, fines and penalties for noncompliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and Directors, officers and employees. The cost of compliance with changes in governmental regulations has potential to reduce the profitability of operations.

Failure to comply with applicable environmental laws, regulations and permitting requirements may result in enforcement actions including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining and mineral processing activities may be required to compensate those suffering loss or damage by reason of such activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations.

Amendments to current environmental laws, regulations and permits governing operations and activities of mining and metallurgical processing companies may change. Regulatory requirements surrounding site reclamation and remediation activities, or more stringent implementation thereof, could have a material adverse impact on the Group and cause increases in capital expenditures or production costs or reduction in levels of operational production, or require abandonment or delays in the development of new sites.

4.13 Financing Risks

The Company may require financing in the future to continue to develop its business and there can be no assurance that such financing will be available or, if available, that it will be on reasonable terms. If financing is obtained by issuing common shares, control of the Company may change, and investors may suffer additional dilution. To the extent financing is not available, lease payments, work commitments, rental payments and option payments, if any, may not be satisfied and could result in a loss of property ownership or earning opportunities for the Company.

Risk factors (9/14)

4.14 Land Title

No assurances can be given that there are no title defects affecting the properties in which Jervois has an interest. The Company's mineral properties and refineries may be subject to prior unregistered liens, agreements, transfers or claims, and title may be affected by, among other things, undetected defects. Other parties may dispute title to a property or the property may be subject to prior unregistered agreements and transfers or land claims by Indigenous people. Title may also be affected by undetected encumbrances or defects or governmental actions. Jervois has not conducted surveys of the Company's properties and the precise area and location of claims and other mineral rights may be challenged. Jervois may not be able to register rights and interests it acquires against title to applicable mineral properties. An inability to register such rights and interests may limit or severely restrict Jervois' ability to enforce such acquired rights and interests against third parties or may render certain agreements entered into by Jervois invalid, unenforceable, uneconomic, unsatisfied or ambiguous, the effect of which may cause financial results yielded to differ materially from those anticipated. Although Jervois believes it has taken reasonable measures to ensure proper title to its mineral properties, there is no guarantee that such title will not be challenged or impaired.

4.15 Pre-existing Environmental Liabilities

Pre-existing environmental liabilities may exist on the properties in which Jervois currently holds an interest or on properties that may be subsequently acquired by Jervois which are unknown to Jervois and which have been caused by previous or existing owners or operators of the properties. In such event, Jervois may be required to remediate these properties and the costs of remediation could be substantial. Further, in such circumstances, Jervois may not be able to claim indemnification or contribution from other parties. In the event Jervois was required to undertake and fund significant remediation work, such event could have a material adverse effect upon Jervois and the value of its securities.

4.16 Loan Default Risk

Loan default risk is the risk that loan covenants may be breached, which could lead to defaults under the loans, economic loss or investment write-off. Jervois Finland has approximately US\$115m of gross debt as at the end of October 2022 (being funds drawn under the US\$150m Mercuria facility, the details of which are set out on page 28). Jervois Finland's ability to service its debt is dependent on future business performance. ICO has US\$100m bond on issue. ICO's ability to service its debt is dependent on future business performance. There is a risk that the Group's cash flow generation will not be sufficient to meet these payment obligations which may result in defaults under this facility. There is a risk that the future business performance or other adverse impacts to the Group will result in non-compliance with these debt obligations. Refinance or replacement of this debt facility will depend on the Group's trading performance, economic conditions and the availability on acceptable terms of debt facilities in the future. There is no certainty that loans will be successfully refinanced or replaced.

Risk factors (10/14)

5. GENERAL RISKS

5.1 Coronavirus (COVID-19) and Global Health Crisis

The COVID-19 global pandemic and efforts to contain it may have an impact on the Company's business. These may extend to local impacts at the operational level, international travel restrictions, together with the broader global economic fallout. The Company continues to monitor the situation and the impact COVID-19 may have on the Company's mineral properties and refinery assets. Should the virus continue spread, travel bans be re-instated or should one or more of the Company's executives become seriously ill, the Company's ability to advance its mineral properties or refinery assets may be impacted. Similarly, the Company's ability to obtain financing and the ability of the Company's vendors, suppliers, consultants and partners to meet obligations may be impacted as a result of COVID-19 and efforts to contain the virus.

5.2 Economic conditions and other global or national issues

General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, current exchange controls and rates, national and international political circumstances (including wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemic and pandemics, may have an adverse effect on the Group's operations.

