

## QUARTERLY ACTIVITIES REPORT – MARCH 2026

### Highlights

- **Bolt Cutter Central lithium discovery continues to expand**, with a mineralised footprint now defined over more than 2.3km and remaining open in multiple directions, expanding the known extents of the stacked LCT pegmatite system.
- **Strong, consistent high-grade lithium intercepts returned from diamond drilling at Bolt Cutter Central**, reinforcing the scale and quality of the discovery with recent metallurgical holes intercepting coarse-grained spodumene mineralisation. Standout results for the quarter include:
  - **BCMT001**
    - 9.4m @ 1.3% Li<sub>2</sub>O from 23.2m (est. true width)
    - 8.1m @ 1.2% Li<sub>2</sub>O from 39.7m (est. true width)
  - **BCMT002**
    - 8.1m @ 1.0% Li<sub>2</sub>O from 34.1m (est. true width)
  - **BCMT003**
    - 7.6m @ 1.4% Li<sub>2</sub>O from 32.1m (est. true width)
    - 4.1m @ 1.1% Li<sub>2</sub>O from 82.8m (est. true width)
- **Definitive Feasibility Study (DFS) for the Tabba Tabba Project well advanced** across key workstreams.
- **Cash at bank of \$43.3M at 31 March 2026.**

Lithium developer and explorer Wildcat Resources Limited (ASX: WC8) (“Wildcat”, “WC8” or “the Company”) is pleased to present its Activities Report and Appendix 5B for the period to 31 March 2026.

During the quarter, Wildcat Resources advanced its Pilbara lithium portfolio through continued exploration success and development progress. Drilling at the Bolt Cutter Central lithium discovery, 10km west of Tabba Tabba, further expanded a large, stacked spodumene-bearing pegmatite system that remains open. At Tabba Tabba, the Definitive Feasibility Study is progressing well across all workstreams, focussing on advancing approvals and early works activities while undertaking key technical studies to support project development.

The Tabba Tabba Project has a spodumene-dominant Mineral Resource of 74.1Mt at 1.0% Li<sub>2</sub>O (at a 0.45% Li<sub>2</sub>O cut-off grade) and a tantalum Mineral Resource of 1.2Mt at 482ppm Ta<sub>2</sub>O<sub>5</sub><sup>1</sup>. The project is located on granted Mining Leases just 80km from Port Hedland, Western Australia. It is nearby some of the world's largest hard-rock lithium mines (47km by road from the 446Mt Pilgangoora Project<sup>2</sup> and 87km by road to the 259Mt Wodgina Project<sup>3</sup>).

The Bolt Cutter Central lithium discovery, ~10km west of Tabba Tabba, is an early-stage lithium exploration project where 2025 drilling discovered the Harry and Hermione pegmatite swarms. Work is ongoing to grow the mineralised footprint, define further targets and deliver a JORC resource.

<sup>3</sup> MIN ASX announcement 23 October 2018: <http://clients3.weblink.com.au/pdf/MIN/02037855.pdf>

## Exploration and Development Activities

### Bolt Cutter Central Lithium Discovery – Pilbara, Western Australia<sup>4,5</sup>

During the period, Wildcat Resources continued to advance exploration at its Bolt Cutter Central lithium discovery, located ~10km west of the Tabbata Tabbata Project in the Pilbara, with drilling confirming significant scale and continuity of mineralisation.

Diamond drilling for exploration and metallurgical purposes completed during the quarter intersected interpreted spodumene mineralisation adding to the previous intersections of the stacked pegmatite system that remains open in multiple directions and at depth. Metallurgical testwork has commenced, with early observations indicating coarse spodumene crystals and potential suitability for conventional processing pathways.

Subsequent extensional drilling has further expanded the footprint of mineralisation, with a new drill line extending interpreted spodumene mineralisation approximately 300m to the north (Figure 1). The Bolt Cutter Central system is now defined over more than 2.3km along strike to the northwest and up to 800m to the northeast, highlighting the scale of the discovery.

**Figure 1 Top (A):** Core from BCDD004 from 76.54 to 76.87m in natural light. Elongate white crystals are interpreted as spodumene. **Bottom (B)** The same core exposed to UV light confirming the elongate crystals fluoresce at a wavelength typical of spodumene (orange).

