

# Investor Presentation

The World's Highest Grade Ionic  
Adsorption Clay REE Deposit

 ASX:MEI

SEPTEMBER 2023

# DISCLAIMER

The material in this Presentation has been prepared by Meteoric Resources NL (“Meteoric”) and is general background information about Meteoric’s current activities as at the date of this presentation. This information is given in summary form and does not purport to be complete. Information in this presentation, including forecast financial information, should not be considered as advice or a recommendation to investors or potential investors in relation to holding, purchasing or selling securities or other financial products or instruments and does not take into account your particular investment objectives, financial situation or needs.

Before acting on any information you should consider the appropriateness of the information having regard to these matters, any relevant offer document and in particular, you should seek independent financial advice. All securities and financial product or instrument transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. This presentation may contain forward looking statements including statements regarding our intent, belief or current expectations with respect to Meteoric’s businesses, operations, market conditions, results of operation, financial condition, capital adequacy, specific provisions and risk management practices. Readers are cautioned not to place undue reliance on these forward-looking statements. Meteoric does not undertake any obligation to publicly release the result of any revisions to these forward-looking statements to reflect events or circumstances after the date hereof to reflect the occurrence of unanticipated events. While due care has been used in the preparation of forecast information, actual results may vary in a materially positive or negative manner. Forecasts and hypothetical examples are subject to uncertainty and contingencies outside Meteoric’s control. Past performance is not a reliable indication of future performance.

## Competent Persons’ Statements

The information in this presentation that relates to exploration results is based on information reviewed, collated and fairly represented by Dr Andrew Tunks a Competent Person and a Member of Australian Institute of Geoscientists #2820 and a consultant to Meteoric Resources NL. Dr Tunks has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity which has been undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results. Dr. Tunks consents to the inclusion in this report of the matters based on this information in the form and context in which it appears

The information in this presentation that relates to exploration results is based on information reviewed, collated and fairly represented by Dr Carvalho a Competent Person and a Member of the Australasian Institute of Mining and Metallurgy and a consultant to Meteoric Resources NL. Dr. Carvalho has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity which has been undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr. Carvalho consents to the inclusion in this report of the matters based on this information in the form and context in which it appears

The information in this presentation that relates to Mineral Resources is based on information compiled by Dr. Beck Nader, a Competent Person who is a Fellow of Australian Institute of Geoscientists #4472. Dr. Beck Nader is a consultant for BNA Mining Solutions. He has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify him as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Dr. Beck Nader consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this presentation that relates to Mineral Resources is based on information compiled by Dr. Volodymyr Myadzel, a Competent Person who is a Member of Australian Institute of Geoscientists #3974. Dr. Volodymyr Myadzel is a consultant for BNA Mining Solutions. He has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Dr. Volodymyr Myadzel consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. The Company confirms that it is not aware of any new information or data that materially affects the Ore Reserves in this publication. The Company confirms that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. The Company confirms that the form and context in which the RPM findings are presented have not been materially modified.

# COMPANY OVERVIEW

Supported by an experienced and competent Board, the share price has performed significantly well this year

## MEI Snapshot

ASX Code	MEI
Share Price (17/07/23 Close)	A\$ 0.245
Shares on Issue	1,940M
Market Capitalisation	A\$480M
Liquidity (3-Month Avg.)	A\$ 3M / day
Largest Shareholder	c. 8.47%

