

# Quarterly Activities Report June 2024

25 July 2024

## North American Lithium achieves further concentrate production records

### Québec, Canada

- Ore mined of 233,699 wet metric tonnes (wmt) was 33% lower than the previous quarter as high ROM pad inventories were utilised while in-pit inventory increased by 44%.
- Process plant utilisation reached a new high of 83% up from 73% in the prior quarter.
- Lithium recovery for the quarter was also a new high of 68%, up from 67% in the prior quarter.
- Record production up nearly 23% to a record 49,660 tonnes of spodumene concentrate at an average grade of 5.3% for the quarter as a result of excellent mill utilisation and recovery.
- Daily production reached a new record of 919 tonnes in June and monthly production reached 19,314 tonnes in May
- Unit operating costs for NAL decreased 2% Quarter on Quarter to A\$1,506/dmt (US\$995/dmt).
- Two marine cargoes of concentrate were sold by NAL during the quarter. A scheduled third cargo at the end of the June was delayed due to weather and departed port on 1 July. Consequently, shipments in the September quarter are now expected to be a minimum of 50,000 dry metric tonnes (dmt) and up to 65,000 dmt depending upon the timing of a shipment scheduled for late September.
- Total concentrate sold during the quarter was 27,729 dry metric tonnes. The average realised selling price (FOB) decreased by 11% to A\$885/dmt (US\$604/dmt) compared to the previous quarter.
- NAL revenue was A\$25 million for the quarter, which was impacted by unfavourable quotational period adjustments and a delayed shipment.
- Major capital projects were completed at NAL, including the Crushed Ore Dome and refeed facility which was reflected in lower capital spend in this quarter and going forward.

### Western Australia, Australia

- An orientation ground gravity survey was completed to assist in targeting the pegmatite system and potential lithium rich zones at depth. Reverse circulation (RC) drilling commenced in late May with 21 holes for 3,538 metres now complete. Assays are pending.

### Corporate

- Mr Lucas Dow was appointed as Managing Director and CEO on 3 July. Mr Dow is a highly experienced mining executive who has a strong operational focus.
- Mr James Brown will serve as an Executive Director until 31 January 2025 after which he will continue in a non-Executive Director role.
- The balance of cash and cash equivalents at the end of the quarter was \$90.6 million, an \$8.3 million decrease over the equivalent balance of \$98.9 million at 31 March 2024

# Management Commentary

It was a quarter of record operational performance for Sayona, with concentrate production at NAL increasing 23% Quarter on Quarter (QoQ) to 49,660 dmt. Mill utilisation has improved materially over the prior quarter to 83%.

The team at NAL continues to optimise mining and production processes, with significant improvements in concentrate production over the quarter. This was driven by excellent mill utilisation and recovery rates. Mill utilisation increased from 73% to 83% as weather related outages abated with the onset of summer and with the availability of ore feedstock from the now fully operational Crushed Ore Dome.

Mill utilisation over the month of June reached a record 91% while the quarter average was negatively impacted by a planned shutdown in April related to the tie-in of the Crushed Ore Dome.

Recovery rates continued to improve during the quarter to 68% reflecting slightly above forecast ore grade and most significantly, excellent operational performance.

Revenue was lower during the quarter, impacted by the delay of a scheduled shipment in June as well as lower average realised selling prices with a decline in lithium prices towards the end of the quarter. Unit operating costs improved benefitting from increased mill output combined with lower mining expenditure through optimisation of activities and ROM pad inventories.

**Production continued to improve throughout the quarter driven by higher mill utilisation and excellent recovery rates.**

The Crushed Ore Dome is now complete and fully commissioned. The dome will significantly boost operational reliability during winter, providing an additional 6,000 tonnes storage capacity of crushed ore between the crusher and the mill. The additional storage capacity of crushed ore enables approximately 1.5 days of continuous mill operation.

Concentrate sales during the quarter included two marine shipments of 27,729 tonnes at 5.4% Li<sub>2</sub>O. A third shipment was scheduled for the end of June, however loading was delayed due to adverse weather conditions and the ship departed port on 1 July 2024 with approximately 14,000 dmt. Larger shipments of up to 30,000 tonnes are planned for the September quarter which is expected to result in higher average realised selling prices.