**Cautionary note:** In relation to the disclosure of visual mineralisation, the Company cautions that visual estimates of mineralogy or material abundance should never be considered a proxy or substitute for laboratory analysis. Laboratory assay results are required to determine the widths, mineralogy, and grade of the visible mineralisation reported

<sup>4</sup> WC8 ASX announcement 11 February 2026: <https://wsecure.weblink.com.au/clients/wildcatresources/headline.aspx?headlineid=61311507>

<sup>5</sup> WC8 ASX announcement 7 April 2026: <https://wsecure.weblink.com.au/clients/wildcatresources/headline.aspx?headlineid=61319332>

Multiple holes drilled during the quarter returned high-grade lithium intersections, including:

- **BCMT001**
  - 9.4m @ 1.3% Li<sub>2</sub>O from 23.2m (est. true width)
  - 8.1m @ 1.2% Li<sub>2</sub>O from 39.7m (est. true width)
  - 2.3m @ 1.6% Li<sub>2</sub>O from 51.7m (est. true width)
  - 4.8m @ 1.2% Li<sub>2</sub>O from 153.9m (est. true width)
  - 2.6m @ 1.3% Li<sub>2</sub>O from 179.0m (est. true width)
- **BCMT002**
  - 8.1m @ 1.0% Li<sub>2</sub>O from 34.1m (est. true width)
- **BCMT003**
  - 7.6m @ 1.4% Li<sub>2</sub>O from 32.1m (est. true width)
  - 4.1m @ 1.1% Li<sub>2</sub>O from 82.8m (est. true width)

The pegmatite swarm is extensive, with geological logging indicating potential for additional mineralised bodies both along strike and at depth. Ongoing work is focused on defining the extent of mineralisation and supporting resource estimation.

An airborne magnetic survey was acquired over the Bolt Cutter Central area and surrounding host granodiorite complex. Technical analysis is currently underway, with high-resolution data expected to enhance structural interpretation of the area and inform future surface exploration and drill targeting both within and beyond the currently defined mineralised footprint.

Planned activities include extensional and infill RC drilling to support geological and resource modelling, continued metallurgical testwork, and first-pass exploration on the adjacent E45/5416 tenement. Environmental studies and early-stage development activities, including preparation of a Mining Lease application, are also underway.

### **Tabba Tabba Project – Pilbara, Western Australia**

A Definitive Feasibility Study (DFS) for Tabba Tabba continues to progress across all key workstreams, with core project frameworks, engineering design and supporting studies advancing in line with the schedule. Project management systems and logistics planning are being established to support future development phases, while tenure and approvals processes are being actively progressed.

Preliminary mine planning and engineering activities indicate alignment with prior assumptions from the PFS. Mine phasing optimisation and financial analysis work is progressing for open pit and underground to provide flexibility for different production options under consideration.

Metallurgical testwork and process design development are delivering encouraging outcomes, supporting confidence in processing pathways.

Infrastructure design is well advanced, including major site facilities and supporting services, with early-stage layouts and engineering underway. Personnel from key engineering design firms for the process plant and non-process infrastructure attended site to inspect proposed site locations. Early works programs are progressing successfully and are providing positive indications for future operations.

Environmental baseline studies and approvals documentation are advancing. The initial stage of water

bore drilling including monitoring bores at Tabba Tabba is nearing completion to support environmental and hydrogeological studies and to support future operations.

### Bolt Cutter Project – Mallina Basin, Pilbara, WA

The Bolt Cutter Project is a large package of exploration tenements and applications. It encompasses the Tabba Tabba and Bolt Cutter Central projects and traverses the Mallina Basin District in the East and West Pilbara terranes (Figure 2). Bolt Cutter is prospective for lithium mineralised pegmatites, gold mineralisation and volcanogenic massive sulphide deposits. Significantly, much of the tenure is located proximal to the prolific Split Rock Supersuite granitoid rocks (these are thought to be a key component in the formation of LCT pegmatites in the Pilbara District).

The Company's geologists continue to systematically evaluate its Bolt Cutter tenure and undertake field reconnaissance, mapping work, geophysical surveys, geochemical sampling and prospectivity analysis. Land access is continually being progressed for key targets to maintain exploration momentum.