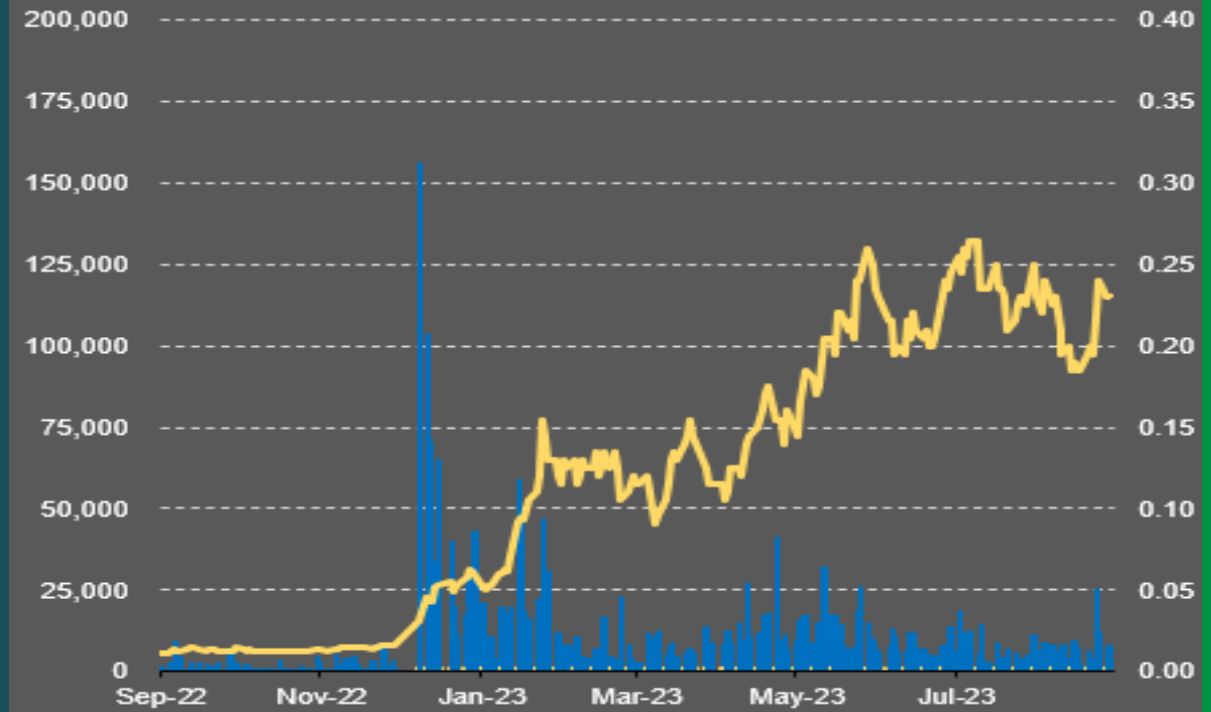

## Board of Directors

Executive Chairman	Dr Andrew Tunks
Executive Director	Dr Marcelo de Carvalho
Non-Executive Director	Dr Paul Kitto
Chief Executive Officer	Nick Holthouse

## Metallurgy Results and Future Work

- Leach in ammonium sulphate solution
- pH 4
- Maximum leach % occurring within 5-10mins
- Recoveries to the leach are exceptional
  - Nd & Pr above 70%
  - Tb 60-70% and
  - Dy 50-60%
- First pass un optimised recoveries to the liquor will be available for all six resource areas in Early October.

