

## QUARTERLY ACTIVITIES REPORT SEPTEMBER 2024

Manhattan Corporation Limited (ASX: **MHC**) (**Manhattan** or the **Company**) is pleased to report on activities undertaken in the September 2024 quarter and its financial position at the end of the period.

### HIGHLIGHTS

During the previous Quarter, Continental Lithium Ltd (a wholly owned subsidiary of Manhattan Corporation Ltd) requested surface access for exploration pursuant to Section 26 of the Mineral Resources Act, S.N.S. 2016, c.3 Nova Scotia Canada, in order to advance to drilling at its Chebogue Lithium Project.

This application remains under consideration by the Nova Scotia Government, where previous exploration has identified several low magnetic responses that may be associated with the occurrence of spodumene bearing pegmatite boulders at the Big Betty Prospect, that have returned significant Li<sub>2</sub>O assays, including:

- Sample 85088A returned 3.40% Li<sub>2</sub>O;
  - Sample 85567A returned 3.23% Li<sub>2</sub>O;
  - Sample 85584A returned 3.19% Li<sub>2</sub>O;
  - Sample 85584B returned 2.97% Li<sub>2</sub>O;
  - Sample 85567B returned 2.41% Li<sub>2</sub>O.
- 
- Although MHC has been allowed access to conduct “Non-Ground Disturbing Activities”, the Company has been seeking relevant approvals from the Landholder, a forestry company, to test the anomalies through drilling. Due to the prolonged negotiations, MHC elected to seek access under a statutory process through the Nova Scotian Provincial Government.
  - MHC announced and completed a 1 for 2 non-renounceable pro-rata Entitlement Offer.

## Chebogue Lithium Project – Canada

The Chebogue Lithium Project is a large, 100% owned land position comprising more than 70km of prospective lithium-bearing pegmatite strike. Chebogue is surrounded by excellent infrastructure and **located just 25km from deep sea shipping facilities at Yarmouth port** connecting the project to the Atlantic Ocean and global markets in North America and Europe.

Manhattan reported on 5 June 2023 the discovery of spodumene-bearing pegmatite boulders at its Chebogue Lithium Project with a further two occurrences reported on 8 August 2023.

The Company reported a further fourth high-grade spodumene-rich boulder occurrence on 11 September 2023, located approximately 1.6km south of Occurrence 2 and 1.1km North of Occurrence 3, all within the Big Betty Prospect.

The Company undertook a highly detailed drone aeromagnetic survey with survey lines spaced at 25 and 50m apart at an average height of 12m above the ground over the Big Betty Prospect late in the September Quarter 2023. Data was received during the quarter and processed by the Company's Geophysical Consultant during the Quarter.

The aeromagnetic survey outlined a number of low magnetic response anomalies that cover an approximate strike length of 30km that could represent pegmatite occurrences that may be associated with high-grade spodumene-rich boulder occurrences identified to date. This includes a central anomaly that covers an area ~200m wide by ~1km of strike that occurs adjacent to the recent spodumene bearing pegmatite discoveries.

During the March 2024 Quarter the Company aimed to complete negotiations of a Land Access Agreement with a Foreign Entity ("Non-Canadian") owned forestry company to undertake drilling, pitting and costeaning over the identified priority targets. Negotiations have become protracted, and the Company has elected to proceed through the Provincial Government's statutory process to gain access to commence drill testing the target. The Company has invested heavily undertaking significant stakeholder engagement, including government and has been advised that its application for access will be received favourably.

This involved the Company making an application for Ministerial Intervention under the Mineral Resources Act of Nova Scotia (Section 26, S.N.S. 2016, c.3) whereby the Minister of Natural Resources can issue a special-order granting surface access when landowners prohibit or limit access for mineral exploration, provided reasonable efforts have been made to obtain consent. The Ministerial decision balances economic benefits of resource development with landowner rights and concerns, aiming for a fair resolution that considers environmental, social, and economic impact.

During the current quarter, the Company reduced its holding in Nova Scotia. The entire package was originally 110 licences; this has now been reduced to a core 43 licences. The Company retained the core area related to the lithium belt. The retained licences are listed in Table 2C. Relinquished licences include the removal of the Paradise (GEM's Target), Kemptville (originally listed as the Blue Mt. Target) and licences that cover the township of Yarmouth.