5.3 Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Group's operating performance. Share market conditions are affected by many factors such as:

- general economic outlook;
- introduction of tax reform or other new legislation;
- interest rates and inflation rates;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital; and
- terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor its Directors warrant the future performance of the Company or any return on an investment in the Company.

5.4 Market liquidity and Share Price Fluctuations

There can be no guarantee of an active market for the Company's shares or that the price of the Company's shares will increase. There may be relatively few potential buyers or sellers of the Company's shares at any time. This may increase the volatility of the market price of the Company's shares. It may also affect the prevailing market price at which shareholders are able to sell their shares in the Company. In recent years, capital markets have experienced a high level of price and volume volatility, and the market price of securities of many companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur.

5.5 Climate change risks

The main climate change risks are associated with changes in the frequency, intensity, spatial extent, duration, and timing of weather and climate events and conditions. Potential effects, such as those related to flooding, droughts, forest fires, insect outbreaks, erosion, landslides and others, may pose risks to operations and their safety, environmental, social and financial performance. Potential adverse effects may occur in terms of geotechnical stability, water supply systems and water balance, working conditions (humidity, heat stress), construction schedules, site access, reclamation as well as supply chain disruptions (e.g. access to inputs, shipping of products), among others. Economic implications of climate change may pose additional risks through reduced global demand for products and increased costs of inputs, among others. Although, through its expanding ESG regime, the Group is taking steps to mitigate its carbon emissions and assess and respond to climate change risks within its business and management processes, the nature and intensity of potential adverse impacts of climate change cannot be precisely ascertained.

Risk factors (11/14)

5.6 Dividends

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends or franking credits attaching to dividends can be given to the Company.

5.7 Force majeure

The Group's projects now or in the future may be adversely affected by the risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

5.8 Taxation

The acquisition and disposal of New Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring New Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of subscribing for New Shares under the Offer.

5.9 Litigation risks

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, reputation, financial performance and financial position.

5.10 Influence of third party stakeholders

Assets in which the Group holds an interest, including fixed assets and infrastructure / utilities, which the Group intends to utilize in carrying out its general business mandates, may be subject to interests or claims by third party individuals, groups, or companies. If such third parties assert any claims, the Group's activities may be delayed even if such claims are not meritorious. Such claims may result in significant financial loss and loss of opportunity for the Group.

Risk factors (12/14)

6. Equity Raising and underwriting risk

Jervois entered into an underwriting agreement with the Underwriters in respect of the Equity Raising on 10 November 2022 (“**Underwriting Agreement**”).

Key terms of the Underwriting Agreement

Each Underwriter’s obligations under the Underwriting Agreement, including to underwrite and manage the Equity Raising, are conditional on certain matters, including the timely delivery of certain due diligence materials. If certain conditions are not satisfied, or certain events occur, the Underwriters may terminate the Underwriting Agreement. Termination of the Underwriting Agreement by both Underwriters would have an adverse impact on the total amount of proceeds that could be raised under the Equity Raising and therefore on the ability of Jervois complete the SMP restart and other activities as set out in the use of proceeds section on Slide 30.

The events which may trigger termination of the Underwriting Agreement include (but are not limited to) the following:

- any material member of the Jervois group becomes insolvent, or there is an act or omission which is likely to result in a material member of the Jervois group becoming insolvent;
- Jervois ceases to be admitted to the official list of ASX or its shares are suspended from official quotation on ASX (other than as contemplated by the Underwriting Agreement), or cease to be quoted on, ASX;
- a material statement contained in the Equity Raising materials is or becomes misleading or deceptive or likely to mislead or deceive (whether by omission or otherwise);
- there are not, or there ceases to be, reasonable grounds in the reasonable opinion of the Underwriters for any statement or estimate in certain Equity Raising materials which relate to a future matter;
- there occurs an adverse new circumstance that arises after certain Equity Raising materials were given to ASX that would have been required to be included in certain Equity Raising materials (or otherwise to have been included in material previously disclosed to ASX) if it had arisen before certain Equity Raising materials were given to ASX;
- there are certain defects in a cleansing notice for the Equity Raising where the defect is materially adverse from the point of view of an investor;
- Jervois is prevented from conducting or completing the Equity Raising by or in accordance with the listing rules, certain regulatory authorities, any applicable laws, an order of a court of competent jurisdiction or a government agency, or otherwise is unable or unwilling to do any of these things;
- Jervois or any member of the Jervois group or any of their respective directors or officers engage, or have engaged in, or is charged in relation to, any fraudulent conduct or activity whether or not in connection with the Equity Raising;
- certain regulatory actions are taken or regulatory approvals are withdrawn or certain other proceedings commence;
- unconditional approval is refused or not granted for official quotation of the New Shares or ASX or TSXV makes an official statement to any person or indicates to Jervois or the Underwriters that official quotation of the New Shares will not be granted;
- certain delays in the timetable for the Equity Raising;
- certain issues with closing certificates under the Underwriting Agreement;
- Jervois withdraws all or any part of the Equity Raising in certain circumstances;
- certain changes in management or the board of directors of Jervois;
- if a material contract is materially breached or terminated or otherwise affected in a prescribed way;

