

## OPERATIONAL UPDATE

---

New Century Resources Limited (**ASX: NCZ**) (**New Century** or the **Company**) provides the following update on operations.

Rainfall events in Northwest Queensland, especially the intense events of the past few days, are having an impact on operations at the Century mine and Karumba Port Facility. Production has been suspended at Century, with only critical dewatering and maintenance activities continuing. Production will not recommence until the weather improves and safe access to the production areas can be re-established.

The safety and well-being of our employees and business partners remains paramount. No safety incidents have occurred, and core infrastructure remains secure, including the Century tailings storage facility, processing plant and pipeline, along with the Karumba Port Facility and the M.V. Wunma.

New Century personnel from Karumba and Century are actively participating in the Carpentaria and Burke Shire Local Disaster Management Committees.

The Company will provide further updates in due course.

**This announcement is approved for release by the New Century Board of Directors.**

## About New Century Resources Limited

---

Established in 2017, New Century is an Australian base metal producer with significant zinc assets and a brownfield copper development project. New Century is a top-15 global and top-five domestic zinc producer, operating Australia's largest hydraulic mine at the Century Mine in Queensland; extracting, processing, and marketing zinc recovered from historical tailings. New Century is actively progressing life extension opportunities at Century and studying the potential to restart copper production at the historically significant Mt Lyell Copper Mine in Tasmania. New Century is also pursuing opportunities with industry peers to reprocess and rehabilitate contemporary and historical mineralised waste assets at operational and legacy mine sites. Under this model, New Century may employ its expertise in economic rehabilitation with partners to the benefit of shareholders and the environment.