## About the Chebogue Lithium Project

The Chebogue Lithium Project consists of 43 licences having potential for lithium-caesium-tantalum (LCT) bearing pegmatites. Initial compilation work identified six target areas with three areas selected as locations for the start of exploration.

Detailed prospecting is now focused at the “BP” target licence and surrounding licences lying both to the north and south. Numerous sub-angular boulders have been observed on surface in this area. Exploration consisting of prospecting, soil sampling, and initial screening for spodumene flakes in glacial till is continuing in this licence area.

Historical surficial maps at the “BP” Target licence area indicates a relatively thin (<5m) cover of glacial till (Brushett, et.al., 2022)<sup>1</sup>. Previous workers have documented three glacial dispersion directions in the region but work at the Brazil Lake pegmatites indicated a predominate ice flow direction from north to south.

The underlying geology at the “BP” Target area straddles metamorphosed Green Harbour Formation of the Goldenville Group to the east, progressing westward across the Chebogue Point shear zone, and into volcanics of the White Rock Formation. These volcanics occur immediately to the northeast along strike of the Brazil Lake pegmatites.

***The Company believes that similar, NE oriented (~050°), spodumene-bearing pegmatites may occur further to the north and south of Brazil Lake along a northeast trending (~020°) stratigraphic sequence of metavolcanics and metasediments. This sequence of up to ~4 kilometres wide, runs parallel to, and to the west of the Chebogue Point Shear Zone.***

## Corporate

### Financial Position

On 30 September 2024, the closing cash balance was \$1.81 million; all of which is unrestricted. The focus during the quarter was on cost control and minimising the cash burn.

The Board continues to monitor cash balances ensuring it is sufficient to support Company operations and implement the necessary capital raisings to ensure the Company delivers on strategy.

One such capital raising initiated during the quarter was a 1 for 2 non-renounceable pro-rata entitlement Offer (**Entitlement Offer**). The Entitlement Offer was supported by a small group of existing shareholders, closing on 4 September 2024 raising approximately \$155,554 (before costs) – involving the issue of 155,553,566 new shares at 0.001 per new share.

The Directors had the right, subject to the requirements of the ASX Listing Rules and the Corporations Act, to place the remaining 1,312,936,518 Shortfall Shares, which was completed in October 2024 together with a Placement of 92,500,000 fully paid ordinary shares, following a strong demand for Shortfall Shares.

Funds from the Entitlement Offer have been applied towards tenement administration, covering costs of the Entitlement Offer and working capital

### Expenditure

Achieving and maintaining operational efficiency is a key – the significant cash outflows for operating activities for the September 2024 quarter included:

- \$302,000 on Exploration and Evaluation expenditure, approximately 78% of that spend directed to the Chebogue Lithium Project; and
- \$218,000 on Administration and Corporate costs.

### Related Party Expenditure (Items 6.1 and 6.2)

The Company paid Directors \$36,000 for services rendered under normal commercial terms during the September 2024 quarter, including a prior quarter Director Fee of \$3,000.

The Company paid Mannika Resources Pty Ltd, an entity controlled by Kell Nielsen, \$24,000 for the provision of consultancy CEO services engaged on specific project tasks together with \$364 being reimbursement of expenses capitalised to Exploration and Evaluation expenditure.

### Additional ASX Listing Rule Disclosures

#### Capital Structure

As announced in the previous quarter, Mr Paul Smith – General Manager, Canada left the Company effective 30 June 2024. As of 1 July 2024, 20 million Performance Options and 40 million Performance Rights were cancelled by the Company.

On 11 September 2024, 155,553,566 fully paid Ordinary Shares were issued representing the take up of the Entitlement Offer.

On 30 September 2024, the capital structure comprised:

	Fully Paid Shares	Unlisted Options	Performance Shares	Total Securities on Issue
Fully paid Ordinary Shares	3,092,533,341			3,092,533,341
Performance Shares			300,000,000	300,000,000
Unlisted Options @ \$0.02 expiring 30 March 2026		110,000,000		110,000,000
Unlisted Options @ \$0.01 expiring 30 March 2026		100,000,000		100,000,000
Unlisted Options @ \$0.04 expiring 30 March 2026		10,000,000		10,000,000
Unlisted Options @ \$0.015 expiring 28 November 2026		17,500,000		17,500,000
<b>Issued Capital at end of March 2024</b>	<b>3,092,533,341</b>	<b>237,500,000</b>	<b>300,000,000</b>	<b>3,630,033,341</b>

