

QUARTERLY REPORT

**Activities Report for the Quarter Ending
30th September, 2024**

Mt Malcolm Mines NL
ACN: 646 466 435

Mt Malcolm Mines NL (ASX:M2M) ("Mt Malcolm" or "the Company") is pleased to provide an update on activities conducted during the three (3) months ending 30th September, 2024 ("the Quarter").

Highlights.

The Company's activity during the Quarter focused on advancing the Golden Crown Prospect in the Eastern Goldfields of Western Australia, emphasizing bulk sampling and gravity processing of high-grade gold mineralised material.

- The Golden Crown Prospect ongoing bulk sampling program reached depths of nine metres from the surface as of September 30, 2024 .
- High-grade material (>5 g/t Au) is being processed using gravity-based wet recovery methods.
- Processing advancements continue to be positive, enhancing overall recovery efficiency and output quality.
- Tailings (after gravity separation of Batches A to G) yielded gold grades ranging from 1.0 to 3.5 g/t Au.
- Accelerated Cyanide Leach (ACL) testwork on tailings samples achieved an average gold recovery of 94.6%.

Managing Director, Trevor Dixon, said, *"Continued excavation and processing studies are enhancing insights into mineralisation controls and refining mining and recovery strategies to evaluate the project's economic potential.*

These results support a comprehensive gold recovery strategy, adding significant value to the Golden Crown Prospect."

Summary

Excavation in the bulk sampling area at the Golden Crown Prospect is progressing effectively, reaching depths between 404mRL and 395mRL, with a focus on extracting and evaluating higher-grade gold mineralisation at deeper levels. High-grade material (>5 g/t Au) is being processed effectively through gravity-based wet recovery methods.

Analysis of tailings from the gravity separation of Batches A to G (details in the ASX release on June 28, 2024) returned gold content ranging from 1.0 to 3.5 g/t Au, highlighting the potential economic value in tailings alongside gravity recovered gold. Accelerated Cyanide Leach (ACL) testwork on these tailings samples has shown an average recovery rate of 94.6% (ASX release on August 7, 2024). Together, these activities enhance the understanding of the total gold recovery and underscore the project's strong economic prospect.

Bulk Sampling

The bulk sampling program began as planned, showing promising initial results. Excavation has reached a depth of approximately nine metres (from 404mRL to 395mRL), with efforts ongoing to excavate and extract deeper mineralised material which is relatively of higher grade as per grade control drilling (see Figure 1).