Risk factors (13/14)

- Jervois alters its issued capital or disposes or attempts to dispose of a substantial part of its business, subject to certain exceptions;
- there is an event or occurrence, including any statute, order, rule, regulation, directive or request of any government agency which makes it illegal for the Underwriters to satisfy an obligation under the Underwriting Agreement, or to market, promote or settle the Equity Raising;
- a director of Jervois is charged with an indictable offence whether or not relating to financial or corporate matters or fraud or financial crimes, or any director of Jervois is disqualified from managing a corporation under Part 2D.6 of the Corporations Act;
- any adverse change occurs in the assets, liabilities, financial position or performance, profits, losses or prospects of the Group from the position fairly disclosed by Jervois to ASX before the date of the Underwriting Agreement or in the Equity Raising materials, but does not include a material adverse change arising from changes in the Cobalt Price or Cobalt Hydroxide Price provided that the Jervois group does not suffer or incur a disproportionate effect compared to other participants in the cobalt industry;
- a change in the board of directors of Jervois occurs;
- certain breaches of the Underwriting Agreement or applicable law by Jervois, including in relation to the Equity Raising materials or the Equity Raising;
- a new law or regulatory directive is introduced or is publicly announced to be proposed to be introduced into the Parliament of Australia, any State or Territory of Australia or New Zealand (as applicable), or a new policy is adopted or is announced to be proposed to be adopted by a government agency, the Reserve Bank of Australia or any Federal or State authority of Australia or New Zealand (other than a law or policy which has been announced before the date of the Underwriting Agreement);
- Jervois varies any term of its constitution except in prescribed circumstances;
- any information supplied by or on behalf of a member of the Jervois group to the Underwriters in respect of the Equity Raising or the Jervois group is, or is found to be, misleading or deceptive, or likely to mislead or deceive (including, by omission); or
- the occurrence of any market disruption events, including (1) a general moratorium on commercial banking activities in certain countries or a disruption in commercial banking or security settlement or clearance services in any of those countries; (2) a suspension or material limitation in trading in securities generally on certain securities exchanges for one trading day on which that exchange is open for trading; (3) any adverse change to the existing financial markets, political or economic conditions of, or currency exchange rates or controls in certain countries, or the international financial markets or any prospective adverse change in national or international political, economic or financial conditions; or (4) hostilities not presently existing at the date of the Underwriting Agreement commence (whether war has been declared or not) or a major escalation in existing hostilities occurs (whether war has been declared or not) involving any one or more of certain countries or a terrorist act is perpetrated on any of those countries or any diplomatic, military, commercial or political establishment of any of those countries elsewhere in the world.
- (prosecution) a director of Jervois is charged with an indictable offence that does not relate to financial or corporate matters of fraud or financial crimes.

The ability of an Underwriter to terminate the Underwriting Agreement in respect of some of the termination events will depend on whether in the reasonable opinion of that Underwriter, the event:

- has or is likely to have a material adverse effect on the success, marketing or settlement of the Equity Raising or on the ability of the Underwriters to market, promote or settle the Equity Raising or the willingness of investors to subscribe for New Shares; or
- has given or is likely to give rise to a contravention by, or liability of, the Underwriters (or one of their respective affiliates) under, the Corporations Act or any other applicable law.

If an Underwriter terminates, Jervois will not be obliged to pay that Underwriter any fees which are not payable or accrued prior to the date of termination.

For details of the fees payable to the Underwriters, see the Appendix 3B released to ASX on 10 November 2022.

Jervois also gives certain representations, warranties and undertakings to the Underwriters. This includes an undertaking restricting the issue of certain securities by Jervois for a prescribed period subject to certain exceptions. Jervois also gives an indemnity to the Underwriters and their respective indemnified parties subject to certain carve-outs.

