TOTAL RETURNS TO 30 APRIL 2019

Commonly used indicators of LIC performance are Total Portfolio Return (TPR) and Total Shareholder Return (TSR). TPR combines the change in value of the NTA per share with the dividends paid in the period. TSR combines the change in share price with the dividends paid in the period and captures the impact of any premium or discount to NTA. The below TPR & TSR calculations do not take into account franking credits which may be of benefit to certain shareholders.