Excellent drilling results were released for both NAL and Moblan during the quarter. The results demonstrate the

extension of mineralisation beyond current Mineral Resource Estimates (MRE) at both projects and provide the potential for further increases to the existing MREs. Exploration and resource definition drilling will continue at both projects throughout 2024.

Exploration at the Tabba Tabba project focussed on strike extensions immediately south of recent discoveries by Wildcat Resources at the Leia and Luke pegmatite systems.

A ground gravity geophysical survey was conducted in April which helped inform the location of holes for a RC drilling program which commenced late May. Drilling focussed in the northern area, immediately south of Wildcat Resources tenements, and at the Roadside prospect, approximately 4.5km to the south and along strike. A programme of 21 holes for 3,538m was completed with assay results now pending.

Sayona appointed Mr Lucas Dow as Managing Director and CEO on 3 July. Mr Dow is a highly experienced mining executive who has a strong operational focus. Mr James Brown will serve as an Executive Director until 31 January 2025 to enable an effective handover, after which he will continue in a non-Executive Director role.

Sayona boasts an impressive portfolio of projects and exploration tenements poised to create significant value for shareholders. While market conditions remain challenging, Sayona remains focused on improving operational results and ensuring the Company is well positioned for the eventual upturn.

## Health and Safety

The Total Recordable Injury Frequency Rate (TRIFR) increased on the March quarter, but remains below the results of FY23. The quarterly increase was driven by a higher number of recordable injuries at NAL and in particular in the mill operations.

During the quarter, the Company continued the implementation of the ICI safety program. ICI has three key pillars to improve safety performance – the use of work cards to define how to safely undertake work tasks, tool box meetings to review safety issues and discuss mitigation actions, and identification of critical risks and their controls.

Training for the ICI program has continued during the June quarter and this is expected to be combined with the site induction over the next quarter to ensure it becomes an integrated part of the employee induction process.

## ESG and Community Engagement

Permitting work continued during the quarter related to the modification and expansion of NAL waste rock stockpiles which has the potential to reduce haul distances and improve mining efficiency.

During the quarter, Sayona obtained UL ECOLOGO certification for its procedures and environmental management system. An external field audit is planned for August.

The research project "Strategies for Creating Anicinapek Service Enterprises in the Mining Sector" was launched in May. This initiative is a collaboration between the University of Quebec in Abitibi-Témiscamingue (UQAT), Canada Economic Development for Quebec Regions, Abitibiwinni, and Sayona. This project aims to explore and develop strategies to support the creation and growth of service enterprises within the Anicinapek community, specifically tailored to the unique needs and opportunities within the mining industry.

Engagement with local communities in the Abitibi-Témiscamingue Hub and Eeyou Istchee James Bay Hub continued during the quarter.

## Safety training and prevention activities continue at record levels

<sup>1</sup> All figures are reported in 100% terms. Numbers presented may not add up precisely to the totals provided due to rounding.

<sup>2</sup> Average realised selling price is calculated on an accruals basis and reported in \$/dmt sold, FOB Port of Québec.

<sup>3</sup> Unit operating cost is calculated on an accruals basis and includes mining, processing, transport, port charges, site-based general and administration costs and cash based inventory movements, and excludes depreciation and amortisation charges, freight and royalties. It is reported in \$/dmt sold, FOB Port of Québec

# North American Lithium

## Mining

Ore mined of 233,699 wmt was 33% lower than the previous quarter as high ROM pad inventories were utilised while in-pit inventory increased by 44%.

Mining in Phase 3 continued throughout the quarter with some productivity restrictions due to safety requirements around historical underground mining areas. ROM feed grade delivered to the ROM stockpile at the plant averaged 1.24% Li<sub>2</sub>O for the quarter, which was slightly higher than previous quarter due to the ore being mined around the historical underground mine workings being of higher grade. The Run of Mine (ROM) stockpile as at 30 June 2024 decreased 31% QoQ to 178,068 tonnes, while the in-pit inventory increased 44% to 164,680 tonnes over the quarter. Overall, in-pit and ROM pad inventory was down 8% on the quarter and up 42% from 31 December 2023 as mining operations continue to improve. The recently completed Crushed Ore Dome also provides the ability to build crushed ore inventory between the crusher and the mill and is delivering higher mill utilisation.

### Crushed Ore Dome

The Crushed Ore Dome was completed and commissioned during the quarter. A plant shutdown was completed in April to allow for final equipment installation after which stockpiling of crushed ore commenced.