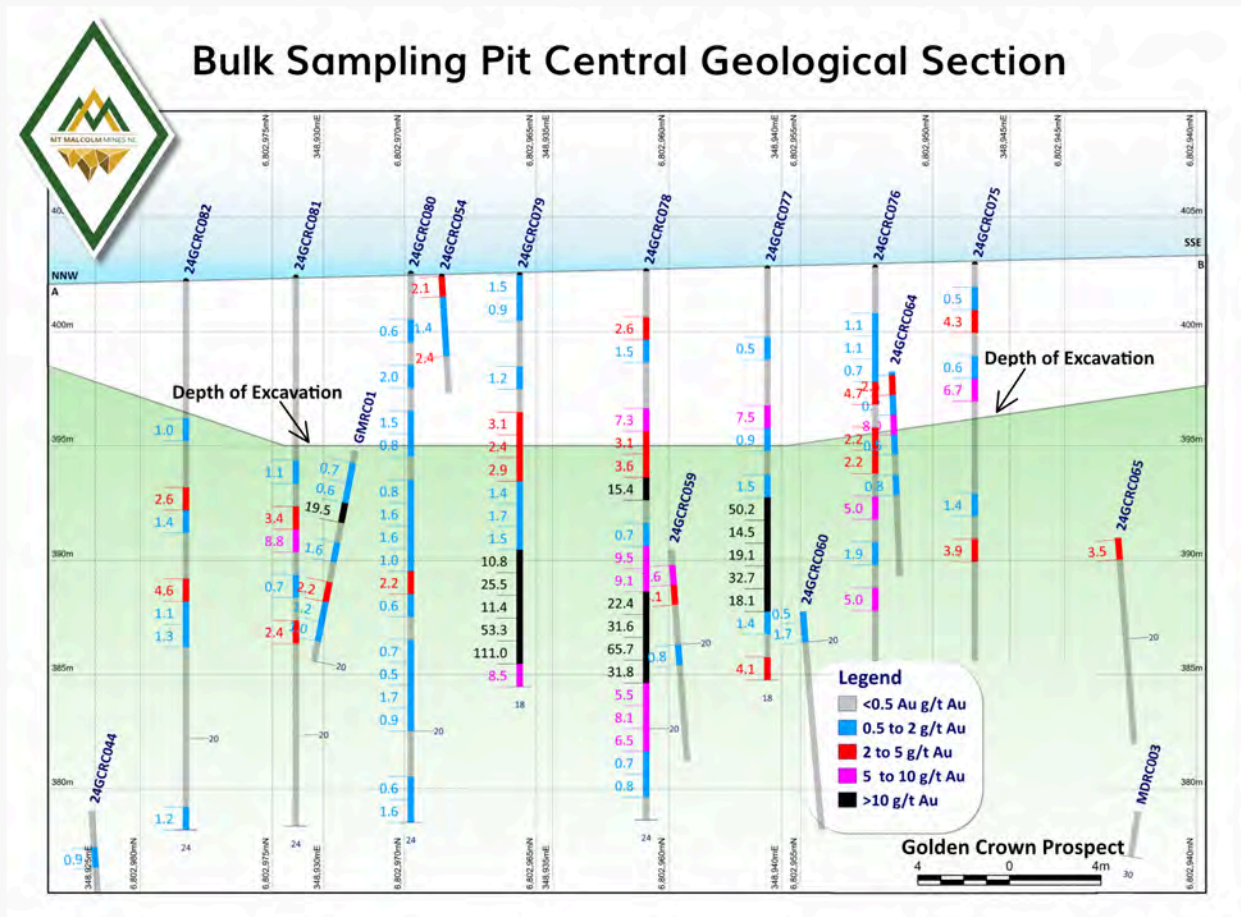

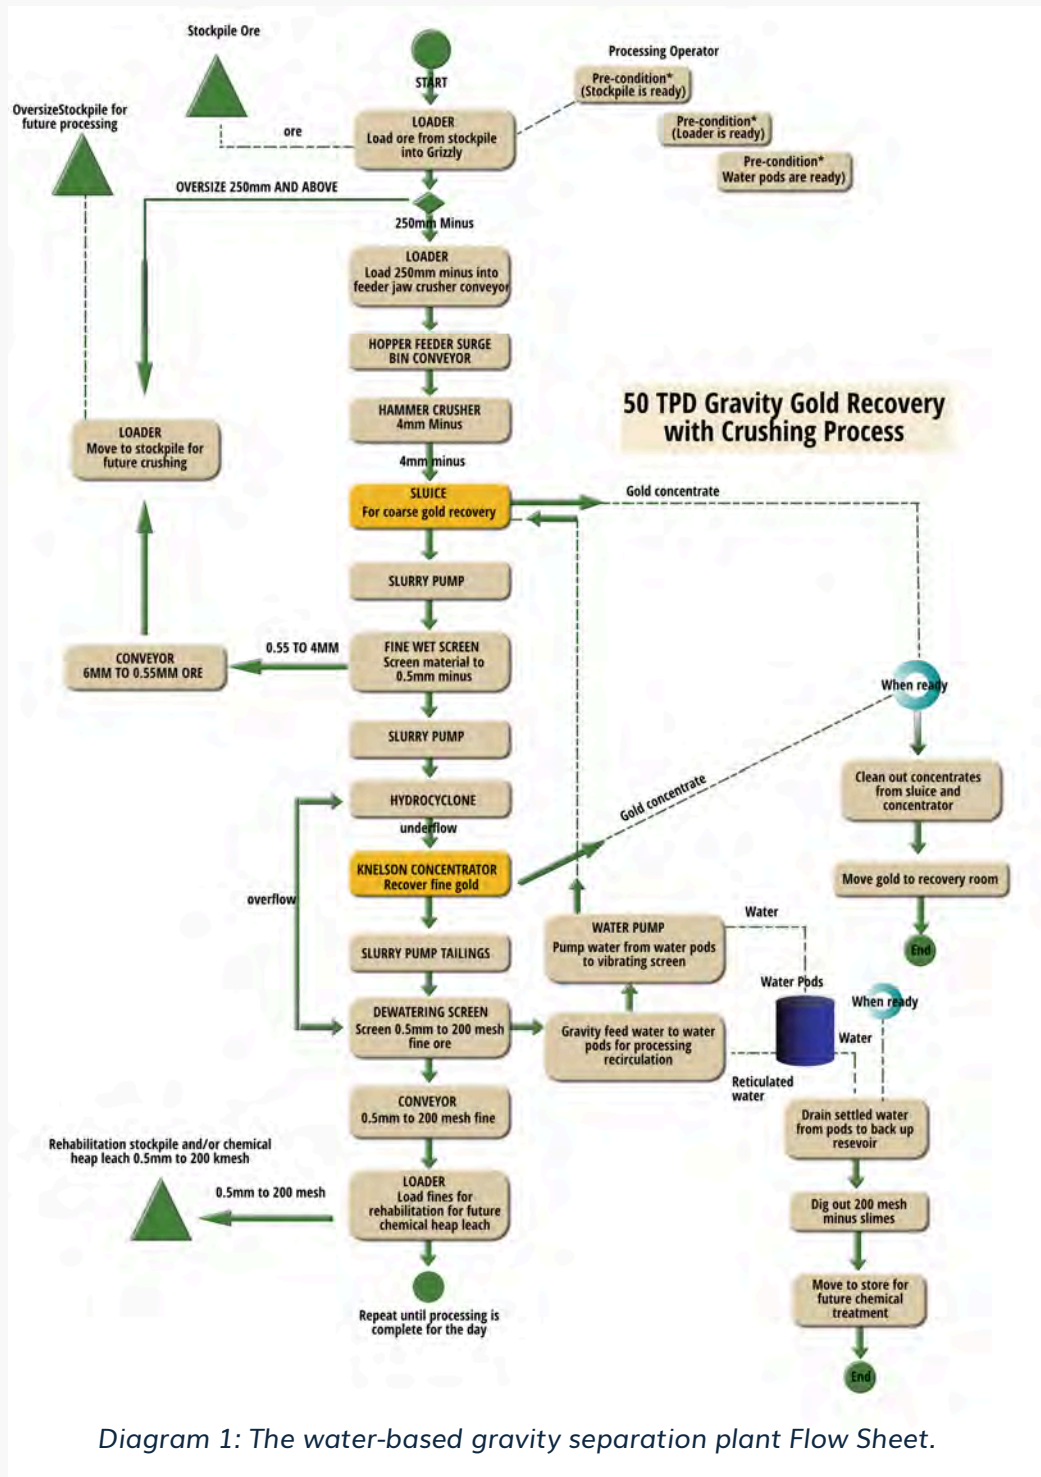

Figure 1: Geological long section along the central grade control line, illustrating current excavation depth as of September 30, 2024.

The program focuses on processing high-grade mineralised material by wet gravity processing after a free-digging excavation approach to confirm gold grade continuity and evaluate the mineability of the mineralisation.

The target area, defined through drilling in February and June 2024, encompasses a high-grade gold mineralisation corridor measuring 50 by 15 metres.

Processing plans involve crushing to release gold particles, followed by sluice processing for coarse gold separation, with fine gold recovery achieved via a Knelson concentrator. This pilot study at Blockchain Resources Ltd’s nearby plant aims to maximise gold recovery and thoroughly assess the potential for commercial gold extraction (see Diagram 1).

During excavation, a total of 30 rock chip samples were collected from mineralised zones within the bulk sampling area, from 404mRL to 395mRL. These samples were sent to Intertek Maddington for fire assay and multi-element analysis, using lab method codes FA50/OE and 4A/OE.

