

Change of company name, ASX ticker and website

Trigg Minerals Limited (ASX: TMG, OTCQB: TMGLF) is pleased to announce that following shareholder approval at its Annual General Meeting (AGM) held on Friday, 28 November 2025, the Company intends to change its name, subject to registration by the Australian Securities and Investments Commission (ASIC), to **American Tungsten and Antimony Ltd.**

The Company's securities are expected to commence trading on the ASX under the new name and ASX code '**AT4**' from the commencement of trading on Monday, 15 December 2025.

In addition, the Company's new website can be found at www.ataa.com

Managing Director Andre Booyzen commented: "*The Company's name change to American Tungsten and Antimony reflects our new focus on US Critical Minerals and our progress in developing the Antimony Canyon Project in Utah, USA and Tennessee Mountain Tungsten Project in Nevada, USA.*

"The name change also reflects our strategic goal of becoming a leading, diversified critical minerals and defence metals company aligned with U.S. national security interests and U.S. federal government procurement objectives. Antimony and tungsten are both critical materials which have seen increased prices and interest in the past 12 months due to global market dynamics and geopolitics."

ENDS

The announcement was authorised for release by the Board of Trigg Minerals Limited.

ABOUT TRIGG MINERALS

Trigg Minerals Limited (ASX: TMG, OTCQB: TMGLF) is advancing critical mineral development in Tier-1 US jurisdictions, with a strategic vision to become a vertically integrated, conflict-free supplier to Western economies.

Its flagship Antimony Canyon Project in Utah, USA, is one of the country's largest and highest-grade undeveloped antimony systems historically mined but never subjected to modern exploration. The recently secured Tennessee Mountain Tungsten Project in Nevada further strengthens Trigg's position in critical minerals, adding scale and diversification within a Tier-1 jurisdiction.

With a proven leadership team, active government engagement, and smelter development underway, Trigg is strategically positioned to lead the resurgence of antimony and tungsten supply from reliable Western sources.