## Metallurgical Recoveries (ASX 27/6/23)

# CALDEIRA GRADES, DRILLING INTERCEPTS AND PEERS

Outstanding grades, wide continuous intercepts and open at depth

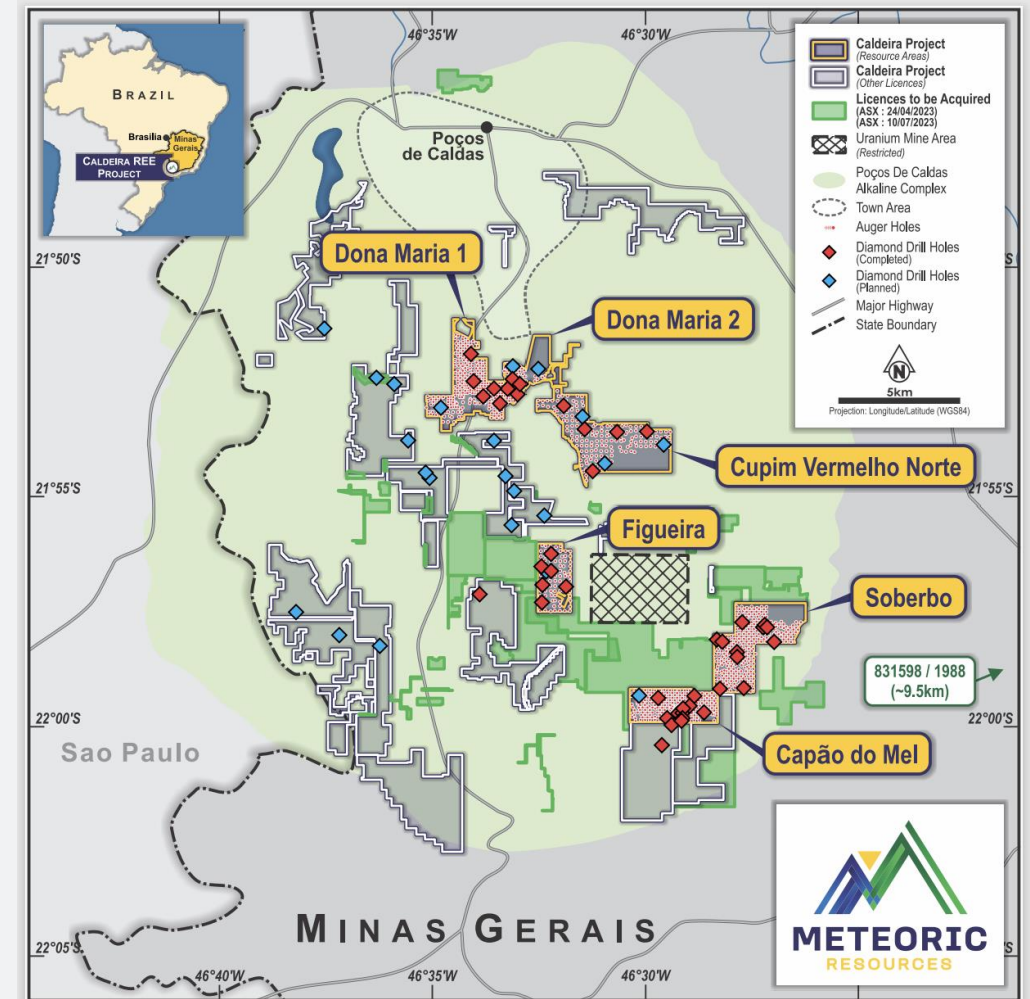

## Capo Do Mel Prospect

### Stylised Cross Section 7,566,800m N

New drilling is designed to intersect the underlying granite (green) at depth to establish the thickness of the prospective clay zone. Every hole on this section finished in grades above 1,000ppm TREO. Vertical exaggeration = 5 times (refer ASX release 16/12/2022).