The rock chip sample shown below in Picture 1, contains visible gold (approximately 2mm x 2mm in size), clearly demonstrating the presence of coarse gold. Several rock chip and panned mineralised samples from quartz veins within sheared felsic volcanic rocks have exhibited coarse gold.

Picture 1: Visible gold in quartz vein at RL 402m, SE corner of the bulk sampling area.

Table 1: Sample Description and Visual Gold Estimate

Sample	Lithology	Gold % (Approx.)	Geological Description
Sample A	Quartz Vein	0.01%	Sheared quartz vein hosted within felsic volcanic rocks

Note: Visual estimates of mineral abundance should not be used as a proxy or substitute for laboratory analyses, especially where concentrations or grades are of primary economic interest. Visual estimates may also not provide insights into impurities or deleterious physical properties that impact valuation.

Picture 2: The orientation of mineralised quartz veins are indicated by orange lines drawn over the bulk sampling pit floor.

Processing Study

Accelerated Cyanide Leach (ACL) testwork on tailings from the gravity separation of Batches A to G (for batch description refer ASX release on June 28, 2024) samples showed an impressive average gold recovery of 94.6% (ASX release on August 7, 2024), closely aligned with earlier results of 94.3% (ASX release, May 6, 2024), underscoring the strong potential for high recovery rates. The testwork, conducted by Intertek Minerals at its Maddington laboratory. To assess total achievable gold recovery, the study used both pulverised and non-pulverised tailings samples in two size fractions to determine leachability.

Pulverised samples were tested through Fire Assay (Intertek method code FA50/OE04), while both pulverised and non-pulverised samples were subjected to a 6-hour ACL test (Intertek method code LW1000/MS) to measure recovery rates.

Fire Assay results indicated that gold content in tailings samples ranged from 1.0 to 3.5 g/t Au, with leach grades varying between pulverised and non-pulverised samples by 0.11 to 0.68 g/t Au (see Table 2).

Sample ID	Sample Batch (Gravity Separation)	Tailings (Pulverised 75 µm, Before Analysis)				Tailings (Analysed Non Pulverised, 0.7mm -0.074mm)		
		Head Grade (g/t Au) FA50/OE	Leach Grade (g/t Au) LW1000/MS	Tail Grade (g/t Au) FA50T/OE	Gold Recovery %	Leach Grade (g/t Au) LW1000/MS	Difference pulverised and non pulverised Leach Grade (g/t) Au	
M2MM6	A	1.00	1.58	0.09	94.61	0.9	0.68	
M2MM7	B	1.13	1.22	0.07	94.57	1.08	0.14	
M2MM8	C	1.19	1.23	0.06	95.35	1.12	0.11

M2MM10	E	2.16	2.25	0.16	93.36	2.1	0.15	
M2MM11	F	1.71	2.01	0.12	94.37	1.73	0.28	
M2MM12	G	3.46	3.14	0.14	95.73	2.67	0.47	
M2MM13	Composited Slime						2.05	
Average Gold Recovery %					94.6			

The average gold recovery % may vary due to rounding off errors*

Table 2: Results of the Accelerated Cyanide Leach (ACL) Leachwell™ Testwork on Tailings at Golden Crown.

The comprehensive test results suggest that both wet gravity processing and leaching are highly effective for Golden Crown-type mineralisation, with gold extraction efficiency reaching comparably high levels, and the Tailings has potential economic value additional to gravity recovered gold.

This study's outcome is encouraging and boosting confidence in the economic viability of processing high-grade material from the ongoing bulk sampling exercise.

About the Golden Crown Prospect

The Golden Crown Prospect, located near Leonora, presents substantial potential due to its favourable geological setting. The combination of historical high-grade production and recent exploration results underscores the prospect's importance, positioning it as a primary site for further exploration and development by the Company. Further excavation is ongoing, for extracting high-grade mineralised material in deeper sections. Continued efforts will focus on delineating these mineralised zones.

Data collected from bulk sampling will further validate the geological model, providing a strong foundation for resource modelling. With additional drilling planned to enhance understanding and extend the mineralisation and support ongoing resource estimation.