The Crushed Ore Dome is designed to act as a secondary supply source of crushed ore to the mill to maintain process plant utilisation. The dome has a storage capacity of around 6,000 tonnes of crushed ore.

### Jaw Crusher C-150

The Jaw Crusher C-150 project is designed to stabilise mill throughput by minimising blockages in the crushing circuit and minimising use of the rock hammer on the ROM pad.

Earthworks were completed for the access ramp during May and June after which crusher assembly and installation was completed during the month of June. Commissioning was ongoing as at the end of June with transfer to the operations team in early July.

## Production

Production increased 23% to a record 49,660 dmt of spodumene concentrate at an average grade of 5.3% for the quarter as a result of excellent mill utilisation and higher recovery. Daily production reached a new record of 919 tonnes in June and monthly production reached 19,314 tonnes in May

The crushing circuit processed 312,296 tonnes of ore (up 20%) at an average feed grade of 1.24% Li<sub>2</sub>O with improved operational performance and weather conditions.

Mill utilisation increased to 83% with mill production hours up 16% as the Crushed Ore Dome became operational during the quarter. During periods of planned and unplanned crusher downtime the mill was able to utilise crushed ore stored in the dome as buffer feedstock.

The ability to build crushed ore inventory between the crusher and mill and use of the new refeed system from the Dome is expected to lead to improved plant utilisation and ore processed tonnages into the future.

The Li<sub>2</sub>O recovery for the quarter was 68%, a further increase over the prior quarter with the month of May exceeding 69%. Recoveries improved due to fewer periods of shutdown in the mill which provided greater consistency of operations and improved process circuit stability.

The metallurgical, operations and maintenance teams have demonstrated outstanding performance this quarter, continually focusing on optimising recovery and concentrate quality. The improvement in recoveries is a testament to their efforts, achieved through minimising shutdown periods in the mill, which in turn provided greater consistency of operations and enhanced process circuit stability. NAL produced 49,660 dry metric tonnes of spodumene concentrate at an average grade of 5.3% Li<sub>2</sub>O, and 1.14% Fe in line with customer contract requirements.

In May 2024, NAL achieved a record monthly production of 19,314 dry metric tonnes, a 23% increase on the previous monthly production record observed in March 2024. NAL achieved multiple daily production records of spodumene concentrate during the quarter of up to 919 dry metric tonnes per day.

### NAL Global Recovery and Mill Utilisation

Figure 1: NAL Global Recovery and Mill Utilisation

### NAL Concentrate Production and Unit Operating Costs

Figure 2: NAL Concentrate Production and Unit Operating Costs

## Sales

NAL revenue was A\$25 million for the quarter, which was impacted by unfavourable quotational period adjustments and a delayed shipment

The decrease in revenue was driven by a 52% decrease in concentrate tonnes sold by NAL in addition to a 11% decrease in average realised selling price for the quarter.

Total concentrate sold during the quarter was 27,729 dry metric tonnes. Two marine cargos departed port during the quarter, with a third cargo scheduled to leave in June delayed to 1 July 2024 due to adverse weather. One cargo was sold to the international lithium market and one cargo sold to Piedmont Lithium. The delay of the scheduled third cargo from June into July has resulted in higher expected concentrate sales and revenue to be realised by NAL in the September quarter.

Average marine cargo shipment size for the quarter was approximately 14,000 dry metric tonnes of spodumene concentrate.

The average realised selling price (FOB) decreased by 11% to A\$885/dmt (US\$604/dmt) compared to the previous quarter. Lithium prices declined throughout May and June resulting in unfavourable quotational period adjustments for cargos from the prior quarter.

In order to obtain improved pricing outcomes for future shipments, NAL is planning larger shipments of up to 30,000 tonnes per vessel to reduce FOB freight costs. This is expected to have a positive impact on average realised selling price in the September quarter, assuming stable lithium prices.

A total of 31,079 tonnes of spodumene concentrate finished goods was stockpiled at NAL, in transit or at the port at 30 June 2024.

## Costs

Unit operating costs for NAL decreased 2% Quarter on Quarter to A\$1,506/dmt (US\$995/dmt).

