ASX RELEASE | 5 June 2023

Operational Update on James Bay Work Program

SUMMARY

- At the request of the Province of Quebec the Company has ceased field exploration activities due to a very high danger of forest fires.
- The Company has ceased drilling and field activities but will continue with core processing from completed drill holes.
- The Company will provide further updates as they become available.

Lithium exploration and development company Winsome Resources (ASX:WR1; "Winsome" or "the Company") announces it has been requested by the Province of Quebec to cease its field exploration activities until further notice due to the risk of forest fires. The Company has ceased drilling and its summer field activities in accordance with the directive from the government of Quebec.

The Company will continue to process previously drilled core for shipment to Val d'Or for analysis.

The Company will continue to monitor the situation to secure the safety of its personnel and will ensure it complies with respective government directives.

This announcement is authorised for release by the Board of Winsome Resources Limited.

ABOUT WINSOME RESOURCES

Winsome Resources (ASX: WR1) is a Perth-based, lithium focused exploration and development company with five project areas in Quebec, Canada. Three of Winsome's projects – Cancet, Adina and Sirmac-Clappier are 100% owned by the Company. The Company also has exclusive option agreements to acquire and explore 669 claims totalling 385km² in Decelles and a further 259 claims totalling 149km² at Mazerac, located near the Quebec mining town of Val-d'Ór. Recently the Company acquired a further 47km² of claims at the Tilly Project, located near Adina.

The most advanced of Winsome's projects - Cancet and Adina, provide shallow, high grade lithium deposits and are strategically located close to established infrastructure and supply chains.

In addition to its impressive portfolio of lithium projects in Quebec, Winsome Resources owns 100% of the offtake rights for lithium, cesium and tantalum from Power Metals Corp (TSXV:PWM) Case Lake Project in Eastern Ontario, as well as a 10% equity stake in PWM.

Winsome is led by a highly qualified team with strong experience in lithium exploration and development as well as leading ASX listed companies.