## Tenements

### ASX Listing Rules 5.3.2 and 5.3.3

Manhattan confirms that during the September 2024 quarter:

- There were no mining production and development activities undertaken;
- There were no farm-in or farm-out agreements entered;
- There were no changes to tenure for the Tibooburra or Ponton Projects as listed in Tables 2A and 2B;
- During the quarter, The Company reduced it's holding in Nova Scotia. The entire package was originally 110 licences, this has been reduced to a core 43 licences. The Company retained the core area related to the lithium belt. The retained licences are listed in Table 2C. Relinquished licences include the removal of the Paradise (GEM's Target), Kemptville (Originally Listed as the Blue Mt. Target) and licences that cover the township of Yarmouth.

## JORC Code, 2012 Edition – Table 1

As required by ASX Listing Rule 5.7, the relevant information and Tables required for previously announced results under the JORC Code can be found in the following announcements.

### Chebogue Lithium Project

In reference to sampling results and the drone magnetic survey from the Chebogue Lithium Project, please refer to the announcement reported by MHC as follows:

3 July 2023 – “High Grade Spodumene sampled up to 2.24% Li<sub>2</sub>O”,

8 August 2023 – “New Spodumene Pegmatite Discovery”,

11 September 2023 – “High-Grade Lithium Assays up to 3.40% Li<sub>2</sub>O” and

30 January 2024 – “December 2023 Quarter Activities Report”.

## Competent Person’s Statement

The information in this report that relates to Exploration Results and Mineral Resources is an accurate representation of the available data and is based on information either compiled or reviewed by Mr Kell Nielsen who is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Nielsen is a Director and Chief Executive Officer of Manhattan Corporation Limited. Mr Nielsen has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person (CP) as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Nielsen consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

## Forward looking statements

This announcement may contain certain ‘forward looking statements’ which may not have been based solely on historical facts, but rather may be based on the Company’s current expectations about future events and results.

Forward-looking statements contained in this announcement include, but are not limited to: completion of the Acquisition; the strengths, characteristics and potential of the Company following completion of the Acquisition; timing and receipt of shareholder approvals; completion of the Capital Raising; discussion of future plans, projects and objectives and statements about the outcome and effects of the Capital Raising and the use of proceeds.

Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward looking statements are subject to risks, uncertainties, assumptions, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by such forward looking statements. Such risks include, but are not limited to third party actions, metals price volatility, currency fluctuations and variances in exploration results, ore grade or other factors, as well as political and operational risks, and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company's Annual Reports, as well as the Company's other releases. The Company does not undertake any obligation to release publicly any revisions to any 'forward looking statement' to reflect events or circumstances after the date of this announcement, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

### **Reliance on third party information**

This announcement contains information derived or obtained from third parties. No representation or warranty is made as to the accuracy, completeness or reliability of the information. This document should not be relied upon as a recommendation or forecast by the Company.

In particular, this announcement contains information taken from NI 43-101 Technical Report on the Mineral Resources Estimate for the Brazil Lake Project (Lithium-Bearing Pegmatite Deposit) Nova Scotia, Canada, prepared for Champlain Mineral Ventures Ltd, by Michael Cullen P.Geol., Matthew Harrington, P. Geol., and Lawrence Elgert, P.Eng, of Mercator Geological Services, dated 25 April 2022 and prepared in accordance with the requirements of National Instrument 43-101 – Standards of Disclosure for Mineral Project of the Canadian Securities Administrators reporting instrument codes. The information in that report relates to the Brazil Lake Project and not the Chebogue Lithium Project that the Company is proposing to acquire. There can be no guarantees or certainty that exploration work on the Project will return similar results or that exploration work will result in the determination of mineral resources or that the production target itself will be realised.

7.4 <b>Total financing facilities</b>	-	-
7.5 <b>Unused financing facilities available at quarter end</b>	Not Applicable	
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	

<b>8. Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1 Net cash from / (used in) operating activities (item 1.9)	(218)
8.2 Capitalised exploration & evaluation from investing activities) (item 2.1(d))	(302)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(520)
8.4 Cash and cash equivalents at quarter end (item 4.6)	1,811
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	1,811
8.7 <b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	3
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: Not Applicable.	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: Not Applicable.	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: Not Applicable.	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

**Compliance statement**

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2024

Authorised by: By the Board of Manhattan Corporation Limited  
(Name of body or officer authorising release – see note 4)

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