Risk factors (14/14)

Regulatory

Jervois will need to comply with Australian and Canadian securities laws (and certain other foreign securities laws), and the ASX listing rules and the TSX-V listing rules, in order to be able to proceed with the Equity Raising, issue new shares under the Equity Raising and successfully complete and close the Equity Raising. This involves Jervois having to making certain applications and filings with ASX and TSX-V, all of which are procedural in nature and generally within the control of Jervois. If Jervois does not make any filings when required, or is unable to meet any applicable securities law or listing rules requirements, or has any requested regulatory relief not granted or revoked, it may not be able to proceed with the Equity Raising in accordance with the proposed timetable, or in its current form, or at all. If this is the case, then participating shareholders and investors may not receive their applicable New Shares when anticipated, or at all. If the Equity Raising does not proceed, then this may have an adverse impact on the ability of Jervois to complete the SMP restart and other activities.

Dilution risk

Existing shareholders who do not participate in the Placement or the Entitlement Offer will have their percentage shareholding in the Company diluted. Depending on the size of a shareholder's existing holding and the number of shares allocated to them, a participating shareholder may still be diluted even though they participate in the Placement or the Entitlement Offer.

Appendix A – Additional Information

Appendix B – Commodity Market Update

Appendix C – Key Risks

Appendix D – International Offer Restrictions

Offering jurisdictions (1/5)

This document does not constitute an offer of new ordinary shares ("New Shares") of the Company in any jurisdiction in which it would be unlawful. In particular, this document may not be distributed to any person, and the New Shares may not be offered or sold, in any country outside Australia except to the extent permitted below.

Bermuda	No offer or invitation to subscribe for New Shares may be made to the public in Bermuda or in any manner that would constitute engaging in business in or from within Bermuda. In addition, no invitation is being made to persons resident in Bermuda for exchange control purposes to subscribe for New Shares
Brazil	<p>The New Shares have not been, and will not be, registered with the Brazilian Securities and Exchange Commission (Comissão de Valores Mobiliários or CVM) or any other authority in Brazil and may not be offered or sold, directly or indirectly, to the public in Brazil. This document and any other document relating to an offer of New Shares may not be distributed in Brazil except to existing shareholders of the Company or otherwise in compliance with Brazilian law.</p> <p>This document has not been approved by any Brazilian regulatory authority and does not constitute, and should not be construed as, an offer to sell, or a solicitation of any offer to buy, any securities in Brazil.</p> <p>The Company's ordinary shares are not listed on any stock exchange, over-the-counter market or electronic system of securities trading in Brazil.</p>
Canada (British Columbia, Ontario and Quebec provinces)	<p>This document constitutes an offering of New Shares only in the Provinces of British Columbia, Ontario and Quebec (the "Provinces"), only to persons to whom New Shares may be lawfully distributed in the Provinces, and only by persons permitted to sell such securities. This document is not a prospectus, an advertisement or a public offering of securities in the Provinces. This document may only be distributed in the Provinces to persons who are "accredited investors" within the meaning of National Instrument 45-106 – <i>Prospectus Exemptions</i>, of the Canadian Securities Administrators.</p> <p>No securities commission or authority in the Provinces has reviewed or in any way passed upon this document, the merits of the New Shares or the offering of the New Shares and any representation to the contrary is an offence.</p> <p>No prospectus has been, or will be, filed in the Provinces with respect to the offering of New Shares or the resale of such securities. Any person in the Provinces lawfully participating in the offer will not receive the information, legal rights or protections that would be afforded had a prospectus been filed and receipted by the securities regulator in the applicable Province. Generally speaking, any New Shares issued to Canadian residents will be subject to a four month and a day hold period prescribed by Canadian securities laws. Furthermore, any resale of the New Shares in the Provinces must be made in accordance with applicable Canadian securities laws. Canadian purchasers should seek legal advice prior to any resale of the New Shares.</p> <p>The Company as well as its directors and officers may be located outside Canada and, as a result, it may not be possible for purchasers to effect service of process within Canada upon the Company or its directors or officers. All or a substantial portion of the assets of the Company and such persons may be located outside Canada and, as a result, it may not be possible to satisfy a judgment against the Company or such persons in Canada or to enforce a judgment obtained in Canadian courts against the Company or such persons outside Canada.</p> <p>Any financial information contained in this document has been prepared in accordance with Australian Accounting Standards and also comply with International Financial Reporting Standards and interpretations issued by the International Accounting Standards Board. Unless stated otherwise, all dollar amounts contained in this document are in Australian dollars.</p> <p><i>Statutory rights of action for damages and rescission.</i> The document provided by Jervois Global Limited (the "Corporation") to purchasers is considered to be an "offering memorandum" for the purposes of certain Canadian securities laws. Securities legislation in the Provinces may provide a purchaser with remedies for rescission or damages if the offering memorandum (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's Province. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's Province for particulars of these rights or consult with a legal advisor. A "misrepresentation" is generally defined under applicable provincial securities laws to mean an untrue statement of a material fact or an omission to state a material fact that is required to be stated or that is necessary to make any statement not misleading in light of the circumstances in which it was made.</p>

Offering jurisdictions (1/5)

This document does not constitute an offer of new ordinary shares ("New Shares") of the Company in any jurisdiction in which it would be unlawful. In particular, this document may not be distributed to any person, and the New Shares may not be offered or sold, in any country outside Australia except to the extent permitted below.

