Market Update

RBA forecasts three years of record low 0.1% cash rate

OFFICIAL RBA CASH RATE EXPECTATIONS – EVEN LOWER FOR LONGER

“Given the outlook, the Board is not expecting to increase the cash rate for at least three years.”

Monetary Policy Decision 3 November 2020.

Yields on all asset classes have fallen

BUT NOTE THE RECENT INCREASE

Source: Plato, RBA, Bloomberg Plato income normalized to exclude impact of large buybacks in 2018/19

The above chart is intended to compare the income generated by each of the identified products. This is not intended to compare the capital returns (or any other risk) as the risk profiles of each product can and will vary. As an example, equities (including via a managed investment scheme) have a significantly greater risk of loss of capital than a term deposit.

Tax effective buy-backs can be very advantageous

CBA BUYBACK – WORTH 14% AFTER TAX FOR ZERO TAX INVESTORS

- A\$6bn off market buyback -
>3.5% of shares on issue
- Worth 14% for pensioners for every share
successfully tendered
- Possibly lower scale back given its
profitability is marginal for 15% tax rate
investors