## Caldeira Project – Diamond Drilling

# Meteoric's Drilling

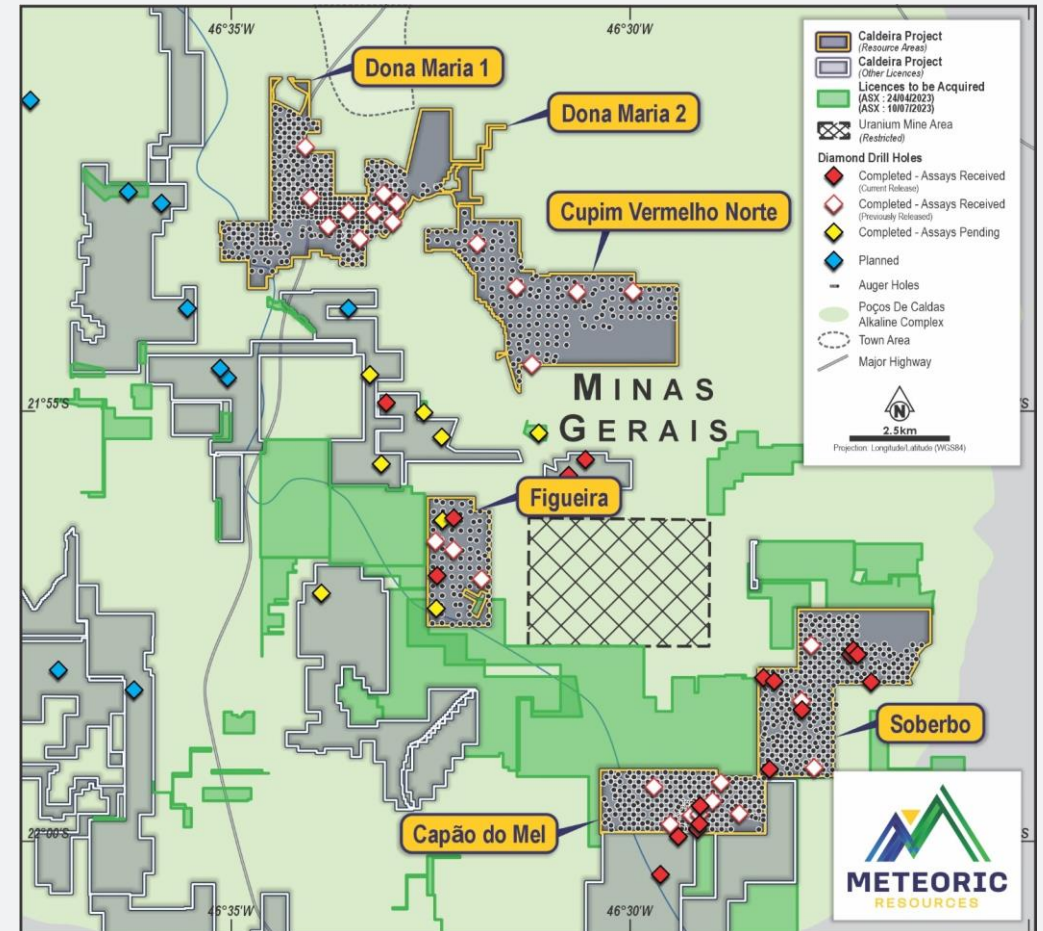

## Depth Extensions beneath and outside the MRE

### Exploration Drilling (Outside the Caldeira Project Resource Estimate) (24/7/2023)

- CVSD001 - 149.5m @ 8,912 ppm TREO [0m],
  - with 52m @ 12,692ppm or 1.27 % TREO [61m],
- BDPDD001 – 73.3m @ 3,939ppm TREO [0m], including 42,3m @ 4,719ppm TREO [0m]
- CDMDD003 - 26.7m @ 1,561ppm TREO [0m], including 4.2m @ 3,582ppm TREO [0.9m]
- CRDD001 - 58m @ 2,702ppm TREO [0m], including 33m @ 3,006ppm TREO [5m]

### Resource Drilling

- CDMDD009 - 16.9m @ 3,649ppm TREO [0m], including 7m @ 5,834ppm TREO [0m]
- CDMDD010 - 52.6m @ 2,619ppm TREO [0m], including 5m @ 3,016ppm TREO [17m]
- CDMDD011 - 25m @ 6,575ppm TREO [0m], including 4.5m @ 15,598ppm TREO [2m]
- FGDD004 - 97.7m @ 1,817ppm TREO [0m], including 12.3m @ 3,666ppm TREO [22.8m]
- FGDD005 - 11.1m @ 2,670ppm TREO [0m], including 7.1m @ 3,072ppm TREO [4m]
- FGDD006 - 59m @ 2,594ppm TREO [0m], including 28m @ 3,905ppm TREO [10m]
- SBDD004 - 22.7m @ 2,359ppm TREO [0m], including 10.3m @ 3,755ppm TREO [0m]
- SBDD008 - 26.2m @ 3,306ppm TREO [0m], including 18.2m @ 4,172ppm TREO [8m]
- SBDD009 - 26.2m @ 3,958ppm TREO [0m], including 19.2m @ 4,785ppm TREO [7m]
- SBDD010 - 24.3m @ 2,992ppm TREO [0m], including 14m @ 4,038ppm TREO [7m]
- SBDD011 - 24.5m @ 2,240ppm TREO [0m], including 10m @ 3,781ppm TREO [12m]

