The VG1 portfolio returned +6.1% in June,² with the long book contributing +5.9%, while the short book returned +0.2%.

Global equity markets continued their recovery in June, driven by tentative US trade agreements, investor optimism around US Fed rate cuts and resilient economic growth coupled with little evidence of any consumer spend slowdown. US-Iran military strikes were also paused.

Positive contributors to performance in June included the portfolio's technology exposures, particularly to the semiconductor sector via SK Hynix and TSMC (both players in the artificial intelligence hardware value chain), as well as our large cap technology holdings (Amazon and Meta).

The portfolio also delivered strong contributions from its exposure to the online gaming sector (via Entain and Flutter) as well as long positions with exposure to the copper and uranium markets. Long positions across the gold sector detracted from returns during June as share prices of various gold miners pulled back following strong price moves in recent months.

We fully exited our position in UK online property portal business Rightmove during June, as our thesis has played out and we now believe the valuation fully reflects the quality of the business. Pleasingly, the stock has been a strong performer for the portfolio.

The portfolio's short book also contributed positively during June despite the strong rally in equity markets, reiterating our belief that short selling is another tool we can actively use to generate performance while mitigating risks.

Buy-back: In June, approximately 0.8m VG1 shares were bought at an average price of \$1.68.

FY25 result: VG1 expects to release its FY25 result on Wednesday, 20 August.

¹ 'Post-Tax NTA' is calculated after tax on realised gains/losses, deferred tax assets and deferred tax liabilities, but before allowing for deferred tax liabilities/deferred tax assets on unrealised gains/losses. As at 30 June 2025, NTA after including deferred tax liabilities/deferred tax assets on unrealised gains/losses was \$2.11 per share, which includes \$0.05 per share of income tax losses available to the Company in future periods.

² Portfolio Return (Net) is shown after all applicable fees and expenses and is defined as the movement in pre-tax NTA, adjusting for payments owed to/from taxation authorities from earlier periods, plus dividends. All data has been adjusted for VGI's capital raising in 2019. Last 12 Months is the 12-month period ending on the last day of the month of the performance that is reported in this document ("Month End"). Dividend Yield refers to dividends that have been determined by VGI's Board where the ex-date occurred during the relevant Last 12 Months period and has been calculated using the Share Price at the Month End of this report. Past performance is not a reliable indicator of future performance.

³ Management estimate of funds under management ("FUM") for 31 March 2025. FUM (including 100% of Taurus Funds Management, Attunga Capital, Kilter Rural and Argyle Group) is rounded, unaudited and includes non-fee earning FUM but excludes non-fee earning commitments.

⁴ Based on VGI's closing share price of \$1.795 on 30 June 2025. Dividend yield of 9.6% assumes 100% franking.

⁵ Monthly returns are shown from October 2017 given VGI's inception of 28 September 2017. VGI's net portfolio return was approximately nil for its two trading days in September 2017.