Bermuda	No offer or invitation to subscribe for New Shares may be made to the public in Bermuda or in any manner that would constitute engaging in business in or from within Bermuda. In addition, no invitation is being made to persons resident in Bermuda for exchange control purposes to subscribe for New Shares
Brazil	<p>The New Shares have not been, and will not be, registered with the Brazilian Securities and Exchange Commission (Comissão de Valores Mobiliários or CVM) or any other authority in Brazil and may not be offered or sold, directly or indirectly, to the public in Brazil. This document and any other document relating to an offer of New Shares may not be distributed in Brazil except to existing shareholders of the Company or otherwise in compliance with Brazilian law.</p> <p>This document has not been approved by any Brazilian regulatory authority and does not constitute, and should not be construed as, an offer to sell, or a solicitation of any offer to buy, any securities in Brazil.</p> <p>The Company's ordinary shares are not listed on any stock exchange, over-the-counter market or electronic system of securities trading in Brazil.</p>
Canada (British Columbia, Ontario and Quebec provinces)	<p>This document constitutes an offering of New Shares only in the Provinces of British Columbia, Ontario and Quebec (the "Provinces"), only to persons to whom New Shares may be lawfully distributed in the Provinces, and only by persons permitted to sell such securities. This document is not a prospectus, an advertisement or a public offering of securities in the Provinces. This document may only be distributed in the Provinces to persons who are "accredited investors" within the meaning of National Instrument 45-106 – <i>Prospectus Exemptions</i>, of the Canadian Securities Administrators.</p> <p>No securities commission or authority in the Provinces has reviewed or in any way passed upon this document, the merits of the New Shares or the offering of the New Shares and any representation to the contrary is an offence.</p> <p>No prospectus has been, or will be, filed in the Provinces with respect to the offering of New Shares or the resale of such securities. Any person in the Provinces lawfully participating in the offer will not receive the information, legal rights or protections that would be afforded had a prospectus been filed and receipted by the securities regulator in the applicable Province. Generally speaking, any New Shares issued to Canadian residents will be subject to a four month and a day hold period prescribed by Canadian securities laws. Furthermore, any resale of the New Shares in the Provinces must be made in accordance with applicable Canadian securities laws. Canadian purchasers should seek legal advice prior to any resale of the New Shares.</p> <p>The Company as well as its directors and officers may be located outside Canada and, as a result, it may not be possible for purchasers to effect service of process within Canada upon the Company or its directors or officers. All or a substantial portion of the assets of the Company and such persons may be located outside Canada and, as a result, it may not be possible to satisfy a judgment against the Company or such persons in Canada or to enforce a judgment obtained in Canadian courts against the Company or such persons outside Canada.</p> <p>Any financial information contained in this document has been prepared in accordance with Australian Accounting Standards and also comply with International Financial Reporting Standards and interpretations issued by the International Accounting Standards Board. Unless stated otherwise, all dollar amounts contained in this document are in Australian dollars.</p> <p><i>Statutory rights of action for damages and rescission.</i> The document provided by Jervois Global Limited (the "Corporation") to purchasers is considered to be an "offering memorandum" for the purposes of certain Canadian securities laws. Securities legislation in the Provinces may provide a purchaser with remedies for rescission or damages if the offering memorandum (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's Province. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's Province for particulars of these rights or consult with a legal advisor. A "misrepresentation" is generally defined under applicable provincial securities laws to mean an untrue statement of a material fact or an omission to state a material fact that is required to be stated or that is necessary to make any statement not misleading in light of the circumstances in which it was made.</p>

Offering jurisdictions (2/5)

Canada (British Columbia, Ontario and Quebec provinces) cont'

The following is a summary of the relevant rights of action for damages or rescission, or both, available to certain purchasers resident in the Provinces.