# SUBSTANTIAL ULTRA HIGH-GRADE RESOURCE

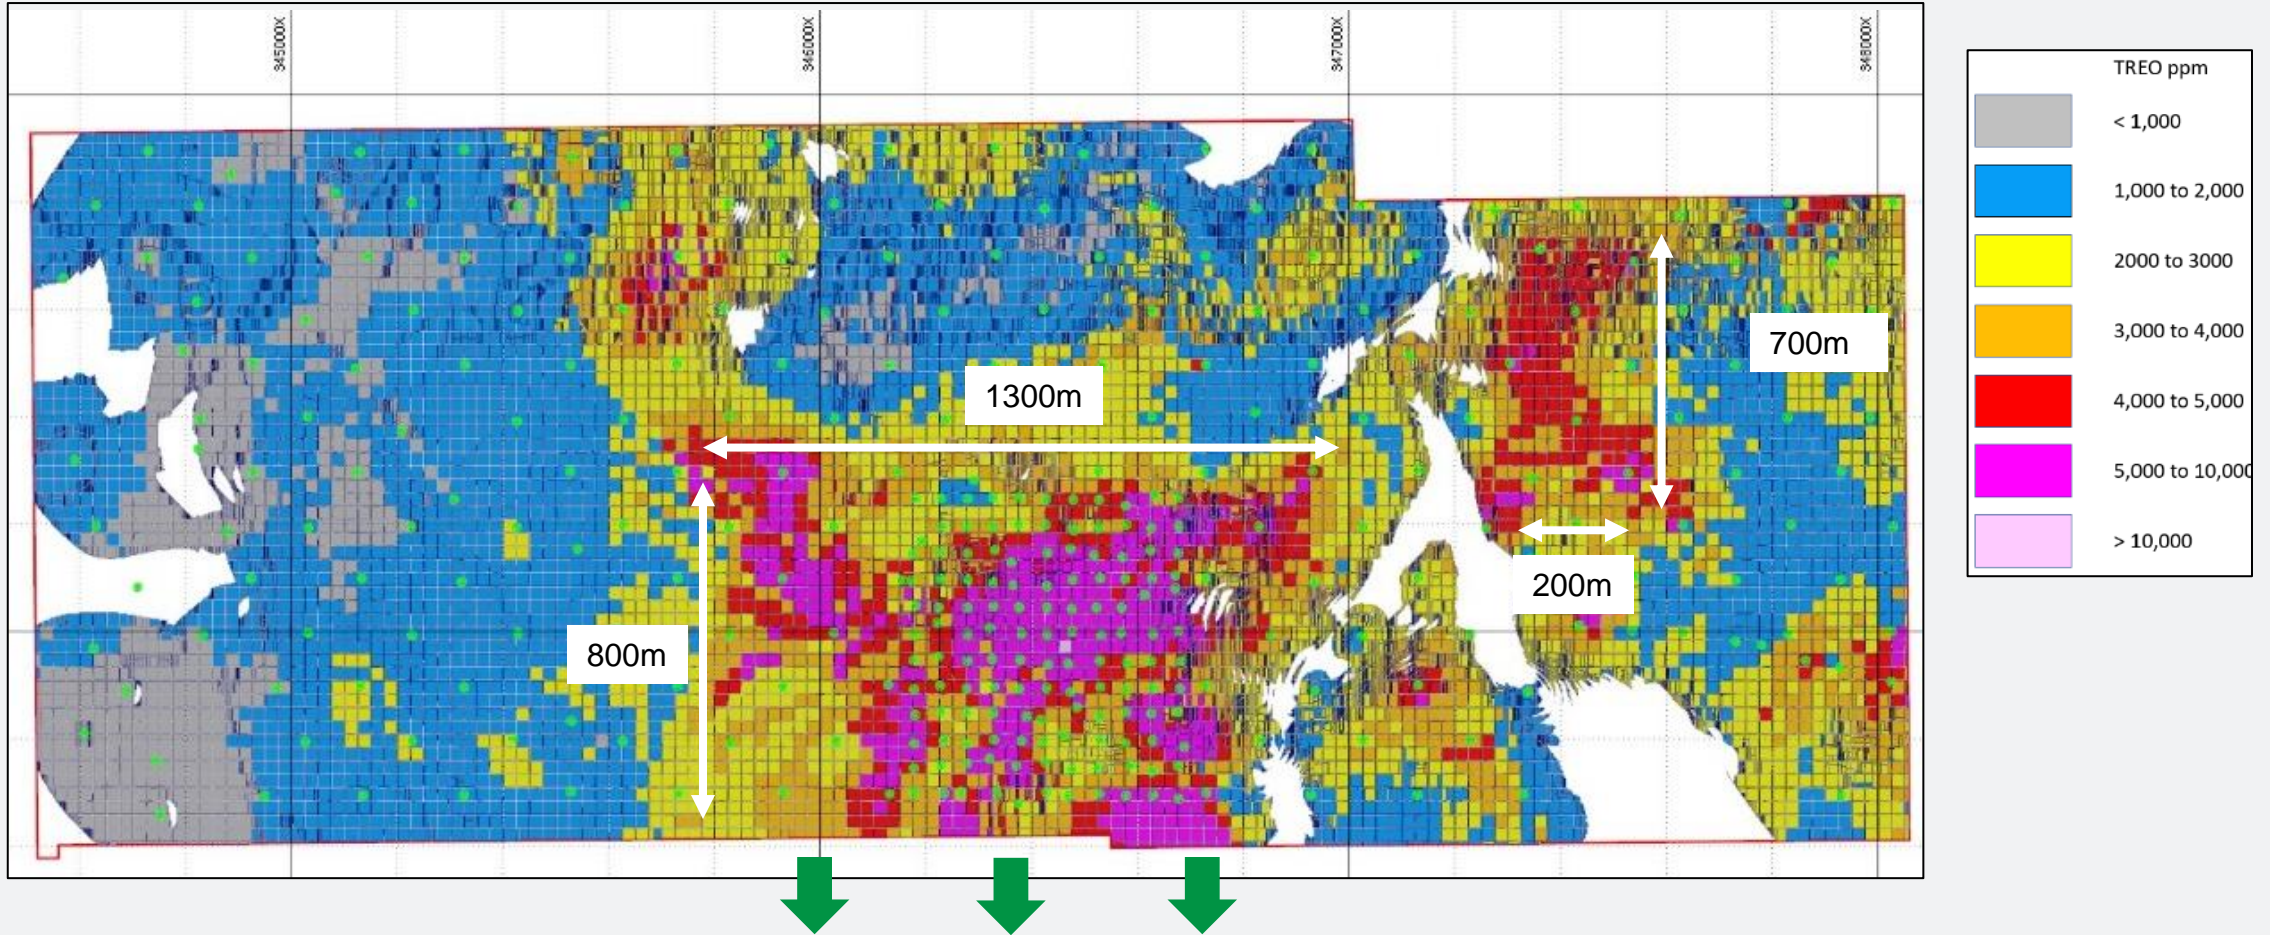

Magnetic Rare Earth Oxide proportion increases as cut-off grade increases

# HIGH GRADE START TO MINE LIFE

Capão do Mel - Plan View Block Model

# In-House drilling capabilities

## Hanjin 8D Multipurpose Drill rig

Currently configured to drill Air Core (150m of rods).

50,000m In-Fill drilling program commenced on the Southern licenses of Figueira, Capao do Mel and Soberbo.

Initial production steady at 100m per day (expected to ramp up to 200m per day).

Potential to add a second Drill Rig in 6-8 weeks doubling production to ensure Resource Update deadline is met.

# Government Partnership

- Meteoric Resources has entered into a non-binding Cooperation Agreement with the State Economic Department (Invest Minas) and the State Government of Minas Gerais
- The Cooperation Agreement will assist with the development of the Caldeira Project and to look at further downstream processing options through to magnet production
- The Cooperation Agreement through Invest Minas will facilitate approvals and licensing processes between Meteoric Resources and government regulators and departments
- Environmental consultants Alger have been engaged to undertake Environmental Impact Study (EIS) for the Caldeira Project

Governor Zema addressing audience

Meteoric Directors Dr Andrew Tunks (left) and Dr Marcelo de Carvalho (right) with Alger Partners Dr Antonio Malard (center-left) and Mr Germano Luiz Gomes Vieira (centre right)

# Focus on Southern Licenses for Initial Operations

The Focus for an initial REE processing facility and mining operations remains on the Southern licenses of Figueira, Capao do Mel and Soberbo.

Current work packages to develop a Circa 5Mtpa processing facility with a +4000ppm feed grade includes:

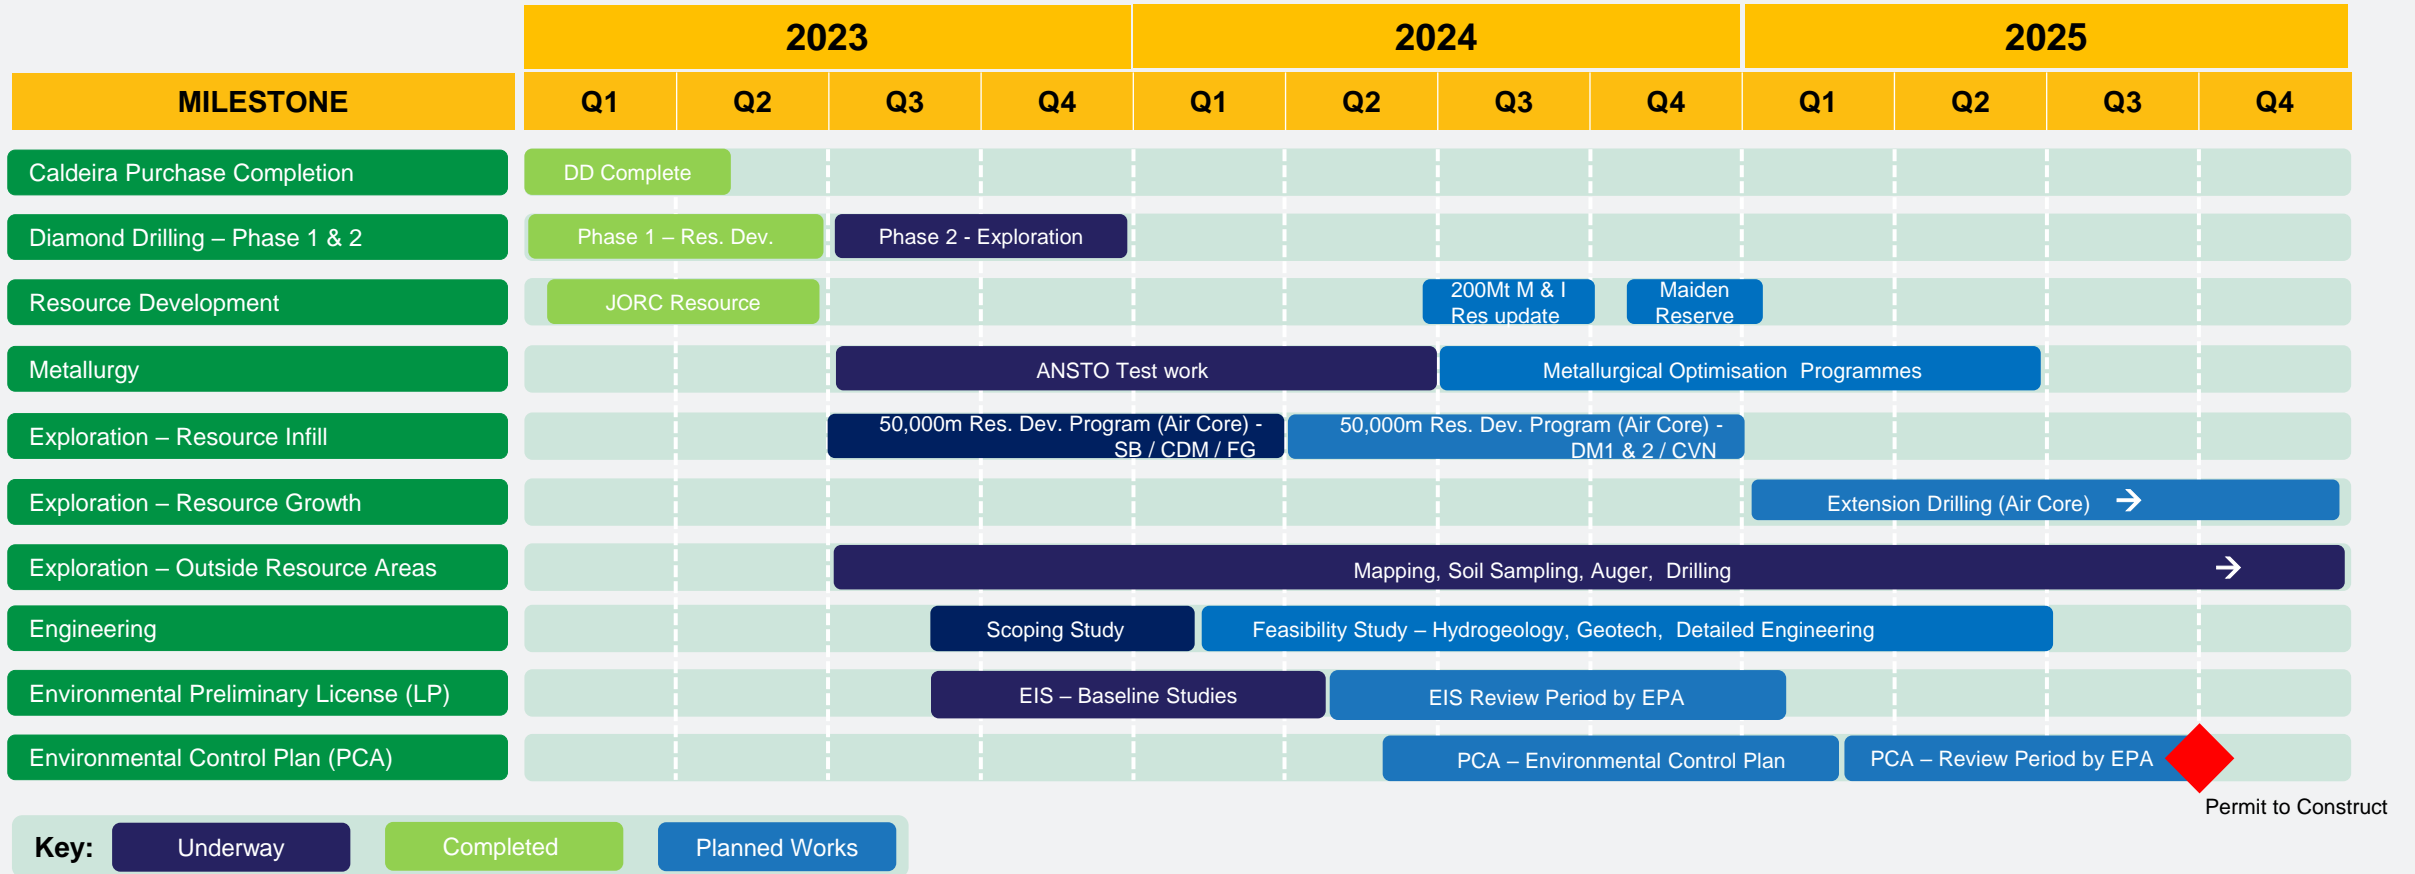

- Engineering Studies - Ausenco
- Metallurgical flowsheet development - ANSTO
- EIA process – Alger Consulting
- Resource infill drilling – Inhouse