Controllable costs decreased with lower mining costs reflecting the utilisation of high ROM pad inventories. Cost savings from reduced mining and stripping activities were partly offset by higher processing costs, additional parts and labour costs from planned and unplanned plant shutdowns and higher reagent costs.

Unit operating costs on a tonnes sold basis were unfavourably impacted by lower concentrate sales due to the delay of the scheduled third cargo,, however this was mostly offset by favourable inventory movements.

Unit operating costs sold reflect the expenditure incurred to produce inventories across the NAL operation, with that cumulative expenditure expensed to profit or loss once the spodumene concentrate finished goods have been sold. As the impact of the optimisation of these inventories flow through, we expect unit operating costs on a tonnes sold basis will continue to decrease.

**Figure 3:**  
**The Magnificent pegmatite at NAL**

# Exploration

## Québec, Canada

### North American Lithium

The 2024 exploration drilling program continued at NAL during the quarter, with the program designed to confirm geological continuity and assess the potential for new discoveries outside the mining lease. The drilling program objectives include detailed assessments of the thickness and geometry necessary for the potential identification and conversion of mineral resources. At 30 June 2024, a total of 29 diamond drill holes measuring a total of 9,282 metres had been completed, with four drill rigs now on site. The drilling program of up to 30,000 metres is expected to be completed by the end of 2024.

Results from the 2023 drill program were released during the quarter identifying new pegmatite zones to the south-east and north-east of the existing Mineral Resource Estimate (MRE) pit shell. Work is underway to quantify the potential increase in resource with a new MRE to be published once the assessment is complete.

### Moblan

Results from the 2023 drill program were released during the quarter which demonstrated significant width intersections of high grade mineralisation.

The results illustrate the potential connection between the Main, South, New South, Inter and Moleon sectors within a single extensive lithium mineralised system.

New 3D geological modelling is underway to consider all 2023 drilling results as part of an updated MRE. A further drilling program of 80,000m will be completed throughout 2024 with the aim of testing the extent of mineralisation and upgrading resource categories.

## Western Australia, Australia

### Morella Lithium Joint Venture Project

Sayona holds a 49% equity stake in the Morella Lithium Joint Venture which comprises lithium rights to six tenements in the Pilbara covering 426km<sup>2</sup> and two tenements in South Murchison covering 48km<sup>2</sup>. Morella Corporation Limited is the manager of the joint venture.

During the quarter RC drilling was carried out at the Tabba Tabba East project with 14 holes for 1,392m completed. Assay results are pending. Drilling targeted lithium geochemical soil anomalies along a major fault structure linked to the main shear hosting the Wildcat lithium discovery at Tabba Tabba.

Work and planning over other JV areas continued, including for RC drilling at the Mt Edon project.

It is anticipated that the results, when returned, will help focus air core drilling of anomalies and help rank areas for deeper RC drill testing.

*Figure 4: RC drill sampling*

### Deep Well

The Deep Well Project (E47/3829) overlies Mallina Basin sediments and Portree Suite intrusive rocks, which are of the same age as those associated with the Hemi gold deposit. During the quarter a total of 610 geochemical soil samples were collected to expand and infill previous anomalous results. Samples have been submitted to LabWest Minerals Analysis for testing using the low level gold CSIRO ultrafine+ technique.

## Tabba Tabba Project

Exploration at the Tabba Tabba project focussed on strike extensions immediately south of recent discoveries by Wildcat Resources at the Leia and Luke pegmatite systems.

Results of air core drilling (see ASX release 11 April 2024), identified targets at the north and south drill areas, providing encouragement to carry out a ground gravity geophysical survey which commenced in April. Gravity data was captured over a 7km x 2km area with approximately 2,500 stations completed on 160m x 40m traverses with local infill at 80mx20m spacing. A number of prospective targets and trends, potential gabbro host units and structural settings have been identified.

RC drilling commenced late May over the north drill area, immediately south of Wildcat Resources tenements, and at the Roadside prospect, approximately 4.5km to the south and along strike. An expanded RC programme of 21 holes for 3,538m was completed. Assay results are pending.

In the north drill area a total of 16 holes for 2,716m were completed on four drill fences spaced 200m apart. Drilling was sited over the southern extension to the Tabba Tabba mine stratigraphy and mineralisation identified by Wildcat. Targets include a western gravity feature linked to outcropping gabbro to the south and an eastern gravity feature coincident with a zone of alteration identified in air core drilling.