Competent Person Statement

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources is based on information compiled by Mr. Vivek Sharma, a Competent Person and a full-time employee of the company, who is a Member of The Australasian Institute of Mining and Metallurgy. Mr. Vivek Sharma has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Vivek Sharma consents to the inclusion in the report of the matters based on the information compiled by him, in the form and context in which it appears.

Forward Looking Statements

Some of the statements appearing in this announcement may be forward-looking statements. You should be aware that such statements are only predictions and are subject to inherent risks and uncertainties. Those risks and uncertainties include factors and risks specific to the industries in which Mt Malcolm Mines NL operates and proposes to operate as well as general economic conditions, prevailing exchange rates and interest rates and conditions in the financial markets, among other things. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement. No forward-looking statement is a guarantee or representation as to future performance or any other future matters, which will be influenced by a number of factors and subject to various uncertainties and contingencies, many of which will be outside M2M's control. In relying on the above mentioned ASX announcement and pursuant to ASX Listing Rule 5.32.2, the Company confirms that it is not aware of any new information or data that materially affects the information included in the above-mentioned announcement.

This announcement has been authorised by the Board of Mt Malcolm Mines NL.

<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7.	Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
	<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1	Loan facilities	500,000	232,416
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		267,584
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
	<p>The Company entered into a short term, unsecured loan facility arrangement with Mr Trevor Dixon, the Managing Director of the Company (ASX announcement dated 31 October 2023). The Company has previously made use of this facility and settled the then principal balance via the issue of conversion securities, as approved by shareholders on 31 January 2024.</p> <p>Since quarter end, the facility term had been extended by six months to 30 April 2025 (ASX announcement dated 21 October 2024). All other terms remain unchanged.</p> <p>Additionally, the Company entered into two short-term, unsecured loan agreements with professional investor clients of Novus Capital (ASX announcement dated 21 October 2024). A total of \$250,000 was advanced under these loans, which carry an interest rate of 7% and are repayable within three months from the date of advance, with a maturity date of 4 January 2025.</p>		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(213)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(431)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(644)
8.4	Cash and cash equivalents at quarter end (item 4.6)	172
8.5	Unused finance facilities available at quarter end (item 7.5)	268
8.6	Total available funding (item 8.4 + item 8.5)	440
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	0.68
	<i>Note: if the entity has reported positive relevant outgoings (i.e., a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer:

The Company expects that the bulk sampling program at the Golden Crown Prospect will continue to generate additional costs. However, these costs are expected to be offset by proceeds from gold sales following the successful production and sale of gold doré bars from the initial parcel of mineralised material, as announced on 21 October 2024. With the continued bulk sampling and exploration activities, as well as the potential monetisation of stockpiled material, the Company anticipates lower net operating cashflows for the next quarter.

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer:

On 8 July 2024, the Company successfully completed a placement raising \$815,000 before costs.

The Company entered and previously announced a drill offset deed (refer ASX announcement dated 9 February 2024). Under the deed the Company can offset 30% of drilling costs by issuing shares (up to \$300,000 excluding GST). The Company previously settled \$74k in costs via the issue of shares.

The Company also entered into a short term, unsecured loan facility arrangement with Mr Trevor Dixon, the Managing Director of the Company (refer ASX announcement of 31 October 2023 and item 7 above). Following the ASX announcement on 21 October 2024, the repayment date for this loan facility has been extended to 30 April 2025. The Company still has ~\$267k in available funds under this facility, which it can draw down as needed.

Furthermore, as announced on 21 October 2024, the Company has entered into two additional short-term, unsecured loan agreements with professional investor clients of Novus Capital, under which the Company has been advanced \$250,000 in loan funds.

The Company is also anticipating further revenues from gold sales during the next quarter.

The Company continues to monitor its capital requirements and retains the ability to raise further capital as required. Given the success of its recent financing initiatives and access to available funds, the Company believes it is well-positioned to continue funding its operations.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

The Company will be able to continue normal business operations. The Company has the ability to reduce its discretionary expenditure to reserve cash, including until such time as it finalises any future capital raising options.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2024

Authorised by: Board of Directors
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – e.g., Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