Proposed plant site location has:

- Access to all weather road network
- Access to existing HV power
- Access to water abstraction points

# INDICATIVE PROJECT TIMETABLE AND KEY MILESTONES

Meteoric is positioned for a milestone 2023 and beyond with multiple packages progressing

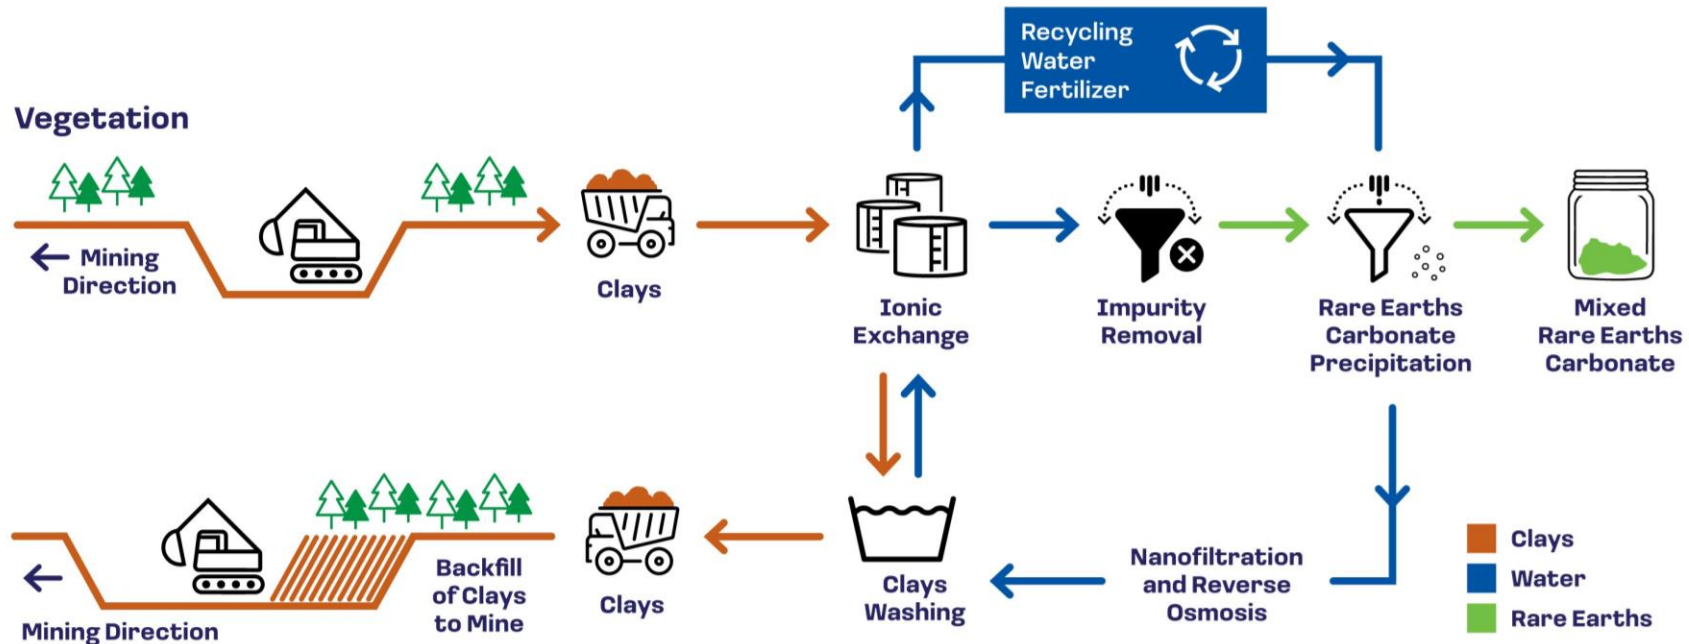

# A Green Mine for Green Metals

## IONIC ADSORPTION CLAY PROJECT FLOW SHEET

### Simple, Environmentally Friendly Process

A simple process with low technical risk and high environmental compliance

- No drill and blast
- No waste dumps
- No tailings dams
