

Drilling Completed at Beatty Park Sth

SUMMARY

- First-pass aircore drilling completed over the T1 gold target. 75 holes were completed over the T1 target on a 60m by 20m grid.
- T1 is located approximately 200m west of high-grade gold intersections previously reported from Tambourah's aircore drilling¹
 - **6m at 25.8g/t Au from 30m in BPAC016**
 - **10m at 38.9g/t Au from 22m in BPAC028**
- T1 is characterised by a 300m continuous gold-in-soil anomaly defined by ultrafine sampling and historic auger sampling, situated at the intersection of north and northwest-trending structures interpreted from SAM geophysical data².
- First assay results expected in 3-4 weeks.
- Drilling of the T2 gold target is planned.

Tambourah Metals Limited (**ASX:TMB**) advises that first-pass aircore drilling over the T1 gold target at the Beatty Park Sth prospect has been completed (see Figure 1). Beatty Park is situated 160km north of Meekatharra in Western Australia and forms part of Tambourah's 467km² Bryah Gold Project, located within a district containing multiple historic and current gold mining operations (see Figure 2).

The aircore program comprised 75 drill holes completed at a 20m hole spacing on traverses 60m apart. Drilling intersected silica-carbonate-altered and sheared ultramafic rocks consistent with previously observed hydrothermal alteration and deformation associated with the gold mineralised system.

Initial composite drill samples have been dispatched and first results are anticipated within the next three to four weeks.

About Tambourah Metals

Tambourah Metals is a West Australian exploration company established in 2020 to develop gold and critical mineral projects. Tambourah is exploring for Gold and Critical Minerals at the Tambourah, Shaw River and Speewah Nth projects and Gold at the Bryah project in the Murchison region. Since listing the Company has extended the portfolio to include additional critical mineral projects in the Pilbara and gold projects in the Bryah, acquiring strategic positions in districts with known endowment and production.

Forward Looking Statements

Certain statements in this document are or may be “forward-looking statements” and represent Tambourah’s intentions, projections, expectations, or beliefs concerning among other things, future exploration activities. The projections, estimates and beliefs contained in such forward-looking statements don’t necessarily involve known and unknown risks, uncertainties, and other factors, many of which are beyond the control of Tambourah Metals, and which may cause Tambourah Metals actual performance in future periods to differ materially from any express or implied estimates or projections. Nothing in this document is a promise or representation as to the future. Statements or assumptions in this document as to future matters may prove to be incorrect and differences may be material. Tambourah Metals does not make any representation or warranty as to the accuracy of such statements or assumptions.

The references in this announcement to Exploration Results were reported in accordance with Listing Rule 5.7 in the following announcements:

- *“High-Grade Gold up to 126g/t Au at Beatty Park Sth” 4th August 2025.*
- *“Exceptional Gold Results from Re-sampling Beatty Park Sth” 13th October 2025.*
- *“Expanded Gold Targets at Beatty Park Sth” 22nd January 2026.*
- *“Drilling to Commence Testing New Gold Targets at Beatty Park Sth” 29th January 2026.*

The Company confirms it is not aware of any new information or data that materially affects the information in the original reports and that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original reports.

Competent Person’s Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr. Bill Clayton, Geology Manager and a shareholder and Director of the Company, who is a Member of the Australian Institute of Geoscientists. Mr. Bill Clayton has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Clayton consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