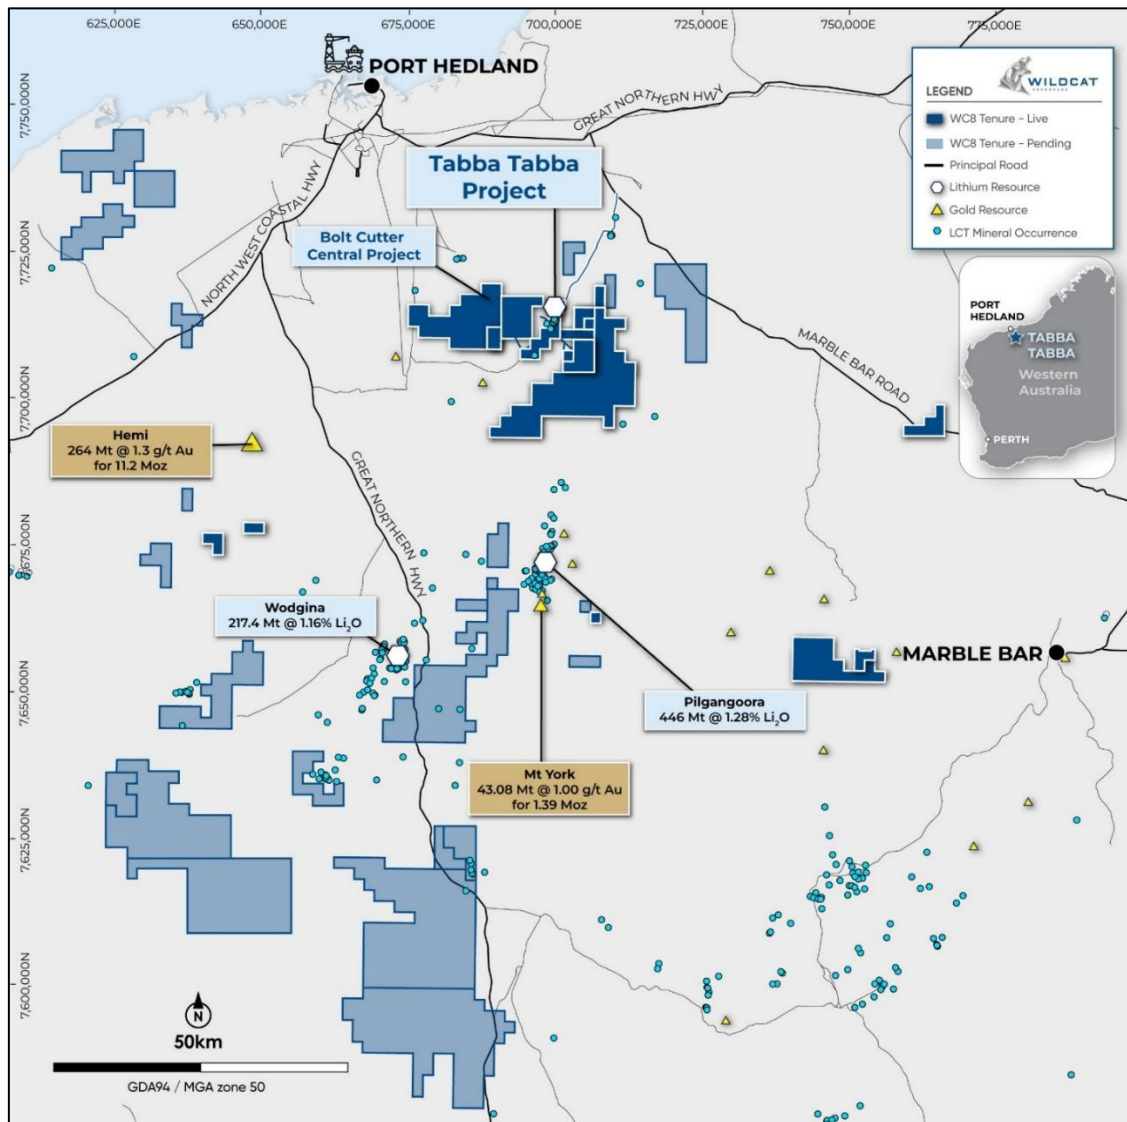

Figure 2: Location of Tabba Tabba and the surrounding exploration tenements at quarter end. Pending Miscellaneous Leases or second-in-time applications are not displayed. Details of tenure changes can be found in Appendix 1.

## Other Exploration activities

Work is ongoing at several regional projects with prospecting, surface geochemical sampling and geophysical surveys completed. Land access negotiations are progressing to obtain authority to progress exploration of the high-ranking targets.

The Company continued project generation activities including tenement monitoring and submitting new applications (see Appendix 1).

## Corporate Activities

### Cashflows for the Quarter

As at 31 March 2026, Wildcat maintained a strong cash position of approximately **\$43.3M**.