Ontario

The right of action for damages or rescission described herein is conferred by section 130.1 of the Securities Act (Ontario) (the "Ontario Act"). The Ontario Act provides, in relevant part, that every purchaser of securities pursuant to an offering memorandum (such as this document) shall have a statutory right of action for damages or rescission against the issuer and any selling security holder on whose behalf the distribution is made in the event that the offering memorandum contains a misrepresentation, as defined in the Ontario Act. A purchaser who purchases securities offered by the offering memorandum during the period of distribution has, without regard to whether the purchaser relied upon the misrepresentation, a statutory right of action for damages or, alternatively, while still the owner of the securities, for rescission against the issuer and any selling security holder on whose behalf the distribution is made provided that:

- (a) if the purchaser exercises its right of rescission, it shall cease to have a right of action for damages as against the issuer and the selling security holders, if any;
- (b) the issuer and the selling security holders on whose behalf the distribution is made, if any, will not be liable if it proves that the purchaser purchased the securities with knowledge of the misrepresentation;
- (c) the issuer and the selling security holders on whose behalf the distribution is made, if any, will not be liable for all or any portion of damages that it proves do not represent the depreciation in value of the securities as a result of the misrepresentation relied upon; and
- (d) in no case shall the amount recoverable exceed the price at which the securities were offered.

Section 138 of the Ontario Act provides that no action shall be commenced to enforce these rights more than:

- (a) in the case of an action for rescission, 180 days after the date of the transaction that gave rise to the cause of action; or
- (b) in the case of an action for damages, the earlier of:
 - (i) 180 days after the date that the purchaser first had knowledge of the facts giving rise to the cause of action; or
 - (ii) three years after the date of the transaction that gave rise to the cause of action.

This document is being delivered in reliance on the "accredited investor" exemption from the prospectus requirements contained under section 2.3 of NI 45-106. The rights referred to in section 130.1 of the Ontario Act do not apply in respect of an offering memorandum (such as this document) delivered to a prospective purchaser in connection with a distribution made in reliance on the accredited investor exemption if the prospective purchaser is:

- (a) a Canadian financial institution or a Schedule III bank (each as defined in section 1.1 of NI 45-106) (for these purposes a "Canadian financial institution" is an association governed by the *Cooperative Credit Associations Act* (Canada) or a central cooperative credit society for which an order has been made under section 473(1) of that Act, or (b) a bank, loan corporation, trust company, trust corporation, insurance company, treasury branch, credit union, caisse populaire, financial services cooperative, or league that, in each case, is authorized by an enactment of Canada or a jurisdiction of Canada to carry on business in Canada or a jurisdiction of Canada);
- (b) the Business Development Bank of Canada incorporated under the Business Development Bank of Canada Act (Canada); or
- (c) a subsidiary of any person referred to in paragraphs (a) and (b), if the person owns all of the voting securities of the subsidiary, except the voting securities required by law to be owned by directors of that subsidiary.

Offering jurisdictions (3/5)

Canada (British Columbia, Ontario and Quebec provinces) cont'	<p>General</p> <p>The foregoing summary is subject to the express provisions of the securities legislation of the Provinces and the rules, regulations and other instruments thereunder, and reference should be made to the complete text of such provisions. Such provisions may contain limitations and statutory defences on which the issuer, the initial purchasers and other parties may rely, including limitations and statutory defences not described herein.</p> <p>The rights of action described above are in addition to and without derogation from any other right or remedy available at law to the investor. Canadian investors should refer to the applicable provisions of the securities legislation of their province of residence for the particulars of these rights and consult with their own legal advisers prior to deciding whether to invest in the New Shares.</p> <p><i>Certain Canadian income tax considerations.</i> Prospective purchasers of the New Shares should consult their own tax adviser with respect to any taxes payable in connection with the acquisition, holding or disposition of the New Shares as there are Canadian tax implications for investors in the Provinces.</p> <p><i>Language of documents in Canada.</i> Upon receipt of this document, each investor in Canada hereby confirms that it has expressly requested that all documents evidencing or relating in any way to the sale of the New Shares (including for greater certainty any purchase confirmation or any notice) be drawn up in the English language only. <i>Par la réception de ce document, chaque investisseur canadien confirme par les présentes qu'il a expressément exigé que tous les documents faisant foi ou se rapportant de quelque manière que ce soit à la vente des valeurs mobilières décrites aux présentes (incluant, pour plus de certitude, toute confirmation d'achat ou tout avis) soient rédigés en anglais seulement.</i></p>
Cayman Islands	<p>No offer or invitation to subscribe for New Shares may be made to the public in the Cayman Islands or in any manner that would constitute carrying on business in the Cayman Islands.</p>
European Union	<p>This document has not been, and will not be, registered with or approved by any securities regulator in the European Union. Accordingly, this document may not be made available, nor may the New Shares be offered for sale, in the European Union except in circumstances that do not require a prospectus under Article 1(4) of Regulation (EU) 2017/1129 of the European Parliament and the Council of the European Union (the "Prospectus Regulation").</p> <p>In accordance with Article 1(4)(a) of the Prospectus Regulation, an offer of New Shares in the European Union is limited to persons who are "qualified investors" (as defined in Article 2(e) of the Prospectus Regulation).</p>
Hong Kong	<p>WARNING: This document has not been, and will not be, registered as a prospectus under the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong, nor has it been authorised by the Securities and Futures Commission in Hong Kong pursuant to the Securities and Futures Ordinance (Cap. 571) of the Laws of Hong Kong (the "SFO"). Accordingly, this document may not be distributed, and the New Shares may not be offered or sold, in Hong Kong other than to "professional investors" (as defined in the SFO and any rules made under that ordinance).</p> <p>No advertisement, invitation or document relating to the New Shares has been or will be issued, or has been or will be in the possession of any person for the purpose of issue, in Hong Kong or elsewhere that is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to New Shares that are or are intended to be disposed of only to persons outside Hong Kong or only to professional investors. No person allotted New Shares may sell, or offer to sell, such securities in circumstances that amount to an offer to the public in Hong Kong within six months following the date of issue of such securities.</p> <p>The contents of this document have not been reviewed by any Hong Kong regulatory authority. You are advised to exercise caution in relation to the offer. If you are in doubt about any contents of this document, you should obtain independent professional advice.</p>

