ASX: NCZ

11 September 2018

## NEW CENTURY COMMENCES SLURRY PIPELINE OPERATIONS & CONCENTRATE DELIVERY TO THE KARUMBA PORT FACILITY

- Zinc concentrate pumping through the slurry pipeline underway
- Concentrate being delivered to New Century's Karumba Port Facility for export
- First revenue from concentrate sales anticipated this month
- New Century remains on track for first shipment of concentrate in Q4 2018

New Century Resources Limited (ASX:NCZ) is pleased to announce the initiation of zinc concentrate pumping along the slurry pipeline to the Company's port facility in Karumba. Operation of the slurry pipeline represents another important milestone for New Century, with the saleable zinc concentrate produced on site to date now undertaking the first stage of logistics for export.

The pumping of slurry to Karumba also allows the Company to anticipate the receipt of first revenue from sales of concentrate later this month.

## About New Century Resources

New Century Resources Limited (ASX:NCZ) is an Australian base metal company, with its operation at the Century Mine in Queensland ramping up to become one of the world's top 10 zinc producers.

As part of the Century operations, the Company is upgrading the Mine's existing world-class infrastructure including a large scale multi train flotation plant, 700-person camp, private airport, grid power connection, 304km slurry pipeline, port facility and concentrate transshipment vessel.

New Century is initially focused the existing Proved Ore Reserves at Century to produce zinc in the lowest cost quartile globally. Substantial Mineral Resources also exist on the mining leases, which provide a significant opportunity for mine life extension and metal production increase.