At the Roadside prospect to the south, five holes for 822m were completed along two drill traverses spaced 200m apart. Drilling was in follow up to narrow pegmatites intersected in shallow air core drilling and pegmatite and geochemical anomalism at surface.

All holes were drilled 80m apart with a -60 degrees dip and westerly azimuth.

Planning is advanced for follow up diamond drilling programme in the north drill area. This will extend RC drill holes with diamond tails and test targets to greater depth in the search for Luke style pegmatite systems and extensions. Concurrently, heritage surveying is planned with the aim to increase the cleared area footprint to allow broader drill testing of targets in the current field season.

Systematic tenement wide exploration has advanced, including geological mapping and the start of field assessment of gravity targets in order to advance early drill testing. Work is targeting prospective gabbro host units and structural settings which facilitate emplacement of flat lying spodumene pegmatite mineralisation.

Sayona has been awarded a co-funding grant for up to \$180,000 for drilling at Tabba Tabba under Round 29 of the Western Australian Governments Exploration Incentive Scheme (EIS). The grant will help fund innovative exploration drilling within the Tabba Tabba lease

**Figure 5: RC drilling at Tabba Tabba**

# Corporate

## Appointment of CEO (post quarter)

Mr Lucas Dow was appointed as Managing Director and Chief Executive Officer on 3 July following his previous appointment as a Non-Executive Director in February 2024.

Lucas is a highly experienced mining executive with a proven track record of outstanding performance across a diverse range of businesses, commodities and geographies, skills which will facilitate Sayona's next stage of growth as a leading North American Lithium producer.

Lucas has led resources organisations at the Chief Executive Officer level and held executive and Non-Executive Director roles in both listed and unlisted entities. As a mining engineer with extensive hands-on operational experience in both the mining resources and the renewable energy sector, he is well versed in global resource trends and growth markets.

It is expected that previous Interim CEO, James Brown will remain as an Executive Director until 31 January 2025 to facilitate the hand over and business continuity after which he will return to a non-Executive Director role.

# Cash Balance

The balance of cash and cash equivalents at the end of the quarter was \$90.6 million, a \$8.3 million decrease over the equivalent balance of \$98.9 million at 31 March 2024.

## Major cash inflows for the quarter included:

- net receipts from customers of \$48.2 million from the sale of spodumene concentrate
- proceeds of \$14.7 million from sale of equity investments
- proceeds of \$7.5 million from joint venture partners; and
- proceeds of \$6.6 million from refund of deposits

## Major cash outflows for the quarter included:

- \$59.6 million on production expenditure;
- \$7.7 million on capital expenditure relating to the acquisition of plant and equipment at the Québec lithium projects;
- \$11.8 million on administration, corporate and payroll costs across all projects in Canada and Australia; and
- \$4.0 million on exploration and evaluation expenditure mainly relating to the Québec lithium projects.

---

Sale of equity investments realised \$15 million to strengthen the Group's balance sheet.

## Sayona Québec Joint Venture (SYQ) Cashflow

During the quarter, SYQ had receipts from customers of \$48 million and payments of operating costs of \$62 million, resulting in a net cash outflow from operating activities of \$14 million reflecting the continuing ramp-up of NAL operations. SYQ incurred lower capital expenditure of \$8 million as major capital projects approached completion, and exploration expenditure cash inflow of \$4 million, reflecting a reimbursement of flow through exploration expenditure. This resulted in a net cash outflow from investing activities of \$4 million. Equity contributions from joint venture partners totalled \$20 million for the quarter. The net increase in cash and cash equivalents for the SYQ joint venture was \$2 million.

## Group Cashflow

Outside of the SYQ joint venture, Sayona incurred payments of operating costs of \$3 million. Sayona (excluding SYQ) incurred exploration expenditure of \$8 million, primarily reflecting payments relating to flow through exploration expenditure. Sayona realised \$15 million from the sale of equity investments and made payments to the SYQ joint venture of \$15 million. Other net cash flows were an outflow of \$1 million. The net decrease in cash and cash equivalents for Sayona, excluding the SYQ joint venture, was \$10 million.

# Cash Flow

Figure 5: Sayona net cash flows for June 2024 Quarter

# Capital Structure

At 30 June 2024, the Company had the following capital structure:

- 10,293,296,014 ordinary fully paid shares; and
- 12,234,482 unquoted options expiring on various dates.