Offering jurisdictions (4/5)

New Zealand	<p>This document has not been registered, filed with or approved by any New Zealand regulatory authority under the Financial Markets Conduct Act 2013 (the "FMC Act").</p> <p>The New Shares are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021.</p> <p>Other than in the entitlement offer, the New Shares may only be offered or sold in New Zealand (or allotted with a view to being offered for sale in New Zealand) to a person who:</p> <ul style="list-style-type: none">• is an investment business within the meaning of clause 37 of Schedule 1 of the FMC Act;• meets the investment activity criteria specified in clause 38 of Schedule 1 of the FMC Act;• is large within the meaning of clause 39 of Schedule 1 of the FMC Act;• is a government agency within the meaning of clause 40 of Schedule 1 of the FMC Act; or• is an eligible investor within the meaning of clause 41 of Schedule 1 of the FMC Act.
Norway	<p>This document has not been approved by, or registered with, any Norwegian securities regulator under the Norwegian Securities Trading Act of 29 June 2007 no. 75. Accordingly, this document shall not be deemed to constitute an offer to the public in Norway within the meaning of the Norwegian Securities Trading Act. The New Shares may not be offered or sold, directly or indirectly, in Norway except to "professional clients" (as defined in the Norwegian Securities Trading Act).</p>
Panama	<p>The New Shares have not been registered with, and are not under the supervision of, the Panama Superintendence of the Securities Market. Accordingly, this document may be made available, and the New Shares offered for sale, in Panama only to "institutional investors" (as defined in the regulations issued by the Superintendent of Securities Markets). The New Shares are not being offered to the public in Panama.</p>
Singapore	<p>This document and any other materials relating to the New Shares have not been, and will not be, lodged or registered as a prospectus in Singapore with the Monetary Authority of Singapore. Accordingly, this document and any other document or materials in connection with the offer or sale, or invitation for subscription or purchase, of New Shares, may not be issued, circulated or distributed, nor may the New Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore except pursuant to and in accordance with exemptions in Subdivision (4) Division 1, Part 13 of the Securities and Futures Act 2001 of Singapore (the "SFA") or another exemption under the SFA.</p> <p>This document has been given to you on the basis that you are an "institutional investor" or an "accredited investor" (as such terms are defined in the SFA). If you are not such an investor, please return this document immediately. You may not forward or circulate this document to any other person in Singapore.</p> <p>Any offer is not made to you with a view to the New Shares being subsequently offered for sale to any other party in Singapore. On-sale restrictions in Singapore may be applicable to investors who acquire New Shares. As such, investors are advised to acquaint themselves with the SFA provisions relating to resale restrictions in Singapore and comply accordingly.</p>

Offering jurisdictions (5/5)

