About Midas

Midas Minerals, which recently listed on the ASX, is a junior mineral exploration company based in Western Australia. The Board and management have an extensive experience and proven track record of significant gold discoveries and mine development.

The Company listed on the ASX on 7 September and is well funded, targeting exploration success resulting in the discovery of economic mineral deposits. The Company has three projects located in the Leinster, Leonora, and Mt Magnet areas of WA.

Project Background

Midas' projects have limited prior exploration and known anomalous to significant mineralisation¹. All projects are also located proximal to infrastructure and within 60km of mining towns and processing plants.

Midas will actively explore the projects on multiple fronts including;

- Geophysics, utilising existing open file and multiclient data and undertaking additional surveys to produce quality datasets;
- Geochemistry, utilising the appropriate sampling and assay techniques to identify drill targets; and
- Drilling to initially confirm and better define areas of known significant insitu mineralisation and later to test targets defined by geochemistry and geophysics.
 - **Weebo Project** – prospective for gold and nickel and located north of the Thunderbox mine within the prolific Yandal greenstone belt. The Company has the option to acquire tenements comprising 198km². The project contains numerous gold prospects ranging from early stage to drill ready.
 - **Challa Project** – prospective for precious and base metals. The Company has acquired two granted exploration licences and three exploration licence applications comprising 858km² of tenure. The project contains significant gold, copper, silver, PGE mineralisation. Limited exploration has been undertaken in recent decades, the Company plans to complete geochemistry and airborne VTEM prior to drilling.
 - **Sunset Project** – prospective for granitoid hosted gold mineralisation. The Company has acquired one prospecting licence comprising 1.2km² of tenure. The project is drill ready.
