ASX RELEASE

Platina outlines fully funded 2026 gold exploration strategy.

Platina Resources Limited (ASX: PGM) (“Platina” or “the Company”) is proceeding with a fully funded, multi-project exploration strategy for 2026, focused on systematic drilling and discovery across its highly prospective Western Australian gold portfolio.

In excess of 20,000m of aircore and reverse circulation (RC) drilling is planned in 2026, predominantly in the first half of the year and largely within the Laverton Gold District which hosts the Company’s Mt McKenna, Sunrise Bore and Mt Morgans South projects.

The Laverton region is host to multiple world-class mines and gold deposits and is supported by the Laverton township, which provides a well-established hub offering excellent access, essential services and multiple nearby gold processing plant options.

Programs will be sequenced to maintain continuous activity enabling execution synergies and steady news flow as projects progress through permitting and target definition.

2026 Exploration Priorities

- **Mt McKenna:** Back-to-back drilling programs planned to commence in early 2026, targeting multiple priority exploration zones across more than 20km of prospective greenstone stratigraphy;
- **Sunrise Bore:** Resource definition RC drilling planned following the grant of the tenement, targeting a highly prospective gold system within a proven mineralised corridor not drilled since 1997;
- **Mt Morgans South:** Pending transaction completion, exploration and drilling activities to be advanced across a suite of shear and intrusion related gold targets; and
- **Beete:** Exploration planned later in 2026, providing additional depth and optionality within Platina’s growing gold portfolio.

Platina Managing Director, Mr Corey Nolan, said:

“Platina enters 2026 with a clear, disciplined strategy and the financial capacity to drive multiple, well-sequenced exploration campaigns concurrently across its high-quality gold portfolio in the prolific Laverton Gold District.

“Our strategy is underpinned by a strong balance sheet, with approximately A\$11 million in cash, enabling full execution without compromise or near-term equity dilution and provide Platina a level of funding strength to execute a material scope of follow up programs as identified during the execution of this 2026 exploration program.”