During the quarter, total cash outflows comprised **\$2.3M** for exploration and evaluation activities, **\$1.9M** for project studies, approvals, community engagement and administration.

Cash inflows during the quarter included **A\$0.5M** in interest income.

Related party payments for the quarter totalled **\$0.3M** (Appendix 5B section 6.1). This includes amounts paid to directors including director fees and statutory superannuation.

Attached to this report is **Appendix 5B**, which provides the Company's detailed cashflow statement for the quarter.

## Activities for the June Quarter

For the three months ending 30 June 2026, the Company plans to:

- Continue exploration diamond and RC drilling at the Bolt Cutter Central lithium discovery to:
  - Determine the extents of the Bolt Cutter Central pegmatite swarms
  - Infill known mineralisation to aid resource estimation
  - Explore the potential of the system extending east into E45/5416
- Progress the DFS at Tabba Tabba
- Progress statutory approvals
- Progress heritage surveys
- Continue regional exploration.

## March 2026 Quarter – ASX Announcements

This Quarterly Activities Report contains information extracted from ASX market announcements reported in accordance with the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (2012 JORC Code). Further details (including 2012 JORC Code reporting tables where applicable) of exploration results referred to in this Quarterly Activities Report can be found in the following announcements lodged on the ASX:

Title	Date
WILDCAT INTERCEPTS SPODUMENE IN ALL HOLES AT BOLT CUTTER	11 February 2026
BOLT CUTTER CENTRAL LITHIUM DISCOVERY EXTENDS TO 2.3KM	7 April 2026

The announcements can be viewed on the Company's website [www.wildcatresources.com.au](http://www.wildcatresources.com.au) under the Investors tab.

Wildcat confirms that it is not aware of any new information or data that materially affects the information included in any original ASX announcement.

## ASX Listing Rule Information

### About Tabba Tabba

The Tabba Tabba Project has a spodumene-dominant Mineral Resource informed by more than 115,000m of drilling (44% diamond drill core and 56% RC drill core) of 74.1Mt at 1.0% Li<sub>2</sub>O (at a 0.45% Li<sub>2</sub>O cut-off grade) and a tantalum Mineral Resource of 1.2Mt at 482ppm Ta<sub>2</sub>O<sub>5</sub> (at a 200ppm Ta<sub>2</sub>O<sub>5</sub> cut-off grade)<sup>6</sup> containing 1,277,300lbs of Ta<sub>2</sub>O<sub>5</sub> (Table 1 and Table 2). Mineralisation outcrops at surface and the extensive pegmatite system is more than 3km long, with potential for further discovery at depth. In July 2024<sup>7</sup> the Company announced stage 1 metallurgical flotation test results of 79% to 84% at head grades of 1.0% to 1.4% Li<sub>2</sub>O to produce a 5.5% Li<sub>2</sub>O concentrate with low iron and no deleterious elements. 94% of the 2024 Mineral Resource estimate (MRE) is in the high confidence Indicated category, and 63% of the resource is contained within the giant Leia Pegmatite, which is up to 180m true width.

**Table 1 – Tabba Tabba Lithium MRE as at 28 November 2024 (using 0.45% Li<sub>2</sub>O cut-off).**

Category	Tonnes (Mt)	Li <sub>2</sub> O (%)	Ta <sub>2</sub> O <sub>5</sub> (ppm)	Fe <sub>2</sub> O <sub>3</sub> (%)	Li <sub>2</sub> O (T)	Ta <sub>2</sub> O <sub>5</sub> (lb)
<b>Indicated</b>	70.0	1.01	53	0.64	709,100	9,948,600
<b>Inferred</b>	4.1	0.76	65	0.88	31,100	724,700
<b>Total</b>	<b>74.1</b>	<b>1.00</b>	<b>54</b>	<b>0.65</b>	<b>740,200</b>	<b>10,673,300</b>

**Note:** Reported above a Li<sub>2</sub>O cut-off grade of 0.45%. Appropriate rounding applied. Wildcat announced the Tabba Tabba Lithium Project JORC (2012) Mineral Resource estimate reported in Table 3 on 28 November 2024<sup>8</sup>