Announcement authorised for release by Mr Lucas Dow, Managing Director and CEO of Sayona Mining Limited.

The following information applies to this report:

1. All references to dollars and cents are Australian currency, unless otherwise stated.
2. Numbers presented may not add up precisely to the totals provided due to rounding.

The following abbreviations may have been used throughout this report: cost, insurance and freight (CIF); dry metric tonne (dmt); earnings before interest and tax (EBIT); earnings before interest, tax, depreciation and amortisation (EBITDA); free on board (FOB); life of mine (LOM); lithium carbonate ( $\text{Li}_2\text{CO}_3$ ); lithium hydroxide (LiOH); lithium oxide ( $\text{Li}_2\text{O}$ ); net present value (NPV); run of mine (ROM); thousand tonnes (kt); tonnes (t); and wet metric tonne (wmt).

## Forward-Looking Statements

This report may contain certain forward-looking statements. Such statements are only predictions, based on certain assumptions and involve known and unknown risks, uncertainties and other factors, many of which are beyond Sayona Mining Limited's control. Actual events or results may differ materially from the events or results expected or implied in any forward-looking statement. The inclusion of such statements should not be regarded as a representation, warranty or prediction with respect to the accuracy of the underlying assumptions or that any forward-looking statements will be or are likely to be fulfilled.

Sayona Mining Limited undertakes no obligation to update any forward-looking statement or other statement to reflect events or circumstances after the date of this report (subject to securities exchange disclosure requirements).

The information in this report does not take into account the objectives, financial situation or particular needs of any person. Nothing contained in this report constitutes investment, legal, tax or other advice.

## About Sayona Mining

Sayona Mining Limited is a North American lithium producer (ASX: SYA; OTCQB: SYAXF) with projects in Québec, Canada and Western Australia, Australia.

In Québec, Sayona's assets include North American Lithium, the Authier Lithium Project and its Tansim Lithium Project, which are supported by a strategic partnership with American lithium developer Piedmont Lithium Inc. Sayona also holds a 60% interest in the Moblan Lithium Project in northern Québec.

In Western Australia, Sayona holds a large tenement portfolio in the Pilbara region prospective for gold and lithium. The Company is exploring for Hemi-style gold targets in the world-class Pilbara region, while a portion of its key lithium projects are subject to a joint venture with Morella Corporation Limited.

For more information, please visit us at [sayonamining.com.au](http://sayonamining.com.au)

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and all material assumptions and technical parameters continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

<b>7. Financing facilities</b>	<b>Total facility amount at quarter end \$A'000</b>	<b>Amount drawn at quarter end \$A'000</b>
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	200,000	-
<b>7.4 Total financing facilities</b>	<b>200,000</b>	<b>-</b>
<b>7.5 Unused financing facilities available at quarter end</b>		<b>193,550</b>
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
<p>The Company entered into an At-the-Market Subscription Agreement (ATM) (previously referred to as a Controlled Placement Agreement (CPA)) with Acuity Capital on 29 October 2019. On 29 April 2021, the parties agreed to increase the ATM limit from \$3 million to a new limit of \$15 million and to extend the expiry date of the ATM to 31 July 2023. On 1 March 2022, the Company announced it had agreed to increase the ATM limit to a new limit of \$50 million.</p> <p>On 5 August 2022, the parties agreed to further increase the ATM limit to a new limit of \$200 million and to extend the expiry date of the ATM to 31 July 2025. To date, the Company has utilised the ATM to raise \$6.45 million. The remaining standby equity capital available under the ATM is \$193.55 million. The Company retains full control of all aspects of the placement process. There are no requirements on the Company to utilise the facility and it may terminate the Agreement at any time, without cost or penalty.</p>		

<b>8. Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1 Net cash from / (used in) operating activities (item 1.9)	(15,485)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(3,978)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(19,463)
8.4 Cash and cash equivalents at quarter end (item 4.6)	90,624
8.5 Unused finance facilities available at quarter end (item 7.5)	193,550
8.6 Total available funding (item 8.4 + item 8.5)	284,174
<b>8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	<b>14.6</b>
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*

### Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

25 July 2024

Date: .....

Paul Crawford – Company Secretary

Authorised by: .....  
(Name of body or officer authorising release – see note 4)

### Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