Switzerland	<p>The New Shares may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange or on any other stock exchange or regulated trading facility in Switzerland. Neither this document nor any other offering or marketing material relating to the New Shares constitutes a prospectus or a similar notice, as such terms are understood under art. 35 of the Swiss Financial Services Act or the listing rules of any stock exchange or regulated trading facility in Switzerland.</p> <p>No offering or marketing material relating to the New Shares has been, nor will be, filed with or approved by any Swiss regulatory authority or authorised review body. In particular, this document will not be filed with, and the offer of New Shares will not be supervised by, the Swiss Financial Market Supervisory Authority (FINMA).</p> <p>Neither this document nor any other offering or marketing material relating to the New Shares may be publicly distributed or otherwise made publicly available in Switzerland. The New Shares will only be offered to investors who qualify as "professional clients" (as defined in the Swiss Financial Services Act). This document is personal to the recipient and not for general circulation in Switzerland.</p>
United Kingdom	<p>Neither this document nor any other document relating to the offer has been delivered for approval to the Financial Conduct Authority in the United Kingdom and no prospectus (within the meaning of section 85 of the Financial Services and Markets Act 2000, as amended ("FSMA")) has been published or is intended to be published in respect of the New Shares.</p> <p>The New Shares may not be offered or sold in the United Kingdom by means of this document or any other document, except in circumstances that do not require the publication of a prospectus under section 86(1) of the FSMA. This document is issued on a confidential basis in the United Kingdom to "qualified investors" within the meaning of Article 2(e) of the UK Prospectus Regulation. This document may not be distributed or reproduced, in whole or in part, nor may its contents be disclosed by recipients, to any other person in the United Kingdom.</p> <p>Any invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received in connection with the issue or sale of the New Shares has only been communicated or caused to be communicated and will only be communicated or caused to be communicated in the United Kingdom in circumstances in which section 21(1) of the FSMA does not apply to the Company.</p> <p>In the United Kingdom, this document is being distributed only to, and is directed at, persons (i) who have professional experience in matters relating to investments falling within Article 19(5) (investment professionals) of the Financial Services and Markets Act 2000 (Financial Promotions) Order 2005 ("FPO"), (ii) who fall within the categories of persons referred to in Article 49(2)(a) to (d) (high net worth companies, unincorporated associations, etc.) of the FPO or (iii) to whom it may otherwise be lawfully communicated (together "relevant persons"). The investment to which this document relates is available only to relevant persons. Any person who is not a relevant person should not act or rely on this document.</p>
United States	<p>This document has been prepared for publication in Australia and may not be distributed or released in the United States. This document does not constitute an offer to sell, or the solicitation of an offer to buy, securities in the United States or in any other jurisdiction. The New Shares described in this document have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the "U.S. Securities Act") and may not be offered or sold in the United States except in transactions exempt from, or not subject to, the registration of the U.S. Securities Act and applicable securities laws of any state or other jurisdiction of the United States.</p>
United Arab Emirates	<p>This document does not constitute a public offer of securities in the United Arab Emirates and the New Shares may not be offered or sold, directly or indirectly, to the public in the UAE. Neither this document nor the New Shares have been approved by the Securities and Commodities Authority ("SCA") or any other authority in the UAE.</p> <p>No marketing of the New Shares has been, or will be, made from within the UAE other than in compliance with the laws of the UAE and no subscription for any securities may be consummated within the UAE. This document may be distributed in the UAE only to "professional investors" (as defined in the SCA Board of Directors' Decision No.13/RM of 2021, as amended).</p> <p>No offer or invitation to subscribe for New Shares is valid, or permitted from any person, in the Abu Dhabi Global Market or the Dubai International Financial Centre.</p>

Basis of preparation of financial information

Historical and forecast financial information

Historical and forecast financial information (Slide 27)

Historical financial information for Jervois Finland prior to acquisition by Jervois Global Limited on 1 September 2021 is based on unaudited financial statements that have been prepared in accordance with US GAAP and accounting principles applied under its ownership by Freeport McMoRan Inc. Financial information presented for the period prior to acquisition by Jervois Global Limited on 1 September 2021 is presented on a proforma basis for illustrative purposes only.

Financial information presented for periods after the acquisition on 1 September 2021 is prepared under Jervois Global Group accounting policies, which conform with Australian Accounting Standards (“AASBs”) and International Financial Reporting Standards (“IFRS”). The Jervois Finland financial results for the period post-acquisition are consolidated into the Jervois Global Group consolidated financial statements. Information presented is unaudited.

EBITDA for historical periods is presented as net income after adding back tax, interest, depreciation and extraordinary items and is a non-IFRS/non-GAAP measure.

The Jervois Finland 2022 guidance consists of actual results for January to September 2022 and forecast results for October to December 2022. The forecast period includes an assumption of a forecast quoted cobalt price of US\$25.0/lb. Other forecast assumptions, including production, sales plans, costs and exchange rates are based on Jervois’ internal estimates.

Non-financial information presented, including sales volume information, is derived from information provided by Jervois Finland. All financial and non-financial information is presented for illustrative purposes only.