**Table 2 – Tabba Tabba Tantalum MRE as at 27 November 2024 (using a 200ppm Ta<sub>2</sub>O<sub>5</sub> cut-off).**

Category	Tonnes (Mt)	Li <sub>2</sub> O (%)	Ta <sub>2</sub> O <sub>5</sub> (ppm)	Fe <sub>2</sub> O <sub>3</sub> (%)	Li <sub>2</sub> O (T)	Ta <sub>2</sub> O <sub>5</sub> (lb)
<b>Indicated</b>	1.19	0.09	482	0.74	1,073	1,267,600
<b>Inferred</b>	0.01	0.05	445	2.50	5	9,700
<b>Total</b>	<b>1.20</b>	<b>0.09</b>	<b>482</b>	<b>0.76</b>	<b>1,078</b>	<b>1,277,300</b>

**Note:** Reported above a Ta<sub>2</sub>O<sub>5</sub> cut-off grade of 200ppm Ta<sub>2</sub>O<sub>5</sub>. Appropriate rounding applied. Only the Tabba Tabba Pegmatite domain contributes to the Tabba Tabba Tantalum Resource. All other domains are excluded. A 2012 JORC compliant tantalum Mineral Resource estimate for the Tabba Tabba Project was announced by Pilbara Minerals in January 2015<sup>9</sup> comprising a combined measured, indicated and inferred resource of 318.1Kt at 950ppm Ta<sub>2</sub>O<sub>5</sub> for 666,200lbs of contained Ta<sub>2</sub>O<sub>5</sub> at a 400ppm Ta<sub>2</sub>O<sub>5</sub> lower cut-off grade and 6,000ppm Ta<sub>2</sub>O<sub>5</sub> upper cut off grade. Wildcat announced the updated Tabba Tabba Tantalum JORC (2012) Mineral Resource estimate reported in Table 4 on 28 November 2024<sup>10</sup>.

Tabba Tabba is an advanced lithium and tantalum exploration and development project that is located on granted Mining Leases just 80km from the Port of Hedland, Western Australia. It is nearby some of the world's largest hard-rock lithium mines (47km by road from the 446Mt Pilgangoora Project<sup>11</sup> and 87km by road to the 259Mt Wodgina Project<sup>12</sup>).

The Tabba Tabba Project was one of four significant LCT pegmatite projects in WA, previously owned by Sons of Gwalia. The others were Greenbushes, Pilgangoora and Wodgina which are now Tier-1 hard-rock

<sup>12</sup> MIN ASX announcement 23 October 2018: <http://clients3.weblink.com.au/pdf/MIN/02037855.pdf>

lithium mines. Tabba Tabba is the last of these assets to be explored for lithium mineralisation.

In July 2023, Wildcat commenced an RC drilling program to systematically explore the Tabba Tabba mining tenement package for lithium mineralisation<sup>13</sup>. A major lithium discovery was announced by the Company on 18 September 2023<sup>14</sup> after assay results confirmed thick intersections of lithium mineralised pegmatites were returned from multiple RC holes in the central and northern pegmatite clusters. On 12 October 2023, Wildcat announced it has successfully completed the acquisition of the Project.

In July 2025 the Company announced a positive and robust PFS for the Tabba Tabba Project outlining potential for a 17 year mine life based on a Maiden Probable Ore Reserve of 46.3Mt at 1.0% Li<sub>2</sub>O using broker consensus SC6.0 pricing of USD \$1,384/t FOB (Table 3). At \$1,384/t FOB, the PFS projects the project to generate a post-tax NPV(8%) of \$1.2Bn at a post-tax IRR of 22.9% with \$443M CAPEX with a post-tax payback period of 5.4 years.

**Table 3 – Tabba Tabba Lithium Maiden Ore Reserve of 46.3Mt at 0.99%**

Source	Classification	Tonnes (Mt)	Li <sub>2</sub> O grade (%)	Ta <sub>2</sub> O <sub>5</sub> (ppm)	Fe <sub>2</sub> O <sub>3</sub> (%)	Li <sub>2</sub> O (kt)
Open pit	Proved	-	-	-	-	-
	Probable	36.8	1.00	62.4	1.06	366
Underground	Proved	-	-	-	-	-
	Probable	9.5	0.94	51.9	0.86	90
<b>Total</b>	<b>Probable</b>	<b>46.3</b>	<b>0.99</b>	<b>60.2</b>	<b>1.02</b>	<b>456</b>

*Note: The Ore Reserve is based on the November 2024 Mineral Resource Estimate (MRE) (Table 1), but does not include the Chewy, Han or Hutt pegmatites, which collectively account for approximately 15% of the MRE.*

The pegmatites at Tabba Tabba are often thick and shallow dipping. This bodes well for the economics of an eventual mining project. Some of the true width intercepts received to date from throughout the project include:

- **105.3m at 1.1% Li<sub>2</sub>O** from 213.7m (TARC259AD), including **43.4m @ 1.4% Li<sub>2</sub>O** from 239.0m;
- **84.8m at 1.3% Li<sub>2</sub>O** from 251.4m (TADD020), including **53.6m @ 1.5% Li<sub>2</sub>O** from 251.4m;
- **54.9m at 1.0% Li<sub>2</sub>O** from 220.0m (TARC230D), including **31.9m @ 1.5% Li<sub>2</sub>O** from 250.0m;
- **84.0m at 1.4% Li<sub>2</sub>O** from 236.0m (TADD051), including **44.0m @ 1.9% Li<sub>2</sub>O** from 268.0m
- **89.8m at 1.2% Li<sub>2</sub>O** from 260.0m (TADD047), including **21.7m @ 2.1% Li<sub>2</sub>O** from 291.3m
- **70.0m at 1.1% Li<sub>2</sub>O** from 265.0m (TADD021), including **41.0m @ 1.3% Li<sub>2</sub>O** from 278.0m;
- **54.9m at 1.1% Li<sub>2</sub>O** from 262.7m (TARC277AD), including **39.1m @ 1.5% Li<sub>2</sub>O** from 264.0m;
- **67.0m at 1.1% Li<sub>2</sub>O** from 351.0m (TARC265D);
- **45.0m at 1.3% Li<sub>2</sub>O** from 164.0m (TARC236), including **29.0m @ 1.4% Li<sub>2</sub>O** from 180.0m;
- **68.0m at 1.4% Li<sub>2</sub>O** from 337m (TADD015, including **50m @ 1.5% Li<sub>2</sub>O** from 338m;
- **58.7m at 1.3% Li<sub>2</sub>O** from 333.1m (TADD011), including **11.8m @ 2.3% Li<sub>2</sub>O** from 362.2m;
- **43.0m at 1.4% Li<sub>2</sub>O** from 316.0m (TAARC348D), and **43.4m @ 1.1% Li<sub>2</sub>O** from 412.0m;
- **54.4m at 1.2% Li<sub>2</sub>O** from 267.9m (TADD030), and **25.0m @ 1.2% Li<sub>2</sub>O** from 363.9;
- **44.0m at 1.1% Li<sub>2</sub>O** from 189.0m (TARC353), including **31.0m @ 1.5% Li<sub>2</sub>O** from 189.0m;

<sup>13</sup> WC8 ASX announcement 14 July 2023: <https://www.investi.com.au/api/announcements/wc8/0d6e63aa-fbc.pdf>

<sup>14</sup> WC8 ASX announcement 18 September 2023: <https://www.investi.com.au/api/announcements/wc8/bd9e13dc-76f.pdf>

- **26.6m at 1.5% Li<sub>2</sub>O** from 305.5m (TARC346D);
- **135m at 0.9% Li<sub>2</sub>O** from 179m (TARC234D), including **99m @ 1.2% Li<sub>2</sub>O** from 207m;
- **123.4m at 0.9% Li<sub>2</sub>O** from 350.7m (TARC245D), including **69.9m @ 1.2% Li<sub>2</sub>O** from 399m;
- **111.4m at 0.9% Li<sub>2</sub>O** from 246.6m (TARC161AD), including **60.3m at 1.4% Li<sub>2</sub>O** from 297.8m;
- **94m at 1.0% Li<sub>2</sub>O** from 206m (TARC154AD), including **64.4m @ 1.3% Li<sub>2</sub>O** from 225m;
- **94.8m at 0.9% Li<sub>2</sub>O** from 361.9m (TARC264D), including **44.7m at 1.3% Li<sub>2</sub>O** from 406.3m.
- **180m at 1.1% Li<sub>2</sub>O** from 206m (TARC148);
- **39m at 1.4% Li<sub>2</sub>O** from 271m (TARC147);
- **73m at 1.1% Li<sub>2</sub>O** from 266m (TARC246), including **10m at 2% Li<sub>2</sub>O** from 328m;
- **70m at 1.0% Li<sub>2</sub>O** from 183m (TARC145), including **47m at 1.5% Li<sub>2</sub>O** from 183m;
- **85m at 1.3% Li<sub>2</sub>O** from 167m (TARC144), including **10m at 2.5% Li<sub>2</sub>O** from 175m; and
- **85m at 1.5% Li<sub>2</sub>O** from 133m (TARC128), including **9m at 3.0% Li<sub>2</sub>O** from 199m.

