ASX headline: National Trial awarded to Operator XR

xReality Group Limited (ASX: XRG)

ACN 154 103 607

ASX Release

Sydney, Australia – 27 March 2023

Operator XR selected for National Trial of Policing Law Enforcement System

- Operator XR has been awarded a national trial of its Law Enforcement System.
- The paid trial will run for up to 6 months, where Operator XR will work very closely with an undisclosed foreign National Police Force.

xReality Group Limited (XRG)

XRG is pleased to announce that it has been selected as a technology and expertise supplier for a funded National trial of its Law Enforcement system. The trial aims to assess and capture the effectiveness of Virtual Reality Simulation Based Training (VRSBT), as an enhancement program to assist in the uplift of frontline safety for police.

The trial is an informative pre-cursor activity to potential future multi-year programs dedicated to initiatives and investments into frontline safety for police.

Operator's Virtual Reality System for Law Enforcement allows Police and Law Enforcement agencies to train their operational tactics and procedures using a highly portable, easy to use and incredibly realistic Virtual Reality system that does not require internet, is highly secure and easily configurable.

Virtual Reality based training with OperatorXR technology offers a low cost, and lower risk alternative to traditional training approaches, reduces demand on staffing resources and at the same time increases trainee and officer throughput, higher levels of training repeatability, facilitates simpler and easier access to training at any time, in any location.

The trial will immerse police into highly personalised scenarios while allowing officers to work together simultaneously in Virtual Reality; where they can see and interact with each other while being monitored and observed by instructors.

Importantly, the system allows officers to bring their own policing equipment into Virtual Reality, thereby conducting extremely realistic training, using non-lethal and if required, lethal force, in a safe manner with their actual equipment.

The system software has been developed from the ground up by Operator XR, using the latest innovations in Virtual Reality technology, coupled with significant experience in design, scaled software platforms and integration of real-world devices.

Operator XR continues to see a significant increase in Global demand from Police, Military and Government agencies for its Virtual Reality System, and the unique differentiators being acknowledged, above that of the competition and the market expectation, including system portability, security, off-internet operation, integration of actual policing equipment and ease of configuration.

XREALITY GROUP LIMITED

XRG continues to conduct numerous product demonstrations across the northern and southern hemispheres, with many being invitations extended from agencies and Governments directly.

Wayne Jones, CEO, XRG, said “The decision to award this National trial to XRG further confirms the quality and effectiveness of the technology. We are currently experiencing a high level of demand from around the world from both military and law enforcement agencies. We look forward to seeing the positive impact our technology can make on improving the safety and preparedness of those men and women on the frontline”.