The Project has favourable attributes which position it well for near-term development and as such, the Company has continued to aggressively advance the project through permitting and studies processes, with much of the DFS work already completed.

### About Bolt Cutter

Wildcat's Bolt Cutter Lithium Project is considered highly prospective for lithium and gold mineralisation. The tenements are located in positions proximal to the Split Rocks Supersuite granitoid complex (considered a fertile source of LCT-type pegmatites) and on regional structures along strike from the 446Mt Pilgangoora<sup>15</sup> and 259Mt Wodgina<sup>16</sup> lithium projects; and in strategic positions on the Berghaus Shear along trend from the 6.8Moz Hemi gold deposit discovered by De Grey Mining (ASX: DEG) now being developed by Northern Star Resources (ASX:NST). Wildcat continues to advance early-stage exploration across its Bolt Cutter landholding.

### About Bolt Cutter Central lithium discovery

The Bolt Cutter Central lithium discovery is located ~10km to the west of the Tabbatabba Project. It is an early-stage greenfields exploration project with lithium mineralisation associated with swarms of lithium-caesium-tantalum (LCT) pegmatite dykes hosted in a granodiorite unit and remains open in most directions. Maiden reconnaissance RC drilling commenced in July 2025, leading to the discovery of the Harry and Hermione Pegmatite Swarms. The tenement package was bolstered by a tenement acquisition concluding in August 2025 by the acquisition of the full rights to the adjacent tenement E45/5416, located only 2.3km from the Tabbatabba Project and along strike from the open eastern extensions of the Bolt Cutter Central pegmatite system. Exploration is ongoing to define further exploration targets and mineralised zones.

### About Mt Adrah

Mt Adrah is a highly prospective 493km<sup>2</sup> tenement package located within the well-endowed Lachlan Orogen region in NSW and straddling the Gilmore Suture Zone (associated with mineralisation at numerous large mines including Cowal gold deposit: >11Moz Au<sup>17</sup>; Temora copper-gold deposit: 2.2Moz Au & 728kt

Cu<sup>18</sup>; and the Cobar goldfields). The project includes the Hobbs Pipe gold deposit which has a JORC (2012) Mineral Resource Estimate of **20.5Mt @ 1.1g/t Au for 770,000 oz** of contained gold (**Table 4**).

Hobbs Pipe is a monzodiorite-hosted intrusion-related gold deposit (IRGS) with similarities to the IRGS gold systems that occur in the Alaskan Tintina Province, which includes the 16Moz Fort Knox Gold Mine. Since acquiring the Mt Adrah Project, Wildcat has confirmed that alteration and mineralisation associated with an intrusive complex extends for more than 1km away from Hobbs Pipe and includes numerous reduced monzodiorite dykes within a gold, arsenic and antimony rich exoskarn. In addition to Hobbs Pipe, the complex hosts several high-grade gold reefs that have been identified by historic artisanal workings and exploration drilling

**Table 4: JORC (2012) Mineral Resources estimate for the Hobbs Pipe Gold Deposit**

Resource Classification	Depth Below Surface	Oxidation Zone	COG Au (g/t)	Tonnes (Mt)	Grade (g/t Au)	Contained Gold (oz)
<b>Indicated</b>	0 – 150m	Oxides	0.4	0.6	0.9	18,000
		Fresh	0.9	3.0	1.0	96,000
	150 – 700m	Fresh	0.9	8.5	1.2	320,000
	<b>Total Indicated Resources</b>			<b>12.1</b>	<b>1.1</b>	<b>440,000</b>
<b>Inferred</b>	0 – 150m	Fresh	0.5	0.2	0.6	39,000
	150 – 700m	Fresh	0.9	8.2	1.1	290,000
	<b>Total Inferred Resources</b>			<b>8.4</b>	<b>1.1</b>	<b>330,000</b>
<b>TOTAL RESOURCES</b>				<b>20.5</b>	<b>1.1</b>	<b>770,000</b>

**Note:** The Hobbs Pipe Mineral Resource was first reported in an announcement by former Mt Adrah owners Sovereign Gold Company Ltd (ASX Announcement 27 December 2013<sup>19</sup>) and affirmed by Wildcat when it acquired Mt Adrah as Fraser Range Metals Ltd on 23 August 2019<sup>20</sup>. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the original market announcements continue to apply and have not materially changed. The company confirms that the form and context in which the competent persons findings were made have not been materially modified from the original announcement.

### Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Wildcat Resources Limited's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may", "potential," "should," and similar expressions are forward-looking statements. Although Wildcat Resources Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

## Competent Person's Statement

The information in this report that relates to Exploration Results and Mineral Resources is based on, and fairly represents, information compiled by Sam Hoppe, a Competent Person who is a Member of the Australian Institute of Geoscientists (AIG). Mr Hoppe is a full-time employee of Wildcat Resources Limited. Mr Hoppe has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Hoppe consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

## Appendix 5B

### Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name of entity

Wildcat Resources Limited

ABN

65 098 236 938

Quarter ended ("current quarter")

31 March 2026

Consolidated statement of cash flows	Current quarter \$A'000	Year to date (9 months) \$A'000
<b>1. Cash flows from operating activities</b>		
1.1 Receipts from customers		
1.2 Payments for		
(a) exploration & evaluation	-	-
(b) development	-	-
(c) production	-	-
(d) staff costs	(555)	(1,966)
(e) administration and corporate costs	(767)	(2,236)
1.3 Dividends received (see note 3)	-	-
1.4 Interest received	493	1,611
1.5 Interest and other costs of finance paid	(5)	(22)
1.6 Income taxes paid	-	-
1.7 Government grants and tax incentives	53	1,717
1.8 Other	-	(379)
<b>1.9 Net cash from / (used in) operating activities</b>	<b>(781)</b>	<b>(1,275)</b>
<b>2. Cash flows from investing activities</b>		
2.1 Payments to acquire or for:		
(a) entities	-	-
(b) tenements	-	(5)
(c) property, plant and equipment	(259)	(390)
(d) exploration & evaluation	(2,281)	(6,465)
(e) investments	-	-
(f) other non-current assets	-	-
2.2 Proceeds from the disposal of:		
(a) entities	-	-
(b) tenements	-	-

<b>Consolidated statement of cash flows</b>	<b>Current quarter \$A'000</b>	<b>Year to date (9 months) \$A'000</b>
(c) property, plant and equipment	-	-
(d) investments	-	-
(e) other non-current assets	-	-
2.3 Cash flows from loans to other entities	-	-
2.4 Dividends received (see note 3)	-	-
2.5 Other (Project Studies)	(1,858)	(4,323)
<b>2.6 Net cash from / (used in) investing activities</b>	<b>(4,398)</b>	<b>(11,183)</b>

<b>3. Cash flows from financing activities</b>		
3.1 Proceeds from issues of equity securities (excluding convertible debt securities)	-	-
3.2 Proceeds from issue of convertible debt securities	-	-
3.3 Proceeds from exercise of options	-	750
3.4 Transaction costs related to issues of equity securities or convertible debt securities	(18)	(28)
3.5 Proceeds from borrowings	-	-
3.6 Repayment of borrowings	-	-
3.7 Transaction costs related to loans and borrowings	-	-
3.8 Dividends paid	-	-
3.9 Other (provide details if material) – Lease principal	(20)	(75)
<b>3.10 Net cash from / (used in) financing activities</b>	<b>(38)</b>	<b>647</b>

<b>4. Net increase / (decrease) in cash and cash equivalents for the period</b>		
4.1 Cash and cash equivalents at beginning of period	48,495	55,089
4.2 Net cash from / (used in) operating activities (item 1.9 above)	(781)	(1,275)
4.3 Net cash from / (used in) investing activities (item 2.6 above)	(4,398)	(11,183)
4.4 Net cash from / (used in) financing activities (item 3.10 above)	(38)	647

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
<b>4.6</b>	<b>Cash and cash equivalents at end of period</b>	<b>43,278</b>	<b>43,278</b>

5. Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts		Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	1,268	3,485
5.2	Call deposits	42,010	45,010
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
<b>5.5</b>	<b>Cash and cash equivalents at end of quarter (should equal item 4.6 above)</b>	<b>43,278</b>	<b>48,495</b>

6. Payments to related parties of the entity and their associates		Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	(257)
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

*Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.*

7. Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	<b>Total financing facilities</b>	-	-
7.5	<b>Unused financing facilities available at quarter end</b>		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

<b>8. Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1 Net cash from / (used in) operating activities (item 1.9)	(781)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(2,281)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(3,062)
8.4 Cash and cash equivalents at quarter end (item 4.6)	43,278
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	43,278
<b>8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	<b>14</b>
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

## Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: ....15 April 2026.....

Authorised by: ..Board of Directors.....  
(Name of body or officer authorising release – see note 4)

---

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
